The unsatisfactory part of this exhaustion theory is that no matter how much fertilizer we may supply, we can not get certain crops to succeed themselves annually through a long series of years and give satisfactory returns; while certain other crops can be grown annually on the same plot for a generation and increase in fruitfulness from year to year. In looking for an explanation which explains, we naturally recall the fact that all living things in the course of their growth use only certain portions of the crude material which is taken into their systems, and reject other portions more or less changing in character. These rejected, waste or by-products may be thrown off from the organism or packed away in some unoccupied corner. These refuse portions are often useful as a food for other organisms though some are very poisonous, particularly to the organism which produced it. You will doubtless remember that the bacteria and other micro-organisms are notorious in this direction, they not only give off refuse matters which are excessively poisonous to some other forms of life, but in the end they destroy the bacteria from whence they came.

These secretions of waste matters have been given the name of ptomaines, and instances of severe illness or even death from the use of ice cream or cheese containing these ptomaines will perhaps be more or less familiar to you.

Now it is possible that our "Clover Sickness" and other like occurrences are due not to exhaustion but to the presence in the soil of these ptomaine poisons. Perhaps the clover itself may not be the direct victim, but the nuturing bacteria so necessary to the growth of the plant may be killed by their own toxic refuse. If this is true of clover, it may be true of other plants which decline to succeed themselves for any length of time.

If this theory of ptomaines is tenable we have an explanation of a puzzle. There is of course a great difference in various plants in the character of their secretions. The Rothamsted experiments showed, if I remember rightly, that wheat could be grown on the same land for at least twenty years and the yield be on the increase.

Some other crops are known to do

well year after year in the same soil, a fact well known to gardeners, and I can recall one instance of rye being grown on the same field for twenty successive years without any apparent loss of vigor.

Regarding the behavior of many of the flower crops which are grown under glass, we have but comparatively few facts available. The general impression is, I think, that they will not do their best unless the soil is entirely renewed each season. Whether this is due to poisoning of the soil or to the exhaustion of some food element, or to a change in the physical character of the soil, has not been determined as far as I am aware. If the loss of fertility of the soil in our greenhouse is due to physical changes, it is a serious matter, for it means the removal and renewal of the soil once or twice a year, an operation both laborious and costly. In the broader practice of field work these losses can be more readily corrected, at least we do not have to move our soil to the crops, but can move our crops to the soil, a comparatively easy matter. Fertility can be maintained by proper rotation and the recuperative forces of Nature.

We stand in need of more work in the investigation of the losses in our greenhouse work, and it seems to me that the experiment stations might help us in that direction.

Horticulturists have, it is true, done a great deal of experimenting along these lines, but most of the work has not been done in such a manner as to render the results of any great value to the public, nor have there been records kept of the work which are available for study and comparison.

These are some of the factors which we have to consider when attempting to increase the fertility of our gardens. We do not know just what is the best thing to do; we must still experiment a little. Fertilizers do not act just the same every time, but we must continue to use them, and our experience is a pretty good, though often costly guide in their application.

We must remember that fertilizers do not always mean fertility; we need good tillage, good cultivation and common sense mixed with them.

It seems to me that we stand today upon the threshold of the door which will lead us to a vastly better understanding, not only of the processes of assimilation, but also a more perfect

knowledge of the economical production and use of fertilizing elements.

## DETROIT FLORISTS' CLUB.

Many members of the club appeared at the last meeting and listened to the address of the newly-elected president, Wm. B. Brown. Irrespective of the usual way of throwing bouquets on such occasions, we can say this time that the new officers of the Detroit Club are a positive guarantee for a very active year.

A committee of three was appointed to confer with such members as are two or more years behind in dues for the purpose of reinstating them again.

## NEWS NOTES.

The display from the children's gardens at Horticultural Hall, Boston, on September 5 was highly creditable and the largest on record, with entries from remote sections of the state. Five prizes were awarded for collections grown in window boxes in the city.

The business carried on by Harry Hoffman at Jacksonville, Ill., has developed so rapidly that a stock company has now been formed to be known as the Harry Hoffman Floral Co., and when, on Feb. 1, they take possession of the tract of land recently purchased near Diamond and Michigan avenues, they will erect a modern range of houses. The salesroom at 25 South Side Square will be retained under the management of Miss Nellie Magill.

We learn that the following trite communication was found attached to the door knob of the Florists' Club of Philadelphia early one morning last week:

"William K. Harris nominated George C. Watson for president at the last meeting of the Florists' Club of Philadelphia. This deep laid and diabolical scheme to keep Watson quiet and dignified for at least a year met, and deservedly too, with a prompt and energetic refusal. The palladium of our liberties cannot be muzzled by the bribe of earthly honor or reward."

You will find something worth reading on every page of HORTICULTURE.

Willimantic, Conn.—W. A. Dawson, additions and improvements.

Oshkosh, Wis.—J. Nelson Co., three houses, each 25 x 80; shed, 22 x 85.

Chicago, Ill.—Calvary Cemetery Association, six houses, one 30 x 150, five 21 x 160.

Port Huron, Mich.—Wm. Murdoch, one house; M. Ullenbruch, four houses, 150 x 150.

New Orleans, La.—Abele Bros., range of houses. Hest. Cook, palm house, 100x200.

Under the plans of J. H. A. Williamson, landscape architect, the grounds of H. L. Pierce at Fitchburg, Mass., are being transformed. One feature of the work is the transplanting of a hundred trees ranging in height from 20 to 40 feet.

To obtain large flowering plants for Thanksgiving and Christmas 1909, seeds should be sown now. For the florist, our Giant Cyclamen is unsurpassed.

### SCOTT MEMORIAL FUND.

At the Niagara Falls convention the undersigned were appointed a committee to receive funds for a memorial to the late William Scott. The movement met with hearty response and the committee is still receiving the checks of those who wish to participate. As it is desired to conclude the matter without delay, the committee hopes that all those who have not contributed to the fund and wish to do so, or who hold moneys collected for the fund, will at once forward their checks, payable to Fred Breitmeyer, treasurer, Mount Clemens, Mich.

## Seed Trade

Some rather sensational crop news has been received during the past week, to the effect that owing to severe drought in Ohio and Michigan, sweet corn was bound to prove a very short crop in these states. In fact, it is said that field corn is little better. From Nebraska comes word of similar character, and predictions of prices up to the high water mark of last season are made by growers and seedsmen. Undoubtedly, this condition of the corn crop is much worse than generally supposed, but most persons have learned not to accept damage reports at their face value, and until fully confirmed, present reports should be accepted with a few "doots."

Bad as are the reports of damage to the corn crop, they are much worse as to vine seeds. One well known grower says in effect that practically every crop of musk and watermelons, and cucumbers in the state of Nebraska will be destroyed. The cause of this is the aphid or small green bug, much like the fellows that destroy peas sometimes and often cause the wheat farmers much worry and loss. This pest is often referred to as a louse, and some weeks ago attention was called to reports from the west that it was appearing in destructive numbers and causing much anxiety to vine seed growers. The latest reports from that part of the country give cause for real alarm, particularly as affecting muskmelons. The fact that they were a very light crop last year, and that we closed the season with very small reserves, and absolutely bare of many varieties, means that prices are going to rule very high the coming season. Admitting that reports are somewhat exaggerated, conditions are nevertheless very bad, and the fact that quotations have absolutely dried up is evidence that the seedsmen fully appreciate the situation. Wholesale houses are flooded with inquiries, but are invariably declining to name any prices.

In addition to melons and cucumbers squashes are also being attacked. The summer or bush varieties are being damaged by a green bug somewhat larger than that found on melons and cucumbers, and thus far the damage has not been so heavy.

Winter squashes are suffering from attacks of a grub which works at the root of the plant, causing it to die. The damage is about the same as in the case of the summer squashes, but a week may change conditions for the worse. It is earnestly hoped, however, that any change may be for the better, though there is little chance for improvement at this date.

Peas and beans are about the same as last report, but beans are going to be higher than expected up to a very great extent. Reports from market gardeners are ripening a large part of the bean crop, and the short bean crop may be anything but an unmixed evil.

Referring again to peas, advices just this moment to hand state that that crop will prove fully as short as last

year. Canada field peas are quoted at \$1.20 per bushel f. o. b. grower's station, bags extra, and it is predicted that they will sell at \$1.40 before March 1st next.

Onion seed in California is all harvested, and 100 per cent. deliveries will be made on all varieties excepting Red Wethersfield and Extra Early Flat Red, which will range between 60 and 80 per cent.; Yellow Prizetaker 60 to 75 per cent.; Southport White Globe, 60 to 75 per cent. There may possibly be a slight shortage in White Portugal, but not enough to materially affect prices, and there will be plenty of seed at prices greatly under last year.

The prediction made in HORTICULTURE many weeks ago, that onion seed, excepting possibly the Whites and Flat Reds, would be abundant and cheap, will soon be realized. A Connecticut seed grower who speaks from knowledge, said weeks ago that 50,000 pounds of onion seed would be grown in that state this season, largely Red Wethersfield, and from 200,000 to 250,000 pounds will be grown in Michigan, Ohio and Indiana. Of this quantity, 60 per cent. will be Yellow Globe, Danvers and Southport.

Lettuces will be delivered on contracts just about as estimated in HORTICULTURE weeks ago. They will average from 60 per cent. to 90 per cent. Many varieties will be delivered in full, while a few will be down to 30 and 40 per cent., and still fewer will be failures.

The yield per acre of sweet peas has been short, as was predicted in HORTICULTURE, but the acreage was large, and there will be no great shortage excepting of a few fancy named varieties.

Salsify will be short, deliveries ranging from 50 per cent. to 70 per cent. California carrot seed is short excepting Long Orange, and so are several varieties of celery, but the situation is clearing up in better shape than might have been expected last June.

Burnett Bros. announce that on and after Sept. 15, 1908, they will be located at their new store, 72 Cortlandt street, between Greenwich and Washington streets, New York City.

Dealers report Roman hyacinth bulbs in the larger sizes as practically all disposed of.

### LOSS BY FIRE.

Bentley & Coatsworth Co.'s plant at New Castle, Ind., was damaged by fire on the night of Sept. 2. The loss is not fully determined, but will be between three and four thousand dollars. The entire packing shed and boiler house, 75 x 100 ft., two stories high, was destroyed, and one greenhouse adjoining had the glass broken and stock injured. The origin of the fire is unknown, but the supposition is that soot collected in the flues must have ignited, over-heating the pipes. When discovered by the night watchman the building was in flames. The loss is covered by insurance.

### NEWS NOTES.

Edward Austin of Suffield, Conn., has taken out a patent on a plant stake.

Gustave Olsen of Hartford, Conn., has started in the florist business at Waltham, Mass.

Bids for the masonry work on the city greenhouse at Sandusky, O., were opened on Aug. 26.

C. C. Arnold succeeds E. D. Collins as manager of the Dunn Greenhouse Co. at Rochester, Ind.

Zech & Mann, Chicago, have added 128 square feet of space to their salesroom by elevating their office.

J. R. Sederquest opened a flower store in connection with his undertaking business at Calais, Me., on Aug. 25.

At the annual meeting of the directors of the Iowa Seed Co., Des Moines, Iowa, the following officers were elected: President, M. Kurtzwell; vice-president, J. M. Albright; secretary, G. L. Kurtzwell; treasurer, Charles L. Page.

W. H. Lutton, Jersey City, reports closing large contracts for ranges of conservatories for J. R. Delamar, Glen Cove, N. Y.; M. M. Looman, New Rochelle, N. Y.; Lafayette Park, City of Norfolk, Va., and several others of lesser extent, all seeming to indicate that hard times are at an end.

### MOVEMENTS OF GARDENERS.

Robert Mackie, formerly at the L. L. Lawrence place, Bay Shore, N. Y., succeeds J. Marshall as gardener for Mrs. R. M. Clark at Pomfret, Conn.

## DOUBLE FORM OF LILIUM AURATUM.

Editor of HORTICULTURE:

In the article in your last issue describing and figuring a double form of *Lilium auratum*, grown by R. & J. Farquhar & Co., the writer mentions that the form shown in the illustration is a variation not before observed, so far as he could learn.

I find in looking over some old volumes of *The Garden* (London) two references to similar flowers. In Vol. 22, 1882, on page 355, is an article by Peter Barr describing a double variety which was flowered by a Mr. A. Higgs, of 38 King street, Covent Garden. Mr. Barr was much interested in this specimen and made the statement that he had flowered many thousands of *Lilium auratum* and had been in the habit of examining each plant, but on no occasion had he been able to trace any deviation from the normal six petals. He also expressed the opinion that it was only a freak but one that might be turned to account. The illustration accompanying the article shows a flower of much different form, the petals being much shorter and broader than the type. The last two flowers to open on the plant were single but the petals were not of the usual form.

The other reference may be found in Vol. 24, 1883, on page 178. This speaks of a photograph of a flower which was sent to the editor of the magazine by a Mr. Hoen of Baltimore. It showed a flower with four extra inner petals, while the one described by Mr. Barr had but three. The flower was produced by a bulb imported direct from Japan and was described as a beautiful and full sized flower.

It would seem that the species has the tendency to produce double flowers at rare intervals, but it is evident that no variety has yet been produced in which the habit has become fixed.

A. H. FEWKES.

## PUBLICATIONS RECEIVED.

Serial No. 46 of the Georgia Department of Agriculture contains a valuable and very elaborate List of Commercial Fertilizers and Chemicals, inspected, analyzed and admitted for sale in the State of Georgia up to August 1, 1907, and other information in regard to fertilizers and fertilizer legislation. It was compiled under the supervision of Hon. T. G. Hudson, Commissioner of Agriculture, and R. E. Stallings, State Chemist, and assistants.

## Obituary

Joseph D. Galvin.

Joseph D. Galvin, manager of the Boylston street store and conservatories of Thomas F. Galvin, Inc., Boston, was killed in a runaway accident on Tuesday evening, September 8. He was driving to his home in Dorchester when the horse took fright at a passing railroad train, and in the smash-up which followed Mr. Galvin was thrown against a telegraph pole and died a few minutes later. John McNamara, an employe, who was with him, was not seriously injured.

Mr. Galvin was 55 years of age. He leaves three brothers, Thomas F., John Mitchell, formerly city clerk of Boston, and Dr. George A., and his mother who is 89 years of age and in very

JOSEPH D. GALVIN

feeble health. His father, the late John Galvin, was for many years superintendent of public grounds of Boston.

Mr. Galvin was a jovial, companionable man, extremely popular with all who knew him and much sorrow is felt over his tragic death.

Frank E. Manning.

Frank E. Manning, of Gatchel & Manning, horticultural engravers and illustrators, Philadelphia, died at Silver City, New Mexico, Sept. 5th, where he had gone accompanied by his wife, last January in search of health. Until recently, when his health broke down, Mr. Manning had been actively identified with his firm. He was of a genial and companionable temperament and made hosts of friends in business and socially. He was identified with a large number of mercantile and fraternal organizations.

## PERSONAL.

Harry Rowe of Somersworth, N. H., has taken a position in Salem, Mass.

J. F. Huss of Hartford, Conn., returned on Friday, September 4, from his European trip.

Miss Pauline Fieber of Cincinnati has taken a position with the Atlanta Floral Co., Atlanta, Ga.

George McWilliam and wife of Whitinsville, Mass., returned from their trip abroad on September 4th.

A letter received recently from Wm. R. Smith of Washington conveys the cheerful news that Mr. Smith is steadily improving in health.

F. X. Amsrhyn, superintendent of New Haven parks, is attending the Congress of the Playgrounds Association of America at New York.

Frank P. Brigham of Lockport, N. Y., has accepted a position as foreman for H. H. Battles, Thorn Hedge Greenhouses, Newton Square, Pa.

Visitors in Boston: Frank N. Meyer, agricultural explorer for the U. S. Department of Agriculture, returning from explorations in China. W. E. Chappell, Providence, R. I.

Mr. and Mrs. August Poehlmann and son returned Monday from their eastern trip. After attending the convention they went up the St. Lawrence to the Thousand Islands, then to Montreal.

George Stumpp while abroad met with an accident when shooting with some friends. A cartridge exploded prematurely and his face was badly burned with powder but fortunately his eyes escaped serious injury.

President Frank H. Traendly of the S. A. F. and Mrs. Traendly are receiving the congratulations of their friends on the birth of a son last Sunday. Jubilation is the order of business this week in the 28th street district of New York.

Chicago visitors: M. Cook, wife and daughter, New Orleans; Martin Reukauf of H. Bayersdorfer & Co., Philadelphia; John W. Getz, Los Angeles, Cal.; J. A. Meinhardt, retail florist, Leavenworth, Kan.; Mrs. J. T. Johnson, of Ft. Smith, Ark., who was taken ill while with her husband in Chicago, improving. P. M. Paley, manager for Vesta Bros., Little Rock, Ark.; W. F. Crabb of Crabb & Hunter Grand Rapids, Mich.

## Flower Market Reports.

**BOSTON** The most conspicuous article in this market at the present time is the aster, of which the supply coming is tremendous. The growers are numbered by legions, and they are all growing the high-class varieties; the result is easily imagined. The retail price "of 25 for 15 cents" doesn't half tell it. Gladioli are fine but also over-stocked. A good place is being found for the variety Princeps, which shares with Shakespeare the popular favor. American Beauty maintains its pre-eminence and some good blooms are being received which sell fairly well. Other roses are not making much sensation. Most of them are small and short-stemmed thus far. Several new varieties are beginning to appear in the wholesale markets, notably Mrs. Jardine and My Maryland, and considerable interest is evinced in their "trotting" qualities. Carnations gradually gaining ground, but the asters hold them down very effectually just now. Lily of the valley has done better since Sept. 1 than in August. Lilies are coming in variable quality and in not too heavy numbers, and they find a fairly appreciative market.

**BUFFALO** The aster season is in full swing and gladioli are in heavy supply. The late branching asters are of fine quality and the best stock has moved fairly well, but too much short, small stock is blocking up and is hard to sell at any reasonable price. The solid colors of gladioli are having a good sale, but there are still too many mixed colors which take the same course as the asters. These are carried along from day to day waiting for the cemetery florist to make an offer and which generally is accepted. The stock of new carnations is increasing each week, but they are short stems. The same is true with Brides, Bridesmaids, Chatenay, Richmond and Killarney, with at times an oversupply. Detroit, Kaiserin and Carnot are still in good supply and move readily. Lily of the valley and other stock is in good supply; demand normal.

**CHICAGO** In the Chicago market asters largely predominate, and the stock is decidedly better on the whole. Prices have lowered on fancy stock because there is more of it, though there is no danger of a glut at present. American Beauty roses are also bringing a little less, because more plentiful. Outdoor flowers, asters excepted, are getting less in evidence. Carnations are still small and on very short stems. Most growers are cutting from new stock, though an occasional one still is using his old plants. Trade in general is picking up and quite a different atmosphere prevails in the wholesale district.

**DETROIT** A much better tone prevails in the business and assists materially in reducing the enormous stock of asters dumped into the local market. Were it not for the careless assorting we would not have such large quantities but better quality and better prices.

**CUT ASTERS** 50c to \$1.50  
per hundred  
**CUT GLADIOLI** \$3.00 per  
hundred

**ALTIMO CULTURE CO.**

Canfield, Ohio.

Carnations are beginning to come in fairly good.

**INDIANAPOLIS** The past two weeks have shown a marked improvement in the quality of stock, but the same cannot be said about the condition of business. There is an increase in the number of roses, with about enough demand to absorb the better grades, Beauties as a matter of course being the leading seller. The carnation supply continues light, with chiefly short stemmed flowers of a half-dozen varieties. The aster crop has been reinforced by the arrival of some extra fine Crego. Dahlias are in, but owing to continued dry weather the crop will probably be very short this year. Gladioli are not quite so plentiful yet sufficient for all demands. Lilies of the various kinds appear to be a trifle less plentiful with prices a little higher. Greens have been reinforced by the arrival of wild smilax and autumn foliage.

**NEW YORK** There is very little doing thus far in wholesale flower trade circles excepting that the commission men are busying themselves with the work of locating desirable consignors in special lines for the coming season, and growers are beginning to cast around and see what they can learn to their own interest in the same line. Asters are the dominant feature everywhere. The small varieties which were first abundant have now given place to the later blooming fancy sorts and those now coming in are grand as to quality. The price is very low, however, and the accumulation of surplus stock is very large. In all other lines the situation remains unchanged. Sales are made at such prices as buyers are disposed to pay and there is little prospect of improvement at the present time.

**PHILADELPHIA** There was no decided improvement in business last week. Frame asters are very good and in fair demand, but there are far too many of the poorer qualities, and these are unsalable. Roses of all kinds were quite plentiful. American Beauties are still clearing up fairly well; but there are a good many more now coming in. Some very good flowers of My Maryland are arriving. These are a little short-stemmed as yet. Mrs. Jardine is fairly plentiful and good. Carnations are improving as to flower, but are very short in the stem. Enchantress and Beacon show up best.

Outdoor Crockers are better for stem, and are unusually free from splits this year. Gladioli are not so plentiful and the light-colored varieties clean up well. Lily of the valley is moving a good deal better. Orchids are still scarce. Nelumbiums and other water lilies are fine, but the demand has dropped off. Tritomas go slow, but will be in better demand when autumn foliage effects are wanted. Greens are going a trifle livelier. Very few dahlias to be seen so far. Growers are holding back until the flush of the aster crop is over. But orders can be filled on short notice if desired.

**WINNIPEG** Trade is still very quiet in this city, although a good deal of funeral work has kept the florists busy for the last few days, but the sale of cut flowers is really at a standstill, and little change is expected until the out-of-town folks return for the winter.

### BUSINESS CHANGES.

John McMillin will retire from the management of the Phelps greenhouses at Blackinton, Mass.

John Bauscher, Jr., started in his new place, 104 Chicago street, Freeport, Ill., on Sept. 1st.

J. A. Kepner of Harrisburg has purchased the Penn Flower Shop, Reading, Pa., and Miss Myra Bretz will be in charge.

The Eggeling Floral Co. of St. Louis has taken down its greenhouses at South Grand avenue and will rebuild at Normandy.

A. S. Nodine is to give up the florist business at Milford, Conn., and looks favorably towards Providence, R. I., for a new location, it is said.

John Kruchten, commission florist, Chicago, opens up the fall season with two partners, Alfred Lorenzo and John Pool, and the name will now read John Kruchten & Co.

D. William Brainard and Chester F. Brainard of Thompsonville, Conn., who have been conducting separate florist establishments, have consolidated. No immediate change will be made the two places running as at present.

### INCORPORATED.

Co-operative Nurseries, Rochester, N. Y., J. A. Ryan, J. C. Feist, J. E. Mavony; capital, \$25,000.

## PHILADELPHIA NOTES.

Edwin Lonsdale, superintendent of the Girard College gardens and grounds, has been appointed judge of flowers at the Allentown Agricultural Society's show, Allentown, Pa., Sept. 22 to 25.

Fred. Lautenschinger of Kroeschell Bros. Co., Chicago, reports the best year in the company's history. The Kroeschell boiler seems to be growing in favor in this locality. Other visitors; J. A. Simmers, Toronto; Mr. Garley, St. Louis.

A. B. Cartledge, Jr., won the championship of the Delaware in Saturday's regatta with his yacht Cornine.

Samuel S. Pennock and family, after a few weeks in Rhode Island, are now finishing their vacation in the Pocono mountains. No hay fever up there.

## IN BANKRUPTCY.

Horace T. Dumont, who has conducted business under the names of Dumont & Co. and The Rosary Flower Shop, Philadelphia, has been adjudged a voluntary bankrupt in the U. S. District Court; liabilities, \$2172.21; assets, \$456.89.

**POTASH**

will make  
your trees pay  
if you take care  
that they are fertil-  
ized with a commer-  
cial fertilizer which con-  
tains from 9 per cent.  
to 12 per cent. of it.

That growth of sturdy  
stock which marks the  
thrifty orchard, and that  
abundance of full-sized,  
finely-colored and well-fla-  
vored fruit which makes the  
grower's profits, are se-  
cured by the use of Potash.

Send for Free Books on Fertilizing,  
prepared by experts, and of greatest  
value to the horticulturist.

### Why My New Curved Iceless Eave is Far Superior to Anything on the Market Today

- 1st. No sash bars incased in iron, thereby eliminating all danger of bars decaying.
- 2nd. Can be used in conjunction with iron frame construction, thereby doing away with that very objectionable feature, "columns."
- 3rd. Roof bars with drip grooves, which act as conductors to carry away the condensation: Result, the driest roof ever used for greenhouse purposes.
- 4th. **THE MOST IMPORTANT OF THEM ALL.** The very small increase in cost over the ordinary style of construction which makes it possible to be used for commercial as well as private purposes.

**William H. Lutton,** Horticultural Architect and Builder

West Side Ave Station (C.R.R. of N.J.) Jersey City, N.J.

## VALUE OF THE U-BAR CURVED EAVE

In the first place, every bench whether it be on the side or in the middle, receives an equal amount of light. In the short winter days there is no band of shade cast by a gutter at the eave. There being no obstruction to the snow, the roof clears itself. Aside from these tremendous advantages, think of the increased light throughout the entire house because of the absence of heavy supporting members and the use of 24 inch wide glass. Then there is the looks

# A WONDERFUL NEW NEPHROLEPIS

## Nephrolepis Superbissima

INTRODUCTION OF 1908

**W**E desire to call attention to this new fern, which originated with us and which we are introducing this year. It is a **very unique and distinct novelty** — as distinct from *Nephrolepis Piersoni* and *Piersoni elegantissima* as they were from *Bostoniensis*. It is in fact a complete break. The fronds are very heavily imbricated, the pinnae overlapping, making the fronds very dense and compact.

It differs from the other *Nephrolepis* not only in form, but also in color, being a **richer and darker green** — entirely different from the yellowish green of all the other *Nephrolepis*. The plant is very sturdy in its habit, the fronds never breaking down.

While a photograph shows a similarity to its predecessors, it is absolutely distinct, not only in the formation of the fronds and color, but also in its habit and general characteristics. It makes a much more dwarf and compact growth, the fronds being very dense, firm and rigid, and having a great deal more substance, so that it **will stand more knocking around than any other fern of this type.**

It is a sterling novelty. Experts who have seen it consider it by far **the best fern ever sent out.** It is a plant that needs to be seen to have its great value and sterling qualities appreciated. It really is not in the same class with the other varieties. It was awarded a

### ... FIRST-CLASS CERTIFICATE ...

by the Royal Horticultural society at Crystal Palace in London, November, 1907, the plants exhibited there having been shipped from New York two weeks before that time. After being exhibited in London, the same plants were shipped to Edinburgh, Scotland, where they were again awarded a first-class certificate by the Scottish Horticultural Society. This will indicate the value of the plant as a novelty, and also demonstrates in a very conclusive manner its fine keeping and shipping qualities. We have just begun shipping advance orders, and new orders can now be shipped immediately on receipt.

Fine, strong plants. 2 1/4 inch pots, \$5 per dozen, \$35 per 100; 4 inch pots, \$7.50 per dozen, \$50 per 100; 6 inch pots, \$1.50 each, \$15 per dozen.

## Phalaenopsis Stuartiana

Ph. Stuartiana is a native of the Island of Mindanao (Philippines) where it grows at an elevation of a few hundred feet above sea-level. It is nearly allied to Ph. Schilleriana although very distinct in the color of the flowers which is usually a creamy white (some varieties are almost pure white), spotted on the lower half of the inferior sepals and lower half of lip with cinnamon brown. The leaves are dark green mottled with silver-gray. When not in bloom it is hard to distinguish the plants from Ph. Schilleriana; the roots are then the best means of identification as they are much smoother and greener than those of Ph. Schilleriana.

Ph. Stuartiana, like the rest of the Euphalanopsis section to which it belongs, requires warm treatment to grow it well. In winter a night temperature of 60 degrees to 65 degrees with 10 degrees to 15 degrees higher through the day suits it well. During the summer the temperature must be regulated according to the weather, giving plenty of fresh air at all times. The plants must not be allowed to get too dry at any time but in winter they will require very little water if the house is damped down at least once a day as it should be. At this time of the year it is next to impossible to overwater them as they are now growing fast and will be throwing up their flowerspikes shortly.

During the time the plants are developing their flowers, they should not get very dry lest some of the buds will turn yellow and drop off. This applies equally well to all the species of Phalaenopsis. The plants require shade at all times of the year; from the first of September to the first of April ground glass answers the purpose. During the summer months some heavier shade should be used to prevent excessive heat and the leaves from getting yellow. When well grown, Ph. Stuartiana is one of the best of the section to which it belongs. It frequently produces young plants on its

roots which if taken care of will grow fast and flower in a year or two.

*M. J. Ope*

## Horticulture at the Franco-British Exhibition

The great Exhibition at Shepherd's Bush where England and France and their respective colonies are making a very grand display in all the sections of Science, Art and Industry affords a very wide scope of the horticultural skill of the gardeners of both countries. There is a permanent exhibition of horticulture provided for by the committee and some of the very largest of the open spaces in this important show are allowed

to the various exhibitors, most of them well known in their different specialties. Temporary flower shows lasting three days have been provided for and are held in the Palace of Music, a large and commodious building, the dimensions of which were taxed to the uttermost when the last of these temporary shows was held. There are other subjects of interest relative to Horticulture and Agriculture in the buildings devoted to

those sections but our present purpose is to give just a few notes on the most salient forces of the permanent or outdoor displays.

Having made numerous visits during the summer for the purpose of keeping one of our French contemporaries fully posted up in what has been done, these notes must be taken to include much that we have seen at different periods during the summer and not the general aspect of the gardens at any one time. Otherwise we should probably miss exhibits that were past their best or else not yet in flower.

On entering the Exhibition we pass through the Court of Honor with its handsome cascade which somewhat reminds us of the one we saw in the Champ de Mars at the great Paris International Exposition of 1900. Just behind, in a large open space formed by the Palace of French Applied Arts, the Palace of British Applied Arts, the Palace of Women's Work and the Palace of Music is arranged what are known as the Court Gardens. Apart from the general aspect of tree planting, band stand and auditorium, these gardens consist mainly of an immense display by J. Carter & Sons arranged on a series of grass lawns of various shapes, and two large exhibits by Sutton & Sons to the right and left of Carter's.

These two well-known firms have each contributed a show of their own and we can scarcely hope within the narrow scope of a newspaper article to give anything like an approximate idea of the many plants and flowers displayed or of the general effect which is well worthy of the best traditions of British horticulture. It is a handsome display of open air gardening *par excellence*.

As we wander around the many beds and borders filled by Carters we notice here and there ornamental shrubs, etc., at intervals, the graceful foliage of which helps materially to lend a charm to the many brilliantly flowering subjects beneath. Phoenix Canariensis, Acer atropurpureum, Buxus Japonica aurea, Thuja Lobbii, Osmanthus ilicifolius, Taxus baccata, Cupressus macrocarpa lutea, and many others are helpful in this respect.

Among the flower beds whose name is legion we find instances of many forms, scrolls, circles, crescents and serpentine beds of all sorts and sizes. These are filled with great taste with such things as Petunia Emperor, Viola purple, Viola Carter's White, Pansy International Prize, Petunia Crimson King, Lobelia Queen Victoria, etc. Zonal pelargoniums are bedded out freely. The old and showy Hemptulopsis is well to the front. King of Denmark, a double salmon; E. V. Raspail, a bright double scarlet; Mrs. Pollock, golden tricolor; Lady Chesnut, West. B. blue green; Edward VII with cream of yellow in the whole display. Fuchsias, marguerites, and other flowers with edgings and borders form a very complete display.

Sutton & Sons have on large lawns situated within sight of the main display, a number of lawns which are laid out in design and are very well kept and watered. Around each lawn, to the right and left, is an immense border of good width with

front end is a small bed composed of carpet bedding with the word "Sutton" boldly standing out and separated from the main lawn by a gravel path. We start from this point and the first thing to attract our attention is a large circular bed filled with Giant Pink verbenas, edged with blue lobelia. Another of Perfection stocks is edged with blue lobelia and a front row of golden pyrethrum. Begonia Crimson Bedder is also freely used. Another round bed at the corner contains Sweet William, Sutton's Scarlet. In the long border following on are petunias and pansies in varieties. At intervals various palms and ornamental foliage plants. Further on a bed of Sutton's petunia Superb, and others containing petunias of every shade and Pansy Sutton's Perfection. Far away on the extreme right hand side of the Court Gardens is another bed similar in form, size and planting.

The other floral displays in the Court Gardens are just ordinary beds filled with plants by the Exhibition authorities and call for no special remark.

Chasman Payne

## Notes from the Arnold Arboretum

One of the latest trees or shrubs to bloom is *Aralia spinosa* which now stands adorned with its conspicuous large and loose panicles of small whitish flowers borne at the end of the stems above the big compound leaves, and if the season is favorable the flowers are followed late in fall by small black berries. It is chiefly planted for its very large handsome foliage borne at the top of the not or very little branched spiny stems and imparting to the tree a subtropical effect. This *Aralia* is not perfectly hardy here, but will stand ordinary winters, and if the stems are killed back, it will spring up from the roots again; in fact it becomes sometimes troublesome on account of its suckering habit.

Another closely related tree, the Japanese *Acanthopanax* or *Kalopanax ricinifolium* is flowering for the first time at the Arboretum. It has proved perfectly hardy and has attained the size of a small tree with spiny stems and branches and handsome large palmately lobed leaves. It is to be recommended for its handsome foliage which combined with its habit gives the tree an exotic appearance very different from any North American tree. Its flower clusters are similar to those of *Aralia spinosa* but smaller.

Besides the species mentioned in the last issue some other *Euonymus* are conspicuous by the pink or pinkish color of their apples which, however, have not yet burst open and disclosed their scarlet seeds: these are *Euonymus europaeus*, *E. Sieboldianus* and *E. Hamilleanus*, all large shrubs, the first of more upright habit and the two last-named broad and spreading. *Euonymus alatus* which shows large alternant

fruits has them still nearly and the low and evergreen *E. radicans* quite green.

Of the Magnolias only the shrubby *Magnolia glauca* has as yet opened its pods and disclosed its scarlet seeds which hang on slender threads from the fruits. *Magnolia tripetala* has its conical pink fruits not yet open, neither has *M. Fraseri* with similar but more brightly colored fruits, nor *Magnolia acuminata* with smaller and often curved fruits. The thick ovoid fruits of *M. macrophylla* have not yet fully assumed their final pink color.

The native *Celastrus scandens* has its capsules still closed, but already colored yellow; they are borne in short panicles at the end of the branchlets, while in the Japanese *C. orbiculata* the capsules are still green and borne in small clusters along the branchlets. They will not burst open and disclose their scarlet seeds until the middle of next month.

The fruits of many of the Barberries are now assuming their scarlet or purple color, as are those of the common Barberry, *Berberis vulgaris* and the allied *B. canadensis*, *B. amurensis* and *B. Regeliana* (*B. vulgaris* var. *japonica*). Also the fruits of *B. Thunbergii* are becoming brightly colored and those of *B. diaphana* which has fruits similar to those of the preceding species, but of a peculiar conical shape.

The berry-like fruits of the Spicebush, *Benzoin aestivale*, though of a bright scarlet color are not abundant enough, and moreover, partly hidden by the foliage, to be very effective.

The fruits of the Flowering Dogwood, *Cornus florida*, are assuming their scarlet color, but only a small percentage of the trees in the Arboretum are well studded with fruits.

Of the Viburnums not yet mentioned the nodding fruiting clusters of *Viburnum Lentago* have now their fruits partly colored bluish black, but most of them retain still their greenish color usually brightened by a red cheek. *Viburnum acerifolium* is covered with numerous clusters of bluish black fruits.

*Panax sessiliflorum* is studded all over with heavy head-like clusters of dull black berry-like fruits which, though not very showy, form a prominent feature of the shrub. One of the plants of this species at the Arboretum is now in full bloom, but the greenish and dull purplish heads of flowers are not very showy.

Some of the varieties of *Malus baccata* are attractive with their abundance of cherry- or pea-sized fruits already brightly colored red or yellow, though they are not yet fully ripe.

The branches of *R. coccinea cathartica* and of the smaller *R. infectoria* are thickly studded with black berry-like fruits, while those of the Siberian *R. dahurica* still retain their green color.

*Alfred Rehder.*

## British Horticulture

SOME SHOW NOVELTIES

At a recent meeting of the Royal Horticultural Society in London a batch of interesting new introductions received awards of merit. Messrs. Kelway & Son, who have done so much to improve the gladiolus had two novelties from their extensive collection. These were Gladiolus Golden Measure, an attractive yellow and G. White Cloud, of a creamy white shade. Dahlias were, of course, well to the fore. Messrs. Stredwick & Son, who won the trade championship at the recent National show, had a meritorious new comer. This was Dahlia Marathon, a cactus variety, with rose and fawn florets, on a yellow base. Tom Jones, a show variety with rose pink florets on a ground color of creamy yellow, was shown by S. Mortimer. Messrs. R. Wallace & Co. showed Kniphofia R. Wilson Ker, of a brilliant scarlet hue, and Gladiolus primulinus hybrids, a new introduction, the result of crossing G. primulinus and G. Gandavensis. H. B. May & Sons of Edmonton, who usually have something notable in the fern line to exhibit, showed a useful specimen from New Zealand, Pteris aquilina Nicholsonii, which is evidently very serviceable as a basket plant. Tritoma Hereward, of an orange-yellow tint, and T. Norvie, also of a yellow shade, found many admirers, these being from Major Petre, of Westwick, Norwich. Gunn & Sons, of Olton, were represented by two excellent exhibits, Phlox Freifraulein Von Lassberg, a pure white variety, and P. Violet, another welcome addition.

*W. H. Adsett.*

## A Conservatory View

Our cover illustration this week shows a pleasing interior view of the palm house on the estate of D. G. Reid, at Irvington, N. Y., presided over by A. W. Goldring as gardener. This house is a fine example of the Lord & Burnham construction. The many large conservatory ranges which have been erected on private estates of late, with imposing lofty central palm houses, have opened up a good demand for palms and tropical plants of large size and furnished the needed incentive for commercial growers to raise fine material, thus making a double demand on the expert plantsman, first in the commercial growing establishment and then in the conservatories where these products eventually find their home and where, also, plenty of opportunity is afforded not only for culture abilities but for the display of skill and taste in arrangement. The latter qualification is unfortunately often lacking, as any one who has occasion to visit any of these places will quickly find out.

### The work and influence of the Club and Society

As indicated in our reports from various sources activity in clubs and societies is being resumed and vigorous policies are being proclaimed by club officials with a view to making the coming year in their respective organizations "the best ever." This is all a very simple matter for a flower club and easily achieved on

paper, but experience and history are burdened with evidence that in real life these ideals are seldom reached. Every secretary of club or association has been called upon many times to answer the question, "What good will it do me to become a member? What do I get for my money?" The temptation is to reply, "Don't be so selfish. Forget self for once and think what you may do for the common good by contributing your little share," but such altruistic sentiments might as well as a rule be kept to one's self in these practical days. The ground is entirely too stony for that kind of seed to sprout and it behooves "the powers that be" in any organization to scan the horizon for opportunities and formulate policies and plans of immediate and direct application to the daily interests of the people whose support is sought. What can you give them *that they want* in exchange for their annual dues?

### Enlisting the sympathy of the retailer

Of presidents and secretaries and committeemen there are many varieties. Occasionally we find one who lives and thinks years in advance of his lagging constituents. Ten or twenty years hence the rank and file may grow up to esteem that which he utterly fails to interest them in today. But if the period of his incumbency is to be "the best ever" he must relax from his standards and be content to limit his leadership to the capacity of his available constituency to follow him. It will probably be unanimously agreed to that the toughest problem any florists' organization ever tackled was how to enlist the interest and loyal support of the men engaged in the retail store business. Individual exceptions may be cited but if the universal key for the solution of this question has ever been found it has not become public property thus far. We read that it is proposed in the Buffalo Florists' Club to take up the subject of harmony in colors. Now, if this topic is of value to anybody it is to the retail florist who presumes to handle colors for decorative purposes in such manner as to appeal to the most refined and critical people. The men and women to whom pre-eminence in this direction means so much *ought* to show up. But will they?

### Where development is most needed

We hope that the effort about to be made by the Horticultural Society of New York to induce the public exhibition of floral decorative work by the retail trade of the metropolis will be met with abundant success. The leading florists of New York have in their employ some very clever workers but outside of a few circles there and in other localities throughout the country it is only rarely that we come across evidence of superiority in the art of decorative arrangement. The great preponderance of the design and decorative work seen is anything but convincing as to the artistic ability of the workman and it must be generally admitted by those who have been on the ground long enough to observe and form an opinion that the art of flower growing has advanced much more rapidly than that of flower arrangement. In fact, the principal difference to be noted between the design work of today and that of a generation ago is the better quality of the material used. The literature devoted to this decorative end of business is woefully deficient in quality and recent additions to it present practically nothing different from what the ordinary florist of a generation ago knew and its perusal is calculated to give a chill to anyone who approaches it with a desire for artistic light.

NEW YORK AND NEW JERSEY ASSOCIATION OF PLANT GROWERS

## During Recess

### The New York and New Jersey Association Gives a Clambake.

The announcement that this Association would give an outing and clambake at Duer's Pavilion, Whitestone Landing, on Tuesday, September 15, was the cause of much joy and enthusiasm and probably occasioned the breaking of more than one Sept. 1st good resolution concerning picnics and holidays, for the Association had already given one outing and the fortunate guests knew what to expect.

The affair came off in glorious shape. The weather was grand and Duer proved himself to be a master of the catering art and the hundred and twenty-five guests, more than half of whom were ladies, had the time of their lives. In the intervals between repasts there was bowling, shooting and dancing and the only incident to mar the day's enjoyment was a bad bruise of one of Paul Dailedouze's fingers which got caught between the balls on the rack while he was bowling. Special cars took the party from Long Island City at 10.33 A. M. and the return was made about 10 P. M. Anton Schultheis presided at the various feasts with characteristic alertness and A. L. Miller superintended with tireless energy the various other events, and the band was always ready to do a stunt when called upon.

About forty participated in the bowling which was a 5-frame individual game. The leading scores were W. W. Burnham 90, W. J. Elliott 86, Paul Dailedouze 84 and Demmerer 82. Following the gentlemen 42 ladies took possession of the alleys. Mrs. Wittmann with 71, Miss Brodsky 63, Mrs. Schoelzel 61 and Mrs. Schultheis 57 were the leaders.

In the evening after the clambake

the bowling prizes were distributed by Mr. Miller amid great hilarity and speeches were made by Toastmaster Schultheis, Julius Roehrs, J. Austin Shaw, W. J. Stewart, H. C. Steinhoff, W. J. Elliott, John Birnie, W. H. Siebrecht, Jr., A. L. Miller and others. A stein with compliments of A. H. Hews & Co., and a miniature flower pot ornament from the Whilldin Company were given to each guest and Miss Mills of the Hinode Nursery donated a big display of flowers for the table for which a vociferous vote of thanks was recorded.

### THE NATIONAL FLOWER SHOW.

Several special premiums have been offered since the publication of the preliminary premium list for the National Flower Show. Through Charles H. Totty of Madison, New Jersey, Mr. W. Wells of Merstham, England, offers a gold, silver and a bronze medal for six flowers of the "W. M. Moir" chrysanthemum, to be shown in one vase on stems 2 1-2 feet long.

J. A. Peterson offers for the best five plants of "Begonia Agatha," \$25.

The S. S. Pennock-Meehan Co., Philadelphia, offers a cup for the best bridal bouquet of which the main features shall be lily of the valley and white orchids or all lily of the valley, with the usual shower trimmings, ribbon, etc.

It is urgently requested that all firms and individuals who contemplate offering special premiums communicate at once with the secretary in order that their offers may be included in the final issue of the premium list which will go to press in about two weeks.

It is requested by the premium committee that any new special premiums be offered for classes which appear in the premium list already published, rather than for a new class.

J. H. BURDETTE, Sec'y.

### THE SCHWABEN VOLKSFEST.

This annual exhibition, always a great event for the florists of the neighborhood, opened on September 5 at the Schutzen Park, Glendale, Long Island, N. Y. The displays were very fine this year. John Baumann of Middle Village won first and John Dreyer, second prize, for carpet bedding. Mr. Dreyer received a special prize for a miniature residence. Other awards were as follows: Group of golden privet, Herman Maenner, Maspeth, first; A. Schrader, Elmhurst, second. Group of cannas, Chas. Koch, Flatbush. Celosias, F. Marquardt, Middle Village. Coleus, Chas. Koch; Salvias, ditto; Begonias, ditto; Foliage plants, John Baumann; Conifers, A. Schrader. General display of cut flowers, Abram Miller, East New York, first; Victor Dorval, Woodside, second. Bulbs and seeds, Stumpp & Walter Company, New York. Special vegetable prize, H. Boettger, Middle Village. F. Marquardt, as usual, put up a grand general display.

The judges were: A. Schultheis, John Donaldson and C. Woerner.

### A WIDE AWAKE SUBURB.

Hinsdale, just outside of Chicago, is alive to the question of knowing how to keep itself beautiful. The Womans' Club has taken upon itself the care of the parkways and public flower beds. Hinsdale has also a Village League to interest and instruct its citizens in the care of its trees. Last week these two organizations had Prof. Roth, head of the Forestry Dept., Ann Arbor, Mich., to lecture on the growth and culture of trees, and Jens Jensen, superintendent of West Side Parks to lecture on streets and parkways. The speakers were entertained by C. L. Washburn, who takes a lively interest in practical village improvements along these lines.

# NEWS OF THE CLUBS AND SOCIETIES.

## NEW YORK FLORISTS' CLUB.

It was an attendance big enough and enthusiastic enough to cheer any club president's heart which President Weathered faced on Monday evening, 14th inst., at the opening session of the New York Florists' Club for the fall season. There were about seventy members present. The various standing and special committees presented interesting reports: Patrick O'Mara for the transportation committee, to the effect that the Niagara Falls excursion had been delightful in every way and all parties well pleased; Joseph A. Manda for the house committee, who had done such good service in feeding and entertaining the excursionists; W. E. Marshall for the outing committee, showing that a substantial surplus had been left after paying all expenses; John Birnie for the committee on death of James Shanley, presenting resolutions of condolence, and the same gentleman for the entertainment committee, stating that at the October meeting Antoine Wintzer of West Grove, Pa., would give a talk on clematises and other hardy vines and shrubs for decorative garden work. All these reports were satisfactorily disposed of and the workers thanked. A communication from Secretary Fraser of the Chrysanthemum Society of America, suggesting a plan of affiliation between the two organizations, was referred to the trustees.

Benjamin Hammond of Fishkill then proceeded to address the meeting as promised, on some of his experiences in the school garden work. Mr. Hammond is always eloquent and interesting on this subject to which he has given so much of his time and thought for so many years. He told of the effect on the children and the community of the introduction of garden work into the Fishkill schools and enlarged upon the good influence upon the growing generation of an early stimulation in the love for nature and the benefits to come directly to the horticultural profession from an encouragement of the work. Mr. Hammond received a hearty vote of thanks.

F. R. Pierson being called upon, told of the arrangements being made by the Horticultural Society of New York for a fall show to be held November 17 to 20 at the Museum of Art. An attempt is to be made to get the retail florist trade interested by the offering of diplomas for such exhibits as bridal, shower and debutante bouquets, canopies, table decorations, etc., and the late date would afford an opportunity to see varieties of chrysanthemums not usually seen on the exhibition table. The schedule, which will be a liberal one, will be ready about Oct. 1. The exhibition will be free to the public. Mr. Pierson expressed the earnest hope that the horticultural profession will display abundant horticultural patriotism on this occasion and do their part to demonstrate that a successful flower show can be given in New York.

Talks on the recent Niagara Falls Convention were then indulged in. President Traendly told of his gratitude for the large delegation from his home section and his pleasure at the

interest displayed in the sessions of the Society, and hoped that all would come down to his home and see the silver ware presented to him in operation. Patrick O'Mara followed with some characteristic reminiscences and concluded by saying that the convention had left a very good taste in everybody's mouth. Next came the howling contingent, who displayed the Michel trophy which had been won by the New York team and expressed through J. A. Manda their hope that increased interest might be developed locally in this sport during the year to come.

One of the most interesting talks ever given before the club was then made by Chas. H. Totty, who was called upon to tell something of what he had seen on his recent visit to England. Referring to the many flowers placed on board ship by the friends of tourists, he said that the flower which kept longest was rose Killarney and the American Beauty came next. He described England as one beautiful garden. Kew Gardens and Hampton Court had impressed him most strongly. The finest thing he had seen in the bedding plant line was scarlet geranium Paul Crambel. He gave very interesting reminiscences of the great Shrewsbury Show.

Committees were appointed on the death of Alexander Wallace, consisting of Messrs. Shaw, Faulkner and Stewart, and on the death of A. David Rose, consisting of Messrs. Sheridan, Burnham and Young. Also the committee to nominate officers for next year.

On the exhibition tables were a vase of dahlias from Fred Hollander, Ozone Park, which was given a vote of thanks, Gladiolus America from J. Lewis Childs, which was awarded a certificate of merit, and vases of Dahlias Kaiserin Augusta Victoria and Fire Rain from A. L. Miller which received vote of thanks.

## NASSAU COUNTY HORTICULTURAL SOCIETY.

The regular meeting of the society was held on the 9th inst., President Jaenicke in the chair. A letter was read from President Roosevelt accepting election as an honorary member. Walter Shaw and W. A. Finger accepted appointments as judges at the dahlia show. Special prizes for the fall show were offered by several individuals and by Rickards Bros., J. Roehrs Co., and J. F. H. Matz. A letter from the Chrysanthemum Society of America inviting the society to become associated with it was presented and after discussion laid over. The awards for the monthly competition were as follows: George Wilson, onions, 88; H. F. Meyer, egg plant, 81. Valentine Cleres, sedum, 78. Honorable mention, V. Cleres, gladioli; J. Roehrs Co., orchids; Geo. Wilson, double dahlias. S. Drombrowski, single dahlias; J. Drombrowski, squash and celery; W. Fleischer, roses, tomatoes, helianthus. Brief talks were given by Messrs. Roehrs, S. Drombrowski and Mr. MacKenzie, gardener to Mr. Wilson, on their methods used in cultivating their respective exhibits.

JAS. KESSON Rec. Sec.

## ST. LOUIS FLORIST CLUB.

The members of the club on Thursday afternoon, Sept. 10, journeyed over to Edwardsville, Ill., fifty strong, to hold their meeting with J. F. Ammann. Mr. Ammann and his foreman, Mr. Blixen, took the party through the houses, which comprise nearly 50,000 feet of glass, where were seen some fine benches of Rhea Reid, Alice Roosevelt, Ivory, Killarney and Perle. The carnation houses were in fine shape and it was voted the best kept range in the state. The meeting was then called to order by President Young. After the routine business was disposed of, J. J. Beneke and C. T. Sanders were called upon to install the new officers: President, W. C. Young; vice-president, Edwin Denker; secretary, A. J. Bentzen; trustee, Henry C. Ostertag. Treasurer-elect F. H. Weber not having returned from his trip abroad will be installed at the next meeting. President Young on taking the chair read an interesting paper and requested W. C. Smith to prepare a paper for the next meeting on "What way socially can the members be brought closer together." A discussion followed on the advisability of holding evening meetings every other month, and the matter was referred to the trustees for report in October. Mr. and Mrs. Ammann were presented with a handsome cut glass water set, J. J. Beneke making the presentation speech. Mr. Ammann accepted the gift in a few well pointed words. The meeting then adjourned and refreshments were served. After enjoying the abundant spread and returning thanks to the host and hostess the party started for home, feeling that a pleasant and profitable afternoon had been spent.

## NEW BEDFORD HORTICULTURAL SOCIETY.

In spite of the advertising the society received through its successful free show last year, the show which was held on the tenth, eleventh and twelfth instants was not an unqualified success, and did not receive the support and patronage hoped for. The hall itself was lacking in decorative features there being less than the usual number of palms and groups for effect. Exhibits of plants and flowers, other than dahlias and groups of palms, ferns, etc., exhibited by two local men were conspicuous by their absence. The exhibits of dahlias were of good quality and were mainly by commercial growers. There was a fine display of gladioli by local growers and also by John Lewis Childs. James Garthley captured a silver medal for best display of not less than 50 spikes. Also first premium for 12 blooms, Mrs. A. J. Jahn taking second premium. Three silver cups awarded by the society were captured as follows: Mrs. Geo. A. Fuller for 25 distinct varieties of show dahlias, Wm. F. Turner & Co. for 50 cactus dahlias of not less than 40 distinct varieties, and Mrs. A. J. Jahn for a vase of 40 dahlias in variety. First premiums were awarded to James Garthley and to Wm. Keith for groups of palms, ferns, etc.

**1220 Race St. - Philadelphia, Pa.****MASSACHUSETTS HORTICULTURAL SOCIETY.**

The autumn exhibition, which was held on September 11, 12 and 13, was a surprise in the quantity and notable quality of the dahlias shown. Especially was this true of the remarkable exhibit by R. & J. Farquhar & Co., said to have contained 20,000 blooms. It was arranged in a sort of parterre with formal lines and scroll work in which the colors were contrasted and blended in an artistic pattern, and relieved by vases and clusters of a single color, palms and foliage plants. It was a most sensational innovation and attracted the public accordingly. Among the varieties especially prominent were Chas. Lanier, Semiramis, Queen Wilhelmina, Hollandia and other gems of recent introduction in all the classes.

Other dahlia exhibitors were the well-known specialists, J. K. Alexander, who staged about 750 blooms of superb quality. W. H. Symonds with 400, W. D. Hathaway, Mrs. H. A. Jahn, Towle's Dahlia Gardens, Dorchester Dahlia Gardens, F. L. Tinkham and W. C. Winter. Altogether these enthusiastic dahlia lovers put up a show of unprecedented extent and interest, and the public took full advantage of the opportunity to admire and learn.

H. A. Dreer showed a tank of fine aquatics, including *Victoria Regia*, many rare and beautiful *nymphaeas*, *nelumbiums* and *papyrus*. Very extensive collections of hardy border plants were staged by Blue Hill Nursery and Harvard Botanic Garden, a group of cockscombs from the latter attracting especial admiration. A very

comprehensive display of garden material was also contributed by Wm. Whitman, gardener Martin Sullivan, and the Bellevue Greenhouses were represented by a particularly attractive and instructive collection in the same line.

F. W. Fletcher showed a large bunch of the new early-flowering single violet *Baronne Rothschild*, which appears to be about a month earlier in blooming than the usual sorts. The display of hothouse grapes from Mrs. J. C. Whittin, gardener George McWilliam, was a most luscious one, including *Madrasville Court*, Mrs. Prince, *Gros Guillaume*, *Lady Downs*, *Black Allcante* and *Muscat of Alexandria*. Of fruits and vegetables the display was fully up to the traditions of this Society in its autumn shows.

The prize list was a long one. Among the special awards were the following: The W. W. Rawson silver cup for largest collection of cactus dahlias exhibited by a private gardener was won by W. A. Riggs; Peirce Bros., certificate of merit for chrysanthemum *Golden Glow*; L. W. Goodell, certificate of merit for collection of *verbenas*; honorable mention to H. A. Dreer for aquatic plants; F. W. Fletcher for *Marguerite* asters, for *Violet Baronne Rothschild*, and for *Physostegia virginica* var. *grandiflora*.

The West Virginia Horticultural Association met at Romney, W. Va., on September 3 and 4. Dr. W. M. Munson and J. H. Stewart of Morgantown, S. W. Moore of Elwell, and H. W. Miller of Paw Paw were among the speakers.

**GARDENERS' AND FLORISTS' CLUB OF BOSTON.**

The first meeting of this club for the fall season of 1908 was held at Horticultural Hall on Tuesday evening, September 15, about 75 members being in attendance. Resolutions of condolence and sympathy on the death of two members of the club, W. W. Rawson and Emil Johansen, were adopted, several members making remarks in eulogy of these useful men.

Interesting vacation reminiscences were given by Kenneth Finlayson and M. A. Patten, the former telling about the gardens and natural beauties of Bar Harbor and the hospitable welcome extended there, and the latter describing vividly the attractions of the Niagara Falls Convention and mildly criticising the local members for their absence from the convention. Mr. Butterworth told of what he had seen in London and other European cities and the bulb growing districts of Holland. Robert Cameron and W. N. Craig added their testimony to that of Mr. Finlayson regarding their trip to Bar Harbor, and Mr. Cameron, who had extended his visit to Nova Scotia, spoke glowingly of the horticultural progress he had noted there. Vice-president Downs recapitulated the pleasant outing enjoyed by about twenty-five members at Amherst and expressed grateful appreciation of the courtesies extended by the College officials.

On the exhibition table were violets and daisies from F. W. Fletcher and orchids from Duncan Finlayson.

# SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

## No Trade Exhibition.

It was suggested to the National Flower Show sub-committee on local management that a trade exhibition of supplies, heating and ventilating apparatus, greenhouse construction materials, etc., would interest many trade visitors at the November show, and accordingly on August 29th letters, enclosing postal cards for reply, were addressed to ninety-five exhibitors at previous trade exhibitions, held in connection with the annual conventions of the Society of American Florists. Forty-four replies were received up to September 7, inclusive. Thirteen of the replies were in favor of such a trade exhibition, eighteen opposed to it and thirteen undecided. The sub-committee, at a meeting held September 7, therefore decided not to take up the project. J. C. VAUGHAN,

Ch. Local Management Committee.

# PENNSYLVANIA HORTICULTURAL SOCIETY.

Perennial phloxes, asters and dahlias were conspicuous at the monthly meeting of this society held on the 15th inst. C. B. Newbold—Thomas Logan, sup't—had a collection of fine phloxes, including Albion, Le Soleil, Pantheon, Bacchante, Colibri, Mrs. Jenkins, Obergartner Wittig, Genl. Chanzy, Independence, B. Comte, Artaxarxes and other Lemoine introductions. Robert Schneider, gardener for Mrs. J. J. Henry, showed a fine collection of dahlias. Queen Wilhelmina, a new white, was much admired. The Paul collection of asters was very fine. Mr. Hurley deserves great credit for these. Mauve Queen and Semple's were especially fine. W. H. Ritter, an amateur, deserves a word of praise for his seedling petunias, showing unusual skill and culture.

In addition to the Hemming talk on perennials, L. K. Peacock had something to say about dahlias, of which he put up an excellent show. The vegetable exhibit was extensive and interesting. McLeary had the old-fashioned Vegetable Marrow displayed in his lot, while Hurley had the English Broad Beans, and Logan Scarlet Runners and Jerusalem Artichokes. The October meeting will be devoted chiefly to cosmos and early chrysanthemums.

# NEW ENGLAND DAHLIA SOCIETY.

As we go to press the dahlia exhibition under the auspices of this Society at Tremont Temple is just opening and exhibits are not all in place but the show is an excellent one and most creditable to its promoters. The exhibits are confined practically to dahlias, a few bay trees and oak branches with some festooning and a group of Whitebloom ferns furnishing the green for a setting, and all classes of dahlias are well represented. Among the most attractive things are Dreer's White, a superb flower, of which a large vase is shown by H. A. Dreer; Epopee, a carmine cactus, William Taft, a white and pink striped Decorative and Stradella, a purple crimson Show, in the magnificent display by J. K. Alexander; a splendid collection

of all classes from George H. Walker and a vase of Forbes' production, Ruth Forbes, pink Decorative, shown by W. F. Turner & Co., who, by the way, have one of the best displays of well grown Cactus dahlias ever staged. Among the visitors seen at the show are: H. F. Burt, Taunton; W. Keith, New Bedford; Alex. MacLellan, James Robertson and E. S. Manuel of Newport, and W. C. Brady of Holliston.

# NEWPORT HORTICULTURAL SOCIETY.

The annual exhibition of this Society was held on September 12, 13 and 14. The show this year was far ahead of those of the past few years, both in size and beauty of exhibits. Dahlias were largely represented and made the finest effect ever seen here. Greenhouse and garden flowers, plants, ferns and vegetables from the summer estates of Mrs. Robert Goelet, Mrs. Winthrop Chanler, R. Livingston Beeckman, Hon. Perry Belmont, Mrs. T. O. Richardson, Daniel B. Fearing, Mrs. I. T. Burden, Hugh D. Auchinclos and Miss Fanny Foster were the principal winners in the various classes.

Table decorations were the most attractive feature of the show. Competition was divided into three classes, the awards being made in the following manner:

Class 34.—For the best table decoration of any kind of flowers or foliage. One of the essential points in this class which was carefully considered by the judges was the element of originality shown. Oscar Schultz was the only competitor and his table was considered well worthy of the first prize. The arrangement was in the form of a bower covered overhead with green and sprays of clematis, while from the peak hung a basket of salvia.

Class 35 was for the best table decoration of any material such as plants, flowers or fruit or along with articles such as silver or glassware for a prize offered by Miss Alice Keteltas. In this class there were two exhibits, one by Mrs. William Astor and the other by F. L. Ziegler. Mrs. Astor's table, arranged by James Boyd, gardener, was accorded first prize. It was an elaborate affair including a heavy gilt service of high candelabra, fruit dishes and heavy glass ware. The table was set with a full equipment of silver plates and glass with finger bowls, each with a gardenia. There were no flowers but an artistic arrangement of Farleyense in the centre. Mr. Ziegler's table, which was given the second prize, showed a centre piece of yellow dahlias of several varieties, the table being set with yellow ribbons and silver service.

In class 36 for the best table decorated with outdoor grown flowers or foliage, dahlias and roses excluded, there were two tables shown, one by Mrs. Winthrop Chandler, William G. Postings, gardener, and the other by Oscar Schultz. Mrs. Chandler took the first prize, her table having a centre-piece of the new Delphinium "Ocean Lawn." Mr. Schultz received the second prize and showed a centre-piece of red gladiolus flowers with sprays of clematis. Both tables as in the other classes were set with a handsome silver service.

# CONNECTICUT HORTICULTURAL SOCIETY.

The regular meeting of this society was held in the county building, Hartford, Sept. 14. Reports of the various committees were heard and the final arrangements concluded for the Dahlia Exhibition of Sept. 23. A fine display of asters was tabled by John Gerard, New Britain, who gave an instructive talk on their culture and history. President Huss gave a very interesting account of his recent vacation tour through Europe.

A. CUMMING, JR.

# CLUB AND SOCIETY NOTES.

The market gardeners of Grand Rapids, Mich., have organized and on September 5 elected the following officers: President, L. D. Davis; vice-president, R. Yonkers; secretary, F. DeKleine.

The New Haven County, Conn., Horticultural Society at its meeting on September 1 had beautiful displays by Messrs. Slocum, Beattie, Symon, Bruce, Allison and Moore. The coming show was discussed and the prospects are that it will surpass anything before attempted by this society.

The Albany Florists' Club (N. Y.) met with F. A. Danker on September 3. The chief business was the decision to have printed 10,000 copies of the circular on the care of plants, for distribution by the members among their customers. W. W. Hannell's invitation to a birthday party on the 20th was accepted.

The preliminary program of the international horticultural exhibition at Berlin on April 2-13, has been sent out. Over 700 classes are represented in the schedule. W. Swoboda, of J. C. Schmidt, Berlin, is president of the council. Particulars can be obtained from the General Secretary's office, Invalidenstrasse, 42, Berlin, N. 4, Germany.

Two large tables of gloxinias contributed by George McWilliam, cannas by E. W. Breed and A. J. Marble, chrysanthemum Golden Glow by H. F. A. Lange and dahlias by M. F. Kelsey were the leading features of the show of the Worcester County (Mass.) Horticultural Society on September 10. Mr. McWilliam resumed his duties of judge for the first time since his return from his trip abroad.

# DREER'S Hardy Phloxes

We can say without fear of contradiction that we are the **Largest Growers of Hardy Phlox in the World** and our collection embraces every known color in this gorgeous race of summer flowering plants. You are behind the times if you cannot offer your customers the **Newer Colors and Varieties** which are now so popular. Our stock was never in finer or healthier condition, and whether your wants are large or small, we are able to meet your requirements. If you have not received a copy of our **Special Offer**, write us today and we will mail you a list. We feel sure that the **Varieties** offered and the **Prices** we quote will both surprise and interest you. Many of the sorts which heretofore have been scarce and of high value, are now offered at **Popular Prices**. The plants which we offer are **Strong, One-year-old, Field-grown Stock**, and can be shipped with perfect safety end of September or early in October.

**Price, \$30.00 to \$50.00 per 1000**  
ACCORDING TO VARIETY

For a complete list of Hardy Plants suitable for fall planting, including our specialties—**Peonies, Iris, Anemones, Tritomas, etc.**, see our fall catalogue. If you have not received a copy, write for same.

**Henry A. Dreer**  
**PHILADELPHIA, PA.**

**714 Chestnut Street**

## BULB NOTES.

Dutch bulbs as seen in the seed stores this season are the best received in many years. Hyacinths are solid and shapely as a rule. Tulips are not remarkably large but in all other respects are fine. Those who buy "Red" or "Scarlet" Pottebakker probably do not all understand that they get the old variety Verbloom renamed. The only true scarlet Pottebakker is the fine variety Sir Thomas Lipton which is a sport from Pottebakker Yellow. Grace Darling is a dark red sport from Pottebakker White.

Lilium candidum bulbs run slightly undersize this year. The best variety of candidum is characterized by short white scales. The variety from southern Europe which produces narrow petalled, inferior blooms has long narrow pinkish scales running up to the apex of the bulb.

Please discontinue our ad. for violets. All sold. **JOHN F. FLOOD CO.**  
Dedham, Mass., Sept. 16, 1908.

ADVERTISER would like to communicate with a Florist or Nurseryman with ten or twelve thousand dollars, who would like to go into business on the Pacific Coast. Address,

## Obituary

Emil Johansen.

Emil Johansen, who died on September 12, was born in Sweden about forty-five years ago. His early life was spent in Sweden and Russia; he was orchid grower to Herr Krupp, of

EMIL JOHANSEN.

Krupp gun fame, after which he further perfected himself in orchid growing in the establishment of Sander & Sons in England. His first position in America was with Mr. Pratt of Brooklyn, N. Y., as orchid grower; then he went to Chicago and took charge of the orchid collection in Garfield Park; from there he went to the estate of James E. Rothwell, Brookline, Mass., in 1900, where under his nurture the collection of orchids increased in numbers and quality steadily. As a hybridist Mr. Johansen was very successful and raised a great number of valuable hybrids, both in cypripediums and cattleyas.

He was a member of the Massachusetts Horticultural Society and had served on the plant and flower committees. As an exhibitor of orchids in Horticultural Hall his displays were always most artistic and won many medals and other awards for their owner.

Last month Mr. Rothwell sold his entire collection of orchids to Ernest B. Dane of Brookline and Mr. Johansen engaged to take charge of the greenhouses on Mr. Dane's estate. Hardly was the collection housed before his health gave way and a painless death from heart failure followed.

Mr. Johansen was unmarried, with parents, brothers and sisters in Sweden. He was a man of artistic temperament, always looking over an arrangement or decoration to see if improvement could be made in the smallest detail, was exact in his accounts, rendering them with the precision of a bookkeeper; his extreme neatness in his houses and in handling his collection was a matter of admiring comment. To Mr. Rothwell his death

comes as a distinct personal loss, as he recognized in him a man of superior character and attainments, who had won his highest esteem.

Resolutions were passed by the Gardeners and Florists' Club of Boston, of which he was a member, and the many beautiful floral tributes at his funeral showed the value placed upon his friendship by the members.

Charles E. Richardson.

Charles E. Richardson, a former treasurer of the Massachusetts Horticultural Society, died at the home of his daughter, Mrs. George W. Milton, Salisbury road, Brookline, on September 14, following a prolonged illness. He was seventy-two years old. Mr. Richardson gave up the treasurership of the Horticultural Society a little more than a year ago, owing to his health. To this society he gave sixteen years of active and faithful service and deeply regretted the necessity of resigning. He was especially well informed regarding pears and his judgment on varieties was valuable. He was a native of Portland, Me., and when nine years old moved to Cambridge and attended school. At nineteen years of age he held a position in the Maverick Bank of Boston and later was cashier of the Rockland Bank of Roxbury. Still later he was cashier of the Lechmere Bank of East Cambridge. Mr. Richardson married the daughter of the late Charles M. Hovey, the noted horticulturist, a former president of the Massachusetts Horticultural Society.

William Butcher.

William Butcher, a highly respected citizen and florist of Providence, R. I., was stricken with heart failure a short distance from home, and died instantly on the 9th inst. Mr. Butcher was born in Yorkshire, England, 72 years ago.

WILLIAM BUTCHER.

Coming to this country a little over forty years ago he was first employed by Governor Sprague, then went into business for himself. He was a charter member of the Florists' and

Gardeners' Club of Rhode Island, a member of several branches of the masonic fraternity, and a churchman of sterling integrity. The funeral was solemnized on the 12th inst. and the floral tributes were numerous and beautiful. The florists' club attended in a body. Mr. Butcher leaves a widow.

Mrs. T. D. Hatfield.

Mrs. Hatfield, wife of T. D. Hatfield, Wellesley, died on Tuesday, September 1, and was buried at Cedar Lawn Cemetery, Wellesley, on Friday, the 4th. She had a kindly disposition and a genial countenance, and a welcome was always given to the fraternity when visiting the Hunnewell estate, as many of them can testify. She was well known and highly respected in the town of Wellesley and was prominent in church work. She brought up her children in the good old English fashion. She took great interest in horticulture. She was 57 years old, and left a family of eight children to mourn her loss.

Henry Regan.

Henry Regan, who for several years was employed by Bassett & Washburn of Hinsdale, Ill., died at Grand Rapids, Mich., September 13. Mr. Regan had been in Grand Rapids several months. His friends in Hinsdale sent an expression of their regard for him in the shape of a large bunch of American Beauty roses.

A. Pinoteau.

A. Pinoteau, who for many years held the position of city gardener in Montreal, Canada, died on Sept. 7 after a brief illness.

## CHRYSANTHEMUM NOTES.

### Chrysanthemums in Demand.

Several growers of young plants for the shipping trade report an unprecedented call for chrysanthemums of the recommended commercial cut flower varieties. An increased demand has also been noted for the newer sorts of pompons and singles for cutting.

### Chrysanthemum Golden Glow.

Golden Glow Chrysanthemum, Elmer Smith's sensational early yellow, is beating all records and is a subject of much admiring comment, coming in as it has with big full blooms ever since middle of August. To get it in good shape in August, Wallace R. Pierson says, "plant it in May and take the first crown bud."

### Feeding and Disbudding.

Chrysanthemum plants in pots should now be setting buds and will require special feeding with a good manure or commercial fertilizer until buds begin to show color, when feeding should cease. Disbudding should be closely looked after in the large flowering varieties. Pompom, Anemone and single varieties do not require disbudding except in case where specimen plants are desired.

### Seed Trade

The worst fears concerning the shortage in the pea crop are going to be more than realized, but by request of our informant we are giving no figures just yet. A few weeks ago we gave some figures, stating that the actual deliveries would be between the high and the low, and much nearer the low. These figures were scoffed at by a few "wise ones" but the worst was not told, and when it becomes known, will create a sensation in the trade. "Nuff" said at this time.

It really looks serious in the vine seed line, when close buyers, and jobbers at that, will pay 50c. per pound for standard varieties of cucumber seed at this date and buy with an alacrity which says plainly that they would have paid more had it been necessary, yet that is what was done during the past week, and if indications are not greatly misleading, 50 cents will look low within the next three months.

As indicated in previous issues of HORTICULTURE, muskmelons are going to be in much worse shape than cucumbers, as not only is this year's crop mainly a failure, but unlike cucumbers, there are practically no reserves carried over, and no doubt a new high record for prices will be reached the coming season. It is useless to attempt to guess what the high figures will be, or what percentage will be delivered on contracts, but it may be said without fear of contradiction, that a most serious condition confronts the great body of seedsmen, and many will be unable to procure certain varieties at any price.

Word from Cincinnati says that the onion seed crop is much shorter than was expected, even as late as the latter part of July. Blight got in its destructive work late, when danger from that source seemed to have passed, and what gave every promise of being a bumper crop seems finally to have turned barely average.

No word about the Lima bean crop has come from California for some time, but something bearing on that subject is expected very shortly. Last

reports indicated a considerable shortage, particularly of the Burpee's Bush.

The great shortage in peas this year will be relieved somewhat by purchases from Europe, but the European surplus will not be large and will not greatly affect prices here.

The succession of bad pea crops calls attention anew to a series of articles on this subject which appeared in HORTICULTURE about a year ago. It was pointed out at that time that standards would have to change, and that five fold was now only a cherished memory on the part of the pea growers. Such a yield is of course not impossible in the future, but it is so long since such a thing occurred, that the memory of the oldest inhabitant is taxed to recall it, and it would be regarded in fact as a genuine phenomenon. This is a matter of supreme importance, and will be dealt with in a future issue of HORTICULTURE.

Mr. Eugene Schaettel, representing Messrs. Vilmorin, Andrieux & Co., Paris, France, will arrive in New York September 26th to make his usual visit to the seed trade throughout the United States and Canada. His New York address will be care of H. Frank Darrow, 26 Barclay St.

#### PUBLICATIONS RECEIVED.

Report of the Proceedings of the Indiana Horticultural Society for the year 1907. This interesting volume of 256 pages includes the report of the 47th annual meeting held in Indianapolis, the summer meeting in Lafayette, proceedings of the State Board of Horticulture, local societies, selected papers, etc. The Indiana Horticultural Society appears to concern itself almost exclusively with orchards. There are large interests in the State of Indiana devoted to other branches of horticulture whose co-operation ought to be worth much to the state organization.

"Arboriculture" for September is as usual interesting and exceedingly spicy reading. Neither Editor Brown nor his correspondents are in the least timid about expressing their views on forestry and lumber topics. Arboriculture demands "the immediate repeal of the tariff on wood pulp, print paper, lumber, timber and logs, and that

these articles be placed upon the free list." HORTICULTURE "seconds the motion."

In a set of bulletins recently issued from the Agricultural Experiment Station at Kingston, R. I., No. 128 is A Further Study of Soil Treatment in Greenhouse Culture by H. J. Wheeler and G. E. Adams. Radishes, lettuce and carnations were the crops experimented on and the results as recorded will be found interesting.

## CATALOGUES RECEIVED.

The W. W. Barnard Co., Chicago, Ill.—Florists' Wholesale List of Bulbs and Seeds for Fall Planting.

Elm City Nursery Co., New Haven, Conn.—Special Summer and Autumn Planting List. A compact and useful list of hardy garden material.

Franz Birnstiel, Coburg.—Illustrated catalogue and price list of baskets, willow and birch flower stands, pot covers, ferneries, etc. Text in four languages.

Champion City Greenhouses, Good & Reese Co., Springfield, O.—Fall Trade List for Nursermen and Dealers Only. Rose novelties and general collection of plants.

Shatemuc Nurseries, Barrytown, N. Y.—Flowering Shrubs, Herbaceous Plants, Trees for Ornament and Shade. A beautiful catalogue, profusely illustrated and with appropriately adorned cover.

Henry F. Michell Co., Philadelphia, Pa.—1908 Book of Bulbs. A finely illustrated, comprehensive catalogue in which the characteristic enterprise of this popular house is convincingly displayed.

Schlegel & Fottler Company, Boston.—Catalogue of Bulbs and Plants for Autumn Planting. This is as heretofore, a gem in its way, with an artistic and effective cover and well-arranged contents.

Bertrand H. Farr, Wyomissing Nursery, Reading, Pa.—Iris, Peonies, Phloxes and Hardy Plant Specialties. This is Mr. Farr's first catalogue and it contains much to command attention. The lists are very comprehensive, the illustrations excellent and the descriptions clear and concise.

Jackson & Perkins Company, Newark, N. Y.—This firm is sending out a descriptive catalogue of tender and hardy plants under the title of "A Business Proposition for Seedsmen," soliciting seedsmen to offer in their own catalogues plants herein listed and have the orders filled direct from Newark under their own labels at a commission of 50 per cent on prices quoted.

Bay State Nurseries, North Abington, Mass.—Special Price List for Gardeners and Owners of Estates Only. A very extended list of trees, shrubs, evergreens, vines, roses, and herbaceous perennials grown in the trying climate of New England and inured against any reasonable exposure to severe extremes. They have a glorious soil in North Abington and the goods they turn out are in the right class.

## The Trade Outlook

### SOME CHICAGO VIEWS.

#### Zech & Mann.

"We think trade is opening up well for the early part of September and predict that within two weeks business will be fine."

#### J. A. Budlong.

"Judging from the way business has held up during the summer I think the outlook for the fall and winter very encouraging."

#### E. F. Winterson Co.

"It is pretty hard to determine the future, but people we are meeting from outside are very hopeful and we predict a good fall and winter business."

#### Hauswirth, the Florist.

"We think the hard times are not entirely over, but do feel that better times are on the way. We think within a month business will be about normal."

#### A. L. Randall Supply Dept.

"We are pleased with the opening up of the fall trade. The dull season gave a chance to work off old stock which leaves the market now in good condition for a revival of business."

#### Benthey-Coatsworth Co.

"It is too early to form definite opinions regarding fall trade, but I consider the panic practically over and think by the middle of the season trade will be equal to that of former years."

#### J. P. Weiland of Weiland & Risch.

"I realize that we have been through hard times but believe them about over. I look forward to an exceptionally good year and have largely increased my greenhouse plant to meet it. Everything points to a good year ahead."

#### A. L. Vaughan, of Vaughan & Sperry.

"We can only judge from the condition of the August business which was decidedly better than that of last year. From inquiries for certain lines of stock I think the outlook for the fall trade good, and the worst of the hard times are over, no matter who is elected."

#### Poehlmann Bros. Co.

"Compared with the opening up of the spring trade the fall season is starting in more favorably. We believe the worst of our hard times are over."

#### S. F. Leonard of the Leonard Seed Co.

"In my opinion the hard times are over. Many of the seed crops are short but this makes the prices better. I know the coming season will be a good one."

#### Bassett & Washburn.

"The shipping trade is better than last year while the city trade hardly as good. This shows that the vast country which has Chicago for its buying center has not been affected any by the panic. The outlook is for a continuance of a good shipping trade equal to if not exceeding former years. The city demand we consider will be below normal. However a good deal will depend on what takes place after the election, this event having more effect on the city trade than on the shipping. We also look for a larger supply of flowers than last year."

### COMING EVENTS.

Springfield, Ill., State Fair, Sept. 25 to Oct. 2.

White Marsh, Md., Maryland Horticultural Society, with R. Vincent & Sons, Sept. 22.

Huntington, N. Y., Horticultural and Agricultural Society, sixth annual exhibition, Sept. 23.

Providence, R. I., Rhode Island Horticultural Society, fall show, Sept. 17, 18, Francis Willard Hall.

Hartford, Conn., Connecticut Horticultural Society, fall show, Sept. 23; chrysanthemum show, Nov. 5, 6, Unity Hall.

New York, N. Y., American Institute of New York, exhibition, Sept. 22, 23, 24; chrysanthemum show, Nov. 11-13, Berkeley Lyceum Building.

### NEW RETAIL FLOWER STORES.

Harry Gessner, 1256 Broadway, New York.

A. Elberfeld, 11th and Main streets, Kansas City, Mo.

### FAIRS AND NEIGHBORHOOD SHOWS.

At the Montgomery County Fair, Dayton, Ohio, the Dayton Floral Co., the Advance Floral Co., and H. H. Ritter had fine exhibits.

School children under the auspices of the Improvement Society, N. Andover, Mass., had a fine exhibit of flowers and vegetables on September 11.

The floral exhibition at the State Fair, Concord, N. H., was very creditable, and the largest in years. A. G. Hood of Manchester acted as judge.

In the competition for garden prizes offered by the Village Association, Lenox, Mass., there were 48 competitors and \$146 was distributed in prizes.

Sept. 2 and 3 were the dates of the flower carnival at Conesus, N. Y. Chas. Larowe of Cohocton had a fine display of gladioli and H. A. Dreer of water lilies.

The success of the first flower carnival held at E. Rochester, N. Y., will probably lead to a repetition. The exhibits were unusually good and the financial results satisfactory.

The Melrose Horticultural and Improvement Society, Melrose, Mass., held its annual exhibition on September 11, the attractive feature being the exhibits from children's gardens.

The annual show of the Cleghorn Landscape and Garden Improvement Society at Fitchburg, Mass., closed on September 7 with numerous awards. Interest has grown until an 80 foot tent was required to house the exhibits this year.

The show of the Westmouth Horticultural Association held on Sept. 5 at Westmouth, Can., while perhaps less ambitious than last year, had some good exhibits of asters; wedding bouquets and ferns were shown by Hall & Robinson, and gladioli by H. Drennan.

## Flower Market Reports.

**BOSTON** The situation here at present is worse, if possible, than last week so far as disposal of flowers is concerned. There is practically no demand for the vast accumulation of asters, roses and other things, carnations included. American Beauty sales are satisfactory as are also those of lily of the valley, which is generally of superior quality. Golden Glow chrysanthemum has made its appearance in this market.

The latter half of the **CHICAGO** week ending September 12 was a period of great depression in the Chicago market. A hot wave swept over the city and trade was practically at a standstill. Asters, carnations and roses piled up and were a glut on the market. Forest fires raging in Wisconsin filled the air with smoke and little else than funeral flowers were needed. To make the market condition worse, flowers from New York, noticeably asters, are being shipped here in quantity. Sunday morning the tide began to turn a little and Monday some of the largest wholesalers expressed themselves as believing the worst was over though trade was very much below the normal. Asters are really fine stock, though sales are discouragingly slow. The early asters this year proved the most satisfactory financially. Roses are good and carnations rapidly improving in size and length of stem.

Business for week before last was very encouraging but the abnormally hot spell of last week seemed to spoil a good beginning. The northern fires which darken our streets and make the air full of ashes and smoke are playing havoc with the fern crop. The fern gatherers travel from place to place without making a find. There will be a premium on ferns next winter.

The retail florists report a little breeze, as it were, just beginning to stir the stagnant surface of business and are looking for a goodly ripple before long, but the movement is not yet appreciable in wholesale circles and we have little to report that will be of interest or instruction to anybody. Asters have been piling up faster and higher and, in bulk, must at the present time nearly equal the entire receipts of the whole market. They are very fine but that doesn't help the prices much, if any, under present conditions. Roses are showing a little improvement in stem, color and solidity of bud. Carnations make progress slowly. Lilies are excellent and lily of the valley has never been finer. Cosmos is seen generally, and dahlias, gladioli and hydrangeas are coming in by the crate full.

Trading has been very quiet the past week, with increasing receipts. No immediate change is looked for unless we have a sharp frost to check outdoor supplies, or a let up on the fakir embargo. Street merchants from New

**CUT ASTERS** 50c to \$1.50  
per hundred  
**CUT GLADIOLI** \$3.00 per  
hundred

**ALTIMO CULTURE CO.**

Canfield, Ohio.

York have been hiring stands in doorways in the central part of the city lately. This would look as if these traders had some assurance from official sources that the peripatetic element were to be kept off indefinitely. On top of the aster have come the dahlias and a glut of Bride and Bridesmaid roses—the latter mostly of poor quality. Among the fairly satisfactory items are My Maryland, which is the best seller at present, and American Beauties. Mrs. Jardine comes next. Some fairly good long-stemmed carnations are arriving and sell well. Cattleyas are a little more plentiful. There are a few *Dendrobium formosum*. Lily of the valley is in normal demand and supply. Hydrangea, tritoma, gladioli and many other outdoor subjects very abundant. Among the most popular dahlias are Kriemhilde and White Kriemhilde. Mrs. Jones, Mrs. Keith, Countess of Lonsdale, Jack Rose, Sylvia, Lyndhurst and Perle d'Or.

With the opening of **WASHINGTON** schools and colleges a great many persons are coming back to the city, and in consequence there is a decided activity in the retail market. There is a glut of asters, but they are of exceptionally good quality. Owing to the drought and the stalk worm dahlias are scarce, but are fine flowers. Carnations are coming in, in very limited quantities. The flowers are remarkably good for this season, but the stems are very short. Roses are good of flower but also short stemmed, and the wood is very soft. There seems to be a greater demand for the latter, than for the cheaper grade of flowers. Lily of the valley is fairly good, though not in abundance. It and the Bride rose have been the flowers par excellence this fall for the numerous weddings. The cool nights have cut off the water lily supply to almost nothing; even the warm days fail to make them respond.

An invitation was received from Mr. Whittier of the Framingham Nurseries for the Gardeners' and Florists' Club of Boston to visit him next month.

### PHILADELPHIA NOTES.

Percy B. Rigby of New York has joined the Pennock-Meehan Co. as a member of the firm and an important stockholder. His special field will be in the accounting department.

Ernest Hemming, of the Thos. Meehan & Sons' Co., addressed the Pennsylvania Horticultural Society September 15th on Hardy Perennials.

George M. Cook, with Pennock-Meehan Co., was married September 7th to Miss Lucille Harris, of Chester, Pa.

Jno. Burton and party left on an auto trip to Summit, N. J., September 15th. Jno. N. May's rose-growing establishment and other interesting points are on the itinerary.

Visitors this week: L. M. Beck, Milton, Pa.; E. G. Hill, Richmond, Ind.; J. B. Swayne, Kennett Square, Pa.

It is reported that Philip Freud is sitting up nights designing the Michell float for Founders' week parade in October, and that it will be a stunner. All indications point to a halcyon and vociferous time in the old Quaker City on its 225th anniversary celebration.

### NEWS NOTES.

John Bennett, Atlantic Highlands, N. J., who was the victim of an explosion that completely wrecked his greenhouses last March, has erected new houses on modern lines and is now ready for business. A cellar 108 feet long is a new feature.

Again we note signs of the beginning of a new season—one of the infallible evidences that summer has gone and that the time of frosty mornings is close at hand in the announcement of the great initial auction sale of useful florists' material by Wm. Elliott & Sons, which appears on another page of this issue. Drop in and see how his throat holds out.

Mr. C. L. Washburn of Bassett & Washburn of Hinsdale, Ills., will take a vacation at his summer home in northern Wisconsin, accompanied by his son.

### Bostrom Improved Builders' Levels and Farm Levels

For Park, Cemetery or Landscape Gardening use, take the place of expensive Engineering Instruments. Simple in construction, easily adjusted, more substantial and less cumbersome than the more elaborate and complicated instruments. Practical, up-to-date instrument that any one can use. Write for descriptive circulars and be convinced that this Level is necessary to complete your outfit. Builders' Level \$25.00. Farm Level \$15.00.

## NEWS NOTES.

The business of the late Mrs. Mary LaFever of Eaton Rapids, Mich., will be carried on under the name of the Mary LaFever Floral Co.

N. C. Moore & Co., of the Flower Growers' Market, Chicago, have opened up business again for the fall season. This company will go extensively into plant growing.

Wm. W. Abrahamson for eight years with E. H. Hunt has opened up a florists' purchasing agency at 21 Wabash Ave. So far as we know Mr. Abrahamson has the only place of its kind in Chicago.

The Greater New York Florists' Association are open and ready for business at 162 Livingston street, Brooklyn. This company is organized on rather unique lines being composed entirely of retail florists or growers who do a retail business and who, because of their interest as stockholders, are expected to do the bulk of their buying from the company. The building occupied is two stories with cellar, the latter being well adapted to the storing of flowers. George W. Crawbuck is manager.

## BUSINESS CHANGES.

Ashley & Huebner succeed S. H. Ashley at New Bedford, Mass.

The Florists' Wire Design Co. will locate at 131 E. 3rd street, Cincinnati, O.

Adolph Wethekam succeeds R. Rees in the greenhouse business at Aurora, Ill.

Slack & Butterworth are the successors of Gunnar Teilman at Marion, Ind.

Chas. F. Swager, Cheyenne, Wyo., will move his business to a location nearer the boulevard.

Edwin Hay has purchased the retail business of the Kelley Floral Co., 627 King's Highway, St. Louis, and will conduct it under the name of Grosvenor Gardens, with J. H. Kenthaw, manager.

Is Your Name In The Above  
List? If Not, Why Not?

NOW IS THE TIME TO USE

## DREER'S Peerless Glazing Point

(Improved Van Reyper Perfect)

Made of Galvanized Wire and Will Not Rust

This point has common sense features of practical value that appeal to practical florists and are possessed by no other point. The only double point with

### BOTH BEVELS ON SAME SIDE

A point made on any other principle will twist in driving and cramp or crack the glass. **Dreer's Peerless Glazing Points** will never work out. Drives true and holds firmly by one blow of hammer or chisel. May be easily removed and used again in case of re-glazing. 1000 sufficient for 500 lights. Box of 1000 points 75c, postpaid. 5000 points by express for \$2.75.

### IF YOU ARE BUILDING

Let us know the thickness of glass you intend using and we will send samples of the size point needed.

**HENRY A. DREER, 714 CHESTNUT ST., PHILADELPHIA, PA.**

### DON'T EXPERIMENT

USE

## To-BAK-INE

and your stock will be  
free from insects, clean,  
and the blooms will not  
be discolored.

Send for full  
information of

**H. E. FISKE SEED CO.**  
13 Faneuil Hall Sq., Boston, Mass.

**STUMPP & WALTER CO.,**

1018 Market St., Philadelphia.

**E. H. HUNT, Gen'l Agent,**  
76-78 Wabash Ave., Chicago.

### NEWS NOTES.

The Ill. Malleable Iron Co., Chicago, is preparing to erect a large six story building to increase its present capacity for manufacturing boilers, etc.

Joseph P. Brooks, who for some time has rented Geo. Harris' greenhouse at Morton Grove, Ill., has now completed three large carnation houses. The new houses are also at Morton Grove.

Michael Angelsberg, for 12 years foreman of Calvary Cemetery Association of Chicago, has completed a range of six modern houses at the corner of Oakton and Railroad avenues. He will grow flowers for cemetery use and place the balance on the Chicago market.

## Why My New Curved Iceless Eave is Far Superior to Anything on the Market Today

- 1st. No sash bars incased in iron, thereby eliminating all danger of bars decaying.
- 2nd. Can be used in conjunction with iron frame construction, thereby doing away with that very objectionable feature, "columns."
- 3rd. Roof bars with drip grooves, which act as conductors to carry away the condensation: Result, the driest roof ever used for greenhouse purposes.
- 4th. **THE MOST IMPORTANT OF THEM ALL.** The very small increase in cost over the ordinary style of construction which makes it possible to be used for commercial as well as private purposes.

**William H. Lutton,** Horticultural Architect and Builder  
West Side Ave Station (C.R.R. of N.J.) Jersey City, N.J.

# A WONDERFUL NEW NEPHROLEPIS

## Nephrolepis Superbissima

INTRODUCTION OF 1908

**W**E desire to call attention to this new fern, which originated with us and which we are introducing this year. It is a **very unique and distinct novelty** — as distinct from *Nephrolepis Piersoni* and *Piersoni elegantissima* as they were from *Bostoniensis*. It is in fact a complete break. The fronds are very heavily imbricated, the pinnae overlapping, making the fronds very dense and compact.

It differs from the other *Nephrolepis* not only in form, but also in color, being a **richer and darker green** — entirely different from the yellowish green of all the other *Nephrolepis*. The plant is very sturdy in its habit, the fronds never breaking down.

While a photograph shows a similarity to its predecessors, it is absolutely distinct, not only in the formation of the fronds and color, but also in its habit and general characteristics. It makes a much more dwarf and compact growth, the fronds being very dense, firm and rigid, and having a great deal more substance, so that it **will stand more knocking around than any other fern of this type.**

It is a sterling novelty. Experts who have seen it consider it by far **the best fern ever sent out.** It is a plant that needs to be seen to have its great value and sterling qualities appreciated. It really is not in the same class with the other varieties. It was awarded a

### ... FIRST-CLASS CERTIFICATE ...

by the Royal Horticultural society at Crystal Palace in London, November, 1907, the plants exhibited there having been shipped from New York two weeks before that time. After being exhibited in London, the same plants were shipped to Edinburgh, Scotland, where they were again awarded a first-class certificate by the Scottish Horticultural Society. This will indicate the value of the plant as a novelty, and also demonstrates in a very conclusive manner its fine keeping and shipping qualities. We have just begun shipping advance orders, and new orders can now be shipped immediately on receipt.

Fine, strong plants, 2¼ inch pots, \$5 per dozen, \$35 per 100; 4 inch pots, \$7.50 per dozen, \$50 per 100; 6 inch pots, \$1.50 each, \$15 per dozen.

**F. R. PIERSON CO., Tarrytown-on-Hudson, New York**

# Horticulture at the Franco-British Exhibition

NO. II.

THE FRENCH GARDEN

We should be sorry to offend the susceptibilities of our fellow countrymen but *magna est veritas, et praevalerebit*. The French garden at the Franco-British Exhibition is unquestionably the finest bit of horticultural work there and a complete contrast to the so-called English garden of which a few notes will be sent later on. Although the Elite gardens are entirely made up of exhibits from Frenchmen the one now under consideration is specially known as "the French Garden," it having been designed and laid out by M. Vacherot, the head gardener to the City of Paris and the horticultural superintendent of the Paris 1900 International Universal Exposition. We offer him here our sincere compliments on his talent which has been ably supported by the exhibitors.

As we leave the Elite gardens we pass under the archway by the side of the Restaurant Paillard, cross the Avenue of Progress and find ourselves in front of a large open space of rectangular form flanked on three sides by the Machinery Halls. A middle path runs from one end to the other, and right and left is a series of geometrical beds and borders laid out with consummate taste and skill. As we enter we find on our right and left two large sunken gardens planted by Vilmorin Andrieux & Co. in the choicest style. They are both identical and a description of one will answer for the other. Each is thirty-eight yards in length by nine yards in width. At intervals on the garden level are huge stone vases on pedestals filled with flowering plants, ivy-leaved pelargoniums and the like. On the inside is a semi-circular stone balustrade occupying the middle half, which is continued to each end by a narrow flower box planted with tropæolums, marguerites, petunias, ageratum and the like. The sides and ends of this sunken garden have grassy slopes upon which have been cut out borders in the form of garlands connected at the end by little circular beds. The garland borders are planted with *Begonia gracilis rubra* and the little connecting beds with bright golden French marigolds. Access to the lower level of the sunken garden is obtained by a flight of steps at intervals, each of which is flanked with zonal pelargoniums and other brightly colored flowers in quantity. On the lower level there is just sufficient gravel path to allow the visitor to inspect the floral design that is cut out on a flat green turf lawn. A most artistic combination of scrolls and fleur de lys comprises the design which at a little distance looks like a handsome piece of carpet bedding. *Begonia gracilis rubra*, and several others are freely employed to fill the design and blue lobelia in quantity heightens the color effect in a most amazing manner. There are at intervals some fine palms and other ornamental plants which lend an indescribable grace to this high class work of floral art. On the inner side immediately beneath the semi-circular stone balustrade is a little pond filled with water lilies and other aquatics by M. Lagrange.

We mount the steps and again find ourselves on the ground level of the French garden. Proceeding further

down we notice Geo. Bruant of Poitiers has some of his zonal pelargoniums and other flowers in two triangular beds. Away in the distance vases, statuary and fountains are plainly visible to lend a charm and vary the design of the ground plan forming the garden. We pass a sunken garden of circular form the sloping grassy sides clothed with ivy-leaved pelargoniums and the bottom planted with a bed of scarlet zonals and blue ageratum. Around it is a path and beds shaped to fit the circle. Ad. Rothberg has standard and small bush roses in great profusion, so too has Louis Leroy of Angers. Leon Pain has two large lots in horse-shoe beds.

Leveque and Son of Paris exhibit roses a little further down towards the middle. Very fine are Mildred Grant, Mme. Hoste, Suzanne Marie, Prince de Bulgarie, Rosel Klein, Souvenir du President Carnot, Papa Lambert, Mme. Abel Chatenay, Paul Olier, etc.

Another important exhibit in the form of a hollow square comes from Cayeux and Leclerc. A lawn is in the middle and a path between that and the outer edge. Various flowers for culture in the open are here displayed. The same exhibitors stage shrubs in two lots. *Ilex marginata alba*, *Magnolia grandifolia* Exmouth, *Osmanthus illicifolius*, are alternated with foxgloves, funkias, *Anemone Japonica*, *gaillardias* and others.

At the four corners of the middle of this garden caused by a transverse path Abel Chatenay has planted standard and bush formed lilacs in large numbers. Further on towards the end where the outer lawns bend inwards and enclose a water fountain with aquatics shown by M. Lagrange are two groups, one on each side of the entrance, by Croux and Son. These comprise some fine examples of ornamental trees and shrubs, *Enonymus radicans* Silver Gem, *Prunus Pissardi*, *Phillyrea media*, *Cornus Siberica elegantissima*, *Buxus sempervirens compacta*, *B. aurea compacta*, *Negundo elegans foliis marginatis*, *Cedrus Atlantica cœrulea* are the most effective.

Auguste Nonin's two lots bring us to the end. He has two long borders running round the edges of a couple of quaintly shaped grass lawns. The planting of these consists of *Calceolaria Triomphe du Nord*, *Impatiens Oliveri*, *Anthemis floribunda*, *Hydrangea arborescens grandiflora*, *Fuchsia Robt. Blabry* and *F. Ernest Renan*, *Lobelia Deanville*, *Plumbago cœrulea*, *Heliotrope Mathilde Cremieux*, *Lantana Soliel d'Or* and a host of others.

Charman Payne

## Home Grounds of a Working Gardener

The pretty view used as a cover illustration this week was taken in the home grounds of J. H. Troy at New Rochelle, N. Y. It tells its own story and needs no description for the class of readers reached by HORTICULTURE. No better evidence of a man's capability in gardening can be given than may be found about his own home. It is the sort of object lesson which stimulates emulation and inspires confidence that the owner can be trusted to do creditable work elsewhere. The florist or landscape gardener cannot devise a more effective advertisement than to set forth in his place of business and around his home, so far as the available room will permit, the very best that his art can produce.

quet tables. The exhibition had been the greatest effort of the Society. Their own hall not being large enough Faneuil Hall had been secured for the show which had been truly magnificent and the company brought together by this brilliant event was a most notable one. Marshall P. Wilder sat in the chair as President of the Society. Among the many men about him who had already or who in later years did make for themselves world-wide renown in literature, art or statecraft, were Hon. Robert C. Winthrop, Josiah Quincy, William H. Seward, Gen. Dearborn, Prof. Joel Parker, Epes Sargent, Andrew J. Downing and accredited representatives from many sister societies including the Pennsylvania Horticultural, New Bedford Horticultural and Delaware Horticultural. All these guests and many others made brilliant addresses. The old "Cradle of Liberty" was lavishly decorated for this memorable occasion. Walls and columns were draped and festooned with green and beautiful sentiments from those of the poets who most loved nature and the garden were tastefully embroidered on the walls and time-honored names of botanists, horticulturists and naturalists shone on transparencies along the galleries. An ode was written for the occasion by Mrs. Sigourney and a song also composed for the event by Epes Sargent was sung. Of the latter we quote three stanzas:

"The Winter chill has pleasures still,  
And Spring is fair to see;  
In Summer's heat the groves are sweet,  
But Autumn bold for me!  
With Vine-Leaves on his honest brow,  
And Harvests in his arms,  
He comes, with all of Winter's cheer,  
And all of Summer's charms!

*Chorus*—For there's nae luck about the house,  
There's nae luck at a',  
There's little pleasure in the house,  
If Woman is awa'.

The Flowers and Fruits that deck our board,  
To her a tribute owe;  
From her the Rose steals all its bloom,  
From her the Peach its glow;  
The Lily in her purity,  
May see its own eclipse;  
And where did Cherries take their red,  
If not from Woman's lips?

*Chorus*—So there's nae luck, etc.

The purple bloom upon the Grape,  
The Violet's modest hue,—  
Who does not see they've borrowed, both,  
From certain eyes of blue?  
And if the Orange Flower is sweet,  
And if the Hyacinth fair,  
Will any one their lovely tints  
With those we sing compare?

*Chorus*—So there's nae luck, etc.

The eyes of blue of those days and the tongues that sung of their charms have long since turned to dust but the good work still goes on and Horticulture in its most comprehensive sense is still "the Fine Art of common life, distributing its productions with equal hand to the rich and the poor and adorning the humble home as well as the palace, and the humble hearts which it refines and elevates," as no other art can do.

Just sixty years ago—on the evening of September 22, to be exact—the Massachusetts Horticultural Society celebrated the close of its twentieth annual exhibition with a fete at Faneuil Hall, Boston, in which over five hundred ladies and gentlemen sat down to the ban-

An  
anniversary

The dahlia is now in the zenith of its blooming period and in all floral exhibitions occurring about this time the gorgeous many-hued flowers occupy the greater part of the space and, we might add, do it creditably. Of new varieties there is no end and, although some advancement is being made on all the various types on which breeders are working, yet it would seem that in the case of the old show and pompon sections the limit of progress in size, form and color had been about reached. The New England States especially abound in dahlia specialists and it is in this section that the greatest popular enthusiasm exists. The growers are in evidence at all the fairs, the number of named varieties shown by each running far into the hundreds and the boast that at a recent exhibition no less than fifteen hundred varieties were staged is not likely to be gainsaid. That three-quarters of this unwieldy accumulation of varieties might well be dispensed with is undoubtedly true and the sooner the dahlia worshippers commence the weeding-out process the better it will be for their idol.

As a decorative feature of the garden the dahlia has some serious limitations. It must have more attention than the ordinary garden owner is disposed to bestow on his plants, otherwise it is not a particularly attractive object. Its coarse habit of growth, late time of flowering and liability to destruction by early frosts stand against it. As a flower for table decoration, however, for mantels and vases and many other uses in the hands of the florist it possesses qualities which no other flower can rival. Yet, here again, it is at a great disadvantage through blooming at a season when the florist has very little of this sort of work to do and, being dependent entirely upon fickle weather conditions for a supply of dahlia flowers he is prevented from planning ahead for their conspicuous use in any large decorative work. Today, dahlia flowers may be had by the ton weight; tomorrow, blackened and limp, they are down and out and this is one reason, insurmountable thus far, why the dahlia makes so little progress as a commercial florists' staple.

## "My Maryland" and Its Home

When speaking about the several roses to be tried out this year the one which, above all others, is spoken of with unlimited praise is My Maryland. While it is yet too early to say anything definite about the new sorts for this season we can find many promising indications of the popularity of this rose.

A visit to the greenhouses of Mr. John Cook, the originator of My Maryland, is time well spent for all

lovers of roses. Mr. Cook has a neat range of glass situated in a pretty locality in the suburbs of Baltimore. The grounds around his home are very well laid out and he has an ideal home where he can take comfort in his life and his work among his pets.

While walking through the houses with Mr. Cook as a guide one is sure to be interested every step of the way. There are a number of new roses in all stages from first-year trials to those which have been watched for a longer time, and while there are several which show good points, it is not possible at this time to say much definitely concerning the final results. One of his new ones, however, gives a very good impression and it is possible that we may hear from it later on. It is a red one, not too deep, but having plenty of life and the bud is of good size and substance. As seen several weeks ago the habit of the plant was very good and we believe that there are indications now which may lead us to expect to hear from this variety favorably.

My Maryland stands at the head of all varieties which are found growing here. The plants were all in excellent shape, having clean foliage and a very healthy and vigorous growth. There were but a very few being allowed to bloom, but those which we saw were indeed handsome specimens, having good stem, size and coloring, considering the time of the year. One point which stands out very prominently with this rose is its excellent color during all seasons of the year. The excessive summer heat seems to have little effect upon it.

This variety seems to be a very easy grower as it is not subject to any extent to mildew or black-spot, nor does it throw many deformed buds. It is a liberal feeder and wants plenty of water. As seen growing in both light and heavy soils it would seem that it is not at all fussy in either of these, but seems to be ready to grow under all reasonable conditions. On all places where we have seen My Maryland growing, we have found it thus far giving encouraging indications for this winter's work, and it is to be hoped that it is with us to stay.

*Louis J. Peubar*

## Scale of Points for Floral Arrangements

Secretary Dysinger of the Minnesota State Florists' Association transmits to us the following query:

"When floral arrangements such as designs, bouquets, table decorations, etc., are exhibited in competition and judged by points, what is the proper scale of points to use?"

We shall be glad to have the views of our readers on this. Very little of a practical nature on this line has been published hitherto. We should like to hear from anyone having knowledge of the use of a scale of points on any occasion in judging floral arrangements or anyone having suggestions to make as to the qualities that should be given a place in such a scale.

# NEWS OF THE CLUBS AND SOCIETIES.

## SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

### Freight Concessions on Cut Flowers.

At the Niagara Falls Convention the subject was brought up of express rates on cut flowers going from North to South, and in general shipping where ice is necessary in warm weather. This matter was referred to the legislative committee and the papers that were read at the session of the Convention have been forwarded to me. The papers so far received are of such general character that in their present form little can be done with them. In shipping fish from a Hudson River point to New Orleans by express, there would be an allowance of 25 per cent. on the gross weight for ice, and after this deduction the charge per hundred weight is \$3.00; on the other hand, if cut flowers are sent no deduction is made for ice but \$4.50 is charged per hundred weight.

What should be done is the revision of classification for long distance shipments. From New York City to Chicago the rate for fish is as follows: 25 per cent. reduction for ice from the gross weight and \$1.90 per hundred weight for the remainder. Over the same line and in the same car a box of cut flowers would go at the rate of \$2.50 gross weight, and at the present time it seems that this is a fair sample of differential charges. What the legislative committee would like is explicit information from any person directly interested and having any experience, as to quantities shipped from given point to given point, over what line, and the weight of the package. I have been speaking with an express manager and he tells me that fish as a commodity is heavy and that flowers for the same cubic space are light, and that where 100 pounds of fish would be in a box, 25 pounds of cut flowers would make a bulk package, and these freighted by weight do not yield the revenue that heavier and coarser goods do. Mr. Edward Reid of Philadelphia has pressed this matter at some length and the committee will endeavor to get the cases into such form that, acting for the S. A. F. as a body, this matter may be laid before the Express Companies' headquarters, where it may receive fair consideration.

BENJAMIN HAMMOND,

Chairman of Committee.

Fishkill-on-Hudson, N. Y.

### The National Flower Show.

Press day for the final edition of the premium list is October first, and before that date all special premium offers which go into this list should be in the hands of the secretary. A list will be published in this book of all subscribers to the guarantee fund who have paid the first assessment, and those who have not paid by October first will be dropped from the list of the guarantee fund by order of the Executive Committee. All who have overlooked paying the 20 per cent. are urged to send their checks to the Treasurer at once. A meeting of the Executive Committee has been

called by Chairman W. F. Kasting to take place in Chicago, Sept. 25. Important matters will be decided, and those members who cannot attend will send in reports to be acted upon.

Very truly yours,

J. H. BURDETTE.

### CHICAGO FLORISTS' CLUB.

A special meeting of the Chicago Florists' Club was called for Friday, Sept. 18th. Its object was a conference with the executive committee of the National Flower Show, but a telegram was received announcing that Mr. Kasting of Buffalo, chairman of the Committee of Fifty, could not be present. No business was therefore transacted other than an informal discussion of the coming show. A great deal of enthusiasm was shown and Pres. Leonard Kill says the members of the Chicago Florists' Club are ready to do their part in making this the best flower show ever held here, which he feels confident it will be. There was a large attendance and much interest shown in the discussions. Mr. Rudd stated that he thought there would not be sufficient room at the Coliseum for properly staging the plants and flowers. It is generally understood that there will be no trade exhibit in connection with the flower show.

### MINNESOTA STATE FLORISTS' ASSOCIATION.

The Minnesota State Florists' Association met on Sept. 15, at Columbia Hall, Midway.

The list of officers as elected for the ensuing year is as follows:

President, Theodore Wirth; vice-president, August S. Swanson; secretary, S. D. Dysinger; treasurer, E. C. Nagel; executive committee, Otto Will, Olaf Olson, James Sanden, J. Jorgenson.

The president was authorized to appoint a committee of five to work out a premium list and attend to matters in general pertaining to the State Fair.

Messrs. Olson and Howland of St. Paul and H. Will and Ruedlinger of Minneapolis are to organize bowling teams in their respective cities. F. J. Mense, of Glen Cove, N. Y., was made an honorary member.

### AMERICAN CARNATION SOCIETY.

#### List of Varieties.

We have received from Secretary A. M. Herr a typewritten list of between eight and nine hundred names of varieties which is probably intended to give a fairly complete list of carnations that have been given names in this country for the past twenty-five years, so far as such could be obtained. We have, however, some doubts as to its value in its present shape, seeing that such well-known varieties as Fair Maid, Mrs. M. A. Patten, Bay State, Helen Goddard, Glendale, Hannah Hobart, Jessica, John E. Haines, White Perfection, Cressbrook, Daheim and Norway and others of lesser note seem to have been overlooked, as they do not appear in the list.

## NEW ORLEANS HORTICULTURAL SOCIETY.

The regular meeting of the New Orleans Horticultural Society was held Thursday, Sept. 18, R. Steckler presiding. J. A. Newsham of the Magnolia Nursery, had rare results of his recent visit to the tropics to show the association. He exhibited two fine specimens of *Odontoglossum grande*, from Guatemala, and *Cattleya Bowringiana*, from British Honduras. Mr. Newsham grew the specimens in his nursery from the plants taken from the tropical countries. He now has 5,000 of the plants in flourishing condition.

Messrs. C. Eble and H. Papworth gave an interesting description of their trip to the S. A. F. Convention at Niagara Falls. President Steckler made his usual gratifying report to the effect that the Society was in a healthy and flourishing condition. The New Orleans Floral Society, through Mrs. B. Williams, sent a check for \$16.95, as that society has decided to disband. Secretary Chas. R. Panter was instructed to write to Mrs. W. J. Behan, the President of the Society, thanking her.

Mr. Newsham resigned as chairman of the arrangement committee of the flower show because of press of business and Mr. Papworth was appointed to succeed him, with Chas. Eble as vice-chairman. The committee on the fall flower show and the committee on the floral exhibit reported satisfactory progress.

The resignation of W. P. McLennon was accepted and the following new members elected: John Herne, H. A. Steckler, and M. J. Gurtler.

CHAS. R. PANTER, Sec.

## NEW ENGLAND DAHLIA SOCIETY.

The prizes were awarded to some twenty-five competitors in the various classes at the exhibition in Boston on which we made a partial report last week. In the seedling competition, "Award of Recognition" was made to W. W. Rawson & Co. for Cactus Dahlia Marblehead and to Wm. H. Richardson for Cactus Dahlia Marion. The Symonds special prizes for 25 assorted were won by W. F. Turner & Co., Dorchester Dahlia Gardens, and F. L. Tinkham. The Amend special for best American seedling was won by George B. Gill. The Manuel prizes for twelve Duke Alexis and twelve Countess of Lonsdale were won by E. W. Ela and Dorchester Dahlia Gardens respectively, the Stredwick prizes for twelve Cactus by N. A. Lindsay and E. F. Dwyer, the Rawson, Michell and Burrell prizes, also the German Dahlia Society's medal for Cactus Dahlias of German origin and the Dobbies medal for the most successful exhibitor, were all taken by W. F. Turner & Co., and the Charmet medal for twelve French went to E. S. Manuel. Henry A. Dreer was given "Honorarium" for his new Show Dahlia Dreer's White. In the regular classes, the above named, also Ed. Lefavour, W. P. Hayden, Johnson & Hall, W. H. Symonds, J. K. Alexander, A. L. Brown and H. F. Burt were the principal winners. Many classes were not competed for.

# TO ALL USERS OF Hardy Ferns and Galax

OWING to unfortunate experience in handling the usual brand of storage ferns and galax we have arranged to handle these specialties direct and store in large quantities and under improved processes. We have already stored several millions of selected ferns and are now prepared to contract for delivery during the coming season of **Best Quality Hardy Ferns, Fancy and Dagger, and Galax Leaves of Highest Grade, Bronze and Green, at Bed Rock Prices According to Quantity Taken.** Write to us before ordering elsewhere and we think we can interest you in our proposition.

**N. F. McCARTHY & CO.,** Largest Shippers of Florist Supplies in New England  
84 Hawley Street, Boston, Mass.

## MORRIS COUNTY GARDENERS' AND FLORISTS' CLUB.

The Morris County Gardeners' and Florists' Club resumed business at the old stand, after the usual summer vacation, on Sept. 9th. President Herbert occupied the chair, and about 35 members were present. Mr. Herbert was requested to tell of his impressions of "Abroad." He responded with a very interesting discourse, and amusing anecdotes of his travels. Flower show discussion was in order and ways and means were fully thrashed out. Prospects for a good show look bright, but as yet we cannot put our finger on who goes in this class or that; everybody is watching and waiting. We look for quite some outside competition, as there have been many requests for schedules. This is just what we want. We should like to fill the hall with exhibits and treat our patrons to a good show, and let the best man win the prize. The class for 100 blooms of carnations in four varieties, \$25.00 one prize, and the Foote prize, open to all, ought to bring us somebody from afar off.

E. R.

## MONTREAL HORTICULTURAL SOCIETY.

The Montreal Horticultural Society (Can.) held its flower show at Lyric Hall, September 11, with larger and more artistic displays than ever before. President R. Wilson Smith addressed the gathering, stating that the society was the third oldest of its kind in the world. The principal prize-winners were:

F. C. Smith, gardener to Sir William Van Horne; W. J. Wiltshire, gardener to Mr. R. B. Angus; G. Vrengde, gardener to Mr. C. M. Hays; G. Trussell, gardener to Mrs. J. H. R. Molson; R. Burrows, gardener to Mr. R. B. Angus; Mrs. Edgar Johnstone; E. J. Haywood, gardener to Mr. J. Brecky; Chaudiere Mills; J. Luck, gardener to Mr. R. B. Gordon; Cote des Neiges; E. J. Hayward; C. A. Smith, gardener to Miss Dawes, Lachine; R. W. Shepherd, Como; R. Jack and Sons; Ignace Morand, Notre Dame College; T. Pewtress; T. W. Burdon; F. S. Watson, Lachine; John Stewart, Westmount; T. J. Church, Lachine; A. H. Cooke, Outremont; J. Bate, St. Lambert; George Bate; W. H. Scharf, Chateaugua; Hall and Robinson; Mr. Gamble, gardener to Mr. W. Currie, Lower Lachine Road.

### NEW LONDON COUNTY HORTICULTURAL SOCIETY.

The flower show of this society held on September 19, at Norwich, Conn., was a success both in exhibits, the twenty-nine classes scheduled being all well filled—and in attendance. Otis B. Chapman staged over 600 varieties of dahlias, among which the new Charles Lanier was pre-eminent; Alex. McClellan had a large display of single seedlings; J. J. Kennedy, C. A. Norcross and A. W. Pierson also had large dahlia exhibits; B. H. Tracy and John Lewis Childs showed magnificent gladioli; W. J. Schoonman fine asters. Other exhibitors were, Mrs. W. C. Lanman, gardener C. T. Beasley; Mrs. F. L. Osgood, gardener F. Shea; S. A. Gilbert; W. W. Ives; Alfred Mitchell, gardener August Neuman; George S. Palmer.

### CLUB AND SOCIETY NOTES.

The Vermont Horticultural Society is planning to hold its annual meeting at Montpelier in November.

The New Hampshire State Horticultural Society will hold a three days' meeting at Milford, opening October 20.

The Kentucky State Horticultural Society held its annual meeting at Louisville Sept. 16, on the State Fair ground.

At the Michigan State Fair held the week of Sept. 7 the Pontiac Floral Co. secured first prizes on roses, carnations and floral designs.

The Minnesota State Florists' Association of St. Paul has incorporated, with Theodore Wirth, S. D. Dysinger, R. A. Latham, A. S. Swan and E. Nagel as incorporators.

The California State Floral Society met on Sept. 11 in San Francisco. Wm. Kettlewell exhibited some 200 varieties of dahlias and spoke enthusiastically on their cultivation.

The last Detroit Florist Club meeting was mainly devoted to a discussion of the constitution. The latter is being rearranged by a committee of three—Messrs. Maynard, Dilger and Brown.

The San Diego Floral Association (Calif.) met on Sept. 8. A. D. Robinson spoke instructively on his method of raising asters, of which he showed a fine array, and Miss Kate Sessions followed with interesting remarks.

At a meeting of the State Floral Society, Little Rock, Ark., on Sept. 17, C. W. Dickinson of E. H. Hunt, Chicago, and C. H. Hume, of Memphis, were elected judges for the November flower show. Upwards of \$3,000 is offered in prizes.

The Tri-City Florists met with Harry Bills, Davenport, Ia., on September 10 and listened to talks on the new carnations by J. T. Temple, Theo. Ewoldt, and Emil Boehm. Bulb culture, the regular topic for the evening, was most interestingly handled.

The Rhode Island Horticultural Society's exhibit at Providence on September 8 and 10 presented a fine array of dahlias and asters, with attractive seedlings of carnations. Mrs. H. A. Jahn, Geo. H. Walker, W. Tar-

box, N. D. Pierce, John Lewis Childs are the familiar names among the exhibitors of flowers. Fruits and vegetables also were temptingly displayed.

The annual meeting and election of officers of the New England Dahlia Society was held in Boston on September 17. Officers were chosen as follows: President, William F. Turner, New Bedford; vice-president, Henry Kendall, Newton; secretary, Maurice Fuld, Boston; treasurer, N. Allen Lindsay, Marblehead; executive committee, E. W. Ela, Woburn; George H. Walker, North Dighton; Theodore H. Tyn-dall, Boston; J. P. Bodge, Fall River; W. D. Moon, Lynn.

### COMING EVENTS.

Boston, Mass., Massachusetts Horticultural Society, exhibition of fruits and vegetables, Oct. 10, 11; Chrysanthemum show, Nov. 6, 7, 8, 9.

Menlo Park, Calif., Menlo Park Horticultural Society, exhibition, Oct. 15.

San Rafael, Calif.—Marin County Horticultural Society, flower show, Oct. 17.

Pasadena, Calif., Pasadena Gardeners' Association, exhibition, Oct. 22, 23, 24.

Lenox, Mass., Horticultural Society, chrysanthemum show, Oct. 28, 29.

Madison, N. J., Morris County Gardeners' and Florists' Society, exhibition, Oct. 29, 30.

St. Louis, Mo., St. Louis Horticultural Society, November 3-6.

Hartford, Conn., Connecticut Horticultural Society, chrysanthemum show, Nov. 3, 4, 5, Unity Hall.

Shreveport, La., State Fair, November 3, 4, 5.

Worcester, Mass., Worcester County Horticultural Society, annual meeting, Nov. 4; chrysanthemum show, Nov. 12.

Red Bank, N. J., Monmouth County Horticultural Society, show, Nov. 4, 5.

Tarrytown, N. Y., Horticultural Society, show, Nov. 4, 5, 6.

Glen Cove, N. Y., Nassau County Horticultural Society, Oct. 14, Dahlia show; show, Nov. 5, 6.

Chicago, Ill., National Flower Show, Society of American Florists, Nov. 6-14.

New Haven, Conn., New Haven County Horticultural Society, show, Nov. 10, 11, 12.

Philadelphia, Pa., Pennsylvania Horticultural Society, annual exhibition, Nov. 10, 11, 12, 13, Horticultural Hall.

Toronto, Ont., Ontario Horticultural Society, exhibition, Nov. 10-14.

Little Rock, Ark., State Floral Society, show, Nov. 10-25.

New York, N. Y., American Institute of New York, chrysanthemum show, Nov. 11-13, Berkeley Lyceum Building.

Denison, Texas, Denison Civic Improvement League, show, Nov. 11, 12, 13.

Washington, D. C.—American Association of Farmers' Institute Workers, Nov. 16, 17.

New York, N. Y., Horticultural Society of New York, annual exhibition, Nov. 17, 18, 19.

### CORRECTION.

In notes on British Horticulture, issue of September 19, for "Tritoma" read Tritonia (Montbretia).

### SCHOOL EXHIBITIONS.

Fairview School, Yonkers, N. Y., annual show, Sept. 12.

N. Brookfield, Mass., Town Improvement Association, awarded prizes to school children on Sept. 13.

Colorado Springs, Colo., Columbia school, flower show, Sept. 11.

West Medway, Mass., products of school gardens under the auspices of the Improvement Society, Sept. 16.

The Outdoor Art and Improvement Association, Milwaukee, Wis., awarded gold and silver medals for exhibits at the annual show on Sept. 17-18.

The garden work of the school children of Providence, R. I., closed with an exhibit in Roger Williams Park on the 19th inst.

The children's garden work was a feature of the exhibit of the Houghton Horticultural Society, Lynn, Mass., Sept. 16-17, many new schools participating this year.

At Waltham, Mass., 786 children competed for prizes, and 14,654 packets of seed had been sold. The exhibition was held on Sept. 17; \$75 was distributed in premiums.

The exhibit of the Highlands school, Holyoke, Mass., on the 19th, was the best and largest they ever made.

### FAIRS AND NEIGHBORHOOD SHOWS.

The Woman's Club of Reading, Mass., held its annual flower show on the 16th and awarded prizes in the children's garden contest.

"The Herald" of Salt Lake City, has conducted a "Yard Beautiful" contest this season with most gratifying results. The conclusion reached is that the offer of cash prizes acted as a decided stimulus.

At the Clinton, Mass., 20th annual fair, Sept. 15, exhibits of orchids by Messrs. Thayer, decorative plants by E. W. Breed, chrysanthemums by H. F. A. Lange, gladioli by B. H. Tracy and dahlias by J. L. Moore were attractions.

"The Dispatch" of St. Paul, Minn., held its second annual aster show recently. Evidently it was not confined to asters, as an exhibit of dahlias received most favorable comment. Holm & Olson, L. L. May & Co. and other florists lent their aid in decorating the hall, and Messrs. Olson and May were judges.

### AN INTERESTING CARNATION OUTLOOK.

A. Roper, the raiser and introducer of that most useful carnation Fair Maid and the superb Bay State, which is to be disseminated this season, has an unusual number of sensational varieties among the seedlings of 1908. One of these, a scarlet progeny from a scarlet seedling crossed with Victory, is of a most dazzling color. Mr. Roper regards as noteworthy the fact that every plant from this cross came true to color. His seedling which was one of the parents came from an unbroken line of reds for several generations back. Victory's ancestry has not so far as we know, ever been given. Although he had fewer seeds than for a number of years back, Mr. Roper regards the results as the best he has ever had.

**THE BAY STATE NURSERIES, North Abington, Mass.**

### HARDY PLANT NOTES.

*Nierembergia rivularis* is worthy of more general use as a rockery or Alpine border plant. Its handsome white saucer-shaped flowers are produced continuously throughout the season.

*Acer Ginnala*, one of the Tartarian maples, is one of the most striking features of the late summer landscape with its brilliant red foliage. When in this condition none of the Japan maples can approach it in beauty and it has the advantage of being hardy everywhere.

Among the interesting things seen in the herbaceous grounds of the New England Nurseries at Bedford, Mass., on a recent visit to that place was a large plat of *Dianthus semperflorens*, a hardy border variety, variously colored and blooming more or less freely all through the summer.

### "A ROSE IN EVERY GARDEN."

A very practical paper for the instruction of the amateur in rose growing, written by L. J. Farmer of Pulaski, N. Y., is being widely disseminated by the German Kali Works, whose products have done so much to promote successful gardening. Mr. Farmer warns the public against the job lot rose plants that are offered at the five and ten cent department store counters which he says are the refuse of the rose nurseries. Regarding fertilizers he recommends the use of a high-grade fertilizer rich in nitrogen to induce vigorous growth and in potash and phosphoric acid to bring out a large crop of flowers. A grade analyzing 4 per cent ammonia, 10 per cent potash and 10 per cent phosphoric acid applied in the quantity of a spoonful to each plant and well-distributed in the soil to the distance of a foot around each stem is advised.

## NATIONAL DAHLIA SOCIETY.

The annual show of this well-known society took place in the Horticultural Hall, Westminster, London, on September 3rd. There was the usual display in the competitive classes for cut blooms and in addition there were some fine exhibits of cut dahlias in vases and baskets. The schedule provided 47 classes divided into sections for nurserymen, amateurs and open to all. The requirements in the various classes vary from 3, 6, 9, 12, 15, 24 to 48 cut blooms with prizes in proportion varying from certificates, sums of cash and medals, to a handsome silver challenge cup, value \$78.00.

The grandest displays of course came from the great trade exhibitors and there were several that occupied an immense space round the side walls of the hall. Dobbies of Rothsay had a grand lot staged in exquisite taste comprising all sections; Pompons, Cactus, Single Cactus, and the old double forms were well represented. Cannell & Sons had a fine lot close by, including Cactus and Decoratives of fine form. Emberson had also a good table neatly arranged. Pompons and Cactus of surpassing merit were well shown with ferns in front, the latter being effectively staged in the back row.

T. S. Ware & Son had a grand lot of the Giant form which were remarkable for size. Cactus and Pompons were very numerous. Hobbies, Ltd., had a collection of the Giant decorative race, Cactus, etc., set up with ferns and *Isolepis gracilis* in quantity; a fine display worthy of more space than is at our disposal. J. T. West was another large exhibitor; Cactus in enormous quantity and variety; Pompons also. Among other exhibitors such well-known names were noticed as Keynes, Williams & Co., J. Cheal & Sons, J. Burrell & Son, John Walker, S. Mortimer, C. Turner, Seall, Knight and Stredwick, all eminent cultivators of this gorgeous autumn favorite.

Singles were shown prettily arranged in pyramids. Specially fine in the various competitive groups were Helena, Tommy, Brilliant, Peggy, Glencoe, Vesuvius, Betty, Formosa, Aurora, Snowdrop, Kitty, Bertha and others.

Medals were awarded as follows: Gold, to Dobbie & Co. Silver Gilt, to Cannell & Sons and J. T. West. Silver to J. Emberson, T. S. Ware & Sons, Hobbies Ltd., and J. T. Knight.

The Floral Committee met in the morning and made the following awards: First class certificates to Burrell & Co., for Una; to Stredwick for Debutante, The Rev. T. W. Jameson, Mrs. Ayre Dyer and Snowdon; to Burrell & Co., for Minnie (Pom. Cactus); to C. Turner for Adela (Pom.); to Pearce for Mrs. W. W. Merry (Single); to J. Cheal & Sons for Betty (Single); to Mortimer for Tom Jones (Show) and Jasper (Show).

Altogether an excellent show with a high standard of quality everywhere observable.

C. HARMAN PAYNE.

## MUSA CAVENDISHII.

Our illustration shows a fine specimen of *Musa Cavendishii* in fruit at the greenhouses of Mrs. H. F. Durant, Wellesley, Mass., Thomas Watt, gar-

denier. The plant shown is about eighteen months old and was raised from a side shoot from an old plant. The fruits are from 7 to 8 inches long, very round and full as the picture shows, and of delicious flavor.

## FERN NOTES.

Among the ferns regarded as especially promising from the florists' standpoint, by J. F. Anderson of Short Hills, N. J., is an adiantum bearing superb fronds, taller and more graceful for cut use than even the popular *Croweanum*. Mr. Anderson thinks it may possibly be a hybrid between *Birkenheadi* and affine as he has both of these growing and the new plant shows characteristics of both. He will, however, submit it to qualified experts for identification before giving it a name.

*Pteris sulcata*, an erect, strong growing fern with generous fronds of light green color is one which Mr. Anderson thinks should be grown more largely by florists for decorative planting. It is tough and hardy and will withstand unfavorable conditions or rough handling as well as any of them.

*Pellaea geraniaefolia* is an elegant little fern for jardiniere work, with wiry stipules and triangular fronds, which suggest a resemblance to a geranium leaf. Another fern which is rarely seen but certainly in the useful class is *Dryopteris palmata*. It is a beautiful dwarf species.

A "golden fern" known as *Gymnogramma Peruviana superba* has the pinnae partially rolled up in the mature fronds thus showing here and there, on the upper side, the bright gold reverse and producing a peculiar sparkling effect.

FLORISTS' PLANT NOTES BY  
"WIRELESS."

## "White Perfection" Well Named.

For really good flowers and plenty of them throughout August and September, when white carnations of acceptable quality are hard to find, *White Perfection* has been winning a great reputation this season. Houses planted with this variety at first of May have been producing crops equal in quality and quantity to those usually cut in March and April.

## Some Fine Bedding Geraniums.

Mr. L. E. Wood of Fishkill, N. Y., ventures the assertion that Mrs. E. G. Hill, single salmon, is about the best of all the bedding zonal geraniums. As seen in a mass in Wood Bros.' field it certainly makes a gorgeous show excelling even the popular *Poitevine*. Another variety that stands out convincingly is *Devoy's Telegraph*, a big light vermillion variety which originated in Poughkeepsie a few years ago. Among the scarlets none beat J. J. Harrison.

## Advice to Rose Growers.

One of the keenest of the large commercial rose growers advises the buying now of 3-in. grafted Killarney, at the present price of about \$100 per 1000, and then turning them out into boxes and holding them cold and dormant until next spring when they may be potted up early and given one shift into 4-in. pots and will be superior to anything that can be bought at any price for next year's planting.

## Pot Lilies.

"A 5-in. pot is big enough for any Easter lily provided you give proper feeding" is the expressed view of one of the most extensive lily forcers in this country. "When it comes to shifting and carrying around you'll find them heavy enough."

## A Profitable Rose.

At A. N. Pierson's establishment in Cromwell, Conn., John Cook's recent introduction "*My Maryland*" is accredited with being the best producer and in all respects the best paying rose ever grown there. Wallace Pierson says it will probably be a long time before the equal of this rose for profit will be found.

## SAME OLD STORY.

Boston dealers who handle Connecticut peaches complain of the slow freight service. Shipments, they say, from nearly all points of Connecticut have been many hours overdue and serious losses have occurred. Railroads conveying produce from the South make a specialty of the trade, sending forward the freight at almost express speed. Dealers contend that New England roads ought to do something of the kind with perishable crops like peaches. At present it sometimes takes peaches as long to come from Connecticut as from the nearer states of the South. It is claimed by some that the railroads are trying to force shippers to patronize the express companies by offering such slow freight service that the shippers will be obliged to patronize the express in order to have their produce forwarded promptly.—Amer. Cult.

# COLD STORAGE LILIUM GIGANTEUMS, SPECIOSUMS and AURATUMS

*Properly packed and stored will retain their strength and vitality until late in December. Beware of improperly packed bulbs, which are likely to lose their vitality about this time.*

Our stock of cold storage lilies are **not surplus or left over bulbs**, but bulbs put into cold storage on arrival, packed especially for this purpose. We offer them till sold as follows: —

## LILIUM LONGIFLORUM GIGANTEUM.

## Surplus offer of

# FORMOSA LILIUM LONGIFLORUM

On account of unfavorable weather the bulbs of the Formosa Lilium Longiflorum did not grow up to the sizes expected but the plants formed good solid bulbs. We are convinced our 6/8 in. size will give the same results which under favorable conditions a bulb of 7/9 in. would produce, and if two bulbs are planted in one pot the plants make a nicer showing than those with a single stem.

6/8 in. bulbs, 400 in a case at \$16.00 per case, 5% cash discount.

# CALLAS, WHITE, JAPAN GROWN

Our stock is grown for one season in dry loamy soil to make these roots fit for the long journey, consequently they are not as large as California grown stock. They produce however more flowers and are perfectly healthy.

Size 1—2 in. in diameter \$45.00 per 1000, 5% cash discount.

## Seed Trade

Fairly definite information to hand confirms the worst fears of damage to the vine seed crop, not alone in Nebraska, but in Kansas and Oklahoma. Even Colorado has not been exempt. Prognosticating prices is of no benefit at this time, and it may be left for supply and demand to determine, but vine seeds, and particularly musk melons, will certainly be among the luxuries, and those who are fortunate enough to have carried any over, can draw almost any price they may choose to ask.

There will be small, if any, surplus of Red Wethersfield onion seed according to California reports, but there is considerable of this seed in Connecticut no doubt, and we still believe prices will sink to lower levels on nearly all varieties of onion seed. Just at present it is safe only to deal in generalities, but specifications will soon be given.

More favorable reports about corn continue to come in, and despite many fears, there will be enough to supply normal requirements at moderate prices. Notwithstanding the extreme drought which has afflicted New England, and nowhere worse than in Connecticut, corn is going to be a fairly good crop, for which the farmers and dealers of the Nutmeg State have good cause to be thankful.

There are pretty reliable rumors that a number of seed pea and bean growers are willing and even eager to dispose of their plants and quit the business. But one of the old-time prominent growers is mentioned in this connection, and probably this is due to momentary disappointment and disgust over the repeated and heavy crop shortages, which have virtually prevented growers of peas and beans from making a reasonable profit for any given period, say of five years. If a grower is fortunate enough to make a fair return on his capital one year, he loses most of it the next, and thus at the end of five years he is very little ahead. As one grower aptly puts it—"Hope springs eternal in the seedsmen's breast, and he is always expecting that next year he will get the crop he has longed for." Were it not for this eternal spring of hope, the average seed grower would quit the business or die of despair.

Those growers who want to sell out evidently do not want to shuffle off just yet, but as they have little to bequeath in seed stocks or reputation, buyers are not camping on their lawns to be first in line in the morning. A good business reputation is a valuable asset, and those who have thought only of how cheap they could produce stocks, with little if any thought of quality, find, now that they want to sell out, that they have nothing that anyone wants, and aside from the little seed of doubtful quality, and their buildings and machinery, their business is an empty shell. No reputable grower would have it known that he had bought such stock, and would be ashamed to look at himself in the glass if he had done so. Most of those who have gone into the business without

the equipment of experience or reputation, have made a failure of it, and have generally just had to quit because they could not find a buyer. No one wanted their business and as it was a losing game they were compelled to close it up.

Preliminary estimates of deliveries may be looked for within the next two weeks, and then will the troubles of the grower begin in earnest. He will learn that he is regarded with suspicion by his valued customers, and his status will be much like the man suspected of burglary. Verily this is a vale of tears for the seed grower.

The affairs of The Templin Co. of Calla, Ohio, have finally been settled, the former owners prior to the appointment of the receiver, having purchased the business and real estate, buildings, etc. The purchasers are Mr. Mark Templin and Mr. C. W. Hendricks, and they are to be congratulated on regaining control. Under their management the name of Templin will stand, as it always has, for integrity and quality, and the trade generally will wish them the largest possible measure of success.

The seedless apple and hipless dress are dead issues alongside of that most remarkable tomato figured and described at length by one of our contemporaries last week. Being "the result of a combination between a tomato and a watermelon" it is well entitled to the name of "Wonder." Go on with the dance.

It is said that the creditors of the St. Louis Seed Co., St. Louis, Mo., recently adjudged bankrupt, will compromise on a 33 1-3 cent basis and that the company will shortly reorganize on a better basis and larger capital than before.

The seed growing business of V. Fromhold & Co., Naumberg-on-Saale, Germany, has been taken over by Emil Fromhold, and will be conducted under the name of E. Fromhold & Co.

In last week's seed trade notes, in the fourth paragraph, referring to information regarding the onion seed crops, read "Connecticut" instead of "Cincinnati."

The L. L. Olds Seed Co. is now permanently located at 313-317 Wilson street, Madison, Wis., but a branch will be maintained at Clinton.

Morris & Snow Seed Co. is now settled in its new quarters at 425 South Main street, Los Angeles, Calif.

## The Automatic Circulator.

While the method of producing a forced circulation of liquids is the same as in the Electric Circulator, some modifications in construction which we consider to be of vital importance are made.

The great improvement of its being equipped with a valve which requires no manual manipulation to change from forced to gravity circulation will be at once recognized as extremely valuable.

Referring to Diagram Below.

A is a light brass valve, hinged as shown at K, on the outer end of valve shaft fitted with index pointer H, protruding through valve casing as shown in half tone. This index shows at a glance the position of the valve in the pipe. When the propeller C is running the liquid is drawn in at the arrow 1, follows the courses shown by 2, 3, 4 and 5; as it impinges on valve A, the valve being very light, is thrown up as shown, closing the gravity system and passes on into system as shown by 6. The instant the propeller ceases to act the valve A drops and opens up an unobstructed gravity flow from 1, 7 and 6 to the system. It has been demonstrated that for ordinary and usual duty there is no advantage to be gained by use of three way valve which must be operated manually. Another valuable feature of this style of Circulator is it can be readily installed by any one who has the mechanical ability to cut out a length of return pipe sufficient to take in the top 1, screwing on the flanges J, J, which are furnished and bolting the pipe and Circulator flanges together. The propeller chamber, B, is fitted to top I rigidly, consequently the propeller shaft E cannot be sprung or cranked in its bearings T, K, L, and is always in line with top I and return pipe. The pulley S is attached on the rotating end of shaft E and supported by bearing F, held in place by saddle D. The bearings F, K, L are boxed out in

absolute truth, the backward thrust of propeller being taken up by step M and cap N. The shaft propeller and bearings are made of best Tobin bronze, bearings K and L have water lubrication. F is fitted with oil cup. The motor may be placed wherever desired and connected by round or flat belt

passing of any part of the electric current to the apparatus, which we have found some times occurs if the motor is not kept clean, thereby losing power and giving a shock of greater or less intensity to any one coming in contact with the Circulator or attachments. The motor may be operated by an electric switch placed in any convenient place, and at a distance from the boiler or fire room, as the instant the propeller starts into action the automatic valve is thrown up and the water passes into the boiler and system, when the electric current is switched off the propeller stopping the valve drops and the gravity system becomes operative. In cases where the electric current is not obtainable, or too expensive, gasoline engine or water motors may be used. It is not necessary to run Circulator continuously. As soon as the thermometer on the return shows approximately (within ten to fifteen degrees) the temperature of the flow from the boiler, it can be shut down, the automatic valve opens to full capacity, and the pipes and water therein, being all heated to within a few degrees of each other, the gravity operation is so accelerated that the system will keep up its heat for from one to three hours.

The Circulators are built in three sizes, Nos. 2, 3 and 4, with tops on connections to returns complete up to eight inches in diameter.

BOSTON, MASS.

Patent Applied For.

to pulley S. It will be recognized that this is a very desirable feature, as the motor may be located away from the dust, ashes and heat of the heating apparatus, also obviating any necessity of insulating it to prevent, by using an electric motor, the

Couplings are Furnished with Bolts and Nuts; Asbestos Packing also if desired. Sample Coupling

# SPECIALTIES

## The Castle Tube and Pipe Coupling

For Steam or Hot Water.

This Coupling was devised to afford a rapid and reliable method of joining pipes, making at once a flexible expansion joint, as well as affording the quickest and most simple method of repairing a defective or burst pipe.

Referring to Diagrams Below.

It is constructed with an internal ring No. 3 into which the ends of the pipes No. 5-5 to be connected are inserted; in the central line of the ring brass screws No. 4 project to the interior sufficient to prevent either pipe creeping further than the central line. On the outer surface two heads No. 2-2 encircle the internal ring

other packing is inserted by pushing back upon the pipe the heads No. 2-2 and wrapping the pipe with sufficient packing for the joint. When this is done, bolts inserted, and nuts screwed up, the drawing together of the heads compresses the packing, making a tight joint between the flanges of the heads and the outer

ring of the ring, at the same time while compressing the packing there, also forces it down upon the pipe, thereby making a tight joint about the same. Thus the pipe can expand or contract in the internal ring No. 3. In using a 3-inch boiler tube, each pipe will have a play of quite one half inch. Pipes should be cut to length giving one quarter inch space between end of pipe and screws in ring.

Patent Applied For.  
Fig. 1.

No. 3, with outer ends flanged down to barely touch the pipe. These heads have 4 slotted lugs through which passes bolts which by drawing together in screwing up the nuts, pull the heads towards each other. Between the flanges on the heads No. 2-2 and the outer ring of ring No. 3 is a space No. 5-5, in which wick or

can be used, one end screwed into No. 1 and the other end into the fitting. Instead of using the internal ring as in Fig. 1, the part No. 1 is extended as shown which produces same result; otherwise the putting together is the same as in Fig. 1. To repair a defective pipe, that part which demands repairs can be cut off with

Patent Applied For.  
Fig. 2.

By the use of these couplings old boiler tubes can be utilized economically and with a surety of reliable operation which has not heretofore been possible. No threading of such thin tubes would withstand the wear and tear of expansion and contraction and rust or packed fittings cannot be depended upon.

Will be Forwarded at 50c each. Estimates and Prices for Circulator or Couplings upon Application.

## NEWS NOTES.

A. N. Pierson is erecting a 150 ft. chimney at his greenhouses, Cromwell, Conn., having found his forced draft outfit unsatisfactory.

The greenhouse stock and buildings on the premises of W. H. Murdock, Cambridge, Mass., were sold by auction on Thursday, Sept. 24.

Harvard College has recently made another addition to the land it is acquiring in Worcester County for forestry purposes, having purchased the Dexter estate of forty-three acres.

W. F. Chessley, an agent for Rice Bros. Co., nurserymen of Geneva, N. Y., who, it is alleged, has been collecting money through Maine and failed to give credit for same, was arrested on September 14.

The flower store of E. H. Smith, Hazelton, Pa., was entered on September 10, and about four dollars secured. Wrong season to break into a flower store. The thieves were interrupted in their work but escaped.

Mr. Harold H. Blossom and Miss Minnie M. Dawson were married at Jamaica Plain, Mass., on Thursday evening, Sept. 24. The bride is the eldest daughter of Jackson Dawson of the Arnold Arboretum and Mr. Blossom is connected with Olmsted Bros., the landscape architects.

It is said that the trustees of the Worcester Art Museum have decided finally to demolish the old Salisbury greenhouses and dispose of the contents. John Coulson, who has had charge of the greenhouses for so many years, has bought a small farm in the country, where he will remove with his family.

The city of Boston receives an enormous bequest, probably amounting to several million dollars, for the maintenance and improvements of her Common and public parks, in the will of the late George F. Parkman of 83 Beacon street, which was filed in the Suffolk county registry of probate on Sept. 21.

A cement tank with running water six or eight inches in depth and jars perforated with several large holes through which the cold water constantly passes is in use at the Pierson greenhouses, Cromwell, Conn., for cooling and hardening up cut blooms of chrysanthemums. The next morning after plunging the flowers fairly tinkle when handled.

Poechlmann Bros. are putting cement benches in one greenhouse this week as a test, and if successful this style of bench will be adopted more extensively. The long drouth is testing the water supply severely at Poechlmann Bros. Plant B, and if relief does not come soon arrangements will be made for drawing a supply from the river some distance away.

The Vermont State Nursery used last year for its own planting and for distribution in the state the seeds from nearly 100 bushels of white pine cones. Cones should be collected in September, at which time the mature

cones are from three to five inches long, green and with scales still closed. Further advice will be given by the Experiment Station, Burlington, Vt., to any interested.

Lawrence Cotter, superintendent of Rosemere Conservatories, Dorchester, Mass., goes on October first to take entire charge of the mammoth plant of the Lakeview Rose Gardens of Jamestown, N. Y. About ten acres of rose houses, an equal extent of carnation houses and five acres of other stock under glass is the present size of this establishment, approximately one million square feet of glass. We know of no man better equipped by experience and knowledge to assume the responsibility of its management than Mr. Cotter.

## NEW RETAIL FLOWER STORES.

Miss Lizzie Miller, Bangor, Me.

G. A. Phillips, Washington, D. C.

Albright & Smith, Erie St., Cleveland, O.

Blauvelt & Dierks, 50 W. 29th St., New York, N. Y.

Farquhar Fraser, Riverpoint, Providence, R. I.

Beloit, Wis. John Reindfleisch, 511 Grand avenue.

Hammond & Gompf, 19 W. Orange St., Lancaster, Pa.

George Betz & Sons, 349 Morrison St., Portland, Ore.

Richard Walsh, Lexington Ave. and 83d St., New York, N. Y.

The Thorsted Co., 14th and Washington Sts., Oakland, Calif.

H. W. Garrett, Old York Rd. and Spencer St., Baltimore, Md.

John Rindfleisch of Beloit, Wis., opened his new store on the 18th of September. Mr. Rindfleisch bought the site, which is one of the best in Beloit, and has put up a fine building with flats above and a store on the ground floor.

## OBITUARY.

Miss Emma F. Gill.

Miss Emma F. Gill, 54 years old, a teacher in the public schools of Medford, Mass., for 28 years, died Sept. 21 at the home of her mother. She had been ill with typhoid fever for three weeks. Her mother, Mrs. E. M. Gill, is the well-known florist and active worker for many years in the Massachusetts Horticultural Society, and the heartfelt sympathy of many loving friends will go out to the old lady in her sorrow.

## PERSONALS FROM MADISON, N. J., AND VICINITY.

Mr. and Mrs. Wm. Duckham will sail for home from Queenstown on the 26th inst.

Herbert Entwistle, gardener to Mrs. Julius Catlin, has resigned his position, to take effect Oct. 1st.

Geo. H. Hunt, formerly with Robt. D. Foote, has accepted a position with D. Rait, Richardson, Morris Plains.

Mr. and Mrs. Percy Herbert are safely domiciled here again. They had a very enjoyable trip through Scotland and England. Both were benefited by the trip.

Chas. H. Atkins of Bobbink & Atkins, is doing Europe too. He reports having met the Madison delegation in London and a general good time was the result.

What C. H. Totty lost in cash he gained in avoiddupois on his European trip. Mrs. Totty is so well pleased that she is already laying plans to duplicate the trip next year.

## CHICAGO PERSONALS.

Welland & Reisch are putting in a new refrigerator, 12x12 ft., built by Gr. & Lockert.

Mr. and Mrs. Chas. W. McKellar have been enjoying a visit with friends near Kalamazoo, Mich.

C. Thomas is back for the winter season in his old place in A. L. Randall's cut flower department.

Visitors: B. Eschner, representing M. Rice & Co., Philadelphia; Edw. Amerpohl, Janesville, Wis.; Aug. Meyer, Janesville, Wis.; Chas. Koelker and daughter, Toledo, O.; A. Heisch, Memphis, Tenn.

## Flower Market Reports.

This market is still **BOSTON.** overstocked with small roses and asters. Gladioli, which were also in the way, are now going past. As to asters, the white stock is marketable at some sort of price but the colored flowers are unsalable. Lily of the valley finds a fairly even market but at prices lower than in any season heretofore. Little change for the better is looked for until heavy frost or autumn rains put an end to shipments of out-door stock.

The market for the past **BUFFALO** two weeks has been in bad shape, overloaded with stock of all kinds, qualities and quantities. Shipping trade being quiet and a good portion being carried from day to day enormous quantities of asters were finally lost. Gladioli were in good supply and seemed to move more freely than asters. Short cuts of new crop roses were in about the same position as asters—no demand whatever; the same may be said of carnations. American Beauties and lily of the valley moved more freely but too much other stock with very little business has caused the wholesaler to become uneasy. It is hoped that things will turn for the better in a short time.

The flower market **CHICAGO** showed signs of reviving Friday and Saturday, but the hot dry weather continues making anything like satisfactory conditions impossible. The outdoor flowers are fast drying up. Asters are beginning to drop out and some florists are heard to express themselves as glad of it. Asters have been shipped into Chicago from far and near, till it would have been impossible to handle them under favorable conditions, but with the market already overstocked it was exasperating. Dahlias are good in red and white but do not sell and will not so long as asters are in. Gladioli are surrendering to the unfavorable weather and are not very plentiful. Roses are in excess of the demand. Kaiserins are good. Brides and Bridesmaids have to be disposed of quickly. Beauties are fine and on long stems. Carnations are on from six to twenty-four inch stems and the sizes of the blooms vary accordingly. White Perfection is, for the time of the year, "perfection," the blooms very large and the stems from 24 to 30 inches long. There is a steadily growing demand for orchids in this market. Chas. McKellar, who is authority on orchids, says the public are becoming educated up to them. The demand is from the smaller towns as well as the larger cities. A few chrysanthemums October Frost with nice long stems were received Monday by Pockmann Bros.

The general tone of business is about the same **DETROIT** as last week. Extraordinary warm weather with a drought now reaching the sixth week have a decidedly depressing tendency on all business. Prices rule the same. Asters are slowly drying up in the fields and this week will see the last of them. Carnations are improving in

# CUT ASTERS 50c to \$1.50 per hundred CUT GLADIOLI \$3.00 per hundred ALTIMO CULTURE CO.

Canfield, Ohio.

both quantity and quality. The same may be said of roses.

**INDIANAPOLIS** There is a little more life and movement in the stores, but nobody seems to be working overtime. Several weddings and fall openings are on the calendar for this month, which will relieve the monotony to some extent. Carnations have shown a wonderful improvement in spite of the extremely hot weather and roses also are getting quite presentable. Asters are about over, as are gladioli. Very few out-door flowers are now presentable. Good American Beauties are being received which sell well. Lily of the valley has done better during September than in August. A few chrysanthemums are seen but they are not much better than fancy asters. Greens of all kinds are very plentiful at usual prices.

**NEW YORK** Not many flowers are in what may be called a real demand. Of the few, Beauties lead in sales and probably will continue to be wanted until the chrysanthemum appears. In small roses very little is doing except for the novelties, and only for them when long stemmed, of which there are not many. The large proportion of roses are moved with difficulty and at low prices. More carnations are appearing as the days go by, mostly rather short in stem, but there are many real good ones with winter length of stems. There is no floating supply of cattleyas. Lilies are plentiful. Asters going off. Plenty of dahlias.

**PHILADELPHIA** There was a glut of everything last week, excepting American Beauty roses. These were of fine quality and in good demand. When a customer sent in an order for some doubtful proposition he generally added: "If you cannot send that, send some good American Beauties." All other roses were far too plentiful. They were good, too, all having improved with the cooler weather. Dahlias are splendid but draggy. Too many asters. We see some signs of aster-wane, however—even if there be no sharp frost to wind them up. Orchids are more plentiful. Single vio-

lets have made their appearance, but are not a factor as yet. Too much lily of the valley. Carnations remain about the same as to quality and demand.

**WASHINGTON** Dahlias are beginning to come in in much larger quantities and they are of fine quality. The aster glut still continues, but the cool spell has cut down the size of the bloom. All green is quite scarce, though as yet the prices have not gone up very much. Cosmos is being received in limited quantity. Roses of all kinds are more plentiful and the quality is steadily improving. There is a steady demand for Bride and Beauty, as well as the good grade of Cochet.

## COMMODORE WESTCOTT GETS A PRESENT.

John Westcott of Philadelphia was a proud man last week, when he received a handsome marine telescope mounted on a tripod for the use of guests at his hospitable bungalow at Waretown, N. J., from two of his Boston friends, Colonel William W. Castle and William J. Stewart. A characteristic letter accompanied the gift.

Terre Haute, Ind.—D. Dickinson Produce Co., range of houses.

Milford, N. H.—Rev. Mr. Holden, conservatory; R. & R. Woodman, house.

The Michigan Cut Flower Exchange reports that notwithstanding the dried-up and burnt condition of the woods all through that section of the country they had succeeded in locating fancy ferns. An exceedingly fine quality of shipments began to arrive last Thursday and by Saturday night 300,000 were safely stored away.

## DREER'S Peerless Glazing Point

(Improved Van Reyper Perfect)

Made of Galvanized Wire and Will Not Rust

This point has common sense features of practical value that appeal to practical florists and are possessed by no other point. The only double point with

### BOTH BEVELS ON SAME SIDE

A point made on any other principle will twist in driving and cramp or crack the glass. Drear's Peerless Glazing Points will never work out. Drives true and holds firmly by one blow of hammer or chisel. May be easily removed and used again in case of re-glazing. 1000 sufficient for 500 lights. Box of 1000 points 75c, postpaid. 5000 points by express for \$2.75.

### IF YOU ARE BUILDING

Let us know the thickness of glass you intend using and we will send samples of the size point needed.

HENRY A. DREER, 714 CHESTNUT ST., PHILADELPHIA, PA.

## DON'T EXPERIMENT

USE

## To-BAK-INE

and your stock will be free from insects, clean, and the blooms will not be discolored.

### Why My New Curved Iceless Eave is Far Superior to Anything on the Market Today

- 1st. No sash bars incased in iron, thereby eliminating all danger of bars decaying.
- 2nd. Can be used in conjunction with iron frame construction, thereby doing away with that very objectionable feature, "columns."
- 3rd. Roof bars with drip grooves, which act as conductors to carry away the condensation: Result, the driest roof ever used for greenhouse purposes.
- 4th. **THE MOST IMPORTANT OF THEM ALL.** The very small increase in cost over the ordinary style of construction which makes it possible to be used for commercial as well as private purposes.

**William H. Lutton,** Horticultural Architect and Builder  
West Side Ave Station (C.R.R. of N.J.) Jersey City, N.J.

## THE EVOLUTION OF THE GREENHOUSE

Compare the old narrow-paned, heavy framed, stuffy greenhouse of a few years ago, with the present lean-barred, wide-paned, sunsome U-Bar structure. The former with decaying roof bars, glass breakage and constant need of repairs; then note the curved eave of the U-Bar house, its downright attractiveness and its structural simplicity in every line and you have a most convincing object lesson. Send for catalog.

## A WONDERFUL NEW NEPHROLEPIS

# Nephrolepis Superbissima

INTRODUCTION OF 1908

**W**E desire to call attention to this new fern, which originated with us and which we are introducing this year. It is a **very unique and distinct novelty** — as distinct from *Nephrolepis Piersoni* and *Piersoni elegantissima* as they were from *Bostoniensis*. It is in fact a complete break. The fronds are very heavily imbricated, the pinnae overlapping, making the fronds very dense and compact.

It differs from the other *Nephrolepis* not only in form, but also in color, being a **richer and darker green** — entirely different from the yellowish green of all the other *Nephrolepis*. The plant is very sturdy in its habit, the fronds never breaking down.

While a photograph shows a similarity to its predecessors, it is absolutely distinct, not only in the formation of the fronds and color, but also in its habit and general characteristics. It makes a much more dwarf and compact growth, the fronds being very dense, firm and rigid, and having a great deal more substance, so that it **will stand more knocking around than any other fern of this type**.

It is a sterling novelty. Experts who have seen it consider it by far **the best fern ever sent out**. It is a plant that needs to be seen to have its great value and sterling qualities appreciated. It really is not in the same class with the other varieties. It was awarded a

### ... FIRST-CLASS CERTIFICATE ...

by the Royal Horticultural society at Crystal Palace in London, November, 1907, the plants exhibited there having been shipped from New York two weeks before that time. After being exhibited in London, the same plants were shipped to Edinburgh, Scotland, where they were again awarded a first-class certificate by the Scottish Horticultural Society. This will indicate the value of the plant as a novelty, and also demonstrates in a very conclusive manner its fine keeping and shipping qualities. We have just begun shipping advance orders, and new orders can now be shipped immediately on receipt.

Fine, strong plants. 2 1/4 inch pots, \$5 per dozen, \$35 per 100; 4 inch pots, \$7.50 per dozen, \$50 per 100; 6 inch pots, \$1.50 each, \$15 per dozen.

**F. R. PIERSON CO., Tarrytown-on-Hudson, New York**

### I HAVE JUST RETURNED

from my annual business tour of the European sources of supply and can offer **Bargains in Kentias and other Decorative Plants**, all sizes. Also the following at **Lowest Import Prices**. 15,000 *Azaleas*, best commercial varieties, from \$25.00 per 100 to \$2.00 each. A fine lot of *Rubbers*, *Crotons*, *Araucarias*, *Pandanuses*, *Asparagus plumosa* and *Sprengeri*. Also a large collection of **small ferns** for table decorative purposes at lowest wholesale rates.

**A. LEUTHY & CO.,**

## Growing the Fern Ball

It is a great pity that there are not more good specimens of the fern ball seen in our homes for as an ornamental addition to a room it is most desirable, if well grown. Every catalogue shows an illustration of a very attractive plant but outside of the catalogues there are very few good examples in sight. The balls are received in the fall and many thousands are sold yearly but many more are not sold and these latter are stored away to await the coming of another season when they can be again served up in company with fresher arrivals. While in many cases this enforced retirement has not done them any good from the fact that they had been improperly stored, drying them out, they can be, despite this rough treatment, made to develop into very fine examples of what fern balls should be.

A reference to the two pictures accompanying this article will show two fern balls that were of the carried-over-from-a-season variety. These were two of a half-dozen that were bought at a bargain and while they all thrived these were the particularly attractive examples. When first brought into the house they were thoroughly soaked and then hung in the light. When growth had started they were regularly treated, every two weeks, to a bath of manure water. They were never allowed to become dry. While the manure water seems to be an essential in the treatment of fern balls, in using it there is a liability of being obliged, speedily, to make a quick choice between your fern ball and your lodgings. The manure water will start the ball growing but it will also start a wave of disapproval that will be quite convincing. However, if you care for a fern ball you must contrive to treat it as above suggested.

The balls shown in the picture are used as table centre pieces. Holes are bored in them with a pencil and cut flowers inserted. Using them alternately keeps them in good condition and keeps on hand an ever-ready table decoration. When the foliage has begun to wither the ball should be stored so that it will not become dried out. Burying it in the ground for a few weeks before starting it into growth will materially benefit it and assist its start. It would be well to watch the string that binds the moss as it is liable to rot out. A little attention to this detail will prolong the life and usefulness of the fern ball.

Salesmen in florist stores should be prepared to give instructions as above to their customers and the result would be a very greatly increased demand and sale for these useful subjects.

*Frederic J. Doogue*

**Pine Bank, Olmsted Park, Boston**

Our cover illustration this week shows a bit of hill-side scenery in the Boston parks. The Boston park system abounds in such examples, where excellent taste and wisdom have been shown in preserving the original topography and the natural features of the woodlands under proper supervision and control but avoiding all suggestion of the "creating" or "reconstructing" which has permanently despoiled the beauty of so many public reservations.

exceedingly attractive and were produced with little expense and their exhibition at that season suggested possibilities for Christmas which, strange to say, growers of holiday specialties seem not to have taken note of. Some of the single-flowered varieties should make splendid subjects for this culture, with their vivid scarlet, crimson or parti-colored flowers. Doubts have been expressed as to the possibility of producing well-flowered pot grown dahlias in the short dark days of December but many things are done today which, not so very long ago, would have been declared impracticable and it is hardly in keeping with the progressive spirit of present-day floriculture to assert that the dahlia cannot be conquered. The possibilities in sight surely warrant the effort.

### The revolution in the cut flower business

Developments from year to year all tend to the unwilling conviction that the days of the small grower as a factor in the cut flower business are about numbered. The advent of the capitalist, either directly as proprietor or in the capacity of financial backer for the individual or corporation engaged in commercial flower production, has made a radical change in aspect and conditions and the big rose and carnation factories, with their advantages of indestructible construction, stupendous heating systems, watering and feeding apparatus, division of labor and grading of products, have already so affected the markets that the standard of value in much of the staple product has declined from time to time until it is now but a fraction of what the old-time grower regarded as his just due, while the standard of quality for which an appreciative regular demand may be found has advanced steadily. It seems to us that one of the most deplorable results due to the changed conditions is the eagerness of the experienced grower to accept employment at wages so low as to be out of all proportion to the responsibility assumed and the ability called for in the management of a large establishment. It is safe to say that in no other manufacturing industry is executive efficiency and technical knowledge, in a superintendent or manager so poorly paid, everything considered.

### Of interest to Bostonians

The recent exhibition of the New England Dahlia Society in Tremont Temple, Boston, apart from the general question of excellence as exhibitions go, was the object of deep interest to many, owing to the fact that in its prospectus much had been made of its being located in the densely thronged down-town shopping neighborhood which the Massachusetts Horticultural Society had abandoned when it removed a few years ago to the Back Bay section of the city. Tremont street in the vicinity of Tremont Temple is one of the most crowded thoroughfares in this country and here surely was an excellent opportunity to test the attitude of the great sidewalk public generally towards flower shows and to form an opinion specifically as to the wisdom of the Massachusetts Horticultural Society in moving away. The result left no room for doubt. Just as in bygone days they had passed, unheeded, the bulletins at the portals of old Horticultural Hall announcing the "grand" free flower shows, so now the crowd surged by, regardless, all day long, and the fact that 20,000 dahlias, more or less, might be inspected at will for a trifling admission fee concerned them not. Our views, often expressed, as to where the key to popular support for flower shows may be found, whether they be sound or not, are doubtless well-known to our readers and we

### A possible opening for the dahlia

A couple of years ago there were shown at one of the exhibitions of the Massachusetts Horticultural Society some pretty little cactus dahlias grown from cuttings in three and four-inch pots, in bloom in November. They were

will let them rest for the present but we are more than ever convinced that a more popular place than the halls of the Massachusetts Horticultural Society, in which to hold any kind of a flower show in Boston, has not yet been discovered.

## Horticulture at the Franco-British Exhibition

### III.

#### THE ELITE GARDENS

Right in the middle of the grounds of the Exhibition is a handsome bandstand surrounded by a sunken auditorium, the whole enclosed with a fine stone balustrade. A circular promenade gravelled, and of good width to allow of easy circulation by the numerous visitors, runs around the entire construction and from it branch in all directions paths bounded on each hand by grassy lawns of various shapes and sizes. These Elite Gardens are unquestionably the most extensive in the whole Exhibition and if not actually the finest from the horticulturists' point of view they are at any rate a very important part of the outdoor gardening.

In early summer time they of course presented a far different aspect from that which they now do, and one of the most attractive exhibits then came from Millet & Sons of Bourg-la-Reine, France. It was composed of several large collections of *Iris grandiflora* of which there was an enormous number of varieties and of which perhaps no good reason exists for troubling American readers with the names. We ought not to omit mention of an exhibit of peonies by the same firm which was contained in several circular beds immediately facing the Restaurant Paillard and which later on in the season made way for dahlias.

The peony is essentially a flower in which Americans take an interest and we therefore mention just a few of the most interesting in Millet & Sons groups. They were Albert Crousse, M. Calot, Mlle. Dessert, Marie Deroux, Couronne d'Or, Flambeau, Henry Dunay, Emile Bourbon, M. de Chanay, Pauline, La Coquette, Louis Van Houtte, Thos. S. Ware, Mlle. Louise Calot, and others.

Just behind the Restaurant Paillard and in front of the Pavilion of the City of Paris were some large groups of azaleas and rhododendrons exhibited by Moser & Son of Versailles. They made a fine show and the best of the latter were Ph. Jacques Vincent, Mlle. Therese de Vilmorin, Duc de Montpensier, Mme. Felix Guyon, M. Chas. Sequin, Mme. G. Bertin, Claude Monet, Ampere, M. Albert Viger, Jacques Moser, M. Fritz Bluay. *Azalea pontica* President Carnot, *Azalea hybride* de Mollis M. Hardy, *Azalea glauca stricta* and *Kalmia Pavardi* formed a not inconsiderable portion of the display. Another large group of rhododendrons had some massive plants full of flower and of these Arago, Jeanne Sure, Directeur Chandese, Mme. Marie de Speransky, Mme. Jules Porges, Mme. Aug. Pellerin, Bengali and Alphonse Mallet were noteworthy examples of this firm's cultural skill.

A later visit enabled us to take note of many of the beds in the Elite Gardens that were not in full flower when we first went there. We have some difficulty in deciding how to start so as not to miss any of the exhibits and finally begin at the left hand corner of the lower end of the Gardens and work our way systematically around. R. Goyer of Limoges has several fine

lots, principally roses, and clematis, although one little bed with a large plant of *Musa ensata* in the middle surrounded with cannas and a ribbon edge of crimson zonal pelargonium Paul Crampel must be noted. In the rose borders, some of enormous length, Goyer has in the rambler class Mme. Norbert Levavasseur, Maman Levavasseur and Mme. Wm. Cutbush. Others include well-known standard varieties.

We cannot enumerate his clematis on account of their numbers, but a few, *Princess Leonidas*, *La France*, *Gipsy Queen*, *Venosa*, *Etoile Violette*, *Xerces*, *Jackmani*, *Marcel Moser*, *M. Van Houtte*, *Ville-de Lyon*, *Modesta*, *The President*, deserve a passing mention.

Croibier & Son of Lyons have a large rose border, *Kaiserin* and *La France* being planted in huge numbers. Chas. Molin of Lyons has roses in large numbers and gladioli, also some dahlias. Of the roses *Liberty* is grand, besides scores of others all in fine form.

Pere Guillot's name is known to all rosarians. He has many bush plants and standards among which we noted *G. Nabonnaud*, *Mme. Margottin*, *Hugh Watson*, *Horace Vernet*, *Pharisaer*, *Prince Arthur*, *Princesse de Sagan*, *La Favorite*, *W. F. Bennett*, *Dawn*, *Killarney*, *Senateur Vaisse*, etc. Pernet Ducher is another eminent French rose grower. On a triangular grass lawn he has an immense border filled with *Teas* and *Hybrid Teas*. How can we describe them? It is practically impossible in the space at our command. The perfume attracts numberless visitors and we hear on right hand and left exclamations of surprise and admiration from those who like ourselves are viewing this choice collection. Jean Note, Laurent Carle, Ferd. Jamin, Anna Olivier, Mrs. Aaron Ward, Gustave Regis, M. Paul Lede, Joseph Hill, Mme. Pernet-Ducher, *Le Progres*, *Souvenir du President Carnot*, *Mme. Abel Chatenay*, *Ant. Rivoire*, *Etoile de France* are but a few out of this great collection.

The last bed of roses to be noted is that from Levavasseur & Son. It is rather a small collection when compared with some of the others and contains a number of dwarf plants of the polyantha varieties.

We must now leave the roses for other flowers. A. Graveureau has several beds of asters, zinnias and gladioli. Several beds of varying sizes and shapes are planted by L. Ferard. One of them has *Begonia* double multiflore Phosphorescent with an edging of *Gnaphalium tomentosum*. Another contains *Begonia* double multiflore var. *Fulgurant* edged with golden pyrethrum.

The world-famed house of Vilmorin Andrieux & Co., at the top end of the Elite Gardens has a huge border planted with gladioli, and at the lower end another one containing some fine cannas. We noted Luigi Baretta, Fanion, Roi Humbert I, *Ecliplique*, *Comtesse de Breteuil*, *Thorene*, *Comtesse de Sartout*, *Marquis de Piolence*, *Claude Brevet*, and others. Between the cannas some sturdy plants of dahlias are just coming into flower, and the whole bed is encircled with an edging of *Centaurea candidissima*.

We have, ere we leave this part of the Exhibition, yet a few more beds to inspect. These are from Cayeux & Leclerc. One is of gladioli, another *Anchusa Italica*, a third of *calceolarias*, while a fourth is a long curved bed planted with *Nicotiana Sanderae*, cannas, and an edging of French marigolds. A curious winding border from the same house contains dahlias in quantity with many varieties of verbenas intervening and this, too, is edged with French marigolds.

Chas. H. Payne

## NEWS OF THE CLUBS AND SOCIETIES.

### SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

#### The National Flower Show.

The Executive Committee had its meeting in Chicago, Sept. 25, and received reports from all sub-committees and took important action.

The secretary was instructed to have 2,000 copies of the final premium list printed and mailed by Oct. 10. President Trandy was requested to offer the gold medal of the S. A. F. for the most interesting and educational exhibit in the show. Chairman Poehlmann of the reception committee, reported that elaborate plans were being made for the entertainment of visitors to the show, and he was authorized to expend not exceeding \$1,000 from the net proceeds of the bar and cut flower booth concessions. Chairman Koenig of the special features committee reported that an exhibit was being planned which would show the evolution of floral designing for the last twenty-five years.

Action was taken fixing the general admission at 75 cents for adults, and 25 cents for children of school age; fixing the price of trade tickets at 35 cents. The action offering a season ticket for \$1.00 to florists not members of the S. A. F., reconsidered and rescinded. J. H. BURDETT, Sec'y.

### THE GARDENERS' AND FLORISTS' CLUB OF BALTIMORE CITY.

At the semi-monthly meeting of the Gardeners' and Florists' Club held on Sept. 28th a copy of a bill as amended at a conference of entomologists, agricultural chemists and manufacturers held in New York June 18, 1908, for preventing the manufacture, sale, or transportation of adulterated or misbranded fungicides, paris greens, lead arsenates, and other insecticides, and for regulating traffic therein and for other purposes was read to the club by the secretary. A free discussion of the matter followed the reading of the bill, the unanimous opinion of the members being that as continuous purchasers of the articles mentioned in the bill it was of the utmost importance that they know the exact strength and quality of the material purchased. The bill appearing to be fair to both the manufacturer and the consumer, a committee was appointed to draft a resolution favoring the passage of the bill by Congress.

At the next meeting, Monday, Oct. 12, Mr. J. Guille of Portsmouth, Va., is expected to read a paper on Virginian grown bulbs and to exhibit specimens.

The meetings of this club are held on the 2nd and the 4th Mondays of the month at the hall of the Florists' Exchange, corner of St. Paul and Franklin streets, and any member of the craft happening to be in Baltimore on any meeting night who will kindly drop in may rest assured of a cordial greeting. F.

### CONNECTICUT HORTICULTURAL SOCIETY.

The annual Dahlia Show under the auspices of this society was held in Unity Hall, Hartford, Sept. 23, and was in every particular a conspicuous success. The entrance to the hall was decorated with conifers from the nurseries of W. W. Hunt & Co. and the Holcomb Street Nurseries. A fine group of palms from J. Coombs, the "leading florist," occupied the centre of the hall and the platform was effectively decorated with the rarer foliage and flowering plants under the direction of J. F. Huss, the veteran plantsman, who is also President of this Society. The general decorations were carried out most artistically by P. Zuger of the Department of Parks.

Public interest in the exhibition was amply demonstrated by the crowd which poured into the hall from 10 A. M. until 10 P. M., and altogether this will be remembered as the most successful exhibition ever held by the Society.

First prizes in the dahlia classes were won by Peter Zuger in one class, J. F. Huss in six classes and W. W. Hunt & Co. in one class.

Diplomas to J. H. Slocombe for collection of dahlias and to J. F. Huss for collection of vegetables. Certificates of merit to J. H. Slocombe for seedling dahlias and vase of cosmos, to W. S. Mason for seedling dahlias, to A. J. Weeber for collection of grapes, to J. M. Adams for collection of annuals, to John Lewis Childs of New York for Gladiolus America, to J. F. Huss for collection of anemones, and to Peter Zuger for water lilies.

During the evening the charm of music was added to the floral beauty and an orchestra played from 8 to 10 o'clock.

### LENOX HORTICULTURAL SOCIETY.

The Lenox Horticultural Society meeting, held on Saturday, Sept. 19th, was largely attended. Laurence Cassell was elected a member. It was unanimously voted to affiliate with the Chrysanthemum Society of America and that the cup be competed for at the forthcoming exhibition. The various committees were appointed for the fall show. Ed. Jenkins gave a short talk on Mendelism or, as commonly known, Mendel's law, which was very interesting and instructive, but owing to the long business session was not widely discussed. Mr. Jenkins was accorded a hearty vote of thanks. G. INSTONE, Sec'y.

### COLUMBUS FLORISTS' CLUB.

The first meeting since the vacation during July and August of the Columbus Florists' Club was held Tuesday night, September 22. There was a good turnout. The meetings will be held as usual on the second and fourth Tuesdays of each month. A new committee on entertainment was appointed as follows: Jas. McKellar, chairman; I. D. Seibert, Wm. Metzmaier, J. Reichert, and Sherman Stephens. They are planning for a dance in the near future and also some interesting features for every meeting.

JAS. MCKELLAR, Sec.

### HUNTINGTON HORTICULTURAL AND AGRICULTURAL SOCIETY.

The sixth annual exhibition of the Huntington (N. Y.) Horticultural and Agricultural Society was held on Sept. 24th in the Opera House. The show was a financial success and well attended.

There was a scarcity of fruits, especially apples, but a good showing of vegetables and flowers. A special exhibit of flowers and vegetables by school children, grown by them from seeds furnished, attracted much attention. There were 166 entries in their classes. A display of wild flowers collected and pressed by children was also a feature.

John Lewis Childs showed Gladiolus America. Dahlias were very prominent among flower exhibits, and in these classes James Duthie, gardener for F. M. Townsend, Oyster Bay, carried off all the first honors with magnificent blooms and 150 varieties. He exhibited for H. A. Dreer six blooms of Dreer's White, a superb show variety of largest size.

Among winners of prizes were August Heckscher, gardener Adolph Alius, first for adiantum, palm, roses, (two classes), hand bouquet, collection vegetables (twelve varieties), nineteen first for vegetables and four for fruits. W. J. Matheson, gardener Jas. Kirby, first for collection of perennials, five firsts on vegetables and one on fruit. Walter Jennings, gardener Richard Cartwright, five firsts on vegetables and two on grapes. L. I. R. R. Experimental Station, first on collection vegetables (six varieties). Huntington Nursery Co., first for tuberous begonias, carnations, basket cut flowers and floral centerpiece. R. J. Kelly, two firsts for vegetables. H. T. & A. H. Funnell, first for Begonia Rex and for specimen nephrolepis.

The Mortimer L. Schiff prizes for collection of vegetables were won by August Heckscher for twelve varieties and the Long Island R. R. Experimental Station in class for six varieties. William Eccles, superintendent for Mr. Schiff, showed some splendid blooms of the new dahlia W. W. Rawson, a superb show dahlia, for which he received honorable mention.

A. H. FUNNELL, Sec'y.

### AMERICAN INSTITUTE DAHLIA SHOW.

This exhibition held last week at New York was one of the best ever presented by the American Institute, particularly in dahlias and vegetables. The dahlias were very numerous, the quality excellent and the proportion of new and choice varieties very large in all the classes. Among the dahlia exhibitors were such well-known Massachusetts growers as W. C. Lathrop, E. Bridgewater, W. D. Hathaway, and Mrs. H. A. Jahn, New Bedford; George Stillman, Westerly, R. I.; J. T. Lovett, Little Silver, N. J.; Mills & Co., Mamaroneck, N. Y., and H. A. Dreer, the latter showing Dreer's White, a variety that has been greatly admired wherever shown. A number of private gar-

deners also figured in the dahlia competitions, including Geo. Hale, Jas Dowlen, James Duthie and W. D. Robertson.

Fruit and vegetables were shown in fine form by a number of commercial and private growers. Inside fruit comprised melons and grapes from Howard Gould, gardener Harry Turner, and grapes from F. W. Hawes, gardener H. L. Hand.

Howard Gould was represented by a splendid group of flowering and foliage plants, an especially brilliant attraction being his remarkable set of specimens of the new *Celosia Pride of Castle Gould*, also *Oncidium varicosum* and *Cattleya labiata*.

An equally impressive and creditable display of foliage and flowering plants came from Julius Roehrs Company, Rutherford, N. J. Particularly good were their *Vanda Coerulea*, *cattleyas*, *laelias* and *odontoglossums*. Lager & Hurrell were also on hand with a fine collection of orchids. Among the promiscuous exhibits were hardy herbaceous flowers from Bobbink & Atkins and J. T. Lovett, roses and a centerpiece of dahlias from Mrs. J. B. Trevor, gardener Howard Nichols, and roses from L. A. Noe.

#### LONDON DAHLIA UNION.

The above society held a very interesting and attractive show in the Royal Botanic Gardens, Regent's Park, on the 10th and 11th of September last. Besides the ordinary society prizes of cash, there were medals awarded by the Royal Botanic Society for the best non-competitive exhibits. The most extensive display was unquestionably that set up by Hobbies Limited, a vast array of all types of the popular flower arranged on a table 55 feet long. Decorative, Peony and Cactus varieties were in the ascendant, and the method of staging in long stands at the back with shorter ones gradually down to the front, was artistic and effective. A large gold medal was awarded. Peony flowered and decoratives included Dr. Hogg, London, Peru, Thunderer, Jeanne Charmot, Paul Kruger, Princess Royal, Queen Wilhelmina, Souvenir de Gustave Douzon, Germania, Queen Emma, etc.; Cactus were Caradoc, Ajax, Imperial, Amo Perry, Vigil (1909), and scores of others equally meritorious.

J. T. West had a fine group beautifully staged, the total length of this group being about 36 feet. Exquisite little floral gems in the pompon section were staged in abundance—Daisy, Bacchus, Adelaide, Alice (1909), Midget, Nerissa, Girlie, Arthur West, Lassie, Annie Doncaster (1909), Jay, etc.; Cactus were Celia, Lustre, Gaselle, Nelson, Rosa Starr, Sunbeam (1909), Stormer (1909), Wm. Marshall, all prettily set up in vases. Peony and others were Rembrandt, Ruskin, Van Duet, Liberty, Rubens, Raphael, Burne Jones, La Calosse, Avalanche, etc.

A gold medal was also awarded to Dobbies & Co., who had a handsome display containing many of the varieties already mentioned in the preceding exhibits. Warnaar & Co. and G. Van Waveren and Kruifit of Sassenheim, Holland, exhibited two choice collections of Dutch peony flowered dahlias, for which they were awarded a silver gilt medal. J. Burrell and Co.

staged gladioli and roses in baskets. Show dahlias were very fine. S. Mortimer was first for 21 cut blooms. C. Turner, John Walker and Keynes, Williams & Co. followed in the order named. There were some tastefully arranged displays in the classes for vases and table decorations.

Pompons and singles also made a very effective display. The classes for Cactus contained many fine flowers, for which no space can be found at the present moment. In class 13, for six blooms of any show or fancy variety not yet in commerce, S. Mortimer was first, with Tom Jones, Keynes, Williams & Co., second, with Crusoe. The first named exhibitor also staged Tasmania, Jasper and Red Cap novelties.

A large display of fruit, principally apples, came from Spooner and Sons  
C. HARMAN PAYNE.

#### THE MINEOLA FAIR.

This is more of a country fair, with the cattle, poultry, farm machines, etc., than a horticultural exhibit. Located in what they call the garden section of Long Island, with the mansions, gardens and greenhouses of so many wealthy people close by, we had expected to see something better in the way of plants and flowers.

Dahlias were the feature of Floral Hall, James Duthrie, gardener to Mr. E. M. Townsend, Oyster Bay, taking first prize for best collection of 25 varieties, which were certainly remarkably fine. Second went to Geo. H. Henning, Freeport, who also had a fine exhibit. A special prize was awarded Oscar E. Addor, gardener to Mr. Harold Goodwin, Roslyn, for cactus dahlias, some extra fine varieties, several of which had never been exhibited in this country before. He also had a variegated seedling cactus, which promises well.

The one dahlia that attracted most attention was Dreer's White, a fine large show, a magnificent flower, a vigorous grower and early and profuse bloomer, with long strong stems, exhibited by Henry A. Dreer, Philadelphia, Pa.

There were quite a display of annual flowers, some roses and carnations, largely in a badly-wilted condition on the fourth day, when our correspondent was there. John Lewis Childs had a bench of gladioli in fine assortment. A mound of palms, ferns, crotons and other plants in the centre of the hall, with a couple of benches of plants, were also from his place. Frank Weinberg, the cactus specialist, had a fine display of his pets, as well as a bench of other plants.

Out on the grounds, near the vegetable tent, we found Adolph Jaenicke, of Floral Park, with a fine exhibit of evergreens, etc., and a vase of Gerbera Jamesoni gigantea, which was attracting considerable attention. In the vegetable tent there was a fairly good display of vegetables that, considering the crude conditions, were well put up, though we noticed that size rather than quality generally had the awards. Stump & Walter, of New York, occupied the centre of the tent, with a nice display of their goods.

#### THE VINCENT FESTIVAL.

The flower show in connection with the annual Harvest Home Festival, to-

gether with the summer meeting of the Maryland Horticultural Society, made a very lively and highly enjoyable affair at the establishment of the R. Vincent, Jr., & Sons' Company at White Marsh, Md., last week. The celebration began on September 22 and the Gardeners' and Florists' Club of Baltimore City accompanied by a party of guests from the Florists' Club of Washington, graced the affair with their presence. The dahlia fields with three hundreds of thousands of plants of every conceivable variety were a prime attraction, and the geraniums, chrysanthemums and other specialties largely grown by this company were inspected with much interest.

At the meeting of the Maryland Horticultural Society an address of welcome was made by R. Vincent, Jr., to which an appreciative response was voiced by President C. L. Seybold. Peter Bisset, Prof. H. J. Patterson, C. Barker, W. I. Walker, J. S. Harris, Col. W. S. Powell and C. Stowell Smith all made addresses, the latter speaking on wood preservatives. Prizes for the exhibits were awarded by a committee consisting of Thos. B. Symons, Geo. Morrison and Geo. O. Brown. The display of vegetables and fruit was excellent.

#### INTERNATIONAL EXHIBITION OF THE EAST OF FRANCE.

We have just received particulars of the horticultural section of the above exhibition, which will be held in the park at Nancy in 1909. It will open in May and close in October and there will be a permanent horticultural display as well as several temporary ones.

In the permanent display there are 26 classes provided. A temporary display will be held on June 19 to 22 inclusive consisting of 90 classes for novelties, greenhouse plants, outdoor plants, floral art, fruit and fruit trees, market gardening.

On July 13 to 16 inclusive, another temporary show will be held, and 70 classes are provided for. A similar gathering is announced for August 21st to the 24th, and another September 25 to 28. The secretary is M. Gerveaux. C. HARMAN PAYNE, Sec.

#### CLUB AND SOCIETY NOTES.

Hon. G. B. Leighton has offered a silver cup, valued at \$35 for the best general exhibit of vegetables at the coming meeting of the N. H. Horticultural Society at Milford, the cup to be won two years before becoming the property of the winner.

The 25th anniversary of the Blackstone Valley Agricultural Society held in Uxbridge, Mass., Sept. 22-23, was the most successful on record, financially and for attendance. Old Home Week was celebrated in connection with same. Decorations and parades compared very favorably with some of our good-sized cities. Mr. W. A. L. Bageley, the president, was more than pleased with the results and is already making plans for a still better fair next year. R. & J. Farquhar & Co., Boston, had a very beautiful and extensive display of dahlias, which was admired and considered the best display of its kind ever seen in these parts.

## CYCAS CULTURE IN BERMUDA.

New York, N. Y., Horticultural Society of New York, annual exhibition, Nov. 17, 18, 19.

And other Mich. flowers grown by children were offered for sale after the papers were arranged in the exhibit. (p. 30, Sept. 27)

One of the pleasant little affairs in many years for the Boston fraternity was the reception and banquet tendered by a few friends to Lawrence Cotter on Saturday evening, September 20, at the Boston City Club. The fact that Mr. Cotter was to depart in a few days to take charge of the big establishment of the Lakeview Rose Gardens, Jamestown, N. Y., was the cause of it all, and if Mr. Cotter fills in the glowing future predicted for him by his friends on this occasion his name will surely be emblazoned on the tablets of fame in the horticultural annals of America. It was undoubtedly the sentiment of the gathering gathered to our banquet and to bid him success in his new career. Little did the individual members of the fraternity realize the extent of the secret of their banquet to a score of important titles of the new and improved American rose garden. The guests included Messrs. M. C. and J. H. Tilton, who were naturally brought with roses and made the evening more enjoyable to the very end. The members of the new law Lakeview Rose Gardens, owned by the Alex. McLean Co. of the Walden Rose Co. of New York, whose taking was announced. It was the consensus of opinion among the rose growers present that this is to be the most popular commercial white rose of the immediate future. This was, we believe, the first time it has been shown in America and the occasion was well worth such notice.

The dahlia fields, many acres in extent, are all aglow with bloom and present a gorgeous sight. Here are seen old and new varieties by the hundred, but none make a more effective impression on the visitor than the glorious yellow, Charles Lanier.

#### OBITUARY.

James W. Paul, Jr.

James W. Paul, Jr., one of the most prominent citizens of Philadelphia, head of the great banking house of Drexel & Co., Philadelphia, Paris, London and New York; and president of the Pennsylvania Horticultural society, died suddenly at Hot Springs, Virginia, September 24th. The funeral took place from his country home, Radnor, Pa., September 28th. A special meeting of the Pennsylvania Horticultural Society was held at Horticultural Hall, September 28th, at which the following resolutions were adopted:

Whereas, It has seemed good to the Almighty Ruler of Events to remove from our midst our honored and beloved President; it is

Resolved, That in submitting to this decree we can but deplore our loss, and that we earnestly desire thus to place on record our sense of the important services he has unfatigably rendered to the cause of Horticulture and the beautifying of our homes.

Resolved, That we tender to his family and friends this tribute to his memory. In all his dealings with the Society there was evidenced the considerate spirit of the Christian gentleman whose liberality led him to consider the feelings of others, while he was always in the forefront of every movement of true progress, and ready to help with mind and purse the advance of every betterment that was proposed. We shall miss his clearness of view and modest firmness in pursuit of every advantage proposed in our efforts to bring the culture of flowers, fruits and vegetables to the perfection we all desire.

Resolved, That the above be sent to his family and the newspapers of the city and that the Council attend the funeral.

(Signed) J. Cheston Morris, Edwin J. Dale, David Rust, Committee.

Mr. Paul was a son-in-law of the late Anthony J. Drexel and was one of the leaders in high taste in gardening matters. His palatial home at Radnor, Pa., (presided over by Joseph Hurley) was the Mecca for countless visitors looking for high achievements in horticulture. His good deeds will live long after him.

Mrs. Cochran.

Eleanor R. Cochran, wife of John T. Cochran, gardener for J. Edward

Addicks, Claymont, Del., died on the 28th inst., aged 50, and was buried Oct. 2nd, at Palmyra, N. J.

#### SWEET PEA CLASSIFICATION.

The Floral Committee of the National Sweet Pea Society of England recommends the following varieties as the best in their colors:—White: Dorothy Eckford, Etta Dyke, and Nora Unwin. Crimson and Scarlet: King Edward and Queen Alexandra. Rose and Carmine: John Ingman. Yellow and Buff: James Grieve and Paradise Ivory. Blue: Lord Nelson and A. J. Cook. Blush: Mrs. Hardcastle Sykes. Cerise: Chrissie Unwin. Pink: Countess Spencer and Constance Oliver. Orange shades: Helen Lewis and St. George. Lavender: Lady Grizel Hamilton and Frank Dolby. Violet and Purple: Rosie Adams. Magenta: Menie Christie. Picotee-edged: Evelyn Hemus. Fancy: Sybil Eckford. Mauve: Mrs. Walter Wright and The Marquis. Maroon and Bronze: Black Knight and Hannah Dale. Striped and Flaked (red and rose): Jessie Cuthbertson and Paradise Red Flake. Striped and Flaked (purple and blue): Prince Olaf. Bicolor: Jennie Gordon. Marbled: Helen Pierce.

#### SILENE LACINIATA.

This perennial is one of the nicest of all known Silenes. It is at home among rocks, or in rocky, sunny soils. It grows from about six to eight inches high, and blooms during the whole season with brilliant red flowers. The roots are quite thick, and penetrate very deep into the soil. We find it requires a sunny, dry location, and in winter a protection of pine needles or the like.—From *Moller's D. Gt. Ztg.*

#### NURSERY STOCK

Norway and Sugar Maples, 10 to 12 in. high, Beeches in variety, 6 to 16 feet. *Viburnum mentosum* and *plicatum*, Forsythias, Deutzias, Altheas and other shrubs 4 to 12 feet. Ask for complete list of ornamental nursery stock in catalogue.

# STANDARD FLOWER POTS

PHILADELPHIA, PA. LONG ISLAND CITY, N. Y. JERSEY CITY, N. J.

### STANDARD POTS IN RELATION TO CHEMICAL FERTILIZERS.

The late editorial in *HORTICULTURE* entitled "Standard" flower pots touched our chemical nervous system and we are obliged to respond to the stimulus. While it may seem a far cry from flower pot to chemical fertilizers (and other things) this is more apparent than real, and the farness is close to nearness.

We presume the great intrinsic value of "Standard" whether applied to iron piping, diameter and threading of same, to threads on bolts, or what not, is generally admitted without cavil—it is a self-evident proposition. Are there or are there not as many advantages and of a similar nature, in the case of flower pots? If so there remains but the stumbling block of what or whose standard, to our minds an inferior desideratum in comparison with the advantages to be derived from any fairly universal standard. As far as that goes if one had even two we would be better off than with no one knowing just what his flower pot did represent.

The great advantage of a standard is in knowing what to expect, whether this be a question of size, capacity of pipe with the attendant known areas and delivery, whether price, or ability to replace similar parts at once from convenient commercial stocks ready to ship. All this is common information; nothing new or startling and doubtless realized by the trade.

There can be nothing new in the use of flower pots as standards of dry (or wet) measure and therefore to this extent standards of weights. Often we note a direction of some kind given in terms of a "two inch pot," "level full" and so on. As the relation between dry measure and weight is easily found out and fairly constant we have here a substitute for weighing by scale. Although the time is at hand when every greenhouse establishment must have one of these useful machines at hand to use for a variety of purposes they are not carried about very easily and often pot measure is just the thing.

We plead ignorance of what may have been done in the past to choose standard sizes, and it may be that attempts have been made to have pots hold so much water which is a universal standard for weight and this procedure would appeal at once to the person who might have to figure this thing out, as that would save time. But this is trivial in comparison to the saving if we could have some standard, however arbitrarily chosen.

If we try to avail ourselves of flower pots as a measure for fertilizers it is most pertinent to inquire the accuracy of such a method.

With any material, using any kind of measure, and flower pots are no ex-

ception, we must take cognizance of these factors:

(1) Purity of material; (2) Mechanical fineness; and (3) Amount of packing (tapping or shaking the pot) compression.

We will not talk about purity of substances, but will mention fineness of grain and packing. There is not so much difference as might be imagined between the weights of a fine ground and coarse ground (or unground) common salt except that the levelling can not be very good when large coarse particles are on top.

We found it possible to make a considerable difference in the content of the pot by continual shaking or tapping with successive partial fillings but we believe that with one filling, then a tap or two, then leveling off with no pressing of the straight edge that rapid and satisfactory measuring may be done in this way and no doubt is being done every day. Such work should come well inside the limit of error of 10 per cent which with our present knowledge is sufficiently accurate for many operations. With a few trials we believe that it would be possible to halve this error.

The idea was to see if ordinary help could do this sort of weighing out with any degree of hopefulness and if it would be possible to construct a table showing all such weights of various-sized pots. To start at the beginning of the pot we made bold to ask manufacturers if they cared to give any information about sizes of pots when made and so on, and to our surprise while several answered us courteously, giving us some information about the "Standard" pot they had nothing to say about standards in general nor much about the figures concerned in their own pots.

We should like to ask them if there is not some value in pots as a measure and could not the hole be omitted without much expense and a few be stamped with the average weight of the pot and its cubic contents to save calculation?

DUDLEY M. PRAY.

### TELEKIA CORDIFOLIA.

This perennial grows to a height of four to six feet, and flowers from June until October. The branches are stout, the leaves heart-shaped and double serrate, and the flowers are about three inches in diameter, of a reddish yellow and purple color, and quite numerous. Either as specimen plants, or in front of tree plantations, *Telekia cordifolia* makes a good effect.

A plant closely related to this is the variety *succulosa*, which is an Alpine plant.—From *Moller's D. Gl. Ztg.*

F. W. Fletcher & Co. have leased for five years the Seaverns Lane Greenhouses at Weston, Mass., and will devote them exclusively to *Marguerite* growing. There are four houses in the range

### "WIRELESS" FROM WESTERLY, R. I.

S. J. Reuter & Son have demolished seventeen houses in their big range at Westerly, R. I., this season and built in their place three modern iron-frame and concrete-foundation houses each 35x185. During the coming season ten more of the old range are to come down, to be replaced by two of the new type. This is only a part of the improvements contemplated in the near future.

In the carnation houses the variety *Splendor* holds a position of high esteem with Mr. Reuter. It seems to be a particularly good variety for early blooming, the color similar to that of *Afterglow*. As an early and all around useful white, *White Perfection* has no rival here. It leads them all.

*Chrysanthemums* look very promising except only the variety *Golden Glow*, which for some reason came with the foliage badly yellowed, and Mr. Reuter is interested to learn whether any other growers have had a similar experience with this variety. In the rose houses *Rhea Reid* is having a trial along with most of the other recently introduced candidates for popular favor. Its status has not yet been decided. One thing Mr. Reuter is willing to say about it is, "that it requires oceans of water."

### STANDARD FLOWER POTS

28th and M Street WASHINGTON D. C.

DECISIONS OF THE BOARD OF  
GENERAL APPRAISERS.

No. 19667.—Evergreen Seedlings—Transplanted Holly Plants.—Protest 295035 of Jackson & Perkins Company.

Holly plants, classified as evergreen seedlings under paragraph 252, tariff act of 1897, were claimed to be dutiable under the provision of the same paragraph for nursery or greenhouse stock. Protest overruled.

Waite, General Appraiser: \* \* \* The question involved in this case was discussed by the Board in G. A. 6169 (T. D. 26772), wherein the conclusion was reached that the provision for evergreen seedlings in paragraph 252 is not restricted to plants of a coniferous nature, but applies to seedlings of all plants that are "evergreen"—that is, which retain their greenness or verdure throughout the year, as distinguished from those which are deciduous, or which lose their foliage every year. The above decision has been affirmed by the circuit court (153 Fed. Rep., 916; T. D. 28183) and by the circuit court of appeals (T. D. 28953). The holly, according to this distinction, belongs to the class of evergreen plants, and it is so characterized by the Standard and Century dictionaries.

The importers also contend that the word "seedlings" applies only to plants "in the seed bed, which have not been transplanted," and that the holly plants in question are not properly classifiable as seedlings, inasmuch as they have been "transplanted from the seed bed and grown on for two seasons." It was held by the Board in G. A. 5305 (T. D. 24305) that the word "seedlings" applies to plants grown from the seed, as distinguished from those propagated by cuttings, budding, or grafting, irrespective of whether or not they had been transplanted. No appeal having ever been taken from this ruling, it will govern in this case.

No. 19651.—Rhododendrons. — Protests 302447, etc., of R. F. Downing & Co. (Boston).

Rhododendrons, classified as nursery or greenhouse stock under paragraph 252, tariff of 1897, were claimed to be dutiable as evergreen seedlings under the same paragraph on the authority of United States vs. Ouwkerk (T. D. 28953), in which it was held that seedlings of certain species of laurel and rhododendrons which retain their verdure throughout the year were so dutiable. Protest overruled.

Waite, General Appraiser: \* \* \* The merchandise before us here is certain-named varieties of rhododendrons, and it appears from the appraiser's report and other evidence to which the Board has access that plants such as these are never grown from the seed, but are always "grafted or layered plants," there being only three species of the rhododendron grown from the seed, none of which appears on the invoices under consideration. The plants in these importations not being seedlings,

the decision above cited is not applicable thereto, and we therefore hold the goods have been properly assessed as nursery stock.

No. 19652.—Evergreen Seedlings.—Protest 182088 of F. H. Shallus (Baltimore). Opinion by Waite, G. A.

On the authority of G. A. 6169 (T. D. 26772) certain rhododendrons, evergreen seedlings, hollies, etc., were held dutiable as evergreen seedlings under paragraph 252, tariff act of 1897, as claimed by the importers. An item of azaleas was held to have been properly classified as such under paragraph 251.

## GENTIANA ACAULIS.

This plant is a native of the Alps. Its deep blue flowers are liked by everybody. In Switzerland it is frequently used. Its preference is a sandy clay. It can be propagated by division or by seed. If by the latter, in the fall the seed is sown in a cold frame in a mixture of leaf-mold, loam and sand; from the seed bed the plants are once transplanted in another cold frame and then set out in their permanent places about ten inches apart. The blooming time is from the middle of May to the end of July.—From Moller's D. Gt. Ztg.

SEEDING BEGONIA GLOIRE DE  
LORRAINE.

Growers of Begonia Gloire de Lorraine who have failed to get seed will be interested in the following note clipped from The Gardeners' Chronicle for Sept. 12, 1908.

"On practically every raceme of Gloire de Lorraine bloom the last flower produced is a female one. By the time this flower makes its appearance, however, the plant has lost most of its beauty, and the inflorescence is removed before the female flowers open. It follows, therefore, that to produce seeds of this plant, the inflorescences should not be picked off until every flower has opened.—C. H. Middleton.

BEAUTIFUL FLOWERS AND HOW  
TO GROW THEM.

An edition de luxe at a popular price is announced by Messrs. Jack of London and Edinburgh, bearing the above title. The book will be issued in 17 parts at 1s. each net. There will be 100 plates in full colors, besides numerous cuts in the text. Messrs. Horace J. and W. P. Wright are the joint editors. C. H. P.

## CONSERVATORY AT GARFIELD PARK, CHICAGO.

The new conservatory at Garfield Park is the latest acquisition in the Chicago park system. It was erected at a cost of nearly a million dollars, and is now practically completed. It covers 75,000 sq. ft., its length 302 ft., width 250 ft., and height 64 ft. Its central area 112 x 150 ft. is used as an aquatic house. The Foley Mfg. Co. supplied all the wood used in its construction.

## AGRICULTURAL EDUCATION.

(A Paper Read Before the Suffolk County Agricultural Society, by Walter L. Jagger.)

The education of the present day appears to be away from the farm, for the major part of the young men who graduate from college appear to think that the farm is only a place of last resort, where they may regain the health—and sometimes the wealth—which they oftentimes sacrificed in the professions or the mercantile pursuits in the cities; failing to realize that, if the same amount of learning and energy was given to agricultural pursuits they might be most successful, whereas they are at present only making a bare subsistence, and sometimes losing their health. Fifty years ago it was thought that the boy who was not qualified for professional or mercantile pursuits might be a farmer. We are ready to admit that there are many very successful farmers who have not a college education; but this does not prove that they might not have been a great deal more successful if they had had a higher education.

## The Best Disseminators of Education.

The daily press and the agricultural journals of the present day are highly educational, and no man can read a good daily or good agricultural paper without gaining useful knowledge. There is also a school of experience which is no mean factor in gaining an agricultural education. By observation and experiment we may often gain useful knowledge. Farmers' Institutes and Horticultural Societies are great disseminators of agricultural wisdom.

The paramount need of a farmer is a good education in its broadest sense. He needs to know the relation of farming to other things. True, education will teach him to respect his calling. Farming is an honorable and respectable calling; and yet how often do we hear it belittled by such expressions as "only a farmer," "a hayseed," "a clod-hopper," etc. Did you ever stop to think that the farmer is the only real producer of wealth in this world? Where does the Wall street banker get his money? Does he make it? No! He shears the lambs from off the farm. And who feeds our Uncle Samuel's

large family of 83 millions of children? The farmer, assuredly.

## Something More than Arithmetic.

The idea, once prevalent, that arithmetic was the most important study for a boy is now out of date. As much as any one does the farmer's boy need to know grammar and the use of language. He must know how to read, how to think, and how to express himself. The farmer needs a thorough education that he may be thorough in all things his business included.

Much of a farmer's education can be obtained at home. The farmer who conscientiously and thoroughly follows the news of the week in a good daily paper will soon become well posted upon the affairs of the world. After the news of the week let him study the markets, and then the various lines of agricultural work as found in good books and papers, and it will not be long before he will feel stronger and more capable. His neighbor will notice the difference and will respect him accordingly, and his farm will become more productive and more valuable. Education, then, must be thorough; and it must be broad enough, that its possessor may profit by comparison, as judgment based upon one line alone is apt to be erroneous.

## "Book Farming" No Longer a Reproach.

There are occasionally to be found instances where farmers who seek to improve and enlarge their knowledge of agricultural science are accused of "book farming" by their neighbors, but so many instances of increased profits from a better knowledge of farming, as a business, are coming to the front in nearly every neighborhood that this ridiculous sort of sentiment is fast dying out. A farmer cannot afford to ignore all these sources of gaining a knowledge of his business, and the best ways of growing and disposing of farm products to the best and most profitable advantage. Any more than a professional or business man of the city can afford not to keep posted and abreast of the times.

Life is too short for any one of us to learn all there is to be known of our profession or business by our own experience and work, especially when it

is possible to get all the experience and knowledge of our best farmers and writers at so small a cost as the price of a few good farm papers and text books. Farmers have about as much to learn in their profession as any other class, and we have always thought it time well spent to read or listen to the plans and methods followed by those who have had a more successful experience than our own. It is cheaper than to do the experimenting ourselves. It doesn't follow that we should do no experimenting ourselves. Times, conditions and crops, as well as market demands, are constantly changing and our knowledge in general can be greatly increased by some judicious research and an exchange of ideas or results. Not all that we read or hear is at all applicable to every man's needs or the special kind of farming he may be engaged in, but he must be able to pick out the points that are applicable to his own particular conditions.

## Winter Opportunities.

During the summer the tiller of the soil has little spare time for reading, but that is the time to apply new ideas gained by the previous winter's reading. Winter nights are long and with plenty of books and papers, bulletins, farmers' institutes, horticultural societies, etc., within reach of most of us, it certainly looks as if we ought to gain some knowledge which may be of great use to us, while we rest up and do some planning for the busy season; and go into our work with a better knowledge of what we are going to do, and how we are going to do it, than ever before. We certainly believe that in farm reading and study, the adage that "in the multitude of counsel there is wisdom" is altogether true. During winter plan your work, and during spring and summer work your plans.

The successful farmer is the one who attends strictly to business. Never put off 'til afternoon what you can just as well do in the morning. Day-after-tomorrow is a very uncertain time for doing business.

"Everything comes to those who wait,  
And the lazy man waits to greet it;  
But success comes on with a rapid gait  
To the fellow who goes to meet it."

## Seed Trade

The long disastrous drought has at last been effectively broken, and a period of thankfulness is raised throughout this broad land. While not the worst in the history of the country, it takes rank among the worst droughts of recent years. Millions of dollars' worth of timber has been destroyed both in this country and Canada, at least as an indirect result of the drought, villages and towns have been laid in ashes, and many lives have been lost. In addition, the loss to farmers has been immense, in damage to crops, and in the loss of pasturage alone, millions can be charged against the drought. For several weeks farmers have been compelled to feed hay and grain to their stock because there was no grass, and at least two months' pasturage has been lost. There has been a great shrinkage in the volume of farm products such as milk, eggs, butter, etc., and prices are soaring near to the figures of mid-winter. Let us hope that the outpouring from Jupiter Pluvius will at once arrest this unwelcome advance, and by increasing production restore prices to normal figures again.

It is not too late for pasturage to improve sufficiently to furnish feed for some weeks yet, but it is of course too late to benefit any but fall-sown crops. It will enable farmers to resume work which has for some time been suspended as a result of the drought. The ground had become so hard as to render it practically impossible to plow, with the result that the sowing of winter grain will be late. Many farmers will not sow at all, the consequences being more or less of a reduction in acreage.

A few preliminary estimates of deliveries of peas of the 1908 crop have sifted through, and they are calculated to cause sinking spells among canners and seedsmen, particularly the former. The estimates range from 25 to 40 per cent, and on such varieties of canners' peas as Admirals, Horsfords, Advancers and Surprise, figures have been as low as 20 per cent. But this is not the worst of it; the shortages cannot be made up. It will be impossible to buy them, as they do not exist, and what the canners are going to do for seed is a yet unsolved problem. The writer, with a pretty fair knowledge of conditions, expresses it as his deliberate opinion that in the matter of seed peas, the seedsmen and canners are confronted with the worst situation they have ever been called upon to face, and the latter in particular.

The canners sell most of their output in advance, and sell the product of certain varieties of seed, and while the rest is not generally represented by the seedsmen, most varieties have a distinct appearance in the can, and the trained eye of the experienced canner or careful goods buyer can detect this at once, therefore the canner cannot

substitute one variety for another without the consent of the buyer.

Most of the "Sweet" peas are packed from the four varieties named above, excepting the Telephone brand. These are a large ungraced pea but few if any canners use Telephone seed. This variety has proven too shy a yielder to be profitable either for the canner or farmer, and as a consequence other varieties such as Prince of Wales, Queen, Yorkshire Hero or Shropshire are used.

For their first early pea, practically all canners prefer the Alaska, while for their main pack of sweet wrinkled sorts, they are compelled to use one or more of Admiral, Advancer, Horsford or Surprise. But a limited quantity of the large or Telephone brand is used, and the only varieties that can be used to produce the type of canned peas and the sizes wanted by buyers, are these four and considering the short deliveries, and the practical impossibility of buying them anywhere in quantities, the predicament of the canners can be appreciated. Gems and Nott's Excelsior might in a great emergency be used but the vines are too short, and they are too shy croppers to be popular with either canner or farmer.

Frosts more or less severe have speedily followed the rain, and any corn, vine seeds, tomatoes or other seed crops not fully matured are done for, but the long dry warm spell has left comparatively little for the frost, and it is fortunate, as the shortage is heavy enough as it is.

Connecticut field pumpkins are said to be abundant; conditions which have been bad for most other crops seem to have been just right for this one. The denizens of the "pie belt" will be doubly grateful when Thanksgiving arrives, and incidentally those outside of this happy zone will try to be for the same reason, but the article they have is a base imitation, and few can ever know what a real pumpkin pie is until they have sampled the real New England article.

C. W. Moore has purchased the interest of his partner, and the firm of Moore & Simon, of Philadelphia, will hereafter be known as the Moore Seed Co.

The Henry Field Seed Co., Shenandoah, Ja., re-elected all officers and declared a dividend of eight per cent. at the recent annual meeting.

The establishment of Oscar H. Bill & Co., Bismarck, N. D., has undergone extensive improvements and additions during the summer.

### CATALOGUES RECEIVED.

Otto Katzenstein & Co., Atlanta, Ga.—Trade Price List, 1908-1909; a good commercial list of seeds of American conifers, trees, shrubs and herbs; also to hand catalogue in Spanish by same firm.

Goos & Koenemann, Nieder-Walluf, Germany.—Illustrated Catalogue and Price List for 1908-1909. This splendid catalogue is arranged in two parts, the first for hardy herbaceous plants and the other for fruit and ornamental trees and shrubs. Many promising novelties are listed.

### PUBLICATIONS RECEIVED.

Annual Report of the Park Board of the City of Portland, Oregon, for the year 1907.—A concise and interesting report embellished with several striking half-tone views.

The Nineteenth Annual Report of the Commissioners of Public Parks of the City of New Haven, Conn., has been received. The half-tones with which it is lavishly embellished give a better idea of the picturesque reservations of which New Haven is justly proud than any verbal description. The area under charge of Superintendent G. X. Amrhn is about 1000 acres, and the total cost to date is over \$700,000. A list of 185 species of wild birds found in the parks is included in the report.

The San Jose Scale and Methods of Treatment, by A. E. Stene, is a joint bulletin of the State Board of Agriculture and Extension Department of the R. I. College of Agriculture and Mechanic Arts. It is a valuable addition to the literature concerning this pest and the best methods of fighting it, being very complete and copiously covering every point on which information of a reliable character is needed. It is embellished with thirty cuts illustrative of the text and nineteen plates.

to be able to announce soon his full recovery.

John W. Dunlap, the pioneer florist of Milwaukee, will celebrate his ninety-fifth birthday on Oct. 16. On Nov. 1 he will resign his position as superintendent of Juncau Park.

Edward Hatch, the honored treasurer of the Gardeners' and Florists' Club of Boston, has been ill for several weeks, and is recuperating at his summer home in East Gloucester, Mass.

Carl S. Pomeroy, assistant horticulturist at Massachusetts Agricultural College, has accepted a position with the U. S. Department of Agriculture. Jacob Kingsley Shaw will succeed him at Amherst.

Alfred Rehder, of the Arnold Arboretum, has gone to Washington, D. C., where he will be engaged in important work for a number of weeks. On his return he will resume his valuable contributions to HORTICULTURE.

A. L. Vaughan, of Vaughan & Sperry, of Chicago, writes that the violets in the Hudson River district are in fine shape. Mr. Vaughan is taking a trip through that country in the interest of business for the coming season.

## NEW RETAIL FLOWER STORES.

A. E. Lutey, Young Block, Houghton, Mich.

H. L. Blind & Co., Liberty Ave. and 5th St., Pittsburgh, Pa.

P. R. Burt, West Deerfield, Mass.

H. F. West, Olean, N. Y.; F. L. Ingles, manager.

J. Reith, Dryades Market, New Orleans, La.

Max Eller, Walnut St., near 10th, Kansas City, Mo.

J. Friedl, 615 W. 26th St., Chicago, Ill.; Mrs. Charles Stewart, manager.

Miss Eva F. Fletcher, 5015 Baltimore Ave., Philadelphia.

## POINSETTIAS IN CHICAGO.

Most of the Chicago growers have a fine stock of poinsettias in pots and pans. If the weather follows the present indication and gets cooler, stock will be in fine shape for the holidays.

The warm weather has had a tendency to lengthen the stems. For cut flowers this is a good feature, especially if plants have plenty of room. But the early stock in pans for decorative purposes are better if kept short.

## NEWS NOTES.

C. G. Nieman has started in the nursery business at Port Clinton, O.

J. Tailby & Son have reopened their flower store in the square at Wellesley, Mass.

The Seymour conservatory at Wright Park, Tacoma, Wash., is completed at a cost of \$10,000.

Adolph L. Foster, New Rochelle, N. Y., has filed a petition in bankruptcy, with liabilities of \$11,526 and assets, \$1,388.

Angelo J. Rossi, florist at 1032 Jones street, San Francisco, Calif., was robbed of jewelry to the value of \$200 recently.

F. H. Kramer, Washington, D. C., will exhibit his new rose, Kramer's Pet, at the flower show Nov. 12-16. This appeared previously as Seedling No. 16.

The Racine Floral Co., Racine, Wis., opens the season with its four new houses equipped with all modern conveniences. Two houses are devoted to carnations, two to roses.

N. F. McCarthy & Co. have begun their regular fall plant auction sales at 84 Hawley street, Boston. The sales are held every Tuesday and Friday A. M. and the stock offered includes all kinds of seasonable material.

HORTICULTURE needs a wide-awake representative in every town in the land. Good commission paid on advertising and subscriptions. If you are ambitious, write for terms.

## Flower Market Reports.

**BOSTON.** Trade continues to fall off and the little movement that has been so carefully nurtured during the past weeks seems to have died out for lack of vitality, and it becomes evident to anybody that nothing with any backbone in it may be looked for until cold weather ensues. The demand is very weak on all lines, except American Beauty roses and lily of the valley, both of which enjoy the distinction of really being called for occasionally. Carnations and roses are improving in quality and increasing in quantity, but that is all that can be said to their credit at present.

The very dry weather **BUFFALO** has played havoc with asters and other outdoor stock, and the selling market for the past week was in fairly good condition. Gladioli have been received in good quantity and have sold steadily, and these together with dahlias have had a fair demand. Carnations have been coming in heavy, but with short stems and up to a week ago, the demand very light. Shipments arriving during the night were asleep when unpacked owing to the intense heat. On Thursday things brightened up and the balance of the week was a busy one for the trade. Beauties and other roses, together with lily of the valley and other stock, were in demand. Violets are of rather poor quality, but there is a call for them now and then. Chrysanthemums have made their appearance in this market from outside sources. Green goods are in good supply; demand normal.

General conditions are **CHICAGO** slowly improving. The market is not so overstocked and the cooler weather will soon improve the quality of the stock. Asters are nearing the end and the season has on the whole been far from satisfactory. The planting was late on account of the wet spring, causing the early crop of asters to be light, while the late ones were greatly injured by the hot, dry summer. Rain fell last Sunday, and the mercury dropped a few degrees. Chrysanthemums October Frost and Golden Glow are in the market, with stems from 30 to 36 inches. Bassett & Washburn and Poehlmann Bros. were cutting them this week. Carnations are improving steadily, and some very good flowers are seen. The first violets in the market were seen at Vaughan & Sperry's on Saturday. Roses are good, considering the hot weather. Beauties especially are fine and find ready sale.

Another week has passed without rain and the record for dry weather in the local weather bureau has thereby been completely shattered. The effect on outdoor stuff is very bad and another bad feature of this dry spell is the loss of fall foliage. The leaves are shriveling up and falling from the trees and this prettiest of all outdoor decorating material we shall have to forego. Business in general has been very good during the last week. Many of the florists are booking liberal orders for weddings and other social functions in the near future.

### NEW YORK.

It is not expected that there will be any material change in our flower market conditions here until a good breeze gets in its work on the outdoor flowers and verdure and the flower buyers who are still dallying in the country. The usual changes in quality of stock coming in, which is characteristic of the season, are going on; asters browned and dissipated looking, roses and carnations longer in stem and improved in flower; dahlias in the way; gladioli on last legs; chrysanthemums getting ready for the invasion and violets peeping shyly in at the doors of the commission houses, uncertain as to their welcome and wondering why there is no excitement. Shake the moth balls out of your overcoat. It's October!

**PHILADELPHIA** While there was a big influx of stock the past week over anything we have had so far, there was very little improvement in the demand. American Beauty roses were good sellers. Cattleyas also. Some unusual funeral work called for large quantities of lily of the valley and orchids and these were in consequence very satisfactory items. A few asters are still coming in but dahlias have the call. The welcome rains early in the week will probably give us far too many dahlias, but they will be finer than ever. Among roses Mrs. Jardine has suffered from the hot spell. Maryland shows up well and is a prime favorite. The weather has been too hot for carnations. They have gone back if anything and carry very poorly. A few violets are arriving and are all right if sold quickly.

Each week shows **WASHINGTON** a marked improvement in the retail as well as the wholesale trade. The continued hot, dry spell has about

**F**OR the past month our private office has been turned into a dispensary for the evolution of silk and satin allurements to charm the nimble orders for ribbons and supplies from the florists of the United States and Canada. Reduced to black and white and bound in compact form the result of this incubation has been mailed to all our customers of record. Anyone not on our list can have the catalogue on application. It will be a revelation to many to find what wonderful creations we offer to the up-to-date florist. We will be glad to hear from you.

**S. S. PENNOCK - MEEHAN CO.**  
1608-1620 Ludlow St., Philadelphia

"The" Wholesale Florists of Philadelphia

finished up the aster crop, not much before the public had begun to tire of it as a cut flower. Dahlias now prove a burden, though they are wonderfully fine. Chrysanthemums are coming in in very small quantities, and the quality is no advance on the quantity. Carnations are improving in size, but the stem is still short, so that the price cannot advance on them. The drought has finally been broken by one of the most perfect downpours that has visited this section in some time. At the present writing there has been but a very little frost; not enough to do any damage.

Although September **TWIN CITIES** has been very hot, trade all around was good. The market is well supplied but no surplus of anything. Quality not up to the standard. Asters are about the only thing where there is a shortage. Every grower complains about having lost most of them through some disease. Thousands went to the dumps before there were any flowers picked.

### Bostrom Improved Builders' Levels and Farm Levels

For Park, Cemetery and Landscape Gardening use, take the place of expensive Engineering Instruments. Simple in construction, easily adjusted, more substantial and less cumbersome than the more elaborate and complicated instruments. Practical, up-to-date instrument that any one can use. Write for descriptive circulars and be convinced that this Level is necessary to complete your outfit. Builders' Level \$25.00. Farm Level \$15.00.

NOW IS THE TIME TO USE

# DREER'S

## Peerless Glazing Point

(Improved Van Reyper Perfect)

Made of Galvanized Wire and Will Not Rust

This point has common sense features of practical value that appeal to practical florists and are possessed by no other point. The only double point with

### BOTH BEVELS ON SAME SIDE

A point made on any other principle will twist in driving and cramp or crack the glass. Drear's Peerless Glazing Points will never work out. Drives true and holds firmly by one blow of hammer or chisel. May be easily removed and used again in case of re-glazing. 1000 sufficient for 500 lights. Box of 1000 points 75c, postpaid. 5000 points by express for \$2.75.

**IF YOU ARE BUILDING** Let us know the thickness of glass you intend using and we will send samples of the size point needed.

**HENRY A. DREER, 714 CHESTNUT ST., PHILADELPHIA, PA.**

### DON'T EXPERIMENT

USE

## To-BAK-INE

and your stock will be free from insects, clean, and the blooms will not be discolored.

Send for full information of

H. E. FISKE SEED CO.  
13 Faneuil Hall Sq., Boston, Mass.

STUMPP & WALTER CO.,  
50 Barclay St., New York.

HENRY F. MICHELL & CO.,  
1018 Market St., Philadelphia.

E. H. HUNT, Gen'l Agent,  
76-78 Wabash Ave., Chicago.

## The Best Bug Killer and Bloom Saver

For PROOF  
Write to

P. R. Palethorpe Co.  
OWENSBORO, KY.

### GREENHOUSES BUILDING OR CONTEMPLATED.

Lowell, Mass.—P. J. Kelly, additions.  
Rosedale, Kan.—Mrs. Bunyar, additions.

Coto de Nojes, Can.—C. B. Gordon, additions.

Chillicothe, Ill.—Thos. Franks & Son, one house.

Washington, N. J.—Mrs. E. E. Jenkins, one house.

Clearfield, Pa.—Wm. Blacker, carnation house, 15 x 60.

Philadelphia, Pa.—Godfrey Aschmann, house 25 x 75.

Burlington, Ia.—Joseph Bock, three houses each 27 x 220.

Pittsburgh, Pa.—Chas. Koenig, two houses, each 30 x 100.

Franklin, Mass.—Continental Nurseries, house 50 x 200.

Montreal, Can.—Wilshire Bros., carnation house 20 x 100.

Providence, R. I.—G. C. Kelly, house 25 x 80; F. Sullivan, additions.

Morton Grove, Ill.—Nic Blatz, two houses, one 20 x 50, one 32 x 200.

### WHERE PROSPERITY THRIVES.

Idle Hour Nurseries of Macon, Ga., are having a violet house erected in addition to a range of greenhouses now about completed. These are all built by the Foley Mfg. Co. of Chicago, who have also just completed greenhouses for the Agricultural College at Urbana, Ills. Their superintendent is now in South Dakota looking after the erection of similar ones for the State Experiment Station there, and their work now includes greenhouses for experiment stations in Minnesota, Wisconsin, Indiana, Illinois, Maryland, Texas, Oklahoma, North Dakota, at the Industrial school for boys at Glenwood, Ills., and Chicago University. Mr. Foley is very reticent regarding his own work and reluctantly gave the above information. He says they are drifting into steel for frames and concrete for walls.

### PATENTS GRANTED.

592,039 Seed-Planter. William T. Gibbs, Louisville, Ga.

598,005 Lawn Mower. John C. Reimers, Stella, Nebr.

599,090 Seed-Can. Tester. Clarence G. Taylor, Sibley, Iowa.

599,046 Flower Scales. William H. Shaw, Springfield, N. J.

599,000 Means for Tilling Fields. George J. Geller, Rouses, N. Y.

599,000 Vapor Engine. August Iron, Mountainview, Hawaii.

### NEW HEATING APPARATUS.

John Walter Youngster, O., two large boilers.

Joseph Bock, Burlington, Ia., two large boilers.

We learn from the Birmingham (Ala.) Herald that in Birmingham to plant Carolina poplars is a criminal offense, and may be punished by arrest and a fine. The council at a recent meeting passed the ordinance, which sets the ban upon this kind of tree planting. It is condemned "on account of the leaves which fall early in November."

## The Payne Steel "T" Bar Greenhouses

The Lightest The Strongest

Half full Size

HOUSES of this type are constructed with both curved glass eaves and straight glass eaves. Least amount of shadow. Least amount of wood. No drip. Greatest durability.

### Why My New Curved Iceless Eave is Far Superior to Anything on the Market Today

- 1st. No sash bars incased in iron, thereby eliminating all danger of bars decaying.
- 2nd. Can be used in conjunction with iron frame construction, thereby doing away with that very objectionable feature, "columns."
- 3rd. Roof bars with drip grooves, which act as conductors to carry away the condensation: Result, the driest roof ever used for greenhouse purposes.
- 4th. **THE MOST IMPORTANT OF THEM ALL.** The very small increase in cost over the ordinary style of construction which makes it possible to be used for commercial as well as private purposes.

**William H. Lutton,** Horticultural Architect and Builder

West Side Ave Station (C.R.R. of N.J.) Jersey City, N.J.

## Horticulture at the Franco-British Exhibition

### IV.

#### THE ENGLISH GARDEN AND OTHER ENGLISH EXHIBITS

In a rather out-of-the-way corner in the official plan will be found a spot marked "The English Garden." So far as English horticulture is concerned it may be said to be conspicuous by its absence, for the large space consists of practically little else than a wide expanse of grass leading up to a huge painted canvas on which is depicted an English country landscape. It is evident that the English nurserymen have preferred to display their products in other parts of the Exhibition grounds and they are dotted about here and there in various places.

The only pretension to gardening in the so-called English garden is to be found in the extreme far end and belongs to an old Tudor House typical of the style of English architecture in those days. It is a fine old house and has a little bit of front and side garden enclosed within a wooden fence and a clipped hedge of yew. There is a grass lawn with a few clipped yews and some beds with box edgings. A stone path leads up to the front door and on each side a border contains sweet williams, stocks, nasturtiums, fuchsias, canterbury bells, sunflowers, asters, zinnias, phlox and other things that may be seen in any of our old English cottage gardens. There is a sundial, and some yews clipped in the form of birds, the whole being designed and laid out by J. Cheal & Sons of Crawley.

Close by is the Daily Mirror Cottage, distinguished by its grass plots, borders, beehive and other rustic surroundings, a few old-fashioned flowers, box and other shrubs. This completes the whole of what is termed the English garden. We therefore push our way further along and reach the Colonial Avenue where just against the wall of the Machinery Hall British Section we find an exhibit by Carter, Page & Co. of London. It is chiefly of dahlias not yet in flower with an edging of *Viola* Ardwell Gem and an inner row of Cox's semi-dwarf antirrhinums of all colors. *Violas*, Blue Duchess and Primrose Dame are also used along part of the front of this exhibit. The show by this firm is about 90 feet long by 21 feet deep and on the extreme right the edging is composed of *Viola* Councillor Waters, V. Blue Gown and Cox's semi-dwarf Antirrhinum White Queen.

Alongside the huge palace devoted to the products of Canada there is a large grass lawn broken only in the middle by a path leading to the side entrance. A fine piece of carpet bedding is here seen being composed of two enormous scroll-like beds with the word "Canada" boldly and tastefully designed. A repetition of the design is on the other side the whole being executed by J. Carter & Sons.

Around the walls of the Australian palace are also grass lawns cut up here and there by beds of different sizes and shapes planted by Jas. Veitch & Sons. Rhododendrons are the principal occupants of these beds,

but at the time of our visit were past their flowering season, and nothing but the edgings were in bloom.

The well-known house of Henry Cannell & Son fill a space at the entrance to the New Zealand Pavilion. In four neatly arranged but moderately sized beds edged with about a foot of turf they show palms, ferns and other decorative subjects. In one of these are *Nicotiana affinis*, *kochia*, cannas and a begonia edging. A bed of cactus, etc., comprises *Aloe serra*, *A. arborea*, *Cereus Peruvianus*, *Agave Queen Victoria*, *Opuntia Missouriensis*, *O. Engelmanni*, *Cereus acidus*, *Aloe plicabilis*, *Opuntia lurida* and *Yucca draconis* which excite no little attention on the part of the visitors.

There may be other exhibits from other English nurserymen scattered over the show but up to the time of writing we have not been able to discover them.

Chasman Payne

## Chrysanthemum Golden Glow

An introduction of this year, this variety is going to prove a decided acquisition especially for the private garden. Commercially it is just a little too early to be a money maker as it flowers at a time when out door stock is plentiful and the demand for flowers even in a good season is at the lowest ebb. With us the first flowers were ready for cutting August 10th. These were from buds taken about July 1st. At date of writing, September 20th, the last flowers are at their best. These are from terminal buds taken end of July. This is a very satisfactory variety in regard to buds as the flowers come full and free from any bud the color always being a bright clear yellow.

Regarding size of flower, we made no attempt to grow specimen blooms, but under ordinary bench culture and planted nine inches apart the majority of the blooms measured six inches in diameter. We had a little trouble with burning where the blooms were exposed to full sunlight but where shade was provided this trouble was obviated.

I see no reason why this should not be a first-class subject for outdoor culture where it would be a welcome addition for cutting purposes. If the sun proved too much for blooms when fully open it would not be a hard matter to provide shade, but it is doubtful if, when grown in the open air, the sunlight would have the same effect on color as when grown under glass as the outdoor conditions would produce firmer growth and the flowers in all probability would lack that softness which tends to burning. No doubt this variety will be more generally grown another season and its qualities and qualifications more fully tried.

We think there are great possibilities ahead of Golden Glow and look on it as the forerunner of a new race which will extend the chrysanthemum season from July to the flowering time of existing varieties.

given hurriedly but on after-consideration our suspicions were aroused and we started an investigation which resulted in our bringing the circumstances to the attention of the Post Office Inspector at New York and the detention of all the mail addressed to Henry in response to his advertising in our columns and in those of a contemporary which had declined to join with us in the investigation. Later, all the mail, some of it containing money, was returned to the writers and thus a swindle was nipped in the bud. We are inclined to the belief that Henry is the same party who worked a similar game last winter under the name of J. Lambert with address at 150 Nassau Street, New York City. If any of our readers can give us any information that will lead to the apprehension of the rascal we shall be duly grateful.

### A better mercantile system needed

While on the subject of shady business operations we might, with propriety, call attention to certain other practices which have been the cause of great annoyance from time to time to reputable dealers. There are parties who seem to be in the habit of giving orders for goods, import orders generally, and then after the goods have been shipped to their address and recall is out of the question cancelling the order with or without explanation. The proper course for the dealer to pursue in such cases is obvious but, unfortunately, methods of procedure which have long been the rule in mercantile affairs generally are but scantily observed in commercial horticulture and irregularities such as the above mentioned, the giving of overdrawn checks, non-payment of notes, dishonoring of sight drafts and similar lapses which other lines of business would not tolerate, are often condoned and overlooked until our credit system, or rather lack of system, has become such that the average buyer pays his accounts at his own convenience and doesn't always take kindly to any insistence otherwise.

### Credit control

So strongly entrenched had the lax methods in credit-giving become in New York, as well as elsewhere, that when the wholesale flower dealers got together last winter and announced their agreement on a definite limit for settlements to which all buyers must conform in the future the scheme was derided by many as an impracticability. Had not the wholesalers been driven to desperate action by the untenable position in which they found themselves it is a question whether the necessary joint-courage would have been forthcoming but necessity is an all-powerful incentive and in this instance led on to a course of action which is now acknowledged to have been one of the best reforms ever sprung upon the florist trade. And, it may be added, the retail trade have accepted the situation and met their imperative obligations in a manner greatly to their credit, thus demonstrating how deep-rooted abuses and assumed impossibilities may be overcome by determined action. Other interests will do well to emulate the example which the New York wholesalers have set. Shorter and more carefully considered credits will be better for all concerned. The retailers, especially as the initial collectors of all the money which must pass through their hands to wholesalers and supply dealers and thence to manufacturers and producers, have plenty of room for reform in their own method of collection from society patrons. Here, indeed, lies the foundation of most of the trouble.

In our issue of September 5 there appeared an advertisement in the name of J. H. Henry, 1157 Myrtle Ave., Brooklyn, N. Y. The order for same had reached us late and one insertion was

A swindle  
 which miscarried

## Rose Mrs. Jardine

The behavior of this variety thus far leads one to think that we may expect another permanent acquisition to our list of forcing roses. The bloom, while not exceedingly large, is of very good substance and a pleasing color. It also has a delicious fragrance which will make friends for it. Judging from the results last season wherever this variety was exhibited, we would say that the keeping qualities were good. This was especially noticeable in a vase of excellent blooms shown before the American Carnation Society last January in Washington.

The growth of the plant is very clean, sturdy and vigorous. The foliage is large, of good color, and thus far it has been found not to be subject, to any extent, to black spot and seems to be practically proof against mildew. The blooms are borne on long stiff stems and with the well-colored heavy foliage which the well-colored heavy foliage which is natural to this variety a finished bloom leaves little to be asked for. In productiveness, judging from what we can see thus far this year, we would say that it is equal to Bride or Bridesmaid and we would expect to get a larger percentage of blooms with strong stems than could be expected from the two old favorites mentioned.

The lively salmon pink color of the blooms has won already the favor of the buying public, as there has been no rose offered which could readily fill the place which Jardine is bound to take. As a summer rose it hardly seems possible now that this variety will be used to any extent as the strong sun bleaches the color too much,

but when the cooler days and nights come along it soon comes back to its natural shading which is very beautiful.

There seems to be no particular difficulty in treating this rose as it makes a quick, heavy growth and takes a great deal of water and feed in a way which proves its willingness to grow. When pinching back before allowing to bloom, the shoots should be stopped well back, especially the heavy bottom breaks, otherwise there will result a short growth from these upper eyes.

*Louis J. Peuter*

## The National Flower Show

Less than four weeks from the time this issue of *Horticulture* reaches its subscribers remain before the opening of this stupendous enterprise about which so much has been said during the past three years. We hope the florists and gardeners of America will rise to the occasion and show to the world that all the planning and discussing has been to some effect and that they are not backward in doing

their part toward a creditable realization of all that has been hoped for and promised for this project which, if well carried out, will mean so much for the prosperity of every branch of horticultural industry. The schedule is generous, the opportunity for honor and fame unprecedented in this country and if you have anything in plant or flower in which you take pride, either take it or send it to Chicago and let the world know about it.

# NEWS OF THE CLUBS AND SOCIETIES.

## FLORISTS' CLUB OF WASHINGTON.

The regular meeting of the Florists' Club of Washington was held at the home of Adolphus Gude, Anacostia, October 4. For the past several months each meeting of the club has taken the form of a unique dinner meeting, and to induce a spirit of fellowship and pleasure the members. The addition of the social feature has tended to enlarge the membership, and to induce a spirit of fellowship and pleasure among the members. Mr. Gude was the host to the occasion, leaving nothing to be desired. There was an unusually large attendance. There were added to the roll of membership Adolph Minder, a grower of Washington; John Gritman, of Congress Heights, Anacostia; and Harry Reley, who has charge of Alex. Gude's stand in Centre Market. John Lewis Childs of Floral Park, N. Y., sent a vase of carnations America. A vote of thanks was recorded. A letter was also read from Cares McCauley, ex-secretary of the club, and a toast was drunk to the health of the absent secretary, who did such fine work for the club while an officer in its ranks.

Wm. F. Gude made a motion advocating the establishment of a universal scale of points by which all mantel and table decorations, bouquets and design work shall be judged. The motion was discussed at much length, but no definite decision was arrived at. David Grillboetzer of Alexandria, Va., asked the honor of entertaining the club at the next meeting at an oyster roast at his home. The meeting will take place on the 27th of October instead of on the regular night, Nov. 3rd, which will be election night.

## CHRYSANTHEMUM SOCIETY OF AMERICA.

President Loveless has announced the committees to examine seedlings and sports on dates as follows: Oct. 5, 12, 19, 26; Nov. 2, 9, 16, 23, 30. Exhibits to receive attention from the committees must in all cases be prepaid for destination and the entry fee of \$2.00 should be forwarded to the secretary not later than Tuesday of the week preceding examination, or may accompany the blooms. Special attention is called to the rule requiring that sports to receive a certificate must pass three committees.

New York: Eugene DeBorja, chairman; William Duckham, A. Herndon, Skio flowers to New York; Oct. 12, 19, 26, 23, 30. All flowers to be on hand by 2 P. M. on day of examination.

Chicago: J. B. Deamud, chairman; George Adams, America Median flowers; Oct. 12, 19, 26, 23, 30. All flowers to be on hand by 2 P. M. on day of examination.

Philadelphia: A. B. Cartledge, chairman; John Westcott, W. K. Harris, Skio flowers to Philadelphia; Oct. 12, 19, 26, 23, 30. All flowers to be on hand by 2 P. M. on day of examination.

Cincinnati: R. Winterstetter, chairman; James Allen, Skio flowers to Cincinnati; Oct. 12, 19, 26, 23, 30. All flowers to be on hand by 2 P. M. on day of examination.

DAVID FRASER, Sec'y.

## FLORISTS' CLUB OF PHILADELPHIA.

The annual meeting and election of officers of this club took place on the 6th inst. and was the best attended in the history of the club. The contest for president and secretary was keen and brought out all the war horses, old and young. The result was in doubt until the last minute when A. P. Cartledge, the judge of election, announced Fred Graham and David Rust the winners in the contest for president and secretary respectively. J. Otto Thilow gave an illustrated lecture on "Improvements in Horticulture," which was well received. J. A. Shotton exhibited his new rose W. R. Smith, which is being introduced this year by the E. G. Hill Co. Henry A. Dreer sent a new white decorative dahlia. Samuel Batcheller, gardener for Clement P. Newbold, sent twelve varieties of indoor roses which showed excellent culture.

## ELBERON (N. J.) HORTICULTURAL SOCIETY.

This society held its third dahlia show on September 29 in Fireman's hall. The display was far superior to that of previous years and the attendance larger, the public being admitted. Competition was keen in all classes. First prizes went to J. Kennedy for best display, for Century and Singles; to J. Dowlin for Decorative, Show and Cactus; B. Wyoff for vase of Singles for effect and collection of hardy perennial; W. Robertson, vase of Cactus for effect; P. Murray, vase of cactus; J. Kennedy, collection of vegetables. Certificate of culture was awarded to P. Murray for display of carnations and roses. W. Robertson, for a new seedling dahlia. W. Sperling, John Kennedy and P. Ewing were judges.

The next meeting of the society will be held on October 5, when officers for 1909 will be nominated.

ANTHONY BAUER, Secy.

## CHICAGO FLORISTS' CLUB.

The Chicago Florists' Club had a very enthusiastic and well attended meeting at the regular time and place. Considerable time was passed in an interesting discussion of the coming flower show. All are anxious to make it a great success and are willing to work hard for it. Lincoln A. Robertson, Phil I. McKee, Jos. T. Bryant, Frank Kudler, Geo. Collins, Wm. A. Field, Wm. Abrahamson, Henry L. Lundy, Wm. Alexander, Chas. Arnold, Joseph Kohout and Peter Schenker were proposed and Albert T. Day and John T. Dumke were elected to membership. The picnic committee made a report showing a balance of \$2.00 which was turned over to the general fund of the club. The banquet committee reported that arrangements had been completed for the banquet which will be held on Nov. 10th at the Auditorium Hotel.

An evening known as Ladies' Night was devoted upon for some time in December.

## MASSACHUSETTS HORTICULTURAL SOCIETY.

The annual fruit and vegetable exhibition of the Massachusetts Horticultural Society will be held at Horticultural Hall, Boston, on Saturday and Sunday, October 10 and 11.

In addition to the exhibits of local growers there will be displays of fruit from other New England States and from Nova Scotia and New York.

The exhibition which is free to all will be open Saturday from 12 to 6 o'clock and Sunday from 2 to 6.

WM. P. RICH, Secretary.

## CLUB AND SOCIETY NOTES.

At the next meeting of the Florists' and Gardeners' Club of Rhode Island, on October 12, J. A. Macrae will read a paper on carnation culture.

The monthly meeting of the New Jersey Floriculture Society has been changed from the first to the second Friday of each month. A dahlia exhibit is set down for the evening of October 9.

Officers were nominated as follows at the regular meeting of the Springfield Florists' Club, Oct. 1 on September 14. President, Lemuel Barber; vice-president, F. E. Good; secretary, G. D. Leedle; treasurer, J. A. Doyle.

The annual exhibition of plants, flowers, fruits and vegetables by the Worcester County Horticultural Society was held in Horticultural Hall, Worcester, Mass., on Thursday, Oct. 8. A dinner for the members and guests was served at noon.

Paul M. Paley, superintendent of the State Floral Society of Little Rock, Ark., announces that prizes of over \$100 are offered and many of the large houses in Chicago, such as E. H. Hunt, Bassett & Washburn, Pochmann Bros. Co. and George Wittbold Co., will exhibit.

The Indianapolis Florists' Club at their September meeting re-elected officers as follows:—President, F. S. Smith, vice-president, Fred Hukriede; secretary, Earl Sellars; treasurer, Ernest Rieman. It was decided to hold meetings the second Wednesday of the month in Walhalla hall.

The Dutch Bulb Growers' Society will hold their quinquennial show at Haarlem, from the first days of April until the middle of May, 1910, in the flowering season of the bulbs. It is anticipated that the selection of this season will make Haarlem the rendezvous of horticulturists from all sections of the globe during this festival.

The home garden committee of the Milton (Mass.) Education Society held a successful bulb show Sept. 26. In hard perennials Mrs. W. H. Forbes, gardener James Gibbs, won first prize. For best collection of vegetables, Mrs. H. Gilbert, gardener Carl Olander, was first. The numerous large estates in this vicinity was well represented and the exhibits were noteworthy, vegetables and fruit dominating.

## COMING EVENTS.

Boston, Mass., Massachusetts Horticultural Society, exhibition of fruits and vegetables, Oct. 10, 11; Chrysanthemum show, Nov. 6, 7, 8, 9.

Menlo Park, Calif., Menlo Park Horticultural Society, exhibition, Oct. 15.

San Rafael, Calif.—Marin County Horticultural Society, flower show, Oct. 17.

Pasadena, Calif., Pasadena Gardeners' Association, exhibition, Oct. 22, 23, 24.

Lenox, Mass., Horticultural Society, chrysanthemum show, Oct. 28, 29.

Madison, N. J., Morris County Gardeners' and Florists' Society, exhibition, Oct. 29, 30.

St. Louis, Mo., St. Louis Horticultural Society, November 3-6.

Hartford, Conn., Connecticut Horticultural Society, chrysanthemum show, Nov. 3, 4, 5, Unity Hall.

Shreveport, La., State Fair, November 3, 4, 5.

Worcester, Mass., Worcester County Horticultural Society, annual meeting, Nov. 4; chrysanthemum show, Nov. 12.

Red Bank, N. J., Monmouth County Horticultural Society, show, Nov. 4, 5.

Tarrytown, N. Y., Horticultural Society, show, Nov. 4, 5, 6.

Glen Cove, N. Y., Nassau County Horticultural Society, Oct. 14, Dahlia show; show, Nov. 5, 6.

Red Bank, N. J., Monmouth Horticultural Society and Elberon Horticultural Society, joint chrysanthemum show, November 5, 6.

Chicago, Ill., National Flower Show, Society of American Florists, Nov. 6-14.

New Haven, Conn., New Haven County Horticultural Society, show, Nov. 10, 11, 12.

Philadelphia, Pa., Pennsylvania Horticultural Society, annual exhibition, Nov. 10, 11, 12, 13, Horticultural Hall.

Toronto, Ont., Ontario Horticultural Society, exhibition, Nov. 10-14.

Little Rock, Ark., State Floral Society, show, Nov. 10-25.

New York, N. Y., American Institute of New York, chrysanthemum show, Nov. 11-13, Berkeley Lyceum Building.

Denison, Texas, Denison Civic Improvement League, show, Nov. 11, 12, 13.

Washington, D. C.—American Association of Farmers' Institute Workers, Nov. 16, 17.

New York, N. Y., Horticultural Society of New York, annual exhibition, Nov. 17, 18, 19.

## OFFICERS OF THE MINNESOTA STATE FLORISTS' ASS'N.

From left to right: Back row—J. Sonden, O. J. Olson, Theo. Wirth, O. A. Will, J. P. Jorgenson.  
Front row—A. S. Swanson, E. Nagel, S. D. Lyngner.

We present herewith a group picture of the officers of the Minnesota State Florists' Association. This Association was incorporated last month under the laws of the State and meets on the third Tuesday of each month at

8 p. m. in Columbia Hall, 1929 University avenue, St. Paul.

All persons professionally engaged in floriculture or horticulture are eligible for membership. It is earnestly hoped that all persons in the trade in the State will join the Association.

## FAIRS AND NEIGHBORHOOD SHOWS.

W. P. Lothrop, E. Bridgewater, dahlias, R. A. Amend, Danvers, dahlias, T. H. Chivers, Newburyport, canpas, were among the prize winners at the Amesbury, Mass., fair which closed October 1.

At the Brockton, Mass., fair, which is the mecca for all pleasure-seekers, R. & J. Farquhar Co. showed the possibilities of the dahlia in decorative work with a fine representation of the Old Mill at Newport, using 15,000 dahlias in the design. W. D. Hathaway, J. K. Alexander, W. P. Lothrop, G. A. Walker, W. F. Turner and Mrs. H. A. Jahn had large dahlia exhibits. A certificate of merit was awarded Waban Rose Conservatories for rose White Killarney. H. E. Barrows, Lively & Bond and E. L. Dwyer had attractive displays.

A flower parade in which over a thousand children participated, was a feature of the annual fall festival at Salt Lake City, Utah, and so well was it carried out that it promises to be repeated in future festivals.

## AN HONOR WELL-WON.

E. G. Hill, of Richmond, Indiana, has just received a cable from Secretary Forestier, of France, announcing the awarding of the Grand Prize, the Gold Medal of the Municipality, to the rose Rhea Reid as being the premier variety among some 84 sorts entered for the International Contest.

## MOUNT KISCO FAIR.

This fair, which was held on Friday and Saturday, Sept. 25 and 26, was very successful, and although there was practically no showing of florists' plants or flowers, the trade was well represented in the visitors, especially the sodmen's section. The show was held under large tents and in the vegetable and fruit classes was very fine, the classes being well filled and competition keen. The floral display consisted mainly of hardy herbaceous flowers. Wm. Scott, Geo. D. Hale and W. C. Rickards served as judges.

## AN AMHERST SHOW PLACE.

A notable improvement has been made this year on the estate of E. F. Leonard, Amherst, Mass., under the management of head gardener Thomas Foulds. Shrubbery borders have been planted and a formal garden laid out and planted with choice herbaceous perennials, which in association with a variety of annuals made a most admirable display throughout the season and attracted many visitors. Other improvements are following, notably in the laying out of the vegetable garden and its accessories in small plots.

Thomas Foulds, head gardener on this estate, acted as judge for the horticultural department of the Three Counties Fair, at Northampton, Mass., Oct. 7 and 8.

### A RHODE ISLAND INDUSTRY.

We treated ourselves a few days ago to a trip to Auburn, R. I., where is located one of the largest rose-growing establishments in New England, that of J. Budlong & Sons Co., and where we had heard there was something worth seeing in the line of rose culture under glass under the manipulation of our old Boston celebrity, John Pritchard.

It is certainly a big place. A creek divides it into two sections, one of which is devoted largely to carnations with a block of about 20,000 roses, and the other is entirely in roses. It is the last mentioned which is under Mr. Pritchard's care and which concerns us at the present time. With the exception of a large grafting house which is utilized for Kaiserins in summer time, this range consists mainly of six modern houses each 700 ft. in length, covering about 140,000 sq. ft., and sheltering about 50,000 plants, principally Bride, Bridesmaid, Killarney and Richmond with experimental blocks of recently introduced novelties, and we do not hesitate to say to any one wishing to observe the maximum possibilities with the varieties named that he cannot do better than take a trip to Auburn, and that he will find the time and expense a good investment, no matter how far he may have to travel to get there. A record of forty flowers per plant for the past year may be quoted as to productiveness, and the score card of one house shows an aggregate of 290,000 roses cut for the year. The plants are one, two or three years old, the latter being the limit of best usefulness in Mr. Pritchard's opinion.

The equipment is of the very best, and to this fact must be attributed a portion of the phenomenal results obtained, for no rose grower, however proficient he may be, can be expected to strike a winning gait unless supported by the most liberal and up-to-date policy in regard to equipment. There are four manure tanks of 4000 gallons capacity each in constant use, and pumping apparatus capable of keeping fifteen men at work at the same time distributing liquid manure through 3-4 in. hose. The roses are planted in solid beds, shallow benches having been discarded as producing inferior results.

One most important feature of Mr. Pritchard's tactics is the cutting back of the plants so as to produce successive crops. Each house is thus manipulated in four or five sections so as to have a rotation of crops and avoid swamping the market at any period. The cutting back is done though the summer at intervals of about two weeks. Wood is trimmed down to about three eyes regardless of whether a present crop of flowers is sacrificed or not. It is now discontinued and the different sections are moving along in order with clock-like regularity, but by springtime will have gradually drawn closer and closer until they are practically together again. In cutting flowers from now on, several eyes are always left. Mr. Pritchard doesn't believe in sacrificing wood at this time of the year.

In addition to the regular men in the house, a number of girls are constantly employed picking up dead

### "TEXAS HEATH" AS A FLORISTS' FLOWER.

*Physostegia Virginica* var. *grandiflora*, popularly known in the flower markets as "Texas Heath," has achieved some little recognition the past season among the Boston florists and has also made its entry into the New York and several other markets. The best success with it is when it has been grown to single, rather slender stems, instead of the big, some-

what coarse heads that it produces when allowed to grow naturally, especially in a rich soil. It "makes up" very prettily in wreath form as the picture shows. The engraving is from a photograph of wreath and vase exhibited at the fall show of the Mass. Horticultural Society in Boston, September 11-13, by F. W. Fletcher Company.

leaves and keeping the beds always clean. One of their duties is to follow the men cutting the flowers and carry the blooms as they are handed to them one by one. When an armful has been gathered the girl carries them to the cooling room, where they are at once placed in jars of water. The freedom of action thus given the cutter and the careful handling of foliage and flower make a material difference in the appearance of the blooms when marketed. Steam has been turned on these houses every night during the summer regardless of outside temperature. Mr. Pritchard has one bench of Killarney with canes bent down as an experiment and they are breaking handsomely. Most of the new roses are being tried, and Mrs. Jardine, Queen Beatrice and My Maryland look especially promising. Enchantress is the favorite variety in the carnation section. While all look elegant, the palm at present must be given to one house of Enchantress planted last June with plants direct from the pots.

On the evening of October 4 a disas-

trous fire destroyed a large barn with 47 horses and much hay, the loss amounting to about \$30,000.

### CATALOGUES RECEIVED.

American Nursery Company, New York.—Folder of special offers of fine trees and hardy shrubs for fall, 1908.

S. S. Pennock-Meehan Co., Philadelphia.—Illustrated folder of the new forcing rose White Killarney "The Waban Variety," new carnation O. P. Bassett and other plants.

A credit to the wholesale supply trade is the superb catalogue just issued by the S. S. Pennock-Meehan Co., Philadelphia. Ribbons and fine fancy fabrics of many weaves have been given the premier position in this profusely illustrated book and bring one to an almost startling realization of the enormous growth of this branch of the florists supply business within a few years. Every wide-awake florist will want a copy.

## TENDENCIES IN MODERN LANDSCAPE-GARDENING.

By City Landscape-Gardener Helecke, Frankfurt, A. M., Germany.

(Translated from Moller's, by G. Bleicken.)

In landscape gardening we are living in a time of lively evolution. Also in other fields of art the agitation is going on and it is especially in architecture that it is thought a new style, appropriate to our own times, has been found. But what we see is not a new and unique style, as the gothic and other historic styles of building were, but rather as many modern architects, just as many styles and schools exist.

On the other hand, we find the modern artists all united in opinion as soon as the question of the formation of the garden arises; united especially in a preference for strictly regular forms of contour and planting and united in condemnation of what has in the course of time come to be known as "naturalistic landscape-gardening."

Some of these formal gardens approach the more modern English gardens which, in their turn, rest on the revival of forms that flourished before the adoption of the naturalistic garden style; some derive their form from the German "Empire-time" (Biedermeierzeit), and others tie to the Italian renaissance or wherever any other regular garden motive is found. Even, surprising at it may appear, Japan, the land of bizarre irregularities in gardening, seems to play its part in formal styles; for, if we study the works on Japanese landscape-gardening, we encounter very often forms in enclosures, walls, etc., which do not impress us in any way as foreign, because in the modern artistic gardens we come upon them repeatedly.

### Modern Garden Artists Unfamiliar with Their Subject.

As I stated before, it is particularly interesting to notice that with all the diversity of opinion which exists as to what is called modern architectural style, we find among the modern artists only unanimity of opinion as soon as the field of modern gardening is discussed. I think this very good evidence that they are far from understanding their subject; entering a field in which they are as yet strangers, they prefer those lines with which they are familiar through their training as architects—namely, straight lines—therefore their preference for strict regularity and rectangularity and the rigid exclusion of anything approaching naturalistic lines in landscape work.

Although it is true that most of my associates in the profession are not backward in their disapproval of this one-sided revival of old gardening forms, nevertheless we must also take every opportunity to call attention to the regrettable conditions existing to-day, and the barrenness of ideas which has produced a mechanical process of landscape working of the very worst sort.

We acknowledge that help here is very necessary, and we cordially greet the interest of the artist in the garden because we hope for substantial advancement from their co-operation. I have warned, time and again, against making the mistake of resenting all criticism and advice from non-professional sources especially of artist

critics. I know that in our own professional circles modern essays concerning the art of landscape gardening and related fields pass almost entirely unnoticed.

### A Fallacious System.

The principal argument of modern artists against the naturalistic landscape style is that it is a mistake to try to imitate nature with all her contingencies, inconsistencies and unimportant secondary features in a garden. Therefore should we avoid all naturalness in a garden, and show rather through the form in the garden that it is human work, which requires that regular and rectangular lines should prevail; only in such way would a reasonable human being create. These sentiments, repeatedly expressed in some form or another by all artists of reform in landscape-gardening, contain as many mistakes as they do words, and not much cleverness is needed to prove this. If man should cease to strive after goals, which he never can wholly reach, then would the outlook be bad for progress.

### A Weak Fad.

Really, I believe the use of exclusively rectangular forms in the base line of modern garden-artists to be genuine weakness, and in fact a very deplorable weakness. If we for once prefer a regular laying out, there is no good reason why we should not use, at least, the lines of the circle (of course I do not think now of any special curve, but simply any curve), yet even those circular lines, forming a picture of strictest regularity, are not in use. Why, then, shall we not characterize it as a mode or fad of these artists? Corners are modern fashion, as not long ago curved lines were modern fashion. For a while they were employed with much enthusiasm, but luckily failed. Today they are the rectangular squares, which are passed out to us by an Obrieh, Schulze, Behrens, Lauger, Billing and others; in a few years perhaps some other thing is to be "modern fashion."

(These are the names of artists who have exhibited the so-called "artists' gardens" in the large horticultural exhibitions in recent years in Germany. -Note of the Translator.)

### Misguising the Public.

Such things interest first by their novelty, but they actually mislead, especially when they are presented by otherwise famous artists who might be excused for an occasional extravagance, although they rather should endeavor to avoid this because it is playing with fire; their creations are accepted by the multitude as creations of genius, they are everywhere imitated and made popular, while that which is intrinsic and lasting in the artists' work is hardly recognized or understood.

Of all the indictments which are brought against the artistic correctness and truthfulness of naturalistic landscape methods, this protest that it is really improper to imitate nature seems to me the most noticeable. It shows most plainly that they who voice it have not earnestly taken up the study of the subject which they claim to protest against. They judge the principle only by the exaggerations which they find and, because real pro-

gress for all who are interested in landscape-gardening is only possible through clearness of purpose, it is of the utmost importance to refute false ideas concerning the relations of our work to nature. We can reach a clear understanding of this question only by considering it in its relation to the entire fields of art; because not alone in the art of gardening has this style of argument been made use of, but in all other phases of art, at all times, this same question has been discussed, assailed and defended.

## SCALE OF POINTS FOR FLORAL ARRANGEMENTS.

Referring to the query from the secretary of the Minnesota State Florists' Association which appeared on page 411, issue of September 25, Mr. W. F. Gude of Washington, D. C., who has had an extended experience in the way of public exhibitions, suggests the following as a good scale of points for use in judging floral design work:

1 Style of design.....	10 points
2 Selection of flowers used.....	15 "
3 Blending of colors.....	25 "
4 Arrangement .....	50 "
	100

At the big Kansas City shows where decorative work was made a leading feature the following scales of points were in effect.

### Mantel Decorations.

1 Quality and artistic arrangement of flowers.....	50 points
2 General effect of whole.....	50 "
	100 "

### Table Decorations.

1 Flowers and their arrangement .....	50 points
2 Non-interference of sight or convenience .....	20 "
3 Arrangement of napery and table ware .....	20 "
4 General effect of whole.....	10 "
	100 "

## PLANT IMPORTS.

Entered at New York, Sept. 30 to Oct. 6—From Holland: C. C. Abel & Co., 59 cs. bulbs; Wm. Elliott & Sons, 30 cs. do., 2 cs. plants; Fruit Auction Co., 3 cs. plants; A. W. Fenton, Jr., 1 cs. bulbs; Henry & Lee, 7 cs. plants; J. V. Hampton, Jr., & Co., 47 cs. bulbs, 2 cs. plants; A. F. Lang, 5 cs. flower roots; McHutchison & Co., 2 cs. bulbs, 31 cs. plants; Maltus & Ware, 40 cs. bulbs, 39 cs. plants; J. O. McDonald, 1 cs. bulbs; Marius Mutillod, 17 cs. plants; P. ## A WONDERFUL NEW NEPHROLEPIS

## Nephrolepis Superbissima

INTRODUCTION OF 1908

**W**E desire to call attention to this new fern, which originated with us and which we are introducing this year. It is a **very unique and distinct novelty** — as distinct from *Nephrolepis Piersoni* and *Piersoni elegantissima* as they were from *Bostoniensis*. It is in fact a complete break. The fronds are very heavily imbricated, the pinnae overlapping, making the fronds very dense and compact.

It differs from the other *Nephrolepis* not only in form, but also in color, being a **richer and darker green** — entirely different from the yellowish green of all the other *Nephrolepis*. The plant is very sturdy in its habit, the fronds never breaking down.

While a photograph shows a similarity to its predecessors, it is absolutely distinct, not only in the formation of the fronds and color, but also in its habit and general characteristics. It makes a much more dwarf and compact growth, the fronds being very dense, firm and rigid, and having a great deal more substance, so that it **will stand more knocking around than any other fern of this type**.

It is a sterling novelty. Experts who have seen it consider it by far **the best fern ever sent out**. It is a plant that needs to be seen to have its great value and sterling qualities appreciated. It really is not in the same class with the other varieties. It was awarded a

## ... FIRST-CLASS CERTIFICATE ...

by the Royal Horticultural society at Crystal Palace in London, November, 1907, the plants exhibited there having been shipped from New York two weeks before that time. After being exhibited in London, the same plants were shipped to Edinburgh, Scotland, where they were again awarded a first-class certificate by the Scottish Horticultural Society. This will indicate the value of the plant as a novelty, and also demonstrates in a very conclusive manner its fine keeping and shipping qualities. We have just begun shipping advance orders, and new orders can now be shipped immediately on receipt.

Fine, strong plants, 2 1/4 inch pots, \$5 per dozen, \$35 per 100; 4 inch pots, \$7.50 per dozen, \$50 per 100; 6 inch pots, \$1.50 each, \$15 per dozen.

**F. R. PIERSON CO., Tarrytown-on-Hudson, New York**

## SOME MORE NONSENSE.

The Minneapolis Journal, Sept. 20th, is responsible for the following:

Harry Taylor, renowned horticulturist and landscape gardener, the man whom Thomas Lawson made the guardian of the \$100,000 Lawson pink, will spend the next ten days in the Ramsey county workhouse in St. Paul. He was sentenced yesterday by Judge Hugo Harft of the St. Paul municipal court after conviction on a charge of drunkenness.

Editor has made important literary contributions to the horticultural periodicals of the country. At the time Thomas Lawson made the famous Lawson pink Taylor was head gardener at the Lawson country place in Massachusetts. During his last year he has been traveling in the west advertising a species of dementis which has been developed by him during the last twenty-five years. Taylor resigned his position when Mrs. Thomas Lawson died.

The Minneapolis Journal has been humbugged either by a lunatic or a liar. Mr. Lawson made nobody guardian of the Lawson pink. Its custody was entirely with Peter Fisher, its originator, until it was discontinued. Thomas F. Helvin, who was a prime mover in the sensational sale of the carnation, authorizes us to say that the above quoted story is a take from first to last. There is no Harry Taylor, "renowned" or otherwise, known to Massachusetts florists in connection with Lawson's or any other country place in this section or with any horticultural periodical.

Dr. N. L. Britton of the New York Botanical Garden has returned recently from an exploring trip in the island of Jamaica. The tour was quite successful and a number of new species besides many plants, seeds and herbarium species have been added to the collection of West India flora.

## PITTSBURGH'S CELEBRATION.

Our illustration shows the float representing the florists of Greater Pittsburgh that participated in the Sesqui-Centennial (Greater Pittsburgh Day Parade) Thursday, Oct. 1. This float was doubly appreciated by the public because the hundred or more other ones, many very costly and of allegoric character, lacked the natural sentiment. The work was the combined efforts of Messrs. Walter Breitenstein, T. P. Langhans, A. W. Smith, Jr., Samuel McClements and J. W. Ludwig. It represented an Indian maiden in her birch-bark canoe paddling from a stream of the wilderness into the present stream of progressiveness. The rear of the float was constructed of

fall foliage and hydrangeas; the large bouquet contained about 700 *Perle de Jaspé* roses; the horses were covered with yellow silk over which was a black net with heavy gold fringe. The postilions wore the costume of Father Pitt, yellow and black being the festive colors. The entire scheme was carried out in these colors and a very rich and handsome effect was obtained.

The florists, during the week, arranged their windows and displays to suit the occasion. Special mention may be made of display of dahlias at Mrs. E. H. Williams down-town store. The Department of Public Works also took part in the pageant, and Supt. Geo. Burke received many compliments on the float representing the Park system.

## Obituary

George Nicholson.

Every American gardener will learn with sadness of the death of George Nicholson whose Dictionary of Gardening has undoubtedly a wider dissemination among American horticulturists than any other work of like character. We quote from the *Gardeners' Chronicle* the following notes on the death of Mr. Nicholson:

We regret to have to record the sad death of Mr. G. Nicholson, F. L. S., V. M. H., on Sunday, the 20th inst. His retirement from the curatorship of Kew in July, 1901, in consequence of heart disease, brought on, it is to be feared, by mountain climbing in Switzerland in search of plants, was distressing to his many friends and a great loss to the establishment with which he had been connected since 1873, when he entered the service in the capacity of assistant to the curator, John Smith II., whom he succeeded in 1886, and it has been said of Nicholson that he was an ideal curator. The son of a Ripon nurseryman, trained in the nurseries of La Motte, Paris, and of Messrs. Low & Co.,

GEORGE NICHOLSON

Clapton, and endowed with special exceptional capacity for work and close study, he early developed a fitness for a post where zeal and intelligence were needed, and he found full scope for his gifts at Kew. When he became a member of the staff Sir Joseph Hooker was actively engaged in founding the Kew herbarium, and he found in Nicholson an apt assistant. This gave him his opportunity, and he made full use of it, the result being that he soon knew more about hardy trees and shrubs than any man in Europe, and became the recognized authority in all questions of tree nomenclature. At the same time, Nicholson was not a specialist, for there were very few plants in cultivation with which he was unacquainted. He was a most competent British botanist, knowing native plants as few men ever get to know them. It was almost impossible to entangle him over a plant name; he knew them all so accurately.

Nicholson did much valuable work at Kew. He was a regular contributor to the pages of the *Gardeners' Chronicle*, and his monographs of such genera as *Quercus* and *Acer*, published in these pages, are models of critical study and industry. Whilst he was not a very prolific writer, in all that he wrote he was most conscientious. It was therefore most fortunate for horticulture that he was induced to undertake the editorship of the Dictionary of Gardening, a work which has done more towards standardizing plant names and developing an interest in horticulture than anything published

since Loudon's day. It was his intention had his health permitted, to write a big book on hardy trees and shrubs, for which he had collected much information, some of which has, we believe, been utilized by Messrs. Elwes and Henry in their work on the "Trees of Great Britain and Ireland," now in course of publication.

The great charm of George Nicholson was in his conversational gifts, for he was a most entertaining talker, not about plants only, but about most subjects that interest men. He died comparatively young. Born in 1847, sturdy in figure, full of energy and secure of encouragement, Nicholson appeared to be of the type that reach or get beyond the term of four score years. He married when about thirty, but was soon left a widower, with one child, a son, who is now a naval engineer.

Wm. D. O'Connell.

William D. O'Connell, grandson of William Doogue, superintendent of public grounds of Boston, died October 3 in his 17th year. The young man was a leading athlete in the Mechanic Arts High School and was injured in the stomach in a football game two weeks ago which necessitated an operation, which was not successful.

Charles Weisbecker.

Although the flower business was only a minor item in his large market business, Charles Weisbecker, who was killed in an automobile accident at Englewood, N. J., Oct. 4, was a large buyer in the New York flower market and was highly esteemed by the wholesale trade as a business man of the best type.

A Sad Fatality.

The cottage occupied by Robert Cummings, gardener on the estate of W. F. Cochran at Yonkers, N. Y., was destroyed by fire on the morning of Monday, 5th inst., and his wife, aged 45, grandson 9, and grand-daughter 3, were burned to death.

Alvah A. Eaton.

Alvah A. Eaton, a well-known botanist, died at his home in N. Easton, Mass. Mr. Eaton has been employed in the botanical laboratory of Oakes Ames for the past six years, his work being chiefly on orchids.

H. R. Akers.

H. R. Akers, proprietor of the Chatsworth Manufacturing Co., Chatsworth, N. J., died suddenly on September 7. There being no near relatives, his estate is in the hands of the Surrogate Court.

Mrs. Samuel Henshaw.

Mrs. Henshaw, widow of the late Samuel Henshaw, of West New Brighton, N. Y., died in Brooklyn on September 25.

James Galvin.

James Galvin, son of Thomas Galvin, florist of Newport, R. I., died in New York on September 28.

Julius Schoelner.

Julius Schoelner, florist, died at his residence, 76 Watson Ave., Newark, N. J., on October 5.

Gordon Wolf.

Gordon Wolf, proprietor of the Denver Floral Co., Denver, Colo., died on September 11.

## RAMBLER ROSES FOR FORCING

Including *Lady Gay*, *Hiawatha*, *Delight*, *Sweetheart*; two and three year old stock, first quality plants. Also the new famous French rose *The Lyon*, a grand forcing rose; and *Harry Kirk*, the yellow everblooming Tea, novelties of the highest merit.

### NEWS NOTES.

A large delegation from Pittsburg will visit the National Flower Show at Chicago.

A fire of unknown origin recently destroyed the stable of Mrs. M. D. Reimers, Louisville, Ky.; loss \$600.

Andrew L. Yeager, Allentown, Pa., is having built a storeroom 20x30, one story high, of cement block construction.

Fire in the greenhouse of Jonas Brook, Woonsocket, R. I., Sept. 26, damaged the place to the extent of \$1,000.

P. R. Quinlan, Syracuse, N. Y., secured 29 first prizes from a schedule of 31 entries at the State Fair held last week.

Welch Bros. of Boston have secured an agency for the sale of the new rose White Killarney, which is to be disseminated next spring.

The directors of the American Nursery Co., New York, have declared a dividend of 7 per cent., payable October 1 to stock of record September 25.

An overcoat on cold nights is a great comfort for plants as well as for men. Elliott is advertising some cold frame mats in another column and they're cheap.

Anderson & Williams, Waltham, Mass., have made an assignment. It is anticipated that 100 cents on the dollar will be paid as the property now inventories.

Sam. A. Woodrow of New York has contracted with Lehnig & Winnifield, of Hackensack, N. J., to act as their sole agent in the sale of plants during the coming season.

Five tons of bulbs, including narcissus, hyacinth and tulip tubers, have been received for the new government station located at Bellingham, Wash. The work of fall planting is on.

Mrs. C. H. Foreman has taken the management of her late husband's business at Louisiana, Mo., and is erecting new houses on the site of those destroyed by fire in the spring.

The prospectus of the Smith Agricultural School and Northampton School

of Technology is issued. This is a new school located at Northampton, Mass., one feature of which will be the training in agriculture and horticulture. Vacancies exist in the list of teachers in the agricultural and horticultural departments.

Thomas Fuller, of Battle Creek, representing the Fuller Floral Co., Charlotte, Mich., asks that the firm be declared bankrupt. Liabilities are placed at \$1,874.10, assets \$398, on which exemption to the value of \$250 is claimed. An effort will be made to locate the partners whose address is given as Pecos, Texas.

The Reissig Greenhouses at Riverside, Ill., just outside Chicago limits, are nearing completion and are mostly planted to carnations, lilies and chrysanthemums. There are eight modern houses opening into each other, while a house running at right angles saves gables on the west and a smaller house and service shed give protection on the east. A Kroeschell boiler is being installed this week. The plant covers about 150x175 sq. ft.

While Alfred Barhoffer, one of the outside foremen in the landscape department of J. H. Troy, was loading plants on a wagon in front of Elliott's auction rooms on Vesey street, New York, last Saturday, a carelessly driven mail wagon collided with his truck, throwing him out and running over him and inflicting severe injuries to his leg, hip and face, which may confine him to the hospital for months. This will be a case for settlement at Washington probably.

The Grand Rapids Greenhouse Company, Grand Rapids, Mich., at a directors' meeting held September 21 decided its first semi-annual installment of a 6 per cent. dividend on the preferred stock. The company has more than doubled its glass area, having now over a quarter million feet with all the latest equipments. It has recently erected at its plant on Burton avenue a fireproof office building and a large showhouse for palms and decorative plants. N. B. Stover is in charge of this department.

### A NEW CUT FLOWER MARKET.

The Growers' Cut Flower Company has been incorporated and is open for business at 39 West 28th street, New York City. The officers are as follows: President, J. Vonderlinden, Rhinebeck; Vice-president, Henry Weston, Hampstead, L. I.; secretary, G. G. Lang, Rhinebeck; measurer, Mr. Kramer, Farmingdale, L. I. J. J. Coan, who has had charge of the John King Duer store on Madison avenue since it was opened, has been secured as manager for the new wholesale establishment. Business will be conducted on a strictly commission basis.

### A USEFUL DEVICE.

Bassett & Washburn, the Chicago wholesalers, use a wire attachment to their small vases for holding cut chrysanthemums. They are of heavy wire in the form of two rings, the lower one smaller than the upper and connected by upright wires. These are slipped on over the jars by putting the jar inside the wire frame and pulling it up till it fits tight. It has a decided advantage over the large jar for holding chrysanthemums, for it does not injure the foliage by plunging it into deep water and is also much easier to handle.

### PATENTS GRANTED.

- 899,557. Planting Machine. Charles E. Patric, Springfield, Ohio.  
899,605. Wicket Fence or Guard. Abraham L. J. Miller, Newburgh, N. Y.

## Seed Trade

One of the large jobbing houses has been quoting standard varieties of cucumber seed at 50 and 60c, the latter price for Long Green. A sale of 500 lbs. was made at 50c some weeks ago as chronicled in HORTICULTURE at the time, but the more recent quotation has resulted in the sale of several thousands of pounds, 75c. and \$1.00 have been the prices which most wholesalers have thought about the right figures for standard varieties, and the firm in question, one of the largest in this country, would seem to have larger reserves than generally supposed; but while usually remarkably well informed as to crop conditions, they have on several occasions quoted initial prices away below actual values. Such may be the case now, but the writer is inclined to believe that there has been an unwarranted fright over the shortage.

When reports first came of the practical failure of the cucumber seed crops in Nebraska, coupled with heavy shortages in other parts of the west, there was well nigh a panic, but as seedsmen have regained their balance and taken stock of the reserves carried over, the situation has looked less black. The eastern crop, which a few weeks ago was an unknown quantity, and generally believed to be very short, has proved much better than expected, and it is going to be quite a factor in determining prices. Those seedsmen who have vine seeds to sell, and are willing to accept a liberal profit even if they do not always draw the last cent, will in the end make more money than those who hang on to their goods to get the top price, as these latter not infrequently hold a little too long and in the end are left "holding the bag" by carrying over much of their seed.

A report which recently appeared to the effect that there would be enough onion seed "of the odd varieties," but that of such varieties as Southport White, Yellow and Red Globe, Yellow Globe Danvers, etc., there would be a shortage—would be amusing were it not misleading, and might result in considerable loss if taken seriously. There is not likely to be much if any surplus of White Globe, Red Wetherfield and Extra Early Red Flat, and possibly White Portugal and Yellow Prize-taker might be added, but to assert that prices will be as high as last year shows lamentable ignorance on the part of the writer, and when he says the same of Yellow Globe Danvers it is ridiculous. If mail order houses are able to draw last year's wholesale prices they may consider themselves fortunate, and particularly on the Yellow Globes. Anyone following the advice quoted is booked for trouble and disappointment.

There is a fine, well-established seed business for sale, not far from New York City. If any one is interested, let him address "Seed Trade Notes," care of "Horticulture." A Paterson, N. J. attorney, is endeavoring to find a purchaser, and his attempt to give information while concealing the identity of the concern reminds one of the proverbial ostrich story about that

**R. Vincent Jr. & Sons Co.**  
WHITE MARSH, MD.

silly bird hiding its head in the sand. It is the writer's understanding that the person with cash can buy the business right, as the present owner for very obvious reasons wishes to sell out, and it is a fine paying business, too.

Many seed houses in New York and elsewhere are in the market for bulbs of various kinds and it now looks as though the conservative course followed in giving import orders for this season's supply would result in a healthy cleaning up of stocks this fall and absence of the unsalable surpluses which made last year's bulb business a disappointment to many.

Some preliminary estimates of deliveries of the 1908 pea seed crop will appear this week or next, and then will there be weeping and wailing and gnashing of teeth; and the poor grower will sigh "for a lodge in some vast wilderness."

The marriage of the grand-daughter of F. W. Bruggerhof of J. M. Thorburn & Co. at Noroton, Conn., on October 7, was a notable society event.

The Braslan Seed Growers' Co., San Jose, Calif., has leased eight hundred acres east of Menlo Park for growing vegetable and flower seeds.

The E. E. Theilmann Seed Co., Erie, Pa., lost \$10,000 in the fire on September 28 which destroyed the Mayer building.

#### NEW FREIGHT SCHEDULE FROM JAPAN.

Freight rates on bulbs, under the new arrangement, have been fixed between Yokahama and New York at 1.50 per hundred on carload lots, 24,000 lbs. is the minimum weight for carload estimate and the rate on any less amount is \$2.00 per 100. The greater part of this charge goes to the overland railroads and the steamship companies regard their share in the rate as insufficient. Importers are also dissatisfied over the advance and a revision of these figures may yet be made. It is now said that arrangements are about completed for through transportation by a new route via the Tehuantepec R. R., Salina Cruz being the Pacific terminal and Puerto Mexico the Atlantic port. Many steamship lines on both sides are interested.

## PERSONAL.

Henry Small is lying dangerously ill at his home in Washington.

Visitors in Boston: Mr. and Mrs. Leonard Barron, New York, en route to Nova Scotia.

Visitors in New York: Mrs. W. W. Edgar, Waverley, Mass.; Mr. Hatcher, Amsterdam, N. Y.

Wm. F. Kasting has been appointed park commissioner of Buffalo, N. Y., for a term of five years.

Kershaw Clegg of East Orange, N. J., is now on the Mauretania on his return from a visit to his native England.

George Simpson, of Puchey & Simpson, of East Orange, N. J., was married last week to a Schooley's Mountain girl.

Harry Bunyard, A. T. Boddington's popular representative, is on the high seas, on board the Lusitania, due to arrive at New York on Saturday, Oct. 10.

Gus Freytag, Jr., son of Gus Freytag, florist, of Hilltop place, Orange, N. J., has secured a position in the flourishing floral emporium of George Smith on Main street.

Chicago visitors are few this week—mostly traveling salesmen, drifting in after the early business. Among them we noted A. Martial of Reed & Keller, New York; Wm. Ford, with A. Hermann of New York, and E. J. Fancourt of Pennock-Meehan Co., Philadelphia.

## NEW RETAIL FLOWER STORES.

W. F. Dutton, Holland, Mich.

Phillips reopened his store on Oct. 15th.

R. J. Turner, 112 E. 12th St., Kansas City, Mo.

E. J. Donovan, 874 Ninth avenue, New York.

J. W. Grandy, Jr., 251 Granby street, Norfolk, Va.

A. T. Holmes, 708 Minnesota Ave., Kansas City, Mo.

Miss McGrady, 67 Union street, Newton Centre, Mass.

F. O. Riebe, Webster, Mass.; Miss M. Dufour, manager.

W. Commandaros, 6th avenue and 58th street, New York.

M. B. Kingman, Hunt's Block, Amherst, Mass., re-opened.

Phillips reopened his store in Washington, D. C., on Oct. 15th.

Fred Hoffman, Providence, R. I.; Bernard Conroy, manager.

Vernon Lee opened a new store at 1328 14th street N. W., Washington, D. C., on Oct. 5th.

C. A. Norton is to start a new store at 2818 14th street, Washington, D. C., on Saturday, Oct. 10th.

W. Murchie, formerly with Blackistone, will open on Oct. 15th at 18th and M streets, Washington, D. C.

## FALL OPENINGS.

Z. D. Blackistone, Washington, D. C., invited the public, especially those interested in children's garden work, to visit his establishment from Oct. 1 to 10.

A. O. McCrea, New Haven, Conn., has opened the season with a large stock of standard plants and novelties which he has invited the public to inspect.

## NEWS NOTES.

No flower recently adopted for florists' use has "caught on" in popularity so quickly as the Spanish iris. Dainty in form, lovely in its colors and simple in its culture under glass, it will have a big sale this year. Beekert is advertising them in this issue.

The latest sensation among the Detroit florists is the forming of the "Bright-Mayor-Club" for the purpose of advancing the political prospects of Mr. Phil. Breitmeyer. A party of 75 florists and business men marched to Mr. Breitmeyer's home last Wednesday and serenaded him, carrying a transparency inscribed: "Bright-Mayor-Club—Our Next Mayor—Philip Breitmeyer." Each participant carried a Japanese lantern. Mr. Breitmeyer was escorted to the Harmonic Hall, where a supper was served, the club organized and officers chosen.

## A DEPARTMENT STORE OPENING.

Marshall Field's annual opening in Chicago this week is a study of inestimable value to the florist and in its practical lessons is worth going far to see. Harmony of color is its predominating feature, while it artistically weaves together all the brilliant autumnal hues. The central effect is that of a sweep of color representing the Dancing of the Winds, while mingling with the trees, some in autumnal tints and some still in their summer green prophetic of another summer to come, are nymphs and dryads, sprites and sylphs. The stately columns of the main aisle of the block-long store are draped with vines carrying out a color scheme to be found in constant use by our first and best teacher—Nature. As a complement to all this rich coloring, potted plants were used; Boston ferns, mostly large, and palms to the height of twelve or more feet; from pillar to pillar on some floors were festoons of Asparagus plumosa and chandeliers were hung with smilax. The tea room was beautified with cut flowers and potted plants. Special attention was given to the china and cut glass departments, in which were used long-stemmed American Beauty roses by the hundred. The Killarney rose was also largely used. The decoration of this store, which has no superior in the world today, called for the use of 2500 additional pot plants and over 4000 roses and a large amount of asparagus and smilax.

## Flower Market Reports.

**BOSTON** Happiness of an almost forgotten flavor prevails in and around the wholesale establishments and markets of the Hub this week. Business waked up with a start about a week ago and a nice brisk movement has been going on ever since. How long it will continue is another question and one to which few are courageous enough to even whisper an answer. But for what we have received we are duly thankful. The summer has been the least satisfactory ever experienced here and it will take a long hustle to catch up. There have been no serious frosts yet in this vicinity and dahlias are still on deck but asters are finished. Chrysanthemums and violets are sparingly in evidence. Everything has sold well for the past few days if it possessed any merit. We hope we shall be enabled to make a similarly encouraging market report next week.

The long looked for rain **BUFFALO** finally came good and plenty, with sufficient wind to make it seem like real fall weather. The heat of two weeks ago burned up the asters and other outdoor material which has caused the market to be overstocked on carnations, etc., but as cold weather has come on it has put new life in the market, and the past week business has been quite brisk. Autumn weddings are creating a noticeable demand. Lily of the valley, Eride, Bridesmaid, Killarney and other roses are in good supply. Beauties have been the same but they have sold exceptionally well, and the quality has been fine. Violets have been in the market some time with little or no call, being of poor color and somewhat shaky, but toward the end of the week the demand grew stronger. Chrysanthemums have made their appearance, but not in quantity. Monrovia and Bergmann are seen, but of small blooms. Dahlias have helped out for the past few days, also gladioli, which have been had in good quality, and the quality good for so late in the season. Adiantum, smilax, asparagus, wild smilax, and other greens shared in the demand.

Conditions in the **CHICAGO** market are changing rapidly. A killing frost has reduced the out door stock to a minimum and an advance of 25 percent is noted on nearly all flowers. Lilies are in sharp demand and prices are correspondingly higher. Carnations are rapidly improving with the cooler weather. Roses are also good and seem to sell readily. The greatest change, however, in the appearance of the market is caused by the absence of the asters. The florists generally are glad to see them go, for they were not satisfactory either in quality or price. Quantity alone seemed to prevail and they would not sell. Chrysanthemums are taking their place and are a welcome change.

The season is starting **DETROIT** up very satisfactorily. The volume of business done is considered to be fully up to that of last year. A strong demand exists for palms and ferns, with Boston fern far in the lead. Heavy rains

in the early part of the week were followed by several frosts, which finished all out-of-door flowers, thereby causing a shortage temporarily. In a few weeks we shall have fully recovered from that, as most growers begin to cut chrysanthemums during the coming week.

### INDIANAPOLIS

Business conditions show a decided improvement but still there is room for considerable more. The market is pretty well stocked. Carnations are coming in decidedly better. Chrysanthemums are to be had in fair quantity in yellow and white. Asters and dahlias are about over; likewise all outdoor flowers. American Beauties and tea roses are arriving in good shape; the price has advanced about one-third. Good lily of the valley finds ready demand. There seems to be quite a call for flowering plants but very little to be had along that line. Violets are arriving from outside points; the quality is nothing to brag of. Counter trade is much improved and the usual crop of October weddings will create quite a demand for fancy stock. Green goods are to be had in quantity but not from this vicinity.

### PHILADELPHIA

A better tone prevailed in this market during the latter part of last week and still continues. This is due in part to the cooler weather and to the stimulus of many October weddings and other festivities. American Beauty, Killarney and Mrs. Jardine roses are cleaning up well and bringing very fair returns—all things considered. Richmond, Bride and Bridesmaid have improved considerably in quality. My Maryland is a prime favorite. The retailers like it for its dainty pink, and also for its

keeping qualities. Carnations are improving both in quality and demand. Dahlias are in their glory. No frost to this writing (Oct. 6th). Asters are over. Chrysanthemums just starting; the first arrivals are: Monrovia, Glory of Pacific, Polly Rose and October Frost. Orchids are good and in demand; lily of the valley market healthy. Single violets have improved considerably, and there are a few doubles of very fair quality coming in the past few days. Cosmos is plentiful and improved in quality.

### PITTSBURG

Business conditions are gradually improving. The weather has turned cold and a heavy frost this week has checked the receipts of all out-door flowers. This will stimulate the demand for roses, carnations and chrysanthemums which are coming in in quantity and of excellent quality. Violets have also made their appearance. This section does not produce violets and the entire supply of doubles come from the Hudson River district. Dahlias of superb quality are being received from New Jersey.

### WASHINGTON

There is but little change in the status of the market since the last meeting. A few good chrysanthemums are coming in, and all greenhouse material is hardening up and improving. Asters are virtually gone and dahlias are in by the million. Greens are in demand.

### CHICAGO PLANT MARKET.

Early shipments of azaleas are in Chicago market. It was feared that the hot weather they experienced in transit would injure them but they seem to be arriving in good condition and well set with buds. Chinese primroses, Primula obconica and cyclamens are beginning to come in but are not at their best yet.

### Bostrom Improved Builders' Levels and Farm Levels

For Park, Cemetery and Landscape Gardening use, take the place of expensive Engineering Instruments. Simple in construction, easily adjusted, more substantial and less cumbersome than the more elaborate and complicated instruments. Practical, up-to-date instrument that any one can use. Write for descriptive circulars and be convinced that this Level is necessary to complete your outfit. Builders' Level \$25.00, Farm Level \$15.00.

New wholesale houses and rumors of new wholesale houses amuse and vex by turns the denizens of 28th street, who naturally look askance at any further additions to the lengthening line of brokers among whom the already too slender profits of the wholesale dealer must be divided. This is something, however, that gives no worry to the average flower grower, who is apt rather to encourage a multiplication of distributors, for obvious reasons. Up to present time there is enough stock and to spare for every ambitious wholesaler, and the goods are much more abundant than the buyers as a rule. But the limit has been about reached if the experience of past years is any criterion, and with the finish of aster, gladiolus and dahlia a jacking up of demand and prices on other material would seem to be in order soon. Politics for the next few

weeks is apt to hold down any very sportive tendency on the part of the public, however, and anyone looking for a famine or old-fashioned inflation of values will have a most excellent opportunity to practice up on patience. Quality is improving all along the line. Roses that the most hardened bargainer would be ashamed to even give to a street fakir are giving place to really nice if not over-large stock. Carnations are steadily progressing toward the winter standard. Violets are gaining in quality and quantity but unfortunately the demand seems going the other way. Chrysanthemums such as Glory of the Pacific and Polly Rose give a foretaste of what is coming and cattleyas jumped inside of 48 hours from the scarce column to plethoric abundance. But, alas, just as things begin to come our way, cross-town transfers are discontinued and lots of our friends must either pay double fare or walk. Isn't it awful, Frank?

NOW IS THE TIME TO USE

# DREER'S

## Peerless Glazing Point

(Improved Van Ryeper Perfect)

Made of Calvanized Wire and Will Not Rust

This point has common sense features of practical value that appeal to practical florists and are possessed by no other point. The only double point with

### BOTH BEVELS ON SAME SIDE

A point made on any other principle will twist in driving and cramp or crack the glass. Drear's Peerless Glazing Points will never work out. Drives true and holds firmly by one blow of hammer or chisel. May be easily removed and used again in case of re-glazing. 1000 sufficient for 500 lights. Box of 1000 points 75c, postpaid. 5000 points by express for \$2.75.

**IF YOU ARE BUILDING** Let us know the thickness of glass you intend using and we will send samples of the size point needed.

**HENRY A. DREER, 714 CHESTNUT ST., PHILADELPHIA, PA.**

DON'T EXPERIMENT

USE

## To-BAK-INE

and your stock will be free from insects, clean, and the blooms will not be discolored.

### Why My New Curved Iceless Eave is Far Superior to Anything on the Market Today

- 1st. No sash bars incased in iron, thereby eliminating all danger of bars decaying.
- 2nd. Can be used in conjunction with iron frame construction, thereby doing away with that very objectionable feature, "columns."
- 3rd. Roof bars with drip grooves, which act as conductors to carry away the condensation: Result, the driest roof ever used for greenhouse purposes.
- 4th. **THE MOST IMPORTANT OF THEM ALL.** The very small increase in cost over the ordinary style of construction which makes it possible to be used for commercial as well as private purposes.

William H. Lutton, Horticultural Architect and builder

West Side Ave Station (C.R.R. of N.J.) Jersey City, N.J.

## WHAT THE U-BAR DOES

We might boil it down to five words — **Makes lightest house; increases endurance.**

All the arguments of all the greenhouse concerns hinge on **our five words.**

When a house becomes a standard for comparison—such as "It is nearly as light as the U-Bar." or "It is not as rigid as the U-Bar house," it is because the U-Bar construction is conceded to be in advance of all others. It is the ideal construction for private estates, parks, public institutions and florists' show rooms. Send for catalog.

## Home Grown Tulips

Planting Offsets.

Young Tulips in Bloom.

It is generally understood that tulip bulb growing in the States cannot, under present conditions, be an attractive commercial proposition for many reasons,—the cost of labor, cost of advertising—you must advertise to sell—the percentage of loss, and the formidable competition of the foreign product.

The item of labor, however, is the insurmountable obstacle that spells failure. Prices for labor as paid here compared with the daily wage of Holland and again the cost of the product landed here, duty paid, would be sufficiently convincing to show to anyone desiring to enter the field, that the attempt might lead his footsteps along a shady lane to a little house where they served free soup and the town paid the bills. Yet, while this is absolutely true in relation to a commercial enterprise there are occasions where a man can successfully and economically increase his stock of bulbs with but little effort and a margin on the right side, by working on his old bulbs.

Tulips propagate themselves by sending out "offsets," that is, little tulips from the bottom of the old bulb. These offsets if broken off and planted successively for two or three seasons will make first-sized bulbs. The method of treatment is simplicity itself. Simply the breaking off the sets and scattering them on the ground and covering them with two inches of earth. They may be covered with boughs after the ground has frozen or they may be left as they are. In the spring they may be lifted if the ground is needed, or they may be left in the ground. The lifting is preferable. No technical skill is required to do this work. A small boy can do it, every bit of it. Or the small boy can break off the "sets" and the man in an off time can plant them. Many Dutchmen with whom I have spoken have laughed at the suggestion of successfully growing bulbs under conditions as I stated them but as I once lived in Missouri I prepared comparative pictures which conclusively proved that even some first-year offsets threw good-sized flowers.

The late Superintendent William Doogue of Boston did this work most successfully and economically at the City Greenhouses in Dorchester. Women were em-

ployed at certain seasons to clean the bulbs and the number of bulbs they cleaned and the rapidity with which they worked made it a short operation. The work of planting was performed by men. One year in the Public Garden the tulips grown in this manner were used almost exclusively on the outlying beds and compared very favorably with the imported product.

I know there will be many that will smile at the suggestion but the possibility of economical handling of tulips is a fact and the two pictures accompanying this article show the planting in the fall and the resulting bloom in the spring. As can be seen in the picture where the men are planting, the "offsets" are very small almost too small to throw the flowers that are shown in the companion picture.

The fact of increased price of Holland tulips is not generally considered but it is a fact, nevertheless, that in coming years the Dutchmen will be obliged to ask more for their bulbs because of increased price of land for growing owing to the encroachment of buildings and the impoverishment and worked-out condition of what was formerly most desirable and high priced land. All bulbous stuff has a tendency towards disease and to this is due the abandonment of many bulb growing districts.

## Yucca Filamentosa in Water Scenery

*Yucca filamentosa* is a noble plant when in bloom, whatever position it may be given in the garden and is as hardy and contented at all times and under all conditions as it is noble. Our cover illustration shows an instance of its use in plantations adjacent to water, something not often seen but certainly quite effective as here displayed. The far-famed country seat of J. B. Duke at Somerville, N. J., where this picture was taken abounds in beautiful and suggestive gardening examples and we shall have some more to present from time to time.

sumed under existing conditions are most creditable and speak volumes for the devotion and love for their art which characterizes so many both in and outside of the horticultural profession. We here repeat our belief, often expressed heretofore, in the possibility of making every exhibition a financial success by catering to a greater extent to the tastes and fads of the public as they come and go. Of what practical value are our high standards if nobody takes any interest in them? The first step towards the education of the public in horticulture and its products which is the avowed purpose of our exhibitions is to get the public in. As our genial philosopher and sapient judge of human nature, John Westcott, would say—if you want to keep a school you must first get your scholars.

Where  
standards  
are needed

The request on behalf of one of the horticultural societies in a recent issue of HORTICULTURE for suggestions as to scales of points to be used in judging exhibits of floral decorative arrangements is a good sign, indicating that the promoters of the flower shows are alive to the situation and that a sentiment favorable to doing more in the line of direct appeal for the public interest is gaining ground. The desirability of encouraging to a greater extent than heretofore, competition in floral design work, being now apparent it is in order for those who wish to help towards a revival of public interest in our shows through this medium to give careful consideration to ways and means whereby it may be carried out. Some common standard whereby uniformity of judging may be assured is a first requirement if we are to avoid dissatisfaction and discord at the very outset and so direct the current that the most proficient artists in floral work may be induced to take an active interest—something which they have with remarkable unanimity held aloof from up to the present time. Uniform standards and consistent verdicts can hardly be expected until some carefully considered code has been adopted.

What shall the  
harvest be?

What is the prospect for business this season? This is the question most frequently heard among seedsmen, nurserymen and florists of all persuasions and it is variously answered. As a rule the belief seems to obtain that a general revival of activity is in sight and that with the passing of the political contests "good times" will once more prevail. This spirit of optimism is in itself the most encouraging sign and if well backed up by the taking off of coats and getting busy is sure to help materially towards the desired end. It is encouraging to learn from the nurserymen that very heavy orders for next spring are in sight and that the movement of stock next season promises to be the largest on record, also from the seedsmen that the fall demand for bulbs has been satisfactory and that the supply on some varieties is already exhausted. The season for the florist has not really started yet but there is no reason to doubt that he will come out all right. It seems inevitable, however, that for a few of his products, at least, he must be prepared to accept lower prices than have prevailed in the past. This is not due so much to the general business conditions as to the course of development and the reaching of levels in his own business. A little more watchfulness in the expense account and a little more skill in planning and operating will be required and the dividing space between high efficiency and mediocrity will be still further widened. Rest assured that good business is in waiting for the man who goes after it right.

The exhibition season which is now about to open promises a pretty full list of shows in all sections of the country notwithstanding the rather discouraging record as to popular support in some places in the past. The persistency and determination with which the labor and responsibilities attached to these enterprises are as-

win

## Horticulture at the Franco-British Exhibition

V

### FRUIT AND FRUIT TREES

All the fruit exhibited here is of course under cover and is mostly found in the great buildings devoted to the produce of the English colonies. It is remarkable that by far the greater number of colonial fruit is limited to apples although among the fresh fruits there are a few pears, but still apples are to be found in an overwhelming majority.

At the temporary Fruit and Flower Show of June 24th held in the Palace of Music there were several noteworthy exhibits of fruit. The Government of South Australia staged some bright, well colored specimens of apples. The Forceries de la Seine staged peaches in baskets; the variety was *Precoce de Hall*. They also showed nectarines.

A fine show of fruit trees in pots came from T. Rivers & Son; among them were nectarines *Early Rivers* and *Dryden*; plums, *Blue Rock*, *The Czar* and *Early Prolific*; peaches, *Royal George*, *Dagmar*, *Dr. Hogg*, *Perquine* (new), *Early York*; cherries, *May Duke*, *Bigarreau de Schreken*. *George Bunyard & Co.* showed strawberries as did *Millet & Son* of *Bourg-la-reine* who had about 50 varieties in boxes.

In the permanent exhibits, by far the most imposing display is that made by the Dominion of Canada. In a large space inside their building we find a painted picture representing a view in an apple orchard such as can be seen in many parts of Canada. The time is the apple harvest and the pickers are busy at work gathering and packing the fruit. In front of this and enclosed within a railing is a large number of tables upon which stand plates of the different Canadian varieties. At each end of this exhibit which is 57 feet long are shelves holding bottles of many kinds of preserved fruits.

In the Australian Palace, each colony has a section to itself. That of Victoria contains many samples of dried and preserved fruits of all kinds. Apples of course in quantity. Tasmania has also an exhibit of apples. South Australia has a fine lot of dried and bottled fruits, raisins, currants, prunes, apricots, sultanas, nectarines, etc. In the department of Western Australia the show is not so fine. There are a few unnamed varieties of apples grown in the region of *Preston River*. New Zealand shows some nice specimens of apples and pears in very presentable form. These are set up in small pyramids on plates in a glass case.

Trained fruit trees are planted outdoors by some of the most famous of the French fruit culturists. They are arranged in two double rows along the sides of the Machinery Halls on the extreme edge of the French garden. They comprise apple, pear, peach, plum and every conceivable kind of fruit tree trained in all the fancy ways that only the French gardener seems to have the secret of. They are a source of much curiosity on the part of many visitors and are an important contribution to the display of French horticulture. The leading exhibitors are *M. Lecointe*, *Crout & Son*, *Nomblot-Bruneau*, and *Pinguet-Guindon*.

## Dendrobium Phalaenopsis

*Dendrobium Phalaenopsis* is certainly one of the most beautiful and useful orchids in cultivation and ought to be represented in every collection, however small that collection may be. It is not a difficult subject to grow and if properly treated will increase in size from year to year making pseudo-bulbs as large as and larger than those made in its native home.

Newly imported plants should be potted up at once on arrival, using a little *osmunda* fibre with an equal quantity of fresh sphagnum moss as compost. Use very small, common flower pots with three holes in them for suspending, filling about two-thirds with small crocks, then put the plants in position and tie to the wires used for suspending; pack the peat and moss firmly around the base of the plant, taking care not to cover up the eyes. All old roots should first be cut away. Then the plants are hung up near the roof of a moderately warm house where they can be syringed every bright day.

Towards spring nearly every dormant eye will break away freely but the treatment is not changed until the new growths have made a good headway and when the new roots appear the plants are moved in to their growing quarters, which should be the hottest place obtainable and then the amount of water given is gradually increased until the roots have taken a firm hold of the compost. From that time until the flowers have faded or have been cut plenty of water must be given and a dip in weak manure water once a week will greatly help to build up strong pseudo-bulbs and long flower-spikes, with flowers of good substance and lasting quality. After flowering the plants are removed back to cooler quarters a night temperature of 55 degrees suiting them well during the winter, and very little water, only enough to keep the plants from shrivelling, is given until they start to grow again and the treatment above described is repeated.

*Chasman Payne*

*M. J. Ope*

## NEWS OF THE CLUBS AND SOCIETIES.

### GARDENERS' AND FLORISTS' CLUB OF BALTIMORE.

The Gardeners' and Florists' Club had one of the best attended and most interesting meetings that has been had for some time. Some disappointment was manifest upon receipt of a telegram from Mr. Guille of Portsmouth, Va., who was slated to give a talk on Virginia grown bulbs, stating his inability to be present owing to pressing business conditions. Mr. Israel Rosnosky of Philadelphia who was present as a visitor was pressed into service and gave a very interesting talk on the Formosa lily, which elicited a vote of thanks from the club.

Under the head of new business ensued a discussion on the desirability of having a club badge or emblem, that might be worn in any place upon any occasion so that members of the craft might readily recognize each other although strangers. In opening the discussion the Secretary said in part: "It has often occurred to me that while most other fraternal and business organizations have their respective emblems, we, a body of men scattered over the whole world, including a large part of the United States, have no distinguishing emblem. Surely a permanent emblem could be devised for the fraternity—the whole brotherhood that some of us would not blush to wear.

"With Job gone into innocuous desuetude, and George Watson—genial George—gone to seed, and Patrick O'Mara—where is Patrick? John Birnie—inflammable John—alone is left to tell the tale. Whither can we turn for advice except to some of those strenuous youngsters—Harris, Kift, Stewart, Lonsdale, et al.? They might get their heads together and devise something that would meet the approval of the fraternity."

A little more fraternization would work no injury to the craft neither socially, morally nor financially. After a free discussion the question was left open for future consideration.

### GARDENERS' AND FLORISTS' CLUB OF BOSTON.

The next regular monthly meeting of the club will be held at Horticultural Hall on Tuesday evening, October 20, 1908, at 8 o'clock. William Davis, vice-president of the club, will speak on "Fruit Culture under Glass." There will be interesting exhibits of orchids, chrysanthemums and other seasonal flowers, and an enjoyable evening will be spent by all who attend.

W. N. CRAIG.

### DETROIT FLORISTS' CLUB.

The next meeting of this club was held last night. During a number of the previous meetings some members who had become disinterested have been reinstated. A committee was appointed consisting of Messrs. Dilger, Flowerday and Sullivan to report on the boiler inspector. The latter wants to enforce a law which demands that every boiler in the city be inspected every year. It is estimated that eleven pounds of steam coal are consumed by a boiler in the city of Detroit every year.

### NEW YORK FLORISTS' CLUB.

There was a good attendance at the October meeting of the New York Florists' Club last Monday evening. Antoine Wintzer of West Grove, Pa., read a fine paper on Hardy Clematises and other useful Vines and Shrubs, and brought an exhibit of climbing roses, *Lonicera Heckrottii*, *L. Hendersonii*, etc., from the Conard & Jones Company nurseries.

After the reading of resolutions on the death of A. D. Rose and Alexander Wallace by W. F. Sheridan and J. Austin Shaw, respectively, the matter of transportation to Chicago on the occasion of the National Flower Show was opened up by Patrick O'Mara on behalf of the committee in charge and a long debate followed, participated in by many members on the comparative advantages of the various routes. It transpired that the varying interests of those who go as exhibitors, having their exhibits with them, and those who go merely as visitors, may not be conducive to getting the entire New York party on the same train but the matter was finally left in the hands of the transportation committee for decision. A request from the National Flower Show Committee for the appointment of three judges was received and in compliance President Weathered named Messrs. C. H. Totty, of Madison, N. J.; Wm. Eccles, Oyster Bay, and Harry Turner, Port Washington.

The following is a list of the exhibits of the evening with the awards as recommended by the judges: C. H. Totty, chrysanthemums White Cloud, Wm. Meredith, Beatrice May, C. H. Totty, Yellow Sport from Mrs. J. A. Miller, George Mileham, On-gawa and Leon Truelle; certificate of merit for C. H. Totty, Yellow Sport and George Mileham. Hartman & Wagenfohr, Woodside, Pompon chrysanthemums, cultural certificate. J. D. Cockcroft, Northport, carnation Georgia and Pink Sport from Glory of Pacific chrysanthemum; preliminary certificate for Georgia. W. A. Manda, Salvia cucantha, vote of thanks. Conrad & Jones Co., shrub flowers and fruit, vote of thanks.

It was voted that the entertainment committee make preparations for a smoker to be held some time in November. Secretary Young gave notice of a motion to fix the life membership fee at \$50. Mr. Marshall announced that the bowling club would meet regularly at the Oregon Alleys, cor. Sixth Ave. and 29th Street on Wednesday evenings.

We hope to be able to publish in full, next week, Mr. Wintzer's excellent paper. Following its reading there was an interesting discussion participated in by Patrick O'Mara, Wm. Scott and others.

As a climax to the evening's instruction and entertainment Harry Raymond just back from England, told of his impressions of his native land which he had not seen for so many years, also his regrets at having missed Ireland without stopping off.

### PITTSBURGH FLORISTS' AND GARDENERS' CLUB.

This club met on the evening of October 6 with a good attendance. A. W. Smith, Jr., and Samuel McClements were elected to membership. Prizes had been offered to the private gardeners of \$10 by Dr. Shafer for the best three orchid plants in bloom, and the book "The English Flower Garden" by Mrs. Russell H. Boggs for the four best varieties of herbaceous or annual flowers. For the orchid prize the competition was between David Fraser, gardener for H. C. Frick, and Frank Crook, gardener for J. H. Park, each showing Cattleya Dowiana, Cattleya labiata and Oncidium varicosum Rogersi. The committee on exhibits, Wm. Falconer, P. S. Randolph and J. W. Jones, after careful examination decided that the prize should be divided between the two exhibits as of equal merit.

Owing to the lateness of the season there was not a large display of herbaceous or annual flowers. The prize in this class went to Jas. Wiseman, gardener for D. M. Clemson, Pittsburgh. A lovely group of orchids for exhibition only was staged by Dr. Shafer, Jas. Hutchinson, gardener. The committee gave this charming group special mention. Cultural commendation was given Randolph & McClements for Yellow Polly Rose chrysanthemum, a new and excellent sport originating with this firm. H. H. Negley showed a group of cypripediums in fine and rare varieties.

H. A. Dreer showed "Dreer's White" dahlia, to which the committee gave special mention as "a magnificent, full, double, pure white flower," also a splendid exhibit of single dahlias. Special mention was given to Nephrolepis Scholzei, "a crested form of N. Scottii, shown by H. A. Dreer; a most beautifully crested form, rigid in habit and full in fronds, evidently a very desirable acquisition to our new and useful ferns."

The secretary was instructed to write a letter to B. L. Elliott extending the sympathy of the club for the recent loss of his wife.

A suggestion was made that on November 2, the day preceding the next club meeting, the members meet at Phipps Conservatories to inspect the chrysanthemum exhibit and from there make the round of the various large chrysanthemum establishments, taking lunch at Randolph & McClements. This suggestion was received with much favor and the secretary instructed to make the announcement in the next call. The subject for next meeting will be "Chrysanthemums."

H. P. JOSLIN, Sec'y.

### FLORISTS' CLUB OF WASHINGTON.

Tickets are out for the Annual Flower Show of the Florists' Club of Washington, which is to be held at the old Masonic Temple on Nov. 12, 13, 14 and 15. The doors will be open from 2 to 11 P. M. daily. Tickets of admission will be 25 cents and it is to be hoped that the flower-loving public of Washington will respond, thus helping along a most worthy cause.

### CHRYSANTHEMUM SOCIETY OF AMERICA.

Now that the chrysanthemum once more claims our notice, it seems an opportune moment to call attention to the great exhibition soon to be held in Chicago, and to impress upon the many admirers of the Queen of Autumn, the importance of lending their assistance in making this a memorable occasion in the history of the chrysanthemum in America.

It is encouraging to note the progress that has been made in the development of this charming flower, and all growers are invited to exhibit their productions at the National Flower Show, and to make this the greatest exhibition of perfect flowers that has ever been held.

This particular section is given over to the Chrysanthemum Society of America, and it is the duty of every member to see that our section is much above the average, a credit to our society, an inspiration to the general public who visit the show, and incidentally an expression of our good will for the S. A. F. under whose auspices the National Show is being held.

Send for a schedule, look over your available blooms, and enter in as many classes as possible. This will be the best means of expressing your interest in the success of the Show.

ALFRED J. LOVELESS, Pres.

### Work of Committees —Report on New Chrysanthemums.

Gloria: Jap. Inc. Color. Enchantress pink. Exhibited at New York, October 10, 1908, by Elmer D. Smith, Adrian, Mich. Scored 85 points.

DAVID FRASER, Secretary.

### ST. LOUIS FLORIST CLUB.

The regular monthly afternoon meeting on October 8 in Bowman hall was only fairly attended. After all committees had reported the trustees were given power to secure a new hall for the next meeting. John Steidle, State Vice-President of S. A. F. and the board of trustees, will meet and arrange for transportation for those who will attend the National Flower Show at Chicago next month.

Ten applications for membership were acted on and on nine of them the ballot was favorable. The names of the new members are as follows: Julius Koenig, W. H. Ossie, Louis Maurer, Henry Kahrs, O. H. Landel, L. F. Barrman, L. W. Spangler, L. W. Schiever, Sr., and L. W. Schiever, Jr. The question of holding six afternoon and six night meetings during the year brought out a big discussion. It was shown that nearly fifty employees are ready to join if night meetings were provided, and the motion was carried. The next meeting, Thursday, November 12, will therefore take place at night, the location to be made known later by the secretary.

W. C. Smith read an interesting paper on the social functions of the club and the trustees were instructed to carry out all the good suggestions it contained. One result was the organization of a Florists' Bowling Club for which ten names were secured at once, and the first practice meeting will take place next Monday night at the Marquette Hotel alleys. Anyone wishing to join can call any Monday night and give his name to Henry C. Ostertag.

### SOCIETY AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

#### National Flower Show.

Copies of the final premium list have been sent to all names on our mailing list with entry blanks enclosed. Those who have not received premium lists and desire them, should write at once to the secretary. The following announcement from Mr. Vaughan explains itself:

Secretary W. N. Rudd has found his time so constantly occupied at Morgan Park with S. A. F. work and personal business affairs, that I have appointed, at his suggestion, J. B. Deamud to act in the city, with the title "Superintendent of Show" with authority to select working assistants, and Mr. Deamud will take charge of detail show arrangements from date.

All correspondence regarding premium lists, entries, etc., should be addressed as usual to J. H. Burdett, Secretary, 1411 First National Bank, Chicago.

J. C. VAUGHAN,

Chairman Local Management Committee.

To obtain the co-operation of the newspaper owners of Chicago, and Presidents of park boards, President W. E. Kelley of the Horticultural Society of Chicago will give a luncheon in the Union League Club, Oct. 22. A list of daily newspaper editors prepared by James Keeley will be invited, as well as the park Presidents and directors of the Horticultural Society who include Messrs. Clarence Buckingham, John J. Glessner, Harlow N. Higinbotham, James Keeley, Victor F. Lawson, John J. Mitchell, Martin A. Ryerson, Edward G. Uihlein, Charles H. Wacker, W. E. Kelley.

JAMES H. BURDETT, Sec'y.

Just as we go to press a copy of the final premium list of the National Flower Show to be held at Chicago November 6-14, has reached us from the office of the secretary of the Flower Show. Intending exhibitors should write at once to J. H. Burdett, secretary, 1411 First National Bank Building, Chicago, to inform him of the space they probably will require and requesting a copy of the premium list. The time for staging the various exhibits and other rules as to entries, etc., are very explicit and announcement is made that they will be strictly enforced. Anyone intending to exhibit should read them carefully and comply to the letter with every condition stipulated.

### WORCESTER COUNTY HORTICULTURAL SOCIETY.

The annual fall dinner of this society was held in conjunction with the annual exhibition at Horticultural Hall, Worcester, Mass., on Oct. 8. Among the guests who made addresses were E. H. Burlingame, president, and C. W. Smith, secretary, of the Rhode Island Horticultural Society; J. Lewis Ellsworth, secretary of the State Board of Agriculture and Gen. C. W. Wood. There were about one hundred present and the occasion was, as usual, a very enjoyable one.

### NEW JERSEY FLORICULTURAL SOCIETY.

Dahlia night was observed on the 9th inst. with a very good showing of that flower besides a miscellaneous one of the season's flowers, fruits and vegetables. The principal varieties shown were the decorative sorts with only a scattering of cactus or single varieties. The favorites were, in pink, Mrs. Roosevelt; in white, Grand Duke Alexis and Perle; in red, Katherine Duer and Alaska; in crimson, Cuban Giant and President Felix Faure and many fine flowers shown were without name. The awards were as follows:

A. C. Van Gaasbeek, John Dervan, gardener, 4th for six white; 1st for six pink, 3d for six red, 1st for six crimson, 2d for twelve in variety. Walter Gray of Maplewood, 2d for six pink, and do. yellow, 1st and 2d for six red, certificate of merit for six bronze, 3d for six crimson, 2d and 3d for twenty-five in variety. Thomas A. Edison, Frank Drews, gardener, 2d for twelve in variety. S. and A. Colgate, William Read, gardener, 1st for twenty-five in variety. Charles Hathaway, Max Schneider, gardener, 1st for six white, 2d for six crimson.

Among the miscellaneous exhibits were Lager & Hurrell of Summit, collection of orchids, Charles Hathaway, a vase of celosia, four feet high for which was awarded a certificate of merit, and chrysanthemums. S. and A. Colgate, Cimiefiga simplex. Among those entered not for competition, but which added greatly to the decorative effect were vases of dahlias from Charles A. Munn, John Hayes, gardener, and T. A. Gillespie, George Oakley, gardener.

The judges were Thomas J. Caparn, David Tait, H. Halbig. So successful was the gathering in point of attendance and appreciation that it was voted to hold a chrysanthemum night in the same manner.

J. B. DAVIS.

### MASSACHUSETTS HORTICULTURAL SOCIETY.

The annual fruit and vegetable exhibition at Horticultural Hall, Boston, which was held on Saturday and Sunday Oct. 9 and 10 was pronounced the finest on record for high quality of fruit and vegetables. This was all the more notable because the season had not been regarded as at all favorable for garden crops. Certainly the quantity and quality of both as displayed on this occasion showed no indication of having experienced any cultural hardships. In flowers there was only a limited display, W. W. Rawson & Co.'s dahlias being the most prominent feature. William Sim, famed for sweet peas and tomatoes, came out with a new specialty—sweet potatoes, white, red and yellow, raised at his enchanted place in Cliftondale, Mass. Ellwanger & Barry, of Rochester, N. Y., were awarded a silver medal for collection of peas and the Boston Park Department received a similar award for display of fruits and shrubs. Bronze medals were given to F. E. Smith for display of apples and J. L. Goodale for seedling grapes. The list of prizes was a long one, sufficient to fill three columns of this paper.

## CLUB AND SOCIETY NOTES.

The Arkansas State Floral Society is sending out an attractive postal card advertising their chrysanthemum show at Little Rock.

The Northern Indiana Florists' Association was organized at N. Manchester on October 1 with W. W. Dedrick president and W. E. Hand secretary and treasurer.

The new officers of the Horticultural Society, Lake Forest, Ill., are E. L. Parshall, president; Fred Jackson, vice-president; J. W. Scharfenberg, secretary; H. C. Peterson, treasurer.

The Florists' Club of Cleveland, O., elected officers as follows at their meeting on September 28: president, George W. Smith; vice-presidents, F. Friendly, John Kelley; secretary, Isaac Kennedy; treasurer, Herman Hart.

The Florists' Club of Albany, N. Y., met with Alfred Whittle on October 1. A lively and prolonged discussion took place regarding what are known to the trade as "crape chasers," and a statement of the members' views for the local papers was authorized.

Articles of incorporation of the National Horticultural Congress have been filed with the county recorder at Council Bluffs, Ia. Until the first annual meeting J. P. Hess will serve as president and G. W. Reye as secretary, with a large board of directors.

The nominating committee of the Massachusetts Horticultural Society has published its list of nominations for the offices of the Society to be filled at the annual meeting, November 14.

The list is as follows: For president, Gen'l S. M. Weld; for vice-president, Charles W. Parker; trustee for two years, Geo. B. Dorr; trustee for three years, W. H. Bowker, Charles S. Sargent, Peter Fisher, Thomas Roland; delegates to the State Board of Agriculture, Wilfrid Wheeler; nominating committee, N. T. Kidder, Thomas J. Grey, G. V. Fletcher, William Sim, William T. Thatcher. The members of the nominating committee for the present year are W. H. Bowker, John W. Duncan, J. H. Fletcher, David F. Roy, and Wilfrid Wheeler.

## OBITUARY.

Charles Storer.

This well-known artist and flower painter died at Natick, Mass., on October 1. Mr. Storer, who has been located in Providence, R. I., for some years, had a studio in Boston for a number of years previous, which was the resort of many of the noted gardeners and flower lovers of that time, such as David Allan, F. L. Harris, William Robinson, James Conley and others now passed away, Alfred Dimmock, W. A. Manda, etc., for all of whom he did more or less work in painting their pet varieties. He was particularly successful with orchids, for which he also had a passionate love. He was a genial, kindly gentleman who was held in affectionate esteem by all who knew him.

## COMING EVENTS.

Pasadena, Calif., Pasadena Gardeners' Association, exhibition, Oct. 22, 23, 24.

Lenox, Mass., Horticultural Society, chrysanthemum show, Oct. 28, 29.

Madison, N. J., Morris County Gardeners' and Florists' Society, exhibition, Oct. 29, 30.

St. Louis, Mo., St. Louis Horticultural Society, November 3-6.

Hartford, Conn., Connecticut Horticultural Society, chrysanthemum show, Nov. 3, 4, 5, Unity Hall.

Shreveport, La., State Fair, November 3, 4, 5.

Worcester, Mass., Worcester County Horticultural Society, annual meeting, Nov. 4; chrysanthemum show, Nov. 12.

Red Bank, N. J., Monmouth Horticultural Society and Elberon Horticultural Society, joint chrysanthemum show, November 4, 5.

Tarrytown, N. Y., Horticultural Society, show, Nov. 4, 5, 6.

Glen Cove, N. Y., Nassau County Horticultural Society, show, Nov. 5, 6.

Chicago, Ill., National Flower Show, Society of American Florists, Nov. 6-14.

Boston, Mass., Massachusetts Horticultural Society, Chrysanthemum show, Nov. 6, 7, 8, 9.

New Haven, Conn., New Haven County Horticultural Society, show, Nov. 10, 11, 12.

Philadelphia, Pa., Pennsylvania Horticultural Society, annual exhibition, Nov. 10, 11, 12, 13, Horticultural Hall.

Toronto, Ont., Ontario Horticultural Society, exhibition, Nov. 10-14.

Little Rock, Ark., State Floral Society, show, Nov. 10-25.

Lake Geneva, Wis., Gardeners' and Foremen's Association, chrysanthemum exhibition, Nov. 11, 12.

Providence, R. I., R. I. Horticultural Society, Nov. 11, 12, fall exhibition.

New Orleans, La., N. O. Horticultural Society, chrysanthemum and flower show, Nov. 12, 13, 14, 15.

New York, N. Y., American Institute of New York, chrysanthemum show, Nov. 11-13, Berkeley Lyceum Building.

Denison, Texas, Denison Civic Improvement League, show, Nov. 11, 12, 13.

Washington, D. C.—American Association of Farmers' Institute Workers, Nov. 16, 17.

New York, N. Y., Horticultural Society of New York, annual exhibition, Nov. 17, 18, 19.

Baltimore, Md., Horticultural Society, Dec. 1, 2, 3, Fifth Regt. Armory.

Spokane, Wash., National Apple Show Association, Dec. 7-12.

Indianapolis, Ind., American Carnation Society, Jan. 27, 28, 1909.

## PUBLICATIONS RECEIVED.

Massachusetts Horticultural Society. Part 1 of Transactions for the year 1908 has been issued and contains the various lectures and addresses delivered before the Society during the early part of the year, in full, with the discussions which followed their presentation. A portrait of Ephraim W. Bull, who raised the Concord grape, appears as a frontispiece.

Proceedings of the Columbus (O.) Horticultural Society, S. Hine, secretary.—This volume of 220 pages is a model. Typographically it is far ahead of the average horticultural society document as it excels them in breadth and quality of contents. Every branch of horticultural science and its application is given a due share of the space, and anyone interested in fruits, vegetables, flowers, forestry, botany, wild flowers, orcharding or entomology will find something in the pages of this report well worth having.

The program and schedule of prizes for the Annual Flower Show at Denison, Texas, under the auspices of the Denison Civic Improvement League, contains interesting notes on the excellent local work done by this organization during the past year and presents much that will be suggestive and helpful to parties engaged in similar effort elsewhere. The exhibition will take place on November 11 and 12. The prize list contains no less than 474 classes, of which a liberal slice is devoted to the school children.

Bulletin No. 3, issued from the office of the Superintendent for Suppressing the Gypsy and Brown-tail Moths in Massachusetts, gives information concerning the predacious beetles imported for the purpose of preying on the gypsy caterpillars. Illustrations showing these beetles in their various stages are given, with a view to acquainting the public with their appearance so that in the general warfare against caterpillars and moths they may not be destroyed. The most successful of these insects is known as *Calosoma sycophanti*, many colonies of which have already been established and are spreading satisfactorily in the moth-infested districts in eastern Massachusetts. Copies of this valuable document can be had on application to A. H. Kirkland, 6 Beacon St., Boston.

## DENISON CIVIC IMPROVEMENT LEAGUE.

Arrangements are well under way for the third annual flower show at Denison, Texas, which will be held Nov. 11 and 12. The splendid success of the two previous shows encourages the expectation of an even greater success this season. Much interest is manifested locally and communications received from other towns and cities indicate a larger number of outside exhibitors than was had at either of the previous shows. The catalogue is very creditable in appearance and the list of prizes is liberal and varied. The show will be held under the auspices of the Denison Civic Improvement League, which organization is doing very effective work for the improvement of civic conditions in the city and surrounding country.

## THE ADAPTATION OF SOIL TO VARIETIES AND ITS APPLICATION TO INDOOR CULTIVATION.

A Paper Read Before the American Rose Society at Chicago, by Gustavus B. Maynadier.

The whole work of the Department of Agriculture is apportioned, according to the character of the problem, among the various bureaus of which the Department is made up, one of these being the Bureau of Soils.

This Bureau has allotted to it the duty of surveying and mapping the soils of the United States and of making all investigations concerning them. The problems with which it deals are by no means the simple affairs that many who fail to appreciate what the soil is, what it does and how it does it are inclined to think. To them the soil is so much dirt. It is to them a lifeless, inert mass. It is necessary, to be sure, and therefore to be tolerated. We who take a deeper interest, however, know the soil as it really is. Whether we are accustomed to study it in the laboratory or to use it in the field, the garden, or the greenhouse, we know that far from being just so much dirt it is a highly complex body; far from being an inert, lifeless mass, it is most emphatically a thing of life. For every living thing, bush, tree or shrub, that we see upon its surface, myriads exist within the soil itself. One of the duties of this bureau is to study these soil organisms and to find out what functions they perform.

### Composition and Causes of Infertility.

Soils also vary in composition, and there may be present substances actually harmful to plants, or some of the essentials for plant growth may be wanting, hence they must be studied from the chemical standpoint. Soils possess also certain physical properties such as weight, fineness of division, arrangement of particles. They bear certain relations to heat and to moisture. In the physical laboratory of this bureau is determined the influence of these attributes upon the soil and their effect upon its productiveness.

The causes of infertility in certain soils, the restoration of the so-called worn-out soils, the presence of poisonous substances in the soil as the result of excretion from the roots of living plants, all these demand special lines of investigation, each line being in the hands of specially trained men.

Following these strictly scientific technical investigations of the soil comes the study of soil utilization and management. This comprises the application of these laboratory results to conditions as they exist, dealing with problems of drainage, methods of tillage, the effect of fertilizers and special adaptation of soils to certain crops. For you may rest assured that field operations must be based on correct scientific principles or they will be of no avail. However frequently existing

### A DREER DECORATION.

The accompanying illustration shows the decorations of the Chestnut street establishment of H. A. Dreer during the celebration of Founders' Week in Philadelphia. The windows were interesting to many strangers on their way down Chestnut street to visit Independence Hall and other places of historic interest in which this neighborhood abounds.

The colors used in these decorations were blue and gold, which are the city colors, and in the floral window hardy larkspur was used for blue and yellow dahlias for gold, tastefully arranged so that each color would show distinct-

ly. The vegetable window displayed both pumpkins and squashes of golden yellow and dark green (the nearest to blue obtainable). Many very large and heavy specimens were used, each tagged showing weight, and this feature proved very interesting to the many persons who stopped to look at the display. A large show card painted in blue and gold bore the words, "Some Pumpkins."

The photograph was taken late at night, with no other light than the ordinary electric light in the windows, and it has been pronounced an excellent piece of night photography.

conditions demand that these principles be modified, yet they can never be disregarded or opposed, or disaster will surely follow.

### Special Fitness for Certain Crops.

In the work of the Bureau of Soils in the field one of the most striking soil characteristics observed is the special adaptation or fitness of certain soils for certain classes of crops. That certain classes of soils are peculiarly adapted to the growth and production of certain crops has been recognized by agriculturists of all lands, and in the writings of some of the highest authorities on agricultural topics such expressions as good "corn soil" or "wheat soil" are frequently to be met with. Not only is this adaptation for certain crops observed, but in addition a special adaptation for certain varieties of the same crop. While it is no doubt true that there are other factors which perhaps are to be considered in field practice, yet we feel assured from our observations in this direction that no single factor is of as great importance as the soil.

In regions where uniform soil and climate abound there is frequently to be found one particular variety of a crop that gives far better results than any other variety, though it is agreed on all sides that the soil is a good one for the crop generally speaking. More-

over when two sections are situated so as to be embraced within the same climatological zone it frequently happens that the predominating soils are quite different. In such a case it is usually observed that the successful planters upon each soil type are growing the same or closely related varieties. There will, however, be found a considerable difference between the varieties grown on the different soil types. Not alone with field crops is this mutual agreement of soils and specific varieties to be observed, but with fruits and with vegetables.

### Some Cases Observed.

As specific instances I may mention a few of the many cases that have been observed in the field and garden crops, fruits, etc.

The "Drake Cluster," a very high grade and highly productive variety of cotton, has been grown and kept pure on the upland soils of Alabama, where it is noted for its superior qualities. This variety when grown on the bottom lands produces but little lint, the plant "going to weed," as it is called.

With some varieties of tobacco it is possible to grow on the sandy soils of certain localities cigar wrappers of the highest quality; when these same varieties are grown on the clay soils the product is suitable only for fillers, the quality of which is none too good.

With fruits we find much additional evidence of the adaptation of soils to varieties, and in those sections where orange growing is carried on it is now recognized that it is absolutely necessary to select the particular variety to which the soil is most adapted.

With the apple this adaptation is well illustrated by the Newtown Pippin, which reaches its highest state of perfection only when grown on the same class of soils, whether in New York or in Virginia. Again, the Baldwin, which also ranks high as a commercial apple in this same eastern region, is specially adapted to a much lighter class of soils.

The sandy and gravelly soil in Steuben County, New York, is especially adapted to the Carman potato, while on the light loams of the southwestern section of New Jersey, Irish Cobbler and Green Mountain produce the best crops. On the clay loams in northwestern Ohio we find such late varieties as Iona and Rural New Yorker best suited to prevailing conditions, while Bliss' Triumph is especially adapted to the black prairie soils.

#### Essentials to Successful Truck Growing.

In these localities where truck growing is carried on commercial success depends very largely on the proper observance of this intimate and important mutual inter-relationship.

In a majority of the cases observed it was found that varieties not only were better suited to certain soils, but that the class of soils specially adapted for their growth was similar to that upon which the variety was developed.

This is because the plant is in no sense a fixed unchangeable organism restricted to a definite form. On the contrary, it is highly plastic, capable of being changed or modified in all of its parts. We can by cultural methods alone effect many changes, and it is just as certain that as many more will occur through natural agencies. The effect of climate, the character of the soil whether dry or moist, sandy or clay, all exert an influence tending to change or modify plant characters.

We see then that in the development of varieties the effect of soil is manifested, and that to keep a variety pure by freedom from cross fertilization is not always sufficient to maintain its varied characteristics. To keep it up to the ideal established by the originator it is necessary to provide an environment quite similar to that in which it was developed. For it is now thoroughly understood that a change in environment is accompanied by an attempt on the part of the plant to readjust itself to meet the new conditions. If the change is within the limits of the readjustment the plant responds by changing its physical structure sufficiently to meet the new conditions. If the change is too great the plant dies. Originators of new varieties seldom think it necessary to mention the class of soils upon which the varieties were produced, never perhaps considering the influence that it may exert upon the future of the plants. And I believe that many new varieties which are introduced only to be as suddenly cast aside, disappear from cultivation because their habit is such that there are but few soils really well adapted to their culture.

#### Environment Defined.

By environment is meant those conditions that surround the growing plant, and may be considered under two heads, climate and soil. In climate we include the combined effects of light, heat, moisture, etc. In the field these conditions are always subject to variation, and it is quite impossible for a single growing season to pass without the plants being subjected to climatic conditions more or less hindering their development. In the soil we have not only the supply of mineral plant food, but seemingly there is in it also forces, not yet understood, that exert powerful influence on the habits of the plant, controlling to a great extent its thrift, characteristics and fruitfulness. And the effect of this influence appears whether the plant is cultivated for its foliage, its flowers or its seed. In a change of environment may or may not be included a change of climatic conditions. A change of soil type alone has been shown to be quite sufficient to bring about changes in the plant that in many instances are so marked as to greatly affect many varietal characteristics.

#### Conditions Under Glass.

If with our field and garden crops where the climatic influences have necessarily such a wide variation the soil proves itself to be so important in maintaining varietal characteristics and habits, is it not reasonable to suppose that with indoor conditions where these factors are under control the relative influence of the soil is increased. From my own observations and from the testimony of others I believe this to be the case. In this phase of soil adaptation that concerns the indoor grower and which is now being investigated, particularly in regard to the soils used in the production of the different varieties of carnations and roses. In our modern greenhouses we have eliminated climatic variations. We control the temperatures by the turn of a valve. Rain-fall is displaced by the hose. Ventilation is accomplished without subjecting our plants to damaging winds. In short, it is our business to provide the most suitable climatic conditions for the development of our plants. It is clear then that the only change in environment given the plants in a house where light, loamy soil is used, compared with one in which the benches are filled with a clay soil, is the soil itself. Yet with this difference in the soil only, we frequently observe that there is a considerable variation in the size, brilliancy of color, and other characters of the bloom of the same variety. A visit to the flower markets of our large cities affords many illustrations of these differences, when the products of the various establishments are seen side by side.

It is not to be expected that the soil adaptation is equally well defined with all varieties. Some being more fixed offer a greater resistance to change than others; nor should we expect to find the modifications that arise to be always in the same direction. Not only in the character of the bloom may the influence of the soil appear, but in many cases it will be found to affect the habit of the plant

itself. It does so in the field with outdoor crops, and it is reasonable to think that it exerts a similar influence on plants grown under glass.

#### Experiments With Rose Soils.

A partial examination of the soils used by a few of our rose growers has already been made, and it discloses the great variety of soil types that are being used in the production of this crop alone. Ranging in texture from dense clay loams to porous sandy loams, practically all intermediate grades are represented. Yet in many instances two very widely differing soil types are being used for the production of the same variety, resulting perhaps in a depreciation of the quality or quantity of bloom of one variety or the other. I have recently visited a rose house where I found one of the most popular varieties, a rose of great merit, giving such poor results that its cultivation is to be abandoned after this season. In this instance the size of the blooms was materially affected, though in other respects the general appearance of the plants was comparable in every way with those of the other varieties grown.

#### Experiments With Carnation Soils.

A recent experiment carried on to determine the effect of various fertilizers on carnations is particularly interesting when viewed from the standpoint of soil adaptation. In this experiment two soils were used, various fertilizers being applied to each, comparison being with the soils to which stable manure alone was used. As it is no part of my present purpose to discuss the relative efficiency of fertilizers I will consider only the results obtained from the use of stable manure. These soils were planted to four varieties of carnations of undoubted merit, and were grown in a range of three even span houses without interior walls, making it practically one house. Particular attention was paid to the maintenance of favorable conditions, so that the only point of difference was in the soil in which the plants were grown, the same number of plants of each variety being grown in each of the soils used. Enchantress gave only eighty-five per cent. as many blooms on soil No. 2 as on soil No. 1, Lawson eighty-seven per cent. and Robert Craig but seventy-eight per cent. on the corresponding soils. Peary somewhat reversed conditions and on soil No. 2 produced four per cent. more blooms than on soil No. 1.

We have, then, three varieties out of four that showed a very decided falling off accompanied by a difference in soil only—all other conditions being the same. In one case the results are to all intents equal in each soil. Now, I take it that such results are not due to chance. There must be a reason. And I do not think it too much to offer the difference in soils to this reason. Lawson, Enchantress and Craig found one of the soils far more adapted to their special requirements. With Peary the reverse was true, though the adaptation was not so marked. Nor is this illustrative of adaptation of soils to a whole race of plants, but to specific varieties.

It shows also the impropriety of attempting to draw definite conclusions

## THE HOME OF THE NEW RED CARNATION, O. P. BASSETT

100,000 plants of which were sold at the S. A. F. Convention.

as to the relative merits of different varieties, unless it can be shown that the soil type is equally well adapted to all of the varieties grown. It is, however, in determining the varieties that will likely prove most remunerative to the individual grower that such tests have their real value. For with a single bench, in one season, information of vast importance for his future guidance is readily obtained.

#### Vague Definitions.

Just what determines the peculiar fitness of a soil for the growth of certain plants or varieties of these plants is yet to be determined.

The books on rose culture state generally that the proper soil to use is a well drained loam, many authors adding that it should have a smooth or greasy feeling. This description, while somewhat vague, is yet helpful, for it cautions us to beware of heavy clays and coarse sands and brings before us the necessity of good drainage. But the term loam even in its technical sense is a very elastic one and soils may be very different in some of their most important features and still be properly classed as loams. The provision that it should have a smooth or greasy feeling somewhat restricts the original description and brings it within the limits of the class of soils known as silt loams. The smooth or greasy feeling that is found in a soil when pressed between the thumb and finger is a consequence of the presence of silt, the finest sized particles excepting clay that go to make up a soil. The amount present may vary to a considerable degree without altering the feeling, although materially affecting the character of the soil. This variation in the relative proportions of the different sized soil particles is the basis of soil classifications. Upon it also depends the permeability to air and to water, responses to changes in temperature, retention of moisture, and other physical properties of a soil. It is an important factor in determining the general adaptation of a soil, and there can be but little doubt that modifications in texture greatly affect the adaptation of a soil to varieties. There

are other conditions to be taken into account however, and we must carry our investigations on from a number of standpoints in order to arrive at a solution of this problem.

#### Co-operations of Growers Needed.

In carrying out the investigation of this interesting and important soil problem it is planned to secure samples of soils from various growers with whom the cultivation of certain varieties is made a specialty and to obtain from them the necessary information to enable us to understand the conditions under which their plants are grown. To this end a circular letter has been sent a number of growers requesting the samples and information desired. While our studies have not been carried on far enough to warrant our drawing any conclusions at the present time, yet the outlook is most encouraging, and we have every reason to believe that before long we will be able to state a definite relation between some on the soils and varieties.

In this matter we must have the co-operation of the growers, and I am glad to say that we have found them ready and willing to supply the information and samples necessary to insure the success of this investigation.

#### A PERPETUAL BLOOMING RAMBLER ROSE.

We have received from M. H. Walsh a box of flowers cut from his crimson Rambler rose Delight. This rose has been blooming freely all through September, after having produced the usual summer crop of flowers, and is

still in bloom. It has been a matter of great surprise and admiration to passersby, who were naturally astonished to see a hardy climbing rose in bloom at this season. As Delight is one of the hardiest as well as the most brilliant of the Ramblers, its introduction is a memorable step forward in garden roses, and Mr. Walsh has thus still further endeared himself to the lovers of the Queen of Flowers.

#### NEWS NOTES.

I. P. Hersey has taken charge of the greenhouses of Mr. Henry A. Belcher, Randolph, Mass.

The Rustic Construction Co., 34 Fulton st., New York, has filed a petition in bankruptcy.

The store of John Robertson on Conn. Ave., Washington, is greatly beautified by improvements which he has had made recently.

Mr. Robert Rahaley of the Michigan Cut Flower Exchange who went to Mt. Clemens last week reports prospects for large crops of good quality.

It is reported that a colony of women is to be located at Bellecrest, L. I., N. Y., to raise fruit and flowers by electricity. Mme. Davidoff, a Russian-American, is the promoter.

Clery's Horticultural Company located on at 62 Vesey street, New York, is drawing big crowds every Tuesday and Friday now with a lot of extra quality consignments of bulbs and hardy material, imported and home-grown.

# THE "SHADE-GARDEN" OF THE CASTLE AT LIESER A. D. MOSEL.

By M. Geyer, the Hortic. Gardener.  
From Mollat, D. A. Z. Z. Z. translated by  
G. B. G.

Coming from the rock garden, we enter plantations of shade-loving plants along the north and west walls known as the "shade garden". We note first a *Pseudotsuga Douglas pendula*, in front of which is a *Valeriana rubra* in full flower, demonstrating that this valeriana and its white and pink varieties are also graceful for half shaded place. On our right we see *Clematis paniculata* growing on the west wall of the castle, where it gets only a few hours' evening sun, but flowering profusely nevertheless. Behind the *Valeriana* is also *Picea exc. conspicuus*, very well adapted for planting among rocks.

Upon the rising slope *Bocconia Japonica* has grown into a strong clump, decorating the plantation by its handsome foliage and white flower spikes during July and August. The plant gets sunlight on its upper parts only, its height being about eight feet.

The next view shows *Circea alpina* a graceful bright flowered plant, which should be used more frequently in shady places. The surface of the ground is entirely covered with English ivy, out of which rise the various shrubs, conifers, perennials and ferns, such as *Picea excelsa repens*, *Juniperus virg. tripartita*, *Juniperus Sabina*, *Ilex crenata*, *Euonymus radicans*, *Astilbe chinensis*, *A. rivularis*, *Saxifraga hypnoides*, *Gillenia trifoliata*, *Cypripedium spectabile*, diverse ferns and the graceful *Bambusa aurea*.

Following the path close up to the castle we see a flowering *Lonicera* against the wall, in front of which grow ferns and dwarf conifers.

In another view from here towards the east appears a group, in the centre of which stands a tub with a *Latania*, which however in summertime will be completely hidden by *Mikana scandens*. Against the wall here are conifers, *Bambusa nigra*, *B. flexuosa*, *B. mitis*, various perennials, such as *Spirea*, *Anemone*, *Gimibunga* and further on some ferns and *illex*. In the foreground grows, along-side of an *Araucaria excelsa*, *Osmunda Claytoniana*. A *excelsa* likes such a shady place, as proved by its deep green color. *Thuja exc.* *Woreana* also thrives here very well, but the covering of the surface is also in this plantation, English ivy, framing in the plants on all sides.

Here the castle wall recedes three yards, disclosing a ditch constructed to drain the lower part of the building, and shut out from the garden by a low iron fence. Along this fence

## Forcing Rhubarb and Asparagus

I have 50,000 three year old Rhubarb roots for this winter's forcing. Also 50,000 large Asparagus roots for forcing. Order now as there is a large demand for these roots for forcing. Plants are buying heavily. We have also 1,000 Privet, 35,000 Peach trees, 500,000 Asparagus roots, 200,000 Strawberry plants, 1,000 Apple trees. All ready now to plant.

\$5 00 per 100; \$45 00 per 1000.

**THE E. G. HILL CO., Richmond, Ind.**

are placed small boxes, planted in the back with *Mikana scandens* with *Pilea muscosa* in front and with *Aralia Sieboldi* var. *Moseil* in the corners. The *Mikana scandens* has spread luxuriously over the railing, while the *Pilea* covers the boxes, making a complete carpet. These three plants harmonize well with the other green of the plantation and show by their growth, that an entirely shaded situation is not detrimental to their full development.

Finally, in order to cover the castle and avoid planting climbing plants close to the walls, asparagus in variety is used in a rather unique way. The asparagus are three years old with vines over 10 feet long, and cover completely the pots in which they grow. Iron staples are driven into the wall, supporting shelves upon each of which two of these asparagus pots are placed. In the autumn these shelves are taken down together with the plants, nothing remaining but the iron staples, which protrude only a few inches, and can hardly be noticed. The asparagus used is *A. falcatus* and *scandens deflexus*. *A. falcatus* is unsurpassed for such places and gives an elegant effect with long strings of dark green foliage. Along a path here in front of the ditch grow various rhododendrons, *illex*, *daphne*, ferns, *vinca* and *funkia*.

Following the path the castle wall recedes again, and here in various places are used twenty-four pots of asparagus at different heights, as described above. *A. scandens deflexus* showed very good results, but just as under glass, requires frequent watering, feeding and syringing.

Following the turn of the path to the left we find a patch of ivy again, bordered with *aucuba*, *thuja*, *taxus*, *cryptomeria*, ferns and perennials in variety, also *Phoenix* palms in tubs overgrown by *Colocasia antiquorum*, and finally some rhododendrons.

From here the ivy winds through a valley, bordered by a rocky bank. On the right there rise out of the ivy *Funkia Sieboldiana*, *Saxifraga peltata*, *Polygonia podophylla* and ferns. Upon the rocky banks grow conifers, deciduous trees, ferns and some perennials. Away in the background we notice *Ulmus montana pendula*.

The whole garden has also in winter a cheerful appearance, because the ivy closes over the vacancies left by the perennials and ferns, and the conifers on the rising slopes opposite the house against the walls of the viney combine to make an evergreen surface covering as well as middle and skyline. As the winter-garden of the castle lies on this side this permanent ever-

green feature of the plantation just outside in the near vicinity is especially pleasing.

(We are sorry not to be able to reprint any of the 12 accompanying photos as shown in Moller's journal; they are really a necessary supplement to the above description of a "shade-garden.")

## A FEW BARGAINS IN BULBS

**LILIUM LONGIFLORUM**, Japan-grown. Now ready. Case lots, 300 bulbs, \$15.00 per case; less quantities, \$6.00 per 100.

**FREESIA REFRACTA ALBA**. We have a small surplus of the largest size French-grown bulbs. Mammoth bulbs,  $\frac{3}{4}$  inch up, as long as unsold, \$7.50 per 100.

**LILY OF THE VALLEY**, Cold Storage. Finest quality, for immediate forcing. Case of 250, \$4.00; case of 500, \$7.50; case of 1000, \$14.00; case of 2500, \$32.50.

**DUTCH HYACINTHS**. Selected named varieties, first size, \$5.00 per 100, \$45.00 per 1000; Fine named, second size, \$4.00 per 100, \$35.00 per 1000; Separate colors, \$2.50 per 100, \$23.00 per 1000; Miniature, or Dutch Romans—very profitable stock for growing—finest named varieties in white, pink and blue, \$2.00 per 100, \$18.00 per 1000.

**TULIPS**. A few of the leading varieties, which we can supply in quantity, as follows:—Artus, \$1.25 per 100, \$11.00 per 1000; Chrysolora, 90c. per 100, \$7.00 per 1000; Cottage Maid, \$1.25 per 100, \$10.00 per 1000; Keizerskroon, \$1.75 per 100, \$15.00 per 1000; La Reine, \$1.25 per 100, \$9.00

per 1000; Pottebakker White, \$1.25 per 100, \$10.00 per 1000; Rose Griseelin, \$1.50 per 100, \$12.00 per 1000; Yellow Prince, \$1.00 per 100, \$8.00 per 1000; Gesneriana Spatulata, \$1.25 per 100, \$11.00 per 1000; Darwins, \$1.00 per 100, \$9.00 per 1000.

**NARCISSUS**. Golden Spur, \$1.75 per 100, \$15.00 per 1000; Princeps, 80c. per 100, \$6.50 per 1000; Single Von Sion, \$1.25 per 100, \$10.00 per 1000; Emperor, \$1.75 per 100, \$15.00 per 1000; Empress, \$1.75 per 100, \$14.00 per 1000; Double Von Sion, first size, \$1.00 per 100, \$8.00 per 1000; Orange Phoenix, \$1.25 per 100, \$9.00 per 1000; Paper White Grandiflora, \$1.25 per 100, \$9.00 per 1000; Poeticus, 60c. per 100, \$4.00 per 1000; Barri Conspicuous, 80c. per 100, \$6.50 per 1000.

**SPANISH IRIS**. Finest named varieties, 60c. per 100, \$4.00 per 1000; All colors mixed 40c. per 100, \$2.00 per 1000.

**CROCUS**. Separate Colors, 50c. per 100, \$3.00 per 1000; Finest Named Varieties, 75c. per 100, \$5.00 per 1000.

For complete list of Bulbs, see our Wholesale Price List.

**F. R. PIERSON CO., Tarrytown-on-Hudson, New York**

### LIBRARY NOTES.

Since our last installment under the above heading there have been published on this side of the Atlantic several new gardening books of greater or less interest to American readers. The first one is *Gardens of England*, painted by Beatrice Parsons, described by E. T. Cook. Everything of a library character that Mr. E. T. Cook, the able editor of "The Garden," puts his hand to is executed in the highest style. This new book contains some thoughts on English gardening rather than descriptions, historic and otherwise, of some of the well-known gardens attached to our English mansions. The subjects treated are all dealt with in Mr. Cook's best style, and it is not within our province just now to do more than advise our readers to take cognizance of them themselves. But the chief charm to us as bibliophiles must primarily be the exquisite little gems from the brush of Beatrice Parsons with which the pages of the book are adorned. It is a very long time since we saw anything executed in such dainty style, and of these there are twenty reproductions all in color. Price \$1.75.

"The Perfect Garden," by Walter P. Wright—a somewhat ambitious title, but the author endeavors to justify it by the wide scope over which he travels. One feature of the Perfect Garden certainly deserves our highest commendation, and that is the series of garden plans at the end of the work, a provision that so many authors have failed to make for their readers. Price \$1.60.

*Journal of the Royal Horticultural Society*, Vol. XXXIII, Part 2. (Office of the Society, Vincent Square, London, S. W.) A bulky number of this well-known journal, containing numerous articles of horticultural interest. We quote just a few: Rare Shrubs in the Open Air, Hardy Nymphaeas, The Chinese Flora, Electric Cultivation in Relation to Horticulture, Origin and Present Distribution of the British Flora, Summer Pruning, Another Peach Pest, etc. Reports of Trials at Wisley, Reviews of Books, Additions to the Library and other matter complete the volume. Price \$1.80.

Bulletin de la Societe Francaise d'Horticulture de Londres. (Office of the Society, 66 Long Acre, London, W. C.) This is always an interesting publication and it has now reached its 19th annual issue. The Society consists of French and other French-

speaking gardeners in London, many of whom retain their membership after returning to their native land. The Society is also supported by the leading English and Continental nurserymen. The present issue consists of 192 pages of printed matter, stitched in paper wrappers. A few illustrations are given. The articles consist chiefly of papers read by the members at the Society's monthly meetings and are in the French language. This year an exception is made, and M. Paul Aquatias explains in excellent English the mysteries of intensive culture of vegetables on the French system.

"Pansies and Violets," by D. B. Crane. A neat little book of 128 pages, written by a well-known authority on these flowers. It is a handbook dealing with the cultivation and propagation of the Show, Fancy and Tufted pansy, for garden decoration and exhibition. It deals also with the Violetta, Mountain and Sweet Violets, and treats on the diseases thereof and enemies. The book contains selections of varieties for all purposes. Price 35 cts.

"How to Grow Sweet Peas," by Thomas Stevenson and W. F. May. We have had occasion to notice several little cultural guides on the Sweet Pea of late, and the present in style and get-up generally is in no way behind its predecessors. Several portraits of well-known men in the Sweet Pea world are given. Price 25 cents.

"The French Garden," by C. D. McKay. In this little work of 62 pages the author gives us a diary and manual of Intensive Cultivation, a subject that has aroused considerable interest here and upon which a good deal has been written not only in the gardening but in the daily press. The subjects treated are French and English Gardeners, Starting a Garden, Seed Sowing, Melons and Cucumbers, Some Special Crops, Straw Mats, Packing, The History of the French Garden in England. Price 25 cents.

C. HARMAN PAYNE.

### PROTECTING PINE PLANTATIONS AGAINST THE GYPSY MOTH.

A. H. Kirkland, superintendent of the gypsy moth campaign in Massachusetts has determined by observation that the young of the gypsy moth are not able to feed on the pine for the first three weeks after hatching. It follows, therefore, that plantations of white pine may be made without fear of the depredations of these insects provided all undergrowth and contiguous deciduous trees, etc., are cut away as any caterpillars hatched within territory thus protected would starve.

### RECONSTRUCTION OF SWISS VINEYARDS.

Vice-Consul L. H. Munier, of Geneva, sends a clipping from a Swiss newspaper, from which it is noted that more modern methods of grape culture are being adopted in Switzerland. The old vineyards have been attacked by phylloxera, in fighting which the Government has already spent \$482,500. Now it is decided to replace the old vines with the more robust American vines. To aid the planters in the substitution the Government has voted an annual appropriation of \$96,500, to extend over a period of sixty years.

### A NEW COLOR CHART.

Our readers will remember that some time ago we noticed the publication of a work called *Repertoire de Couleurs* which consisted of about 1400 various shades of colors each named in five different languages. This book has recently been adopted by the Royal Horticulture Society as its standard of colors.

Quite recently a new French work called *Code des Couleurs*, portable in form and containing about 720 colors not named but numbered, has been published by a Paris firm. We shall hope to notice it more fully in our next instalment of "Library Notes."

## Seed Trade

As stated in last week's HORTICULTURE, the first preliminary estimates of deliveries of the 1908 seed pea crop have appeared, and they fully bear out estimates made in HORTICULTURE weeks ago, and particularly on canners' peas, which are even lower than the most pessimistic predictions. Many an uncomfortable quarter hour awaits those growers who deal largely with canners, and especially those who have to call on them. Such unfortunate should make their wills and increase their life and accident insurance before starting on their next year's campaign.

With the exception of a comparatively few varieties, deliveries of beans will be fairly good, and not much complaint is expected from that source. Of Limas, the pole varieties promise a fair crop, and barring damage by rain there should be but little shortage excepting possibly the Dreer or Challenger variety, but there will be considerable of a shortage in the Dwarf and Bush sorts, though nothing in the way of figures is yet available. Of the two new Dwarfs, it is believed the introducers will be able to offer "Fordhook" to the trade, but the Burpee's Improved will probably not be offered this year owing to the great shortage of the crop.

A few seedsmen who managed to secure a little seed of these two varieties last year will have small quantities from their plantings, but ninety per cent. of all the seed in existence is controlled by the introducers. Those seedsmen who contemplate listing these varieties should know the source of their supplies. "A word to the wise is sufficient."

The open warm autumn has been a boon to tomato growers, whether for seed or canning, and the crop will not be nearly so short as seemed probable six weeks ago.

An attack on the seed trade which appeared in the "Rural New Yorker," of recent date, has called forth some indignant protests from seedsmen, for although not an editorial, nor written by a member of its staff, a footnote

by the editor seems to give endorsement to the ignorant and exaggerated trash of its correspondent, and the fact that it is printed prominently on the front page of the paper gives additional weight to this suspicion.

That the spoutings of this cheap sensationalist will be properly answered may be taken for granted, as the seedsmen cannot lightly allow such an attack to pass unchallenged, for, regardless of the insignificance of the writer, the fact that it was published in a paper of the standing of the "Rural New Yorker" with all too evident approval, makes a reply practically imperative. Those seedsmen who have not read the article in question should do so.

Mr. W. Atlee Burpee has just paid a long promised visit to Mr. Jerome B. Rice at the latter's beautiful home at Cambridge, N. Y. Incidentally Mr. Burpee made all too brief social calls on the seedsmen of Albany and Troy.

## PHILADELPHIA NOTES.

Ralph E. Faust has retired from the treasurership of the Pennock-Meehan Co., and is succeeded by Percy E. Rigby. Mr. Faust accepted a tempting offer from his uncle, a wealthy leather manufacturer in Camden, N. J., his holdings in the Pennock-Meehan Company being transferred to that corporation, in which he now holds no interest except that of cordial friendship.

Samuel F. Lilley, late salesman for Eugene Weiss, Hatboro, and Edward Upton, late salesman for J. Welsh Young, Germantown, have formed a co-partnership and will conduct a wholesale commission cut flower business at 1514 Sansom street. They opened for business Oct. 12th. We wish the new firm every success.

Founders' Week brought about four million visitors to Philadelphia last week. There were many of our craft among them, but mostly from eastern Pennsylvania and nearby states. Business, except in special lines, was hindered more than helped by the celebration, but no doubt the flower trade will feel the good effects in due course.

The business parade on Wednesday

**Moore-Livingston Co.,** Patentees and Mfrs., **Lansdowne, Pa.**

was very imposing. The horticultural element was well represented by the Henry F. Michell Co., whose float showed a beautifully laid out plot of real grass—in the centre of which was a circular bed of hyacinths of red, white and blue, bordered with yellow tulips. Pillars surrounded the scene surmounted with vases of plants. Philip Freud represented the gardener.

The historical parade on Friday was of special interest to the local florists, as one of their number, J. J. Habermehl's Sons, constructed some forty of the floats, on which we are told they had been working since last August. These were historically accurate and, while elaborate, did not depart from the best standards of good taste.

Messrs. Dreer contented themselves with a lavish display of dahlias and larkspurs on one side, and pumpkins on the other, which was a centre of interest to the throngs passing down Chestnut street, on their way to Independence Hall.

Among our visitors this week: Mr. Payne, of Sawyer & Payne, Jacksonville, Florida. He reports good crops south and a very hopeful feeling among the merchants. He was surprised at the congested flower conditions in New York and congratulated Philadelphia on better regulated balance between supply and demand. We don't quite see it—here. We think situation rank enough.

At the annual meeting of the National Farm School at Doylestown, Pa., the president, referring to the change in the horticultural department, said: "in our faculty a change was made during the past year in the appointment of Mr. Walter F. Fancourt as horticulturist, succeeding Mr. W. B. Brierly. Mr. Fancourt has won for himself an enviable reputation as a thoroughly skilled and eminently practical man in his profession, and the school may therefore look forward to great progress in its department of horticulture, fruit raising and truck gardening" all of which we are sure will be echoed by Mr. Fancourt's fellow craftsmen in the trade.

## NEWS NOTES.

The Alpha Floral Co., Des Moines, Iowa, has enlarged its window capacity and made other striking improvements.

It is stated that the Philadelphia Cut Flower Company has secured judgment against the Newton Floral Co., Norfolk, Va., in the sum of \$458.50.

## NEW RETAIL FLOWER STORES.

P. R. Burt, Greenfield, Mass.

Frank Benson, Indianapolis, Ind.

William Hoffman, Pawtucket, R. I.

W. C. Young, 316 Broad St., Providence, R. I.

W. W. Mulich, 706 Wealthy Ave., Grand Rapids, Mich.

Harvey Erchert & Co. have opened a new flower store at 1004 Elmwood ave., Buffalo, under the sign of the Elmwood Floral Depot. The Erchert Co. have greenhouses on Bid ave.

## BUSINESS CHANGES.

The Empire Plant & Floral Co., Spokane, Wash., has sold out to I. Hajek.

Lemoine Bros. have bought the business of Remick & Smith, S. Framingham, Mass.

The firm of Weigel & Ujfalussy, New York, has dissolved, and the business will be carried on by Mr. Weigel.

The Eastern Nurseries, Jamaica Plain, Mass., will hereafter be under the management of Henry S. Dawson. Mr. Dawson, who has been connected with the nurseries for the past four years, is the youngest son of Jackson Dawson of the Arnold Arboretum, and that he will conduct the establishment in a manner which will especially appeal to the buyers of choice ornamental stock goes without saying.

## Flower Market Reports.

Trade has been a **BALTIMORE** trifle better during the week. Material has come in pretty good quality although roses have been a little off the last few days. Every devout florist—and some that are not too devout—is praying for that frost that shall put out of commission all out-door stuff with which the markets are now flooded.

The market has had a **BOSTON** good lively time for the past two weeks. The craft has had a fair wind and rapid traveling, but prospects are for a dead calm right ahead, which may keep us tied up for some time. Chrysanthemums are coming in with fierce energy and bid fair to overwhelm everything. An avalanche is undoubtedly on the way and all other things must stand aside. Roses are better, much better, in quality and stems but the demand is decidedly weak. Carnations are all improving in quality and would be all-important were it not for the rising tide of chrysanthemums. Violets are doing better than they did last week; quality improved and market value advanced. Sweet peas from under glass have just started in. Price of peas is at present 50 cents per 100, but as soon as the stems lengthen out they will make a better record.

Autumn is with us **BUFFALO** again and the shop windows are filled with chrysanthemums and decorated in genuine autumn style and good displays are seen among the down-town florists. The cool bracing weather of the past few days has quickened trade and the volume of business is increasing. A few light frosts the past week killed all outside vegetation and the demand for indoor stock has advanced. All roses are getting into winter form, some choice Beauties being on the market. Carnations are in good demand and the best stock finds ready sale. Violets are improving daily in color and stem and demand is getting brisker daily. Lily of the valley has never been better in quality than at present. Dahlias and cosmos have had their inning and have sold exceedingly well this fall. Gladioli are about over with. Chrysanthemums are coming in more plentifully and the early varieties such as Kalb, Monrovia, White and Pink Pacific are had but the demand not any too brisk. Green goods are in excellent supply. Wild smilax has been in demand, also autumn foliage.

A complete change has **CHICAGO** taken place in the Chicago market since the hard frosts. Where all was quiet two weeks ago it is now full of life and stir. The outdoor flowers which filled

the counters but did not bring in the dollars are all gone for this season and chrysanthemums have taken their places. The varieties in the market this week are mostly Oct. Frost, Monrovia, Rosiere, Lady Harriet, C. Touset, Oct. Sunshine and Robt. Halliday. The blooms are on long stems and are fine. Carnations are scarce and bring good prices. The cool weather has made the shipments of Hudson River violets arrive in good shape the past week. Cattleya labiata, Vanda coerulea, Dendrobium formosum and Oncidium varicosum are furnishing variety in the orchid line and the demand steadily grows. The first shipments of boxwood are in and are of excellent quality. Roses are good and on fairly good stems. All the retail stores are handling large quantities of the Boston and other ferns, the demand for which seems constantly increasing.

Flowers have been **INDIANAPOLIS** exceedingly scarce the past ten days,

and the cool weather, although delightful, undoubtedly is instrumental in checking the supply to some extent. Were it not for fancy American Beauty roses many of the retailers would be in a quandary when it comes to filling an order with something choice. There is a noticeable improvement in the quality of Killarney, Chateauf, Bride, Bridesmaid and Perle roses; prices having advanced accordingly. Carnations have been scarce, the best fetching \$3.00 per 100. Several heavy frosts have put outdoor stock, such as dahlias, cosmos, etc., out of business. There is a good demand for lily of the valley, good stock of which can be had at any time. The middle of October will see this market well supplied with chrysanthemums. The de-

mand for everything is on the increase and October gives promise of being a very busy month.

From a florists' standpoint **PHILADELPHIA** Founders' Week celebration was a hindrance rather than a help. As one wholesaler put it: "The parade paraded business out of town." Chrysanthemums became very plentiful all of a sudden and prices broke badly. Dahlias moved off fairly well but at any old price. American Beauty was in the lead as to roses, and Kaiserin, My Maryland, Mrs. Jardine and Richmond were good followers. Improvement continues in carnations and these move fairly under the depressed conditions. Cosmos and autumn foliage are conspicuous items everywhere. Violets more plentiful and of better quality. Orchids in large supply and prices weakened considerably, with the exception of white varieties. Easter lilies are not going quite as well. Lily of the valley and greens plentiful and sluggish. The present week has started off much more briskly and a more cheerful feeling prevails.

A killing frost on **WASHINGTON** the night of the 12th put an end to almost all out-of-doors flowers, especially dahlias; the latter were cut and rushed in in large quantities which made the market more piled up than before with that particular commodity. The carnations that are coming in are much improved in color and size and the price is correspondingly better. In-door chrysanthemums are being cut, but in limited quantities. Violets are thus far very short of stem, and nothing to brag of in color. Roses are improving daily and there is a steady demand for them.

### Bostrom Improved Builders' Levels and Farm Levels

For Park, Cemetery and Landscape Gardening use, take the place of expensive Engineering Instruments. Simple in construction, easily adjusted, more substantial and less cumbersome than the more elaborate and complicated instruments. Practical, up-to-date instrument that any one can use. Write for descriptive circulars and be convinced that this Level is necessary to complete your outfit. Builders' Level \$25.00. Farm Level \$15.00.

New York again re-  
ports a very dull  
market with no sign  
of any general movement towards a  
seasonable activity. This is all the  
more noticeable because a gratifying  
resumption of healthy business condi-  
tions seems to have set in generally  
in other flower centres. Roses are  
in lighter supply here, partly as a re-  
sult of lower temperatures, but this  
has no perceptible effect on the value  
of or demand for the product as there  
is still a larger influx than the nor-  
mal needs of the market call for.  
Chrysanthemums are rapidly gaining  
in quantity, quality and prominence  
but are selling very poorly as com-  
pared with past seasons. Violets are  
in a similar position. Carnations  
show a trifle better front than they  
did. Summing up the general condi-  
tions, it may be truthfully said that  
they are decidedly unsatisfactory.

### PERSONAL NOTES FROM FLAT- BUSH, N. Y.

John Kemper has returned from a  
trip to his old home in Holland, where  
he enjoyed himself for several months  
and was rejuvenated by 20 years.  
Mrs. Kemper, his general superinten-  
dent, kept everything in first-class  
shape during his absence.

John Scott of Flatbush, who was  
laid up with typhoid fever, we are  
happy to say is well on his way to  
recovery and hopes to be around  
again in a short time, but two of his  
brothers are laid up with the same  
disease. His neighbor, Peter Wagner,  
is busy finishing up a fine double  
greenhouse, 50 x 150 feet, which he  
has put up himself, thus showing him  
to be as proficient an architect in  
greenhouse building as he is a good  
grower.

### FARM IMPLEMENTS IN TASMANIA.

Much American Trade Lost Because Patterns Do Not Suit.

In reporting that there should be a good market in Tasmania for American cultivating implements, Consul Henry D. Baker, of Hobart, goes into the following details:

In these implements there is already a fair trade, and in certain lines, such as scufflers and other market garden tools, the makers from the United States have the bulk of the trade. In other and more important lines, such as plows, cultivators and harrows, there is a chance to largely increase the business. As a fact, the trade with the United States in many classes of implements is smaller now than it was ten years ago. The reason for this seems to be that the patterns do not suit the requirements of the Tasmanian farmer.

### Cultivators and Plows.

In regard to cultivators, few makers in the United States make a spring-toothed machine on high wheels. The spring-tooth harrow with its low wheels and frame close to the ground is not entirely suitable, as the Tasmanian farmers are cultivating their land all through the winter months when there are often only three fine days in a week.

Any low-framed cultivator will clog up in stubble land, and a large proportion of the farmers use the high-framed machines, which are mostly imported from Canada. These Canadian machines, including the duty, cost about \$60 landed in Tasmania, and retail at from \$70 to \$80, according to the terms of settlement.

In plows the American patterns are also said to be unsuitable. They have had a fair trial, as some ten years ago some of the largest importers obtained shipments from some of the leading makers in the United States, one Indiana firm supplying as many as 3,000 plows in a single season. The reason they were imported was very dry and they sold readily. In the normal Tas-

manian winter the American patterns are not liked, as the short breast and wide share cause them to clog up in the clay soils. The market is almost entirely supplied by Canadian makers, who supply a plow made from patterns brought over to Canada by the Scotch immigrants.

Manufacturers in the United States do not seem to have made themselves acquainted with Tasmanian requirements. For instance, when the Hobart exhibition was opened an enterprising firm in the United States sent out a consignment of plows. Nearly all of these were riding plows. As Tasmanian winters are cold, and much of the land contains stones and roots, riding plows are most unsuitable, particularly for British-trained farmers. Further, many manufacturers are constantly sending traders' catalogues of corn-planting machines, corn harvesters, and shedders. As an acre of corn has never ripened in Tasmania, the climate being unsuitable, the sending of this literature is wasted energy.

It may be mentioned that Canadian makers have imported plows from Tasmania for inspection and have made up and exported to this State plows made up in the same pattern. It would certainly pay makers in the United States to do the same.

## STANDARD FLOWER POTS

Packed in small crates, easy to handle.

Price per crate		Price per crate	
1500 2 1/2 in. pots in crate	\$4.88	120 7 in. pots in crate	\$4.20

**FIRE RECORD.**

The plant of E. A. Muchow, Clarence, N. Y., was damaged by fire on Oct. 4; loss, about \$3000; partially insured.

A large barn belonging to Rane & Hall, Waban, Mass., was destroyed by fire on the night of Saturday, Oct. 10. Two horses, several wagons, harness, an automobile, hot bed sashes, and a large quantity of hay and grain, were also burned and considerable glass in the greenhouses was broken. The loss is from \$5,000 to \$6,000, partially insured. E. W. Rane, senior member of the firm, is State Forester.

**PATENTS GRANTED.**

### Why My New Curved Iceless Eave is Far Superior to Anything on the Market Today

- 1st. No sash bars incased in iron, thereby eliminating all danger of bars decaying.
- 2nd. Can be used in conjunction with iron frame construction, thereby doing away with that very objectionable feature, "columns."
- 3rd. Roof bars with drip grooves, which act as conductors to carry away the condensation: Result, the driest roof ever used for greenhouse purposes.
- 4th. THE MOST IMPORTANT OF THEM ALL. The very small increase in cost over the ordinary style of construction which makes it possible to be used for commercial as well as private purposes.

William H. Lutton, Horticultural Architect and Builder  
West Side Ave Station (C.R.R. of N.J.) Jersey City, N.J.

## AN IDEAL SMALL GREENHOUSE

This section shows our ideal violet, propagating or small greenhouse for general purposes. It is of Semi-Iron construction, but no purlins or columns are necessary for this width house. The roof is supported and the sides are kept from spreading by the iron tie rod which extends from eave to eave. This tie is supported in the center by a rod suspended from the ridge. It has an exceptionally large bench area, as but little of the space is taken for the single walk.

You will find the plan and elevation on page 22 of our Handy Hand Book — or better still, write us.

plant of  
Kentia  
Forsteriana

## AZALEAS NEW IMPORTATIONS NOW READY

If you have not already secured all the Azaleas that you want for Christmas-forcing or later and Easter-flowering, you will find it to your advantage to purchase at once, while the plants can be forwarded by freight, thus saving in cost of transportation, as later, after cold weather, plants will have to be shipped by express; and as Azaleas are heavy, it is to your advantage to order them now and have them shipped while they can travel safely by freight.

Besides this, you can secure the varieties wanted before assortments are broken. Plants are in fine shape, well budded, and we offer the best commercial varieties, as follows:

Apollo, Bernhard Andrea Alba, Deutsche Perle, Empress of India, Mme. Jos. Vervaene, Mme. Van der Cruyssen, Mrs. Petrick, Niobe, Paul Weber, Prof. Wolters, Simon Mardner, and Vervaeneana.

Strong Plants, 10 to 12 inch in diameter,.....	\$4.80 per doz.	\$35.00 per 100
" " 12 to 14 " " .....	6.00 " "	45.00 " "
" " 14 to 16 " " .....	7.20 " "	55.00 " "
" " 16 to 18 " " .....	12.00 " "	
" " 18 to 20 " " .....	24.00 " "	

Dwarf or Miniature **AZALEAS** { Firefly, or Hexe. Brilliant Crimson. } \$3.60 per doz., \$25.00 per 100.

# Rocky Mountain Rambles

I.

## SOME UNFAMILIAR PLANTS

I made my first outing in the Rocky Mountains in 1895, and since have made many more, not only to study the plants of the region but also to enjoy the woods and brooks. The first trip was a revelation to me. Many of the plants I had never before seen growing, although they were familiar to me from herbarium specimens. We had passed the Nebraska-Colorado line and were on the high plain east of Denver at evening. As the train sped along the air was filled with the perfume of a white-flowered plant, a near relative of our common Four O'clock, known to botanists as *Abronia fragrans*. I had never seen it in cultivation and wondered why a plant with such beautiful clusters and delightfully fragrant blossoms should not find a place in our gardens. So far as known to me this plant is seldom seen in cultivation, but should be. There were also to be seen along the railroads many other plants, among them the Prickly Poppy (*Argemone platyceras*) common from Nebraska west to Utah. In places it covers many acres. The large white blossoms are handsome. The species has been cultivated and some think it a most desirable plant. It is, however, a bad plant to handle; the setose hispid hairs inflict injuries that are as exasperating to the collector as are those from the common cactus. The Evening Primrose (*Oenothera*) is numerous in species. The *E. speciosa* an erect perennial with large white or rose colored flowers is found plentifully on the plains and the lower foothills of the mountains, and is a most desirable plant and should be cultivated. The *E. Missouriensis*, a low caulescent perennial, with large, yellow, axillary flowers sometimes forms large patches in shady ground. It is surely a most desirable plant for cultivation.

From central Nebraska and westward occurs a large cucurbit with a large fusiform root, thick triangular cordate leaves, and large, yellow flowers; up the Arkansas it is abundant. On the plains is a large rooted Morning-glory (*Ipomoea leptophylla*) with a root that at times is said to weigh 100 pounds. Unlike our native species the stems are erect or ascending. The large flowers are three inches long.

## THE STATELY YUCCA

Of all the plants on the plains none are more interesting than the Yucca. On my trips to the Rocky Mountains I have always been a little too late to see the *Yucca glauca* in bloom. This year during the month of June I found this beautiful plant in full bloom at Denver, Manitou, and Placerville. It was a glorious sight to behold the thousands of plants in full bloom. The pendant more or less bell-shaped, yellowish-white flowers, hang in ample racemes and make a fine display in the otherwise monotonous landscape. They were growing abundantly in stony ground, on steep banks and in level places. One wonders why the Yucca is not planted more extensively in our gardens than it is. There is surely a place for it in many of the gardens in the Mississippi Valley. It is perfectly hardy as far north as Northern Iowa, since it is indi-

YUCCA GLAUCA AT MANITOU, COL.

genous to the western part of the state, extending northward to South Dakota. The picture shown here was taken near Manitou, Colorado.

## THE COLORADO STATE FLOWER

This year the Rocky Mountain Columbine was in all its glory. In my first trip out of Denver up the mountains saw people carrying large bunches of this plant, which is an inhabitant of the pine and aspen woods. It grows from 7000 feet to timber line. No wonder the state of Colorado has adopted it as the state flower. No other American species is quite as handsome and grows so abundantly. The eastern species has a wider distribution but it is not as beautiful. As we were coming down the mountain near Palmer Lake, there was given to us a Moccasin flower (*Cypripedium pubescens*), the same species found in the East. It is, of course, a rare plant in the Rockies.

## GEMS OF THE MOUNTAIN WOODS

As we went up the mountain in June the Western Choke Cherry (*Prunus demissa*) was in full bloom and with it a kind of Raspberry (*Rubus deliciosus*). Later the Salmonberry (*R. Nutkanus*) was in bloom. It seems that there should be a place for this plant in our gardens. In the foothills one finds a great deal of a spiraea with fragrant leaves, the *Holodiscus discolor*. The western Geranium has great possibilities under cultivation. The parks and woods show a continuous bloom of these species. Add to these the great Fireweed (*Epilobium angustifolium*) so common in the north, which is everywhere abundant at higher altitudes, especially where the woods have been burned. In many streams and brooks we find a yellow-flowered mimulus (*M. Jamesii*) occurs and in some places a large flowered purplish kind, the *M. Lewei*. The service Berry (*Amelanchier alnifolia*) Mountain Mahogany (*Cercocarpus parvifolius*) and *Purshia tridentata* all add charm to these woods, each species in its appropriate place, the Mahogany in dry arid soil and the Service berry in more moist places, generally, although it sometimes occurs in dry places.

Tree Talks

I.

WASTE AND IMPROVIDENCE

A few generations ago an almost unbroken forest covered the greater part of this continent. Looking from the tops of our highest mountains only a few small patches, laid open for the cultivation of corn, could be seen: now those old woods have nearly disappeared. The new settler, at that time, cleared in a year more acres than he could cultivate in ten, and destroyed in one burning enough wood to last twenty years. The same destruction is still going on in the adjoining provinces. I have seen hundreds of acres of what we would call valuable wood and timber logged and ready to fire. The only product would be a few hundred pounds of potash, two or three crops of potatoes, oats or buckwheat, and a crop or two of hay, when the land would be abandoned and another strip of timber would be cut down and treated in the same manner. So the indiscriminate waste goes on, and in a few years, if this work continues, the Provinces will be as short of good timber as we are at present, although I believe the government of Canada has taken some steps to try and preserve its forests.

ANDOVER'S LOST BEAUTY

Thirty-five years ago the town of Andover, Mass., contained as fine groves of pines and other woods as there were in the State. From Wilmington to the edge of the Merrimac there were many large tracts of beautiful old woods, which it was the pride of my boyish days to travel through, collecting the beautiful flowers that grew there. In those woods I gathered the most of my knowledge of the plants and trees of eastern Massachusetts, and it pains me to see them disappearing so fast, and such little provision being made for their renewal. From the top of Institution Hill, at that time, look whichever way you might, beautiful groves were to be seen, and the new city of Lawrence was hardly visible. Today, from the same point, it is like looking across an almost barren plain, with the city in the background. The woods have nearly disappeared, and few trees, if any, have been planted to take their places. The brooks I remember, where a string of trout could be caught, are nearly dry, and contain water only a few weeks in the spring or during heavy fall rains; the rest of the year they are dry or nearly so. At that time peaches and plums grew well in any garden where they were planted; today scarcely a peach or plum can be found growing in the town. A great portion of the land where these woods have been cut is of the poorest kind. After burning the little sod there was on it and growing a few crops of rye (I believe that was the usual way), they left the land nearly worthless, what little soil there was, being stripped of its covering of leaves and mats of small roots, was exposed to the action of the weather and was washed away by every rain until

nothing but gravel or loose stones remained. This is only one illustration.

A PATRIOTIC DUTY AND BUSINESS INVESTMENT

What is going on in this town is going on in almost every town in the State; and, if this subject of tree planting is not taken in hand, either by the Government or private parties, we shall soon have a treeless State in Massachusetts. We have thousands of acres of land that are unfit for cultivation—ten acres would hardly keep a sheep—yet this same land has been covered with good growths of timber and wood, and could be again covered if every owner of land would take hold and plant if only a few acres every year. There is no better investment he could leave his children than to plant his barren lands with trees, besides benefitting the State and country in which he lives. A great many will say: It does not pay; a tree grows so slowly, I could not reap any benefit from it during a life-time. Let us look at it in a business way and see. Mr. Avery Slade of Somerset has investigated this matter somewhat, and here are a few of the results. Mr. Zebulon Pratt of Bridgewater purchased twenty-five acres of wornout land in North Middleboro, at \$9.00 per acre, and set it to white pine in the spring of 1863, at an expense of \$6.00 per acre. Two years after he paid a man \$47.00 to fill the vacancies where some had died, making the cost \$197.00 exclusive of the cost of the land. The plants were from six to eighteen inches in height and were planted ten feet each way. In December, 1883, twenty years afterwards the trees were from twelve to sixteen inches in diameter and in thrifty condition. The lot is now taxed for \$800.00, which is based on two-thirds valuation; and, as towns favor experiments of this kind, it is fair to presume that the assessed valuation is not too high, and that the cash value of the lot is not far from \$1200.

Land,	\$225.00	
Setting trees,	197.00	\$1200.00
Taxes 20 years,	120.00	542.00
Total cost,		\$542.00
Profit,		\$658.00

Savings banks would have given him about \$450.00, with risk of losing it all the time.

J. D. G. Williams of Raynham set a piece of land to pine in 1850. The land was \$10.00 per acre, cost of setting out, \$5.00. After twenty-five years' growth the standing wood was sold to Mr. Thayer of Taunton for \$150.00 per acre, leaving the land in better order to set out again than when he bought it.

Land per acre,	\$10.00
Trees " "	5.00
Taxes " "	5.00
\$20.00	

Sold wood for \$150.00 per acre and had land left. A Mr. Williams of Bristol County set a piece of land to pine in 1841, the land costing \$6.00 per acre. The trees were set in rows varying from six to nine feet and four to six feet apart. The lot was examined by an experienced lumberman in 1876, with a view to purchas-

ing, and his estimate of the wood was seventy-five cords to the acre. More than two-thirds of this is suitable for box boards, and is worth at the mill, three miles distant, \$6.00 per cord.

Land per acre.....	\$6.00
Setting trees .....	7.00
Taxes .....	11.00
<b>Total cost per acre.....</b>	<b>\$24.00</b>
50 cords at \$6.00.....	300.00
25 cords wood at \$2.00.....	50.00
<b>Yield per acre.....</b>	<b>\$350.00</b>

The late Richard Simpson set a piece to pine thirty-one years ago on land too poor to cultivate. The wood now is estimated to be worth \$150.00 per acre, at least.

The groves of which we have spoken have had no treatment to hasten their growth or improve the quality of the lumber, and, with the exception of the removing of one or two dead trees, it might be said that they have taken care of themselves. Had these plantations been pruned, so that the whole growth of the branches had been thrown into the trunks, they would have been worth at least fifteen per cent. more.

Boston, Mass.

## The Propagation of Phloxes

Many kinds now in cultivation are not satisfactory. The individual flowers may be large, but there is not a full symmetrical head. This is very important. We want the crown to appear like one great beautiful bloom. Again we want a plant that will propagate readily, one that will stool out and understand and practice multiplication. For instance Karoline von Sossburg is one of our most beautiful plants with its flowers of porcelain whiteness, but it lacks a well rounded head, and you can raise it a year or two with no increase. This is not profitable to the average grower who does not have a greenhouse for propagation. Some, indeed, plant cuttings out of doors but they are uncertain.

Then again, you want healthy plants. At least one-half of those we import are worthless. If it is very wet they blight terribly, and if it is very hot and dry they cannot endure it; so it is hard to find the ideal phlox. I have been at work for years endeavoring to originate new sorts from the best strains. I found *Crepusculum* to be a remarkable flower. The individual blooms are often larger than a silver dollar. The color is variable. The name, I believe, is twilight or fading light. It has the most glorious symmetrical crown of any I have ever seen. It is a continuous and a late bloomer, November sometimes finding it in its glory. The large and beau-

tiful florets match together so well that a single stem in a vase is a bouquet of itself of marvelous loveliness. It has one defect; it is a slow multiplier, but I find I can increase it fairly well from the roots. When planted near others it is marvelous how it will impress itself. You sow the seeds in the fall, and the next summer you are in a garden of delight, filled with surprises of beauty.

Associated with this, I have, from the seeds of the *Coquelicot*, which is a feeble plant with small flowers, increased the size one-half with a plant of twice the vigor of the parent. *Crepusculum* is quite variable in color. In our hot climate it endures the heat the best of any, and the flowers are nearly white with a crimson star in the center, while in Colorado at Boulder at Mr. Andrews' place I was shown some of that name with much darker flowers with no whiteness about them. I told Mr. Andrews I was sure he did not have the right kind. But this fall after the frosts I notice that mine have changed color materially. The normal color is white, shaded violet, and the shading is deeper in a cooler climate or in the autumn.

Notwithstanding the one defect of a slow propagator, I have secured some splendid crosses. One I call *Arete*, taking the names from the classic dictionary. This is the ideal flower. The blossoms are larger and much the color of the parent. It is about half-way between *Richard Wallace* and *Crepusculum*. It endures both floods and drouths without wincing. It stools vigorously and the head is full of seed. In fact it seems to be interested in the business all over and ready to help along all the lines. Phloxes never or seldom reproduce themselves from seed, but with seed from the finest you stand a chance for improvement. Another cross I named *Venus*, now changed to *Aleyoni* (daughter of *Atlas*), because there was another phlox of the same name. I have seen a great many of various kinds and colors but have never seen anything to compare with this. Single florets are much larger than a dollar. The general form is much like *Crepusculum*, only the blooms are of snowy white with five crimson stars artistically placed in the center. Though of vigorous habit, unfortunately this is a very slow propagator. It takes about two years to come to its best. However, it is now of such vigor I think I can reproduce it from the root cuttings so in a few years I can have some to spare.

We have quite a number of new ones of other colors on the way of which we have great hopes. But they must first be tested year by year before we can give them to the public. Too many untested new things have been put on the market. In this trying climate of floods and drought with hot winds and 110 in the shade, if we get anything to meet the condition we can depend on it anywhere.

the flower trade extricated from the predicament into which it has been forced by the untoward circumstances which it has had to contend with. One cause of the embargo from which New York (and in some degree Philadelphia) has been suffering is the remarkably salubrious weather all through October which has kept flower buyers in the country and left the hotels half empty. A good attack of disagreeable weather is needed to drive people back to city life and its flower-absorbing activities. This accomplished and election perplexities past, there is every reason to expect a genuine revival all along the line.

### Looking to better business ethics

Our recent brief notes illustrating the need of greater caution in the matter of credit giving seem to have stirred up a spiteful hornet's nest in the office of our New York contemporary. There is nothing in the remarks in question other than a desire to facilitate the exposure of the swindler under whatever guise he may operate and, by timely warning, to reduce to a minimum his opportunities for fraud. We believe this to be the proper policy for a dealer, publisher or other business man to pursue when he sees his neighbor being made a fellow-victim with himself of an impostor, and a grateful co-operation in thwarting the rascal would seem to be the right course in return, and not the slinging of mud. None of us are so profoundly discerning that we can claim immunity from imposition and the primitive propensity to stand aloof and chuckle with delight over the buncoing of a business competitor, when it is in our power to prevent it, finds little favor in these enlightened days other than among the constitutionally narrow-minded. We applaud the New York wholesalers for their action in establishing and adhering to a common standard in the collection of accounts and assuming of risks in connection therewith, and, as before stated, we hope to see something of the same co-operative spirit displayed in other departments of our business, for the common good.

### Pertinent reading contributions welcomed

We receive occasional communications from our readers urging that we devote a larger proportion of our reading space to topics connected with this or that department in which they are particularly interested. We are glad to receive these suggestions and would be grateful if many more were sent in. It is our especial desire to provide for our readers the sort of material that they will peruse with interest and benefit and to so diversify it that each of the many interests will find in every issue a liberal serving of that which most directly concerns them in their respective departments. In some lines, we think it will be generally acknowledged that we have been notably successful. In others, no one recognizes the deficiency more than we do. The fault in this respect is not entirely ours and the remedy lies with our readers among whom are unquestionably numbered the most intelligent and refined exponents of every branch of horticultural industry, who can easily accomplish the desired end by contributing liberally to those departments which lack and in such manner as to incite others to do likewise. We know that, in our big family of readers there are many well-versed and capable men and women who have thus far never written a line for publication who, if they could only be induced to begin, would quickly be accorded a distinction as writers, excelled by none. Send along the goods and HORTICULTURE will do its part in placing them where they will be appreciated.

### The business situation

It is gratifying to those in the less favored localities to learn of the very satisfactory conditions prevailing in many cut flower and plant centres where, as reports indicate, fall business has started up in good shape and supply and demand are nicely balanced. The knowledge that this prosperity exists elsewhere helps to inspire confidence in those markets where the summer stagnation has not yet lifted that their time will soon follow along and that before long the activity which is now so unevenly distributed will become universal and

### SOME LESSONS FROM A BOSTON "FLOWER FACTORY."

A visit to Pierce Bros. big greenhouse range at Waverley is at all times a pleasure and profit, for at least three reasons: first, the great quantity of flowers grown; second, the many mechanical adaptations in use for facilitating the various operations; and third, the cheerful frankness with which either one of the two brothers will show and explain any process or improvement which contains anything of interest or value to a fellow florist.

#### Mechanical Appliances.

The heating system in this mammoth establishment is one of the most complete in the country. It is finely equipped for forced draft and vacuum system with a tier of massive boilers and machinery of the highest efficiency. An ingenious system for interchangeable use in syringing with clear water or manure water is in operation. Through the entire length of the central shed there are laid parallel pipes, a 4 in. for water and 3 in. for manure water, each with branches right and left to the door of each greenhouse, where they unite into one pipe which runs over head to the farthest end of each house, with hose connections at regular intervals. The turning of a simple valve alongside each door stops the flow of clear water and admits the manure water, which is also under high pressure, to such house or houses as desired, or vice versa, at will, without disturbing operations in any other house. Attaching the hose overhead saves wear and tear dragging it over the ground and it is more easily handled. A series of artesian wells, all under glass roof, are soon to be opened, with a tank capacity of 150,000 gallons and 125 pounds pressure.

#### Home-Made Cement Benches.

In all the houses except one cement or tile benches have now replaced those of wood, the construction being home-made throughout. No wood is used other than temporarily to sustain the cement while it is drying. The only supports are cement posts built around 3-4 in. pipe uprights. The cement bottom is made by spreading the cement over ordinary chicken wire mesh which is also turned up at the edge to hold the cement sides. For drainage perforations the method is to wait until the cement has partially hardened and then punch holes at intervals with a piece of 3-4 in. pipe, a much simpler procedure than the customary plan of inserting wooden plugs to be driven out after the cement has become hard.

#### A Unique Propagating House.

The propagating house, which is a very large 16 ft. wide house on the north side of a chrysanthemum house is also worth describing. Instead of one continuous bench, it is arranged with a series of benches running crosswise of the house, 5 x 11 ft. with a separate coil of pipe under each, so that heat can be given or withheld independently in each as required. A side path runs the length of the house and the short paths branching off between the beds give easy access to every part for the workmen. These beds are all with tile bottom and cement sides and can accommodate from 8 to 10,000 cuttings each. The lower half

of the roof is of single long lights of ribbed glass thus furnishing continual shade and eliminating all drip.

#### Some Interesting Items.

One new house has been added to the range this season, size 21 x 225, the glass being laid with the 24 in. length crosswise giving some advantage in light and considerable economy of construction. An auto-truck is among the modern accessories. Its record for the ten days preceding last Easter was 1000 miles travelled and 7000 pots of lilies delivered in Boston. Lilies have always been a big crop here but it is proposed to make them a regular standard crop the year through and to this end a large cold storage house for the bulbs is to be built soon.

#### What Are Grown.

Now a few words in conclusion as to the contents of the houses at present. Four houses, each 40x300, are in chrysanthemums. With rare good judgment a big planting of Golden Glow was made and with the market all to themselves Peirce Bros. made a hit that certainly caused a stir. It is worth noting that this chrysanthemum is giving evidence of being a "cut and come again" variety, for numerous long branches with fine foliage and buds have started out from where the first flowers were cut. Halliday, Crocus, Polly Rose, Virginia Poehlmann, Bonnafion and Pacific Supreme are among the best liked early and mid-season sellers. Pacific Supreme is a pink sport from Glory of Pacific and will supersede it. October Frost is regarded as inferior to Polly Rose, and Matchless will not be planted again because of its long bare neck. Of carnations, 75,000 are grown, comprising most of the popular market varieties. The plants were very small when planted out on account of dry weather, but are now catching up rapidly. Most satisfactory of the new ones is Snowflake, a superb, free-blooming variety, raised by C. W. Ward.

Thirty thousand freesias, 5,000 cyclamens for this year and 10,000 for next, 5,000 azaleas, and lilies uncountable, are among the stock in sight at the present time. Such is the story, very briefly told, of what is going on at one of Boston's "flower factories."

#### A FERN GROWER.

Thomas Christensen who has one of the most up-to-date ranges of iron frame houses devoted to fern culture is expecting a shipment of interesting novelties in quantity from England. Among these will be *Cryptomeria Mayii* and *Pteris tricolor*, the latter not exactly new as it was in the stock of the old Pitcher & Manda establishment, but has been practically out of the market since then. *Nephrolepis Whitmanii* as grown by Mr. Christensen is at its very best. He suspends it in hanging pots close up to the glass and keeps it growing rapidly with the result that a fine green color is secured and the keeping qualities are much better than when it is grown in heavy shade as is done by some growers.

Henry Durenberg of Idlewild Greenhouses, Memphis, Tenn., is in Chicago with his bride.

#### PERSONAL.

Chicago visitor: Max Eller of People's Floral Co., Kansas City, Mo.

Alexander McKay of South Framingham, Mass., is suffering from a light attack of nervous prostration.

Boston visitor: Ernest H. Chamberlain, New Bedford, Mass.; Eugene Schaettel, representing Vilmorin, Paris.

Thomas L. Greeley of Belmont has been appointed by Governor Guild as trustee of Massachusetts Agricultural College for the term to end at the beginning of 1911. Mr. Greeley is a member of the Boston Fruit & Produce Exchange and of the Market Gardeners' Association and is eminently fitted for the position.

We are sorry to have to announce a relapse in the case of ex-President John Scott of the New York Florists' Club, who was convalescing nicely from a serious attack of typhoid pneumonia, but, with over-confidence in his returning strength, exposed himself too soon. We hope he will soon be on the way to recovery again.

Visitors in New York: Geo. W. Burke, superintendent park department, Pittsburgh, Pa., also a large and distinguished delegation of gardeners from Mount Kisco and elsewhere. William Jurgens, Jr., Newport, R. I., J. F. Sullivan, Detroit, Mich., S. S. Skidelsky, Phila., Pa., Mr. Payne, of Jacksonville Floral Co., Jacksonville, Fla.; Mr. Chadbourn of Shaeffer Floral Co., Newburgh.

We had the pleasure of a look at the splendid Carnegie gold medal awarded to Mrs. C. Albert Small by the U. S. Government in recognition of her heroism in saving the lives of two drowning women at Seagate, N. Y., on September 18, 1907. Mrs. Small had two ribs fractured in her efforts and is now in the hospital recovering from an operation necessitated as a result of her injuries.

A pretty home wedding took place Monday evening, Oct. 12th, at the residence of Mr. John T. Withers, the well-known landscape gardener, Jersey City, N. J., when Miss Bertha de Grieff became the bride of Mr. M. Vanderhave. Miss de Grieff arrived Monday morning on the steamship Rotterdam from Apeldoorn, Holland, and the ceremony was solemnized in her native tongue by the Rev. Dr. Fogg of New York City. Mr. Vanderhave is a graduate of the Botanical School of Holland, and has spent several years in the East Indies, Belgium, Germany, etc., before coming to America. He is at present superintendent of Shatenuc Nurseries, Barrytown, N. Y. Everybody was made happy with an elaborate supper, after which Mr. and Mrs. Vanderhave left for New York. Among the out-of-town guests present, in the trade, were Mr. and Mrs. L. H. Wise, of Boston, Mass.

# NEWS OF THE CLUBS AND SOCIETIES.

## GARDENERS' AND FLORISTS' CLUB OF BOSTON.

The special attraction at the October meeting of this club was the reading of a very practical paper by Vice-President Wm. Downs on the subject of "Improving under glass." This paper will appear in next issue. The audience was large and appreciative, and the address was followed by some discussion on fumigating and other points touched upon.

The communication from the Chrysanthemum Society of America in regard to affiliation was debated at length, W. N. Craig, James Wheeler and others speaking in favor and Fred. Palmer in opposition, and it was finally laid on the table on motion of T. J. Grey.

Peter Miller was on recommendation of the executive committee elected to the position of assistant treasurer.

There was an unusually fine display of chrysanthemums on the exhibition tables. Following is a list of the exhibits and the awards, as reported by the judges:

Rose White Killarney: Waban Rose Conservatories. Report of superior merit.

Carnation Georgia: J. D. Cockcroft. Honorable mention.

Seedling chrysanthemum, creamy white; S. J. Reuter & Son. Honorable mention.

Dwarf-grown chrysanthemum plants; Wm. Downs. Honorable mention for culture.

Collection of early flowering English chrysanthemums: Horace Martin, Ralph Curtis, Mme. Marie Massee, Crimson Marie Massee, Goacher's Crimson, Mme. Cassimir Fierce; W. N. Craig. Report of merit.

The following exhibits received votes of thanks: Cosmos Lady Lenox from George Page and Duncan Finlayson. Celeriac, F. E. Palmer. Violet Baronne Rothschild, F. W. Fletcher. Yellow sport from chrysanthemum Mme. Clementine Tousset, F. C. Becker & Son. Nephrolepis Whitmani, J. E. Chase.

## NASSAU COUNTY HORTICULTURAL SOCIETY.

The annual dahlia show of this society was held on Wednesday evening, October 14, in connection with the regular meeting. There was a fine display of dahlias and other autumn flowers. James Duthrie, gardener to E. M. Townsend, carried off first for collection, showing about fifty varieties; first for 12 Cactus, 12 doubles, 6 distinct, and the largest bloom shown. George Wilson, gardener to Mrs. Benjamin Stern, was second in collection and the Cactus classes; J. O'Brien, gardener to E. H. Sayers, was first in collection of singles.

At the close of the show President Jaenicke took the chair and presented the silver medals won at the summer show to George Wilson for roses, Charles Knight and Valentine Cleres for sweet peas. Mr. Lenker then introduced Mr. Dean, who gave an interesting and much appreciated talk on floriculture, and at the close offered a

silver cup to be competed for at next year's dahlia show. Mr. Mense spoke entertainingly of what he had seen in his recent western trip. The awards for points in the monthly competition were as follows: H. F. Meyer, pears, 89; George Wilson, chrysanthemums, 86; V. Cleres, dahlias, 79. Cultural certificates were awarded to V. Cleres for cosmos and dahlias; Paul Reul, cosmos; Alex. Lothian, indoor roses; F. Petroccia, cauliflower. Honorable mention to P. Reul for hilly of the valley and vegetables; F. Petroccia, violets and chrysanthemums; Oscar Adendor, cosmos; H. F. Meyer, lettuce; After making final arrangements for the show next month the meeting adjourned.

JAMES KESSON, Secretary.

## MORRIS COUNTY GARDENERS' AND FLORISTS' SOCIETY.

The October meeting of this society was well attended, and the monthly exhibition was a special feature. Floram Farms, A. Herrington, Supt., had a fine display of cosmos Lady Lenox which fully maintained all that has been claimed for it, showing decided superiority to other strains. A vase of 100 blooms of carnation Afterglow from same place got a cultural certificate. Dr. Leslie D. Ward, gardener A. R. Kennedy, had a superb vase of rose Mrs. Jardine, awarded cultural certificate. Whatever this rose does in other places, it seems to be at home with Mr. Kennedy. A. R. Whitney, gardener H. B. Vyse, had a great vase of Enchantress which received honorable mention. C. H. Totty showed his new chrysanthemums in eight varieties, Lilian Coppard, bright red, a yellow sport from A. J. Miller, Pockett's Crimson, Mrs. O. H. Katan, a beautiful bronze, C. H. Totty, a giant crimson, Mary Warrick, flesh pink. These each received a certificate of merit. This was a superb half dozen; they have to be seen to be fully appreciated. Two vases of single, Rob Roy and Marvel, received honorable mention.

Preliminary arrangements were made for the show, a committee appointed, etc. Every member is to work for its success. 500 tickets were distributed among the members to sell. I mention this to show that in "unity there is strength," and if every one works we must make the exhibition a success. We expect to have a good show. All we want is for exhibitors to bring the stuff; we will furnish the prizes and the people to look at them.

E. REAGAN.

## BUFFALO FLORISTS' CLUB.

The regular monthly meeting of the Buffalo Florists' Club will be held on Thursday, October 29, instead of the regular meeting night, which falls on election eve. The committee in charge of the flower show and banquet are working hard to make it a grand success, as every effort will be made to get all the late varieties of carnations, chrysanthemums, roses, etc. The date is set for November 18 and to be held at Iroquois Hotel. Other business of importance will be discussed at this meeting.

## MT. DESERT HORTICULTURAL SOCIETY.

The Flower Show held last August at the Building of Arts was such a success from many points of view, and so much real enthusiasm and energy was shown, that it is not surprising that it resulted in the organization of a society to promote the general welfare of floriculture and horticulture.

This Society received its first impetus from Mr. George B. Dorr, who is the owner of the Mt. Desert Nurseries, and has spent much money and time in beautifying the town by various small parks and also by laying out paths over the mountains.

The membership of the Society includes many of the millionaires as well as all the prominent gardeners about here, and every condition seems favorable to the advancement of the Society.

Mr. Dorr has given the Society the use of his flower store on Main street for eight months, and is having the place fitted with a hot water heating apparatus. This will be used as a club room where all the current literature concerning horticulture will be found as well as a good library on the subject.

This is the first society of its kind in the state and there is little doubt that in a few years its growth will have made remarkable strides. During the winter months there will be smoke talks and lectures. The regular meetings are held the first Tuesday of each month.

The Society is incorporated under the laws of the State of Maine, and following is the list of officers: Pres., G. B. Dorr; 1st Vice-Pres., L. B. McKag; 2nd Vice-Pres., William Miller; 3rd Vice-Pres., William Burton; Financial Sec., T. Harrison Styles; Treas., Edward Kirk; Clerk, Charles Shand; Sergt.-at-Arms, George Renwick; Board of Trustees, John I. Kane, C. Morton Smith, Geo. S. Robbins, A. W. Ekstrom, A. E. Chilman, Clarence E. Dow.

R. H. KINGSLEY.

## PENNSYLVANIA HORTICULTURAL SOCIETY.

The regular monthly meeting of this society was held on the 20th inst. Some fine chrysanthemums were exhibited by Wm. Kleinheinz, one of them being the new variety, 58-2, which the introducers, Elmer D. Smith & Co., are to send out next year and which was awarded a certificate of merit—pure white globular flower, very compact, good foliage. Another fine variety was Miss Clay Frick, which took first for six blooms of early flowering variety. A first prize went to James Coleman, gardener Walter Lippincott, for cosmos Lady Lenox. The prize for celery went to the Crosswicks Farms, Jenkintown, and reflected credit on Walter Scott, the grower. Alphonse Pericat was awarded a silver medal for a grand display of *Cattleya labiata*—among which were some flowers of remarkable size and form—one spike bearing seven flowers. C. G. Roebing, gardener Jas. Goodier, was awarded a silver medal for *Cattleya Kinkora*, and certificate of merit for *Cattleya*

"magenta," a light crimson tinged with lighter edge. Special mention was accorded to another seedling, very light pink. Peacock Dahlia Farms were awarded certificate of merit for dahlia "Jack Rose." The committee recommended very highly the new plant stand exhibited by the Moore-Livingston Co. of Lonsdowne, stating that this device filled a long-felt want as it can be adjusted to any desired height. Prof. Stewardson Brown gave an account of a recent trip, entitled "Ten Weeks in the Wilds of British Columbia." The annual fall show will take place Nov. 10 to 15, and entries are coming in very satisfactorily, according to Secretary Rust.

#### SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

##### National Flower Show.

President Traendly has decided that the S. A. F. gold medal shall not be awarded for any specific exhibit, but it will be left to the judges to award it to any exhibit, provided there is such an exhibit in the show which may be deemed worthy of so high an award. It was provided by the executive board of the S. A. F. also, that the award of this gold medal should not be complete until the action of the committee had been specifically ratified by the executive committee of the Flower Show.

A mistake was made in the final edition of the premium list in giving the judges nominated by the American Carnation Society. Instead of the names given in the premium list, the nominees are: Wm. Nicholson, Framingham, Mass., Fred Burki, Pittsburgh, Pa., and Peter Fisher, Ellis, Mass.

Mr. Nicholson, who was also one of the four nominees presented by the Chrysanthemum Society, will probably be withdrawn as a judge of Division A. J. H. BURDETT, Ass't Sec'y.

Elaborate plans have been made for the decoration of the Coliseum for the National flower show. Jens Jensen, superintendent of the West parks; John Olgotz, superintendent of Chicago's small parks; and several other experts are at work on the plans.

#### LADIES' SOCIETY OF AMERICAN FLORISTS.

The Ladies' Society of American Florists have accepted the invitation to the banquet Tuesday eve, Nov. 10th, Auditorium Annex. On Wednesday, Nov. 11th, the Society will give a theatre party for its members, who will please wear their badge pins. Members of the Ladies' S. A. F. will please report to the Chairman of Entertainment Committee, Mrs. J. C. Vaughan, or the Secretary, Mrs. C. H. Maynard, Tuesday morning, Nov. 10th, at Exhibition Hall.

MRS. W. J. VESEY, President.

#### SOUTHAMPTON HORTICULTURAL SOCIETY.

The regular monthly meeting of this society was held Oct. 15, President Clark in the chair. Wm. Gray, gardener to Judge Russell, showed a very fine vase of Browallia. There was a discussion as to the proper size to show beets for table use. B. C. Palmer,

gardener to B. A. Sands, gave a very interesting talk on "What I Don't Know About Dahlias." At the next regular meeting, Nov. 6, W. L. Jagger will read a paper, subject, "Carn Varieties and Management."

#### CHRYSANTHEMUM SOCIETY OF AMERICA.

##### Report on New Chrysanthemums.

Sport of Gloria Pacific; Jap. reflexed. Color pink. Exhibited by Samuel Cockburn & Sons, Woodlawn, N. Y., on Oct. 17, 1908, at Cincinnati. Scaled 77 points; at Philadelphia scaled 72 points.

Dark Sport Gloria Pacific; Jap. Color dark mauve. Exhibited by Samuel Cockburn & Sons, Woodlawn, N. Y., at New York, Oct. 13, 1908. Scaled 79 points.

Gloria. Color Daybreak pink. Exhibited at Cincinnati, Oct. 17, 1908, by Elmer D. Smith, Adrian, Mich. Scaled 85 points.

No. 58-2-06; Jap. incurved. Color white. Exhibited at Philadelphia Oct. 17, 1908, by Elmer D. Smith, Adrian, Mich. Scaled 86 points commercial, 86 exhibition.

DAVID FRASER, Secretary.

#### AMERICAN CARNATION SOCIETY.

##### Carnation Registered.

By Scheiden & Schoos, South Evanston, Ill. William H. Taft, color bright red, resembling Crusader; a seedling of Crusader and Enchantress, size of flower three to four inches; a high built and the most double flower ever seen, with a long graceful stem; a free bloomer with very few splits; keeping qualities remarkable, has been kept cut three weeks in good condition.

ALBERT M. HERR.

Lancaster, Pa.

#### CLUB AND SOCIETY NOTES.

The Elmira Civic Improvement League and Horticultural Society, Elmira, N. Y., offer a silver cup and other prizes at the chrysanthemum show to be held Nov. 5-7. H. N. Hoffman is chairman of the committee.

The Tri-City Florist Club met with Ludwig Statt of Rock Island, Iowa, on Oct. 8. The theme for the evening's discussion was poinsettias, azaleas and geraniums for Christmas culture. The next meeting will be with Emil Boehm.

The Omaha Florists' Club, Omaha, Nebr., have elected the following officers: President, L. Henderson; vice-president, G. Swoboda; secretary, J. H. Hadkinson; treasurer, George Sorenson. They are planning for a large flower show for the winter of 1909.

The annual meeting of the Vermont State Horticultural Society will be held in Montpelier on Nov. 4, 5, 6. Among the speakers outside of the state will be J. H. Hale of South Glastonbury, Ct., H. W. Collingwood of New York and U. P. Henderson of Geneva, N. Y.

The idea of abolishing the green-houses at John Ball park as a matter of economy has been suggested by C. B. Blair, president of the board of park and cemetery commissioners, Grand Rapids, Mich., but is not generally favored by the other members of the board.

#### COMING EVENTS.

Secretaries are invited to send us dates of exhibitions or other club and society arrangements for mention in this column.

Lenox, Mass., Horticultural Society, chrysanthemum show, Oct. 28, 29.

Madison, N. J., Morris County Gardeners' and Florists' Society, exhibition, Oct. 29, 30.

St. Louis, Mo., St. Louis Horticultural Society, November 3-6.

Hartford, Conn., Connecticut Horticultural Society, chrysanthemum show, Nov. 3, 4, 5, Unity Hall.

Shreveport, La., State Fair, November 3, 4, 5.

Worcester, Mass., Worcester County Horticultural Society, annual meeting, Nov. 4; chrysanthemum show, Nov. 12.

Red Bank, N. J., Monmouth Horticultural Society and Elberon Horticultural Society, joint chrysanthemum show, November 4, 5.

Tarrytown, N. Y., Horticultural Society, show, Nov. 4, 5, 6.

Glen Cove, N. Y., Nassau County Horticultural Society, show, Nov. 5, 6.

Elmira, N. Y., Civic Improvement League and Horticultural Society, chrysanthemum show, Nov. 5, 6, 7, Women's Federation Building.

Chicago, Ill., National Flower Show, Society of American Florists, Nov. 6-14.

Boston, Mass., Massachusetts Horticultural Society, Chrysanthemum show, Nov. 6, 7, 8, 9.

New Haven, Conn., New Haven County Horticultural Society, show, Nov. 10, 11, 12.

Philadelphia, Pa., Pennsylvania Horticultural Society, annual exhibition, Nov. 10, 11, 12, 13, Horticultural Hall.

Toronto, Ont., Ontario Horticultural Society, exhibition, Nov. 10-14.

Little Rock, Ark., State Floral Society, show, Nov. 10-25.

Iake Geneva, Wis., Gardeners' and Foremen's Association, chrysanthemum exhibition, Nov. 11, 12.

Providence, R. I., R. I. Horticultural Society, Nov. 11, 12, fall exhibition.

New York, N. Y., American Institute of New York, chrysanthemum show, Nov. 11-13, Berkeley Lyceum Building.

Denison, Texas, Denison Civic Improvement League, show, Nov. 11, 12, 13.

New Orleans, La., N. O. Horticultural Society, chrysanthemum and flower show, Nov. 12, 13, 14, 15.

Washington, D. C.—American Association of Farmers' Institute Workers, Nov. 16, 17.

Pittsburg, Pa., the National Municipal League and the American Civic Association, annual meeting, Nov. 17-20.

New York, N. Y., Horticultural Society of New York, annual exhibition, Nov. 17, 18, 19.

Baltimore, Md., Horticultural Society, Dec. 1, 2, 3, Fifth Regt. Armory.

Spokane, Wash., National Apple Show Association, Dec. 7-12.

Indianapolis, Ind., American Carnation Society, Jan. 27, 28, 1909.

THE POEHLMANN BROS.' ESTABLISHMENT,  
Which every visitor at the National Flower Show will want to see.

#### HARDY CLEMATISES AND OTHER USEFUL VINES AND SHRUBS.

A paper read before the New York Florists' Club, by Antoine Wintzer.

As all plantsmen know the Hardy Clematis family forms a group of most desirable hardy climbers. They are suitable to plant in almost any place where the fancy of the gardener or grower desires to have them, so I will not enlarge on that topic as full details can be found in Bailey's Encyclopedia, also the leading catalogs of America and Europe.

Glancing, mentally, over the field it has often occurred to me that the Clematis family would prove a fascinating pastime for the plant breeder of ample means and leisure, and we sincerely hope that some of our noted breeders may soon be inspired to take up the work, if it has not been taken in hand.

Probably it is not generally known that over 40 years ago several thousand fine young clematis seedlings of the lanuginosa and azurea grandiflora strain were raised by that enterprising and talented plantsman, the late Eugene Beauma, at Morrisiana, New York, in 1864. Nearly all the seedlings produced very fine large flowers, some of them fully as good as the named varieties we have at the present time. The seed was sown as soon as matured in shallow wooden boxes; the young seedlings were then planted in the field the following spring, and left out over winter, the next spring they would bloom freely. One strong point in favor of those

seedlings was, that nearly all produced large flowers adhering pretty close to the type, and they were of unusually healthy and vigorous growth. It is my firm belief that had the good work been continued, a remarkable strain could have been produced.

While we seem to have done little toward improving the family, the European breeders are doing grand work along this line. In glancing over their catalogs one can find from 50 to 75 or more varieties and types listed. Nearly all our leading firms are satisfied with from five to ten varieties. They have evidently learned from experience that very few of the large flowering varieties are adapted to our climate. If this is the case we should strive our utmost to breed as good or better varieties suitable for our climate. Perhaps someone is doing the good work in silence.

The following are some of the large flowering varieties mostly of lanuginosa, Jackmani, and viticella types, generally cataloged by the leading firms: Jackmani, violet purple; Henryii creamy white; Gypsy Queen, dark purple, velvety; Ramona, deep blue, very fine; Mad. Baron Viellard, shade of lavender pink; Ville de Lyon, carmine red; Star of India, shade of purple; Miss Bateman, silvery white; Lanuginosa Candida, pure white; Belle of Woking, silvery gray; Countess of Lovelace, bluish lilac, double; Jackmani Surperba, deep violet purple.

#### Clematis paniculata.

This beautiful and popular Japanese variety has grown to be a general

favorite; its graceful sprays of fleecy white flowers are always attractive. It is readily increased by seedlings. The seed is usually sown as soon as matured in green house, and the young plants potted singly, and planted in the field in May or June. Other methods are sometimes pursued.

#### Clematis Virginiana.

This native is found growing wild usually in moist places, near the banks of rivers and brooks by the margins of woodlands, also in neglected fence corners. Its sprays of white flowers form a pleasing sight in early autumn. It is easily increased from seed.

#### Clematis flammula.

This European variety was more extensively grown formerly than at the present time. Flowers small white clusters. Its roots are used as stock to graft the large flowered varieties on.

#### Erect Varieties, Semi-Shrubby.

Clematis Davidiana, a late flowering variety, small tubular-shaped blue, flowers in August and September. Grown from seed.

#### Clematis stans.

Like the preceding, only flowers are a light porcelain blue and bloom in September and October. Where the season is long enough to ripen the seed it is best grown that way. It is the easiest variety to grow from hard wood cuttings; these should be cut to single eyes and planted in greenhouse bench in January and February. In March or April they will be fairly rooted,

and should then be potted into 3 inch pots, and are then ready to plant in the field in May or June.

They will bloom the first season in October.

Outside of New York state I do not think that the large flowering varieties of clematis are grown to any considerable extent, most of the catalog houses depending on the imported stock, although home grown stock is better, as several of the large New York firms grow the plants from cuttings. These are usually made in May and June from the young wood. The cuttings taken from plants started in greenhouse root more readily than those from outdoor plants.

In taking a glance through a number of catalogs it is noticeable that the Europeans are far ahead of us in the number of varieties and classes listed, some of the leading firms listing as many as fifty to eighty varieties or more, while our American firms are satisfied with from six to twelve. Is it because we are less enterprising?

Not having followed this line of plants continuously, I should like to leave other details to experts in this field. But there is no reason why the same advance which has been made in Roses, Carnations, Gladioli and Canas may not also be made in the Clematis family, and we hope that some of our American hybridizers will take advantage of the opportunity here offered as there is unlimited room for the development of this most useful and ornamental family of climbers.

#### Lonicera (Honeysuckle).

This family of hardy climbers is very popular, few plants emitting a more delightful fragrance than some of the varieties in this class; "As sweet as a honeysuckle" is an old time expression. Some of the newer varieties, notably, Heckrottei and Hendersoni are especially adapted for pot culture, and easily forced. In the open field they produce continuous bloom from June to November. At this writing the young plants in the field are a mass of bloom, and a bouquet of their graceful sprays is always pleasing and is a delightful change at this season.

All the varieties of honeysuckle are of easiest propagation. Heckrottei, Hendersoni, and the varieties generally cataloged as Red and Yellow Coral and all European varieties. I prefer to propagate from hard wood under glass. The cuttings are planted on open benches in a cool greenhouse in January. One eye cuttings are used where the joints are long. In spring they are planted in the field; potting is not necessary during an average season. They grow from two to four feet or more and bloom freely in a few months after they are planted.

All varieties of honeysuckle also root freely from green wood cuttings made during the summer in June and July from the young growing wood, and we grow nearly all varieties in that manner. We plant the cuttings on open benches in greenhouse where they root in a few weeks. After they are rooted we pot them in 3 1-2 to 4 inch pots, from 4 to 6 plants in a pot, and place them in beds outside in September and October, where they remain until planting time the following spring, which should be done as early

as possible, for a few warm April days start them into growth.

Propagators pursue the methods best adapted to their different localities. In the Japan section *Lonicera brachypoda* is becoming a real pest, as it roots freely from every shoot touching the ground; birds are also carrying the seeds, and where it becomes firmly established it is difficult to exterminate. The type cataloged as *Halliana* has generally superseded the above named, as it is more desirable in every respect.

#### Ampelopsis Veitchii.

This useful climber is so well known that it requires no description. It is of easiest propagation. Seeds of it sown in March or April germinate in a few weeks, when they can be potted singly in 2 1-2 inch pots, and if shifted into 4 inch, and staked, will make nice plants by October. The pot grown plants have the advantage over the field stock for decorative foliage. I have noticed that they color up finer under glass, as the grower has them under better control. Varieties of this type, like *Robusta* and *Royalli* and others, require to be propagated from cuttings; these root easily in summer from green wood, but I prefer to make them from hard wood cuttings in winter.

#### Ampelopsis quinquefolia.

Our native American species is useful in cold climates owing to its extreme hardiness. It is easily increased from seed.

#### Akebia quinata.

This graceful Japanese climber seemed to be more common 40 years ago, and deserves more attention than it receives. Besides its fragrant chocolate colored, sweet scented flowers, it is free from all insect pests and diseases. The easiest way to propagate it is from the seed, but it also roots freely from cuttings from the young wood in June and July. It will also root from the matured wood in fall, but requires a longer time.

#### Celastrus scandens (Bitter Sweet).

It has always been a surprise to me that this beautiful native climber is not more popular. It has fine glossy foliage and in autumn its orange seed pods are charming. It is grown from seed. There are great variations, and to perpetuate the best fruiting strains they should be root grafted. There is plenty of room to work up this breed, and show them pot grown for the Thanksgiving and Christmas trade.

It seems to me that there is always room for fine berried plants, and few plants are more attractive than this when full of its charming seed berries.

I intended to continue this paper but find it is getting too bulky, and fear it may tax the patience and trespass too much on the time of the audience.

#### INCORPORATED.

The Wm. Graham Floral Co., Philadelphia; capital, \$60,000; John H. Galen, president.

The Columbia Planter Co., Springfield, O.; C. E. Patric, J. T. Guffy, H. C. Wiseman, J. J. Veasie, J. L. Zimmerman; capital, \$30,000.

L. D. Batchelor of Upton, Mass., has taken a position as instructor in greenhouse construction at Cornell University, Ithaca, N. Y.

#### CHRYSANTHEMUM GLORIA.

Color. Enchantress pink. Elmer D. Smith & Co. were awarded C. S. A. certificate for this novelty at New York, October 10.

#### A PRESENTATION.

A number of the gardeners in the vicinity of Auburndale, Mass., along with a few of the Boston seedsmen surprised Frank H. Allison, head gardener to Mrs. B. L. Young, Weston, Mass., at his new home on Friday evening, Oct. 16, by presenting him with a beautiful solid mahogany bookcase. Peter M. Miller made the presentation, and Mr. Allison responded in his usual modest manner. Messrs. T. J. Gray, Al. Coutts and P. Crotty made a few timely humorous remarks. Dancing was kept up until a late hour, refreshments being served at intervals. The following gentlemen contributed to the evening's entertainment: William Westland, William Wylie, Thomas Beattie, John P. A. Guerinneau and Al. Merrill.

#### CHICAGO PLANT TRADE.

There is a little better variety in blooming plants this week in the Chicago market. Cyclamen, Chinese primrose and *Primula obconica*, though not showing a great abundance of color, are coming in.

A limited quantity of bush chrysanthemums are also offered in the following varieties: *Glory of the Pacific*, and its white sport *Estelle*; early Summer, October Sunshine, Murdock, yellow. In pompons the only varieties offered are *Alena*, a very delicate pink and *Zenobia*, a yellow.

Houghton & Clark, florists, Boston, have dissolved partnership. T. J. Clark retiring, and F. H. Houghton will continue the business.

We extend an invitation to our patrons and friends to be present at our anniversary on Thursday, October 29th. Reception from 7 to 12 P. M. to be given at our store, 15 Province St. and 9 Chapman Place, Boston, Mass.

We remain,  
Very truly yours,  
H. M. ROBINSON & CO.

Obituary

Gustav Hanson.

This young and promising landscape engineer was born in Denmark, forty-two years ago, and came with his parents to Cleveland, O., where his father is superintendent of schools at the present time and where he received his own education. Came under the instruction of Nathan Barrett at New York, whom he somewhat resembled, made his first noted work at Chevy Chase near Washington, D. C., the project of Senator Newlands of Nevada, did other promiscuous work around Washington and last fall was engaged in a gigantic scheme for the improvement of Harrisburg, Pa., where he had 300 men under his employ and was contractor, nursery man and landscape architect and engineer. The refusal by the banks at the time of the panic to further finance any contracting scheme forced him to transfer his contracts and the work has since been finished by the municipal authorities. His latest labors have been at Morris-town, Newark and Orange, N. J. In the latter place he did considerable work for Senator Everett Colby, A. C. Jenkins and George Merck in Llewellyn Park.

Two weeks ago he was attacked with rheumatism and was treated by a physician. It, however, returned on October 9 and he expired on the way to the City Hospital, Newark, N. J., at five a. m. The remains were taken to Washington, D. C. He was widely known and maintained an extensive correspondence all over the country. A student of his art and a most promising member of his profession.

J. B. DAVIS.

John A. Balkwil.

John A. Balkwil, president of the Canadian Horticultural Society, and one of the best known floral experts in Canada, died at London, Ont., Oct. 10, from heart failure. Mr. Balkwil had officiated as judge at many of the largest exhibitions in Canada and the United States. He was 72 years old.—Detroit Journal.

Henry Glins.

Henry Glins who died in Cincinnati, O., on October 8, had been connected with the florists' business from early youth, and for the last 25 years had been identified with the retail business on Vine street, Cincinnati. He leaves a widow and daughter.

George A. Saunders.

George A. Saunders, in early life associated with the late George Patten, and later a member of the firm of Mellor & Saunders, retail florists of

Forcing Rhubarb and Asparagus

I have 50,000 three-year old Rhubarb roots for this winter's forcing. Also 50,000 large Asparagus roots for forcing. Order now as there is a large demand for these roots for forcing. Florists are buying heavily. We have also 30,000 Pernet, 35,000 Pernet trees, 50,000 0.0 Asper. roots, 200,000 Strawberry plants, 50,000 Apple trees. All ready now to plant.

### PITTSBURG EXHIBITIONS.

The chrysanthemum season opened in Pittsburg Oct. 18th, when the conservatories of H. C. Frick and A. J. Heinz were declared open. At the Frick place D. Fraser, who is the pioneer of these popular semi-annual shows in Pittsburg, again does himself credit with a magnificent display of chrysanthemums, begonias, orchids and other good things, all well grown and arranged a la Fraser. The chrysanthemums are particularly fine; the recent warm weather has hastened the buds along, many of the flowers being large, well-finished blooms, but the best are still to come. A number of plants in reserve will greatly prolong the season. The major portion of the chrysanthemums are standard varieties. Amongst the newer varieties May Donnelan, a beautiful rich yellow, is considered the finest. Mr. Fraser pointed out a sport of G. H. Hunt which has originated with him and which is quite spiny.

The Heinz display reflects credit on the skill of Mr. Featherstone, who has only lately assumed charge, and has already made his presence apparent in those fine greenhouses and grounds. The chrysanthemum display is somewhat premature, many of the flowers which will make fine large blooms being as yet only half expanded. The other sections are in good condition; some fine *Cattleya labiata*, gardenias and foliage plants were noted. The palm house, an exterior view of which appeared on the frontispiece of a recent issue of *HORTICULTURE*, has been thoroughly overhauled, and transformed from a tropical wilderness into a model of luxuriant neatness.

Some fine specimens of *Dicksonia antarctica* are worthy of special mention.

J. HUTCHINSON.

## Seed Trade

If recent quotations from California are any indication of actual conditions, the persistent cry of the great shortage of lettuce seed is on a par with the claim of a famine in onion seed which came from the gold state a year ago. In the onion seed matter most seedmen were led into error as to the shortage and prices were made far too high. A few seedmen following their usual course, the more eager buyers became, the more closely they buttoned up, and turned a deaf ear to all inquiries, and instead of selling when they could have made a handsome profit, they began to see visions of \$5.00 onion seed, the result being that at the last they would have been glad to sell their seed at cost, but could not even do this and had to carry over large quantities, especially of the yellow varieties, which must now be sold at less than cost. So it may prove on lettuce and cucumber this year. Josh Billings' homely saying that "the time to set a hen is when she wants to set," applies with remarkable directness to the seed business, as the time to sell is when people want to buy, for no matter what the scarcity, there comes a time when interest wanes, and prices go the same

way. When the buyer seeks the seller, is the latter's opportunity.

The temporary relief from the protracted drought in the shape of badly needed rain which gladdened the heart of the whole country a week or two ago, has been followed by conditions even worse than those before the rain. The terrible forest fires which have raged in northern Michigan, in addition to the loss of millions of dollars worth of property, have also taken an awful toll in human life. These fires are the almost direct result of the drought which has renewed its blighting grip on the entire country east of the Rocky Mountains.

There is just one cause of satisfaction to the seedsmen, and that is, that such crops as were raised can be cured and saved without the additional loss which might have followed a cold, rainy autumn, but the loss and suffering which farms and rural communities must endure are really appalling, and will be tragical in many sections if rain does not soon relieve the situation.

Not much additional information can be given on crop conditions this week. There is a flood of inquiries coming from canners, but not an offer of canners' peas can be extracted with a corkcrew. It is certainly an unparalleled situation.

There seems to be more than the usual complaint and dissatisfaction this year among the pea packers regarding the extremely short deliveries being made to many of them upon their seed contracts.

While it is known that the seed crops harvested are less than a full crop, and even less than the field estimates, yet it seems unreasonable that there should be such a difference between the deliveries actually being made by the seed growers this season, and many canners are seriously questioning whether or not they really received their full pro rata of the crop grown by the parties they made their contracts with.

It is understood that some deliveries have fallen as low as 25 to 40 per cent., which makes it unprofitable for the unfortunate canner to operate his factory, unless he enters the market and buys at extremely high prices a large share of the seed necessary to plant his usual acreage. This makes

the average cost of his seed higher than his farmers will stand for.

Among the brighter spots standing out this year are the deliveries that are being made by two or three of the western growers. One or two expect to deliver 50 per cent., and we understand the Leonard Seed Company is making 60 per cent. on Alaskas and the Sweet Wrinkled varieties used by canners.

At the regular annual meeting of the Mutual Benefit Association of the Joseph Breck & Sons Corporation held October 13, the following officers were elected for the ensuing year: President, Alex. J. M. Joiner; vice-president, F. S. Ferreira; treasurer, H. L. Haynes; secretary, Miss H. L. Riley; executive committee, Mrs. A. Coombs, Miss M. E. Hopkins, Messrs J. N. Marden, S. L. Hatch, and W. J. Dacey.

It was unanimously voted to extend to the members of the corporation a vote of thanks for the action taken recently as regards early closing on Saturdays.

The report of the treasurer showed the association in a very flourishing condition.

The Lake Erie Seed Co. has been incorporated at West Seneca, N. Y., with capital of \$6,000, by J. H. Bar, Fred Heomadka of Cleveland and G. S. Olcott of Olean, N. Y.

A. J. Pieters Seed Co., Hollister, Calif., who have recently acquired the Lyon ranch at Fairview, will sow it to onions.

It is stated that the D. M. Ferry Seed Co. is to establish a large seed farm in Idaho.

Proclaiming a new era for seed selection in the agriculture and horticulture of the state, President Duncan of the Alabama Plant Breeders' Association, issued an enthusiastic appeal to the public for co-operation. The address of President Duncan is to enlist the masses in the movement. The logic of his appeal, it is believed, will have the desired effect, and on the membership roll of the new organization, the leading farmers of Alabama will in time appear. The committee on constitution and by-laws of the organization will make a full report at the next meeting of the association, subject to the call of the president.—Mobile (Ala.) Register, October 9, 1908.

## Of Interest to Retail Florists

### ECONOMY IN WINDOW DRESSING.

The general depression of business having manifested itself keenly in the cut flower trade suggests the necessity of economy and its practice by the retail florists.

No better opportunity presents itself than that of window dressing, where flowers are too often unnecessarily wasted. With one-fourth, or less, of the cut flowers banked in the windows of many of our flower shops, a tasty and artistic show might be made.

Too many flowers and too little judgment are usually the faulty features. Exotics in variety placed wide apart, allowing each plant to show fully for itself, is the first economy essential. The plants must be as near perfect as it is possible to procure them, and, when no longer things of beauty, must

be replaced with others of equal distinction. Plants of light structure are preferable, as they make the most delicate background for the flowers that constitute the bloom display.

One large vase of choice flowers—one kind—is all that is actually necessary, although the introduction of several smaller vases of rare blossoms, harmonizing with the larger centerpiece, is admirable. These flowers, after having done a day's duty, if not sold before closing time, can be very readily used in orders of a secondary nature, the following day; the value of the flowers being but slightly impaired the matter of economy is easily observed.

Window displays as described, when artistically arranged, are invariably observed by the public, and when the character of dressing is frequently changed will prove sufficiently attractive to induce the flower lover to go out of his way to observe the nov-

#### NEWS NOTES.

The Hawkes Nurseries at Caldwell, Idaho, is a new addition to the enterprising nurseries of the west.

Frank T. Ramsey has just admitted his son, J. M. Ramsey, into partnership in the Austin Nursery, Austin, Texas.

Miss Bessie Pearce has been appointed manager of the branch of the Lutey Floral Co., located at Lake Linden, Mich.

C. N. Weaver has purchased the Berry ranch at Freewater, Ore., for the purpose of raising flowers for the market.

C. A. Kuhl, of Pekin, Ill., won six premiums out of nine on plants and six out of eight on cut flowers at the Illinois State Fair.

The Dole Floral Co., Beatrice, Neb., are to move between Fifth and Sixth streets, their present site having been sold for park purposes.

John DeRock has fitted up the Mau Greenhouses, between Wymore and Blue Springs, Nebraska, and planted them largely to carnations.

The Wichita Nursery at Wichita, Kansas, has built a new fumigating house for the purpose of treating all plants with hydro-cyanic gas.

The contest over the will of the late George Ellwanger of Rochester, N. Y., has been settled by the withdrawal of the objection against the executor.

A portion of the greenhouse of Mrs. M. Neuberger of Erie, Pa., was destroyed by fire on October 1, with a loss of about \$1,000. A defective boiler was the cause.

Mrs. Grace M. Nichols, who conducted a florist store in the Allen building, Worcester, Mass., was a sufferer by the fire which occurred on October 11 to the extent of \$100.00.

H. P. Potter of Wilmington, Del., has completely transformed his establishment this summer, adding offices on the first floor and a large display room on the second floor.

Among the most striking adornments of the florists' windows in New York are groups of superb celosias. These are specialties with Lehnig & Winnifield at Hackensack, N. J.

Harry Cornell and Edward Salyer, under the firm name of the Park Floral Co., had a very successful opening of

their new store at Nanticoke, Pa., on October 9. Souvenirs were presented to all the ladies.

The Empire Floral Co., of New York, recently incorporated, will operate the various Warendorff stores of the Warendorff brothers, Herman, Victor and Edward, also the stand at the Hotel Empire recently acquired from Fleischman.

Wieter Bros., Chicago, find a barrel a good thing for holding cut chrysanthemums, using about eighteen inches of water in it. The barrel gives room for the stems without injury to the foliage. This is, of course, for use at the greenhouses and not in the store.

#### BUSINESS CHANGES.

C. A. Beyer succeeds Starke & Co., 52 West 29th St., New York.

The greenhouses of the late James Ruth, Wyomissing, Pa., have been sold to C. C. Stetler.

J. D. Lewis has bought out the greenhouse business of his son, S. E. Lewis, at Moosup, Conn.

The Idlewild Floral Co. succeed D. L. Lashey at the Battery Park greenhouses, Asheville, N. C.

Albert C. Rott of Joliet, formerly president and treasurer of the Thompson Florist Co. of Joliet, Ill., has purchased the interests of the other parties and is now sole proprietor. The name will probably be changed soon.

## Flower Market Reports.

**BOSTON** Business here has dropped off with a suddenness and decidedness almost startling. The hot weather did it. For the two weeks of prosperity enjoyed previously all are duly grateful. Not content with slugging the demand the hot weather went further and forced in a lot of flowers of miserable quality unfit to offer to any discerning buyer, and although freezing night temperatures have now swung in the effect of the strain is still visible in the stock being received at present. Values have, of course, weakened, but price quotations are not materially changed. They are low enough on all goods for the time of year and there is a disposition to maintain them if possible, cutting them only on very large sales or on account of age or other disqualification.

**BUFFALO** Genuine Indian summer was had the past week and the warm weather brought on the stock faster than was wished for, especially the chrysanthemums, which came in heavy supply and with little or no demand except for yellow. There being plenty of other stock, especially Beauty, Killarney, Richmond and all other roses, the coolers have been carrying a heavy supply. Lily of the valley was quite active, but violets very slow. Carnation demand has been a little brisk. White Enchantress is showing well, large blooms and long stems; other varieties also of excellent quality. At the time of mailing report (Tuesday) the market is loaded with everything, particularly chrysanthemums, short carnations and roses. The first two days have shown a falling off in trade as compared with one week or ten days ago, but it is hoped that things will change for the better at the end of the week.

**CHICAGO** Chrysanthemums are here with the results, good and bad, that always follow. The flowers are fine. October Frost and Golden Glow are practically gone but a few are still seen in some stores. Chrysanthemum plants can scarcely be said to be in the market yet. During the past week summer heat has been with us and been rather disastrous to the market, chrysanthemums excepted. Some dealers report business so slow that roses must be disposed of at about half price or lost. Stock is poor and demand light. Carnations are suffering too, and only fancy stock brings the price that gladdens the heart of the grower. Poor carnations or those that could not stand the heat will not sell at all. Chrysanthemums, always queen of the market at this time of the year, are especially so this week. The killing frosts have completely cleaned the market of asters, gladioli and daisies.

The market appears to be on a pretty good footing. While some lines are scarce there is a sufficiency of other stock to offset this lack. Chrysanthemums are coming pretty freely and their influence is felt on the demand for roses and carnations. American Beauty roses, particularly long-stem grades, are more plentiful. Other roses continue good

with prices a trifle lower. Carnations are much improved but prices unsatisfactory. Lilies seem to be hard to dispose of at the present time. Trade is not what it ought to be owing to the weather. Fall weddings are numerous but very few elaborate. Prospects are good for an abundance of orchids, violets, lily of the valley and flowering plants of all sorts. The market here is depleted of good green stock, particularly smilax, and shipped material is relied upon.

**LOUISVILLE** Business the past week was not any too good. There was plenty of stock and not much demand, chrysanthemums and carnations being about the only stock moving satisfactorily, although roses had a fair demand. Lilies, lily of the valley, dahlias, greens, etc., are all in good supply and find some demand. The quality of all is excellent.

**PHILADELPHIA** The flower markets here were fairly brisk the early part of last week but the warm weather of the latter part had a bad effect, bringing in too much stock—the glut being accentuated by a slackening in demand. Chrysanthemums held steady at the sharp decline of previous week. They are of fine quality and moved freely but the quotations were very unsatisfactory to the growers. Among the most conspicuous arrivals are: Cremona, Halliday, Touset and Ivory. Roses are holding their own fairly well. American Beauty continues of excellent quality, but the market is not particularly lively. While carnations are improving, there are still great quantities of short-stem stock coming in. The best are: Winsor, Enchantress, White Perfection, Afterglow and Beacon. The demand for violets is livelier. The demand for orchids is good, but the supply keeps pace. Lilies are plentiful and in demand. Great quantities of cosmos used

daily. Snapdragon has been coming in sparingly for several weeks and is now plentiful. The lighter colors are most popular.

Following the heavy **WASHINGTON** frost of last week, Washington has been sweltering under almost August temperature. The heat and drought of the past three weeks is seriously affecting all vegetation and wells are lower than in years. Greenhouse prices are down and there is a perfect glut of cosmos on the market. It is hard to find sale for good material for the usual pre-election conditions exist—only a little "more so"—and florists complain that it is hard to tell a week day from Sunday.

### PHILADELPHIA NOTES.

Paul Klingsporn has severed his connection with W. E. McKissick, and will locate with his brother in Florida.

Harry A. Crawford was married to Miss G. White Oct. 7th. The happy couple will reside at their country home at Secane, Pa. Mr. Crawford is a son of Robert Crawford, and is associated with him in the florist business.

The Moore-Livingstone Co. report a very satisfactory demand for their new flower stand from every state of the Union; Canada and Mexico are also heard from. The Pennsylvania Horticultural Society highly commended the device at its last meeting.

The new dahlia "Jack Rose" deserves all that Edwin Lonsdale and others have said of it. Too much magnanimity in it for my taste. Maybe Jack Rose can make a place for itself but I can't see it. To my mind, it's a weak imitation of Katherine Duer.

Arthur Herrington was a visitor this week and was captured by W. Kleinheinz long enough to meet the experts at the meeting and exhibition of the Pennsylvania Horticultural Society.

### Bostrom Improved Builders' Levels and Farm Levels

For Park, Cemetery and Landscape Gardening use, take the place of expensive Engineering Instruments. Simple in construction, easily adjusted, more substantial and less cumbersome than the more elaborate and complicated instruments. Practical, up-to-date instrument that any one can use. Write for descriptive circulars and be convinced that this Level is necessary to complete your outfit. Builders' Level \$25.00, Farm Level \$15.00.

### NEW YORK FLOWER MARKET.

Much as we should like to record an improvement in this market, we are obliged to say that we can see nothing at the present time to warrant such an announcement. The situation is complicated by the very large increase in daily product resulting from the unseasonable high temperature of the past week, which has driven in the crops of chrysanthemums at an unprecedented rate and shifted even the cattleya into the bargain counter class for the time being. The wholesale districts furnish, nevertheless, an interesting sight in these days of big things and low prices. Chrysanthemums are brought in boxes large enough to hold a man and whether they are carried away in wagons and autos or loaded on the shoulders of jubilant Greens in such bulk as to even debit them from transportation on the cars, they take lots of room and the street, sides

walks and areaways are at times taxed to the limit of available space. Roses, lilies, carnations and other stock contribute their share to the deluge of color and fragrance which, with all its wealth of beauty, soon loses its attractiveness in the eyes of the man who is put to his wits' end to find a market for it. The political problems in which the great American voter is so deeply interested just at present seem "dead easy" when compared with the shrewd maneuvering and sagacity required to establish and maintain a market value on anything at such a time.

J. S. Fenrich and A. M. Henshaw, wholesale florists of New York, have joined interests and on Nov. 1st will open as Henshaw & Fenrich at 44 West 28th street, where Mr. Henshaw has been located hitherto. The new firm will be a strong one in ability and popularity.

### Why My New Curved Iceless Eave is Far Superior to Anything on the Market Today

- 1st. No sash bars incased in iron, thereby eliminating all danger of bars decaying.
- 2nd. Can be used in conjunction with iron frame construction, thereby doing away with that very objectionable feature, "columns."
- 3rd. Roof bars with drip grooves, which act as conductors to carry away the condensation: Result, the driest roof ever used for greenhouse purposes.
- 4th. **THE MOST IMPORTANT OF THEM ALL.** The very small increase in cost over the ordinary style of construction which makes it possible to be used for commercial as well as private purposes.

**William H. Lutton,** Horticultural Architect and Builder

West Side Ave Station (C.R.R. of N.J.) Jersey City, N.J.

### GUTTER No. 1750

Here is a cross section of our 6 inch "V" Gutter showing how the sash bar clasps are extended at the lower end to carry all roof condensation to the U-Bar drip gutter and how securely these clasps are fastened to the sides of main gutter.

Because of the gutter's shape, a very small amount of water will start running at once.

It is cast by the same special process employed in our other gutters which insures it being tough and straight.

See page 11 of our Handy Hand Book. Can fill order at once.

### SNOW—THE U-BAR—ITS CURVED EAVES

Accurate, scientific measurements of plant growth in greenhouses prove that the first few hours after it is light in the morning, the plants grow more than during all the rest of the day—think what that means when a gutter or plate backs up the snow and ice during the night and shades your plants those first hours. The U-Bar roof clears itself entirely of snow—it is always a clean sweep from ridge to foundation. Photo was taken in Canada just after a heavy fall of snow. The ideal construction for private estates, parks, institutions and florists' show rooms. Send for catalog.

## Rocky Mountain Rambles

### II.

In the Rocky Mountains are few goldenrods, those flowers which are the glory of our autumnal landscape in Iowa and the Mississippi valley. They are, however, replaced by several species of *Bigelovia* or "Rayless Goldenrod" which often form a conspicuous feature of the landscape at 6,000 and 7,000 feet altitude. There are comparatively few of the asters which are so abundant in Iowa and Wisconsin, but they are largely replaced by the fleabane (*Erigeron*) which is common in the woods and on the plains. The species of this genus found in this region are numerous and difficult to name except by one who has made a careful study of them. They occur from the plains to the timber line. The landscape has an especially somber aspect where the trees are absent because of the peculiar gray foliage of the sage brush, *Bigelovias* and many other plants of this region. One is interested in the thistles which abound in this country. In the open places around Laramie and other high places in eastern Wyoming and Colorado, a yellow-flowered thistle (*Cirsium Nelsoni*) holds sway. Were it not for the very spiny character of the leaves, this would be a most beautiful plant to cultivate. Many larkspurs occur in this region: on the high planes east of Laramie, a blue-flowered species (*Delphinium Geveri*) much like the southern *D. tricornis* is abundant. In the woods and at higher altitudes larger species occur but the flowers are not so pretty. The western aconite (*Aconitum Columbianum*) is common in swamps and along brooks at high altitudes. The larkspurs and aconites are frequently reported as poisonous by the stockmen of the region.

The alpine flora is most interesting to the botanist. The alpine gardens with meadow grasses, hair grasses, dwarf fleabanes, dwarf clovers, avenas and primroses abound. These plants bloom simultaneously and give a beautiful aspect to the meadow. A little search in these gardens may reveal a small willow but a few inches in height which displays its tiny catkins above the grasses and other flowers. The Pasque Flower which in Iowa was in bloom in April was just beginning to flower in the middle of June in Colorado at an altitude of 11,000 feet. It is the same species which blooms earlier on the plains.

Many of the most interesting features of the mountains are the conifers which everywhere above 5000 feet begin to appear. At lower altitudes is the Bull Pine (*Pinus scopulorum*), along the streams south of Den-

ver, the Black Fir (*Abies concolor*), occasionally the White Pine (*P. flexilis*) and Colorado Blue Spruce (*Picea pungens*); at higher altitudes and covering thousands of acres is the Lodge Pole Pine (*P. Murrayana*) the most useful pine of the region, because it covers such large areas. It is an important factor in holding the moisture which later is released in the form of springs.

One of the most beautiful of the Rocky Mountain conifers is the Douglas Fir (*Pseudotsuga Douglasii*) which occurs, at times, closely massed, at others in scattered groups. The Subalpine fir (*Abies subalpina*) occurs on the slopes of hills or in the canons. It is a beautiful tree that has adapted itself to a wide range of territory and is well worth cultivating. The Pinon Pine (*P. edulis*) covers large areas between 5,000-7,000 feet south of Colorado Springs; it is a tree of little commercial value but makes good firewood and the seeds are largely collected by squirrels. It is interesting to watch the squirrels open the cones and take out the seeds.

The deciduous trees are not numerous; the larger ones occur in the canons in which the Cottonwood, as it is called, but more properly Balsam Poplar (*Populus angustifolia*) often forms dense copses. The only widely scattered tree in the region is the Quaking Aspen (*Populus tremuloides*). Not much use is made of it but there is no reason why it should not be used in the manufacture of wood pulp. Other deciduous trees are the birch (*Betula occidentalis*) but the species is confined to the streams. The western Hard Maple (*Acer grandidentatum*) covers large areas in parts of Utah, and is an important factor in conservation of moisture in the soil. In Utah, the dwarf white oak is abundant, forming large copses. The soil is generally quite dry where this species occurs.

Ames, Ia.

## Tree Talks

### II.

#### HOW FOREST GROWTHS CONSERVE SOIL AND WATER

Where there are forests, the soil is constantly improving and increasing. The roots penetrate deeply into the ground, which lets in the air to produce its slow but sure result, the radicals decompose the grains of sand and extract from them some of the elements essential to the soil; they drink in the moisture and the carbonic acid which is brought down from the atmosphere above the surface, and, from the elements acted on by frost, heat, light and air in the leaves, and by that unknown influence, vegetable life, are composed the venous substances which compose the plant, while the annual deposit of leaves and finally the decay of branches go to make a soil on which other plants thrive. The soil thus formed is kept by the twist-mat of roots from washing away. When snow or rain falls in a country covered by forests it is retained by the deep spongy mats formed by the roots and assimilated deposits of leaves, and, instead of rushing down as it otherwise would in torrents, carrying with it large quantities of soil, the leaves and roots protect it from rapid evaporation, and it remains laid up as in a reservoir, trickling gradually out and forming perennial streams, which water the

MT. OURAY, MARSHALL PASS  
Lodge Pole Pines in Foreground

country through the longest and driest summer, moderating the droughts by mists of heavy dews. All along the coast of New England numerous streams, which were formerly fed by the forests, and often rolled a volume of water sufficient to turn a mill through the summer, before the forests were cut away, are now dried up at that season and form only a drain for the melting snows of spring or heavy rains of autumn. In Piper's "Trees of America" he says that within a half mile of his residence (Woburn, Mass.) there is a pond upon which mills have been standing for a long time, dating back to the first settlement of the town. These had been in constant operation until some thirty years ago, when the supply of water began to fail. This pond owes its existence to a stream in the hills some miles to the south of the town. Within the time mentioned, these hills, which were covered with a dense forest, had been cut off, and, to the wonder and loss of the mill owners, the water in the pond failed, except in seasons of freshets, and, what was never heard of before, the stream itself became entirely dry. Within ten years a new growth has sprung up on most of the land formerly occupied by the old forests, and now water runs through the year notwithstanding great droughts.

#### PAYING THE PENALTY

This wholesale destruction of the forests, no doubt, lessens our water supply more and more every year. When land is cleared of trees and burnt over, as it usually is, the evaporation is very rapid, even with continuous rains. Anyone can verify this by going into the woods (if they can find any) a week or more after the cleared land has become comparatively dry. The soil and atmosphere of the woods is humid and moist, and the ground still wet and full of water, if you dig down. I would not say that the destruction of the forests lessens the rainfall, but the evaporation is so rapid that we do not receive the benefits of the moisture in an open country that we would in one well covered with forests. Storms are generally less severe in a wooded country than in an open one, the force of the heavy gales is broken by the woods, while on the western prairies, where there are few or no trees, the gales sweep with great fury, carrying destruction with them on every side. Almost everyone who cultivates early vegetables or fruit knows the value of having a heavy belt of evergreen trees on the north and west of these farms; and many who buy open farms plant, as one of the first operations, shelter belts of trees in proper positions. No one would think of placing their early hot beds in an open field without some shelter, either natural or artificial. If they did it would necessitate double the labor to obtain the same results they would get in a sheltered position.

As a sanitary measure forests are one of the best preventives of malaria. In the Everglades of Florida, the pine forest of North Carolina, and other places which are heavily wooded, malaria is unknown, and one can even sleep out in the forests without fear of that disease, but as soon as the settler chops down large tracts of lumber, the tropical sun, acting on masses of decaying vegetable matter, fills the air with the germs of disease, the carbonic acid which was consumed by the trees is inhaled by the people and the result is malaria.

#### AN UNAPPRECIATED BLESSING.

The benefits, pleasures and comforts arising from trees are so great, aside from their commercial value, that one would naturally think that man would need no urging to protect them, but I am sorry to say that the majority would rather cut a tree down than plant one. And notwithstanding all that has been said and written on the subject, there seems to be but little response. The Massachusetts Society for the Promotion of Agri-

culture offers valuable prizes for plantations of trees, but meets with little success, although I believe that a North Andover gentleman lately took one of the premiums.

This subject of tree planting and caring for our forests is a serious one, and should command the careful attention of every thinking man who holds the welfare of his State at heart. It has been delayed too long, and it is time that the people's eyes were opened to the necessity of planting, preserving and caring for the forests, or the coming generations will find themselves not only short of both wood and lumber, but inhabiting a country where life is hardly worth the living.

*Jackson Dawson*

## Early Flowering Chrysanthemums

In a recent issue of the Florists' Review there appeared a few notes on early flowering chrysanthemums, from the pen of the "American Wells," i. e., Chas. H. Totty. Personally I was much interested in Mr. Totty's notes. Having visited Merstham myself some years ago I can very well believe that the earlies made a most inspiring show there this season.

One paragraph in particular in Mr. Totty's article took my eye, namely, "I do not see why they ('earlies') should not be largely planted as border plants to flower outside when the early frosts have caught many of the tender bedding plants." Now that is a question which was put to Mr. Totty in Horticultural Hall a year ago last July by a member of the Gardeners' and Florists' Club of Boston. During the discussion which followed Mr. Totty, if my memory serves me right, condemned the English early-flowering chrysanthemums as being absolutely unfit for use in America. His exact words if I remember correctly, were, "I have given all the best varieties an extended trial and with the exception of a few of the Pompon varieties, have not found any which will stand the extreme heat of an American summer."

I have pondered over Mr. Totty's statement for some considerable time, and now I am going to ask him to give us something more definite on this subject, because, I am sure he will admit that his words in Boston a year ago last July, and his notes in the Review a few weeks back, were if anything a trifle contradictory.

Personally, I think there are few chrysanthemums more useful or more profitable to grow than the English early-flowering section. Yet it is very rarely that one ever sees them grown in this country either by commercial growers, or by private gardeners. This in itself is strange when we remember that they come into flower at a time when flowers for cutting and house decoration are very scarce. Certainly a good batch of them grown in eight-inch pots, with their glorious tints and colors would prove a welcome addition and preface to the chrysanthemum season proper. They have a most charming effect when grouped among other plants, and where large quantities of cut flowers, and especially the white sorts, are required the early bush chrysanthemum will be found indispensable. Mr. Totty, I am sure, will pardon me when I say that their usefulness for gardeners and florists in this country is already assured, and their beautiful free flowering and bushy habit will justly ensure them a prominent position in both private and commercial establishments.

For pot work, we find the best time to put in the cuttings is about the second week in February. When

the cuttings are nicely rooted, they should be potted singly into three-inch pots and then kept near the glass to prevent them from being drawn. About the beginning of April we shift them into six-inch pots where they remain until potted into their flowering pots early in June. To secure a good bushy plant, pinching should continue until the end of June when they should be stopped for the last time. If at all possible they should be grown outdoors until the buds begin to show, when they may be removed under glass. For pot culture the following list contains, I believe, the cream of the early flowering section:

Carrie, deep yellow; Crawford, white; Crimson Marie Masse, a beautiful deep bronze; Fee Japonaise, white, shaded rose; Goacher's Crimson, a very bright crimson, does best disbudded; Horace Martin, bright yellow; Mdm. Marie Masse, lilac mauve, one of the best; Maggie, canary yellow, very dwarf; Mdm. Casimer Perrier, creamy white, shaded pink, makes a perfect pot plant; Louis Lemaire, bronze, best disbudded; Mytchett White, a beautiful flower, very early; Robbie Burns, rosy cerise, very fine; White Quintus, the most profitable market white grown, an indispensable sort for the florist; Sally, light pink; Tangiers, reddish orange, a lovely shade; Ralph Curtis, pure white; Mrs. Baird, peach pink; Ryecroft Glory, golden yellow, a fine pot plant.

## Fertilizers

### THE NATURE OF CRYSTALLINE WATER-SOLUBLE FERTILIZERS.

Before we knew as much of science as we do today it was supposed that animals and plants, being endowed with that incomprehensible mystery termed life, must perforce be very different from the mineral or "dead" world. This is true but not to the extent often imagined. There is no sharp line between these: no man may say, "This is dead," or "This is alive," at least not in the case of the simpler forms of life. But it is glaringly evident that the "live" world with its plants and animals is infinitely the more complex, and yet the mineral world commonly considered comparatively simple, is not without its vast uncharted depths.

Vegetable life chemically considered has much to do with a certain substance, carbon, which, at once so rare in the mineral world while so plenteous and important in plants or animals, becomes a loose criterion between these two great classes. Chemists call carbon-containing things, organic; without this element, inorganic, in which class are most of the soluble fertilizers of today, one exception being the new cyanamide.

One of the star attractions in the mineral tent is the curious and common process known as crystallization, a most interesting and important branch of chemistry and well worth our attention here, even if it is a science by itself, as shown in such a fascinating way in the cabinet of the mineralogist, who knows something about it too.

We may dissolve of a soluble salt like copper sulphate (blue vitriol) or a soluble plant food only so much in water according to the substance and the temperature, and no more. The reverse process may be gone through by boiling off some water or cooling it at some point known in advance: the crystals will form much as they existed before they were dissolved. The copper sulphate will be blue and every crystal will be of the

proper shape, color and, note this—of exact composition.

These two marvels of crystallization—*form* and *composition*—are of wide application to the manufacture of soluble fertilizers and indeed all "salts," as chemical combinations of acids and alkalies are called, as are also most soluble fertilizers.

Owing to grinding, the form of the crystals is not usually seen but what is invisible and of the greatest importance is the *composition*. A pure crystal has always a certain fixed proportion of elements; if sulfate of ammonia always so much ammonia, always so much sulphate—no more, no less,—invariable. Why then, you ask, are not all salts of the same composition? Because the removal of the pure crystals from the solution is not always inexpensive and when the solution is evaporated impurities outside the crystal are gathered up too. Absolutely pure articles may be made by recrystallizations as is often done with powerful drugs, but is too costly ordinarily, especially as many impurities are not only harmless but may be even beneficial. We are trying to explain why commercial chemicals are not usually pure, and that the purchaser should care mostly about the amount of the material he wants in the chemical purchased, and the price paid should be in exact proportion to this and *not* to the *degree* of *purity*, if the impurity is innocuous.

Now let us consider this a moment more. Knowing that these crystals have an unvarying composition and knowing the per cent. impurity we are yet enabled to calculate exactly how much of each ingredient is in there. If we know Nitrate of Soda is 95 per cent. we may at once calculate how much Nitrogen is present unless the impurity had some Nitrogen, which is highly improbable.

Along with the shape and composition of the crystal is included its "water of crystallization," as it is called. In the case of Copper Sulphate there are always 5 "waters" which would make about a third water, but note, this is no adulteration; in fact *lack* of *water* would be a falsification, for pure crystals would have all this water. For most purposes, however, the copper is what is most desired and if the crystals look whitish some of the water has gone and the buyer is getting more copper for his money.

Of the list below of soluble crystalline chemicals we will note the water usually found in sodium acid phosphate is half the whole crystal, and in buying this chemical this should be taken into consideration and the actual phosphate present should be asked for. The other chemicals mentioned have no water except sometimes Kainit. Of course this water of crystallization may be dried off but in the case of the phosphate this makes such changes that the result can hardly be called soluble.

Commercial soluble chemicals for fertilizers, all white dry crystals if pure, and made on commercial scale:

*Nitrogen-carrying:* Nitrate of Soda, Ammonium Sulphate, Nitrate of Potash, Ammonium Phosphate, Ammonium Nitrate.

*Phosphorus-carrying:* Sodium Acid Phosphate, Mono-Ammonium Phosphate, Potassium Phosphate.

*Potash-carrying:* Sulphate of Potash, Carbonate of Potash, Kainit (Impure mixed with Magnesium, if pure would be Chlorid of Potash), Phosphate of Potash.

We hardly need to add that all these are not of equal value, chemically or from the horticultural point of view, of which we have more to say later.

*Rudley M. Bray.*

declare the rates demanded by these companies for the transportation of goods between Boston and the cities and towns within a radius of fifty miles to be "excessive and unreasonable." The railroad commissioners in their report give adequate reasons for their decision. The territory within fifty miles of the State House in Boston contains three million inhabitants. The American Express Company, which is not a corporation but a form of partnership, has absorbed within twenty-five years the express business of about twenty corporations, firms and individuals doing business in Massachusetts and also controls the National Express Company. It appears that the gross amount invested in the conduct of the business of the two companies in Massachusetts is only about \$600,000, more than half of which is invested in stables and the major portion of the balance in horses and wagons. Little, if any credit is extended and the risk involved in the conduct of the business is small.

Just what action the express monopoly will take in the face of this verdict is not yet apparent. Unfortunately the State Board is not invested with the power to name and compel a rate which

they believe to be just and reasonable as is the case with the Interstate Commerce Commission, but that power can be given by the people and probably will be if the warning is ignored. In the face of such a powerful monopoly the individual who feels their oppression stands little show for redress if he goes it alone, but the power of organized protest cannot be over-estimated and with the example of what was accomplished in the name of the Society of American Florists last year the florists of Massachusetts who have been complaining of the excessive transportation rates they have had to pay to get their product to market need not throw up their hands and stand helpless while they have clubs and societies whose business it is to take aggressive action on these things which so vitally concern their members.

Let no one take the foolish position which some selfishly blind S. A. F. members assumed at the time of the tussle with the United States Express Company, to wit,

that these abuses are only local and it is no part of the outsider's business to concern himself so long as it is "not his ox that is gored." Depend upon it every shipper in every section under the domination of any one of the big companies is slated for his share of the imposition in due time if the initial efforts are allowed to slide through unopposed. How closely the affairs and operations of all the companies are interwoven may perhaps be better understood after reading the following extract from a recent statement by the New York Public Service Commission:

"It appears that the Adams Express Company holds \$906,000 of the \$10,000,000 of stock issued by the United

Express charges "excessive and unreasonable" Massachusetts railroad commissioners find no justification for the increase of rates by the American and National express companies in February last, and

States Express Company. The American Express Company has holdings in the National Express Company of \$484,600 out of a total issue of \$500,000; in the United States Express Company, \$1,000,000 out of a total of \$10,000,000, or just 10 per cent; in the Westcott Express Company \$143,600 out of a total of \$150,000 preferred stock and \$497,650 out of a total of \$500,000 of common stock. It also appears that the Southern Express Company owns \$70,000 of stock in the United States Express Company, as well as \$111,800 of the \$12,000,000 in stock issued by the Adams Express Company, and also \$118,500 out of the \$18,000,000 of stock issued by the American Express Company. The president of the Adams Express Company, Levi C. Weir, and the president of the American Express Company, James C. Fargo, are directors in the United States Express Company, of which Senator Platt is president."

Considering these facts and in the light of recent experiences in various sections of the country is it not a reasonable proposition that the legislative committee of a trade organization stands second to no other department in importance today?

#### OPPORTUNITY

##### Destiny

vs.

##### Perseverance

Master of human destinies am I;  
Fame, love and fortune on my footsteps wait;

Cities and fields I walk; I penetrate  
Deserts and seas remote, and passing by  
Hovel and mart and palace, soon or late  
I knock unbidden once at every gate.  
If sleeping, wake; if feasting, rise before  
I turn away; it is the hour of fate  
And those who follow me reach every state  
Mortals desire, and conquer every foe  
Save death; while those who doubt or hesitate,  
Seek me in vain, and uselessly implore;  
I answer not, and I return no more.

—John J. Ingalls.

#### THE "ONE-CHANCE" IDEA

You look about and everywhere you're pretty sure to see  
Some weak-kneed men just plumb knocked out by that  
"one-chance" idee,

They missed it at the very start, and all their lives since  
then,

They've set around a-tellin' of the things they might have  
been.

I don't believe an all-round man who wants to travel far  
Will stay at home for ever 'cause he missed the first  
through-car.

It ain't the way real men should do, for 'cordin' to my text,  
"If one good chance gets by you, why, you ought to grab  
the next."—London Report.

Here are two views of life and its chances. It is not improbable that during the past year of uncertainty and apprehension many a one who reads these lines has been moved to think very seriously on the perplexities of the situation as it presented itself to him individually and to wonder whether, after all, any chance remained for him in the unequal struggle against hard times and bad luck. Forget it all and practice the invincible art of "keeping everlastingly at it." By the time the next issue of HORTICULTURE appears election will be past. No matter who wins there is no reason to doubt that our 80,000,000 enterprising and industrious people will continue on their prosperous way. Beyond a doubt the opportunities ahead are just as good and abundant as they have ever been in the past so get after your share. To the faint-hearted we commend the following verses which our hustling florist friend, John F.

Rupp of Shiremanstown, Pa., is sending out with his correspondence:

There's only one method of meeting life's test—  
Just keep on astringing and hope for the best;  
Don't give up the game and retire in dismay  
If hammers are thrown when you'd like a bouquet.

This world would be tiresome, we'd all get the blues,  
If all the folks in it held just the same views:  
So finish your work, show the best of your skill—  
Some folks will not like it, but other folks will.

If leading an army or building a fence  
Do all that you can with your own common sense.  
One word of kind praise in this journey of tears  
Outweighs in the balance a cart-load of sneers.

The plants that we're passing as commonplace weeds  
Oft prove to be just what some sufferer needs.  
So keep on agoing, don't ever stand still—  
Some folks will not like you, but other folks will.

Do you make a practice of looking over that unique department of Horticulture's advertising section—The Buyers' Directory and Ready Reference Guide?

There's lots of business done through the medium of those useful pages carefully compiled every week for the convenience of the busy man. Not only are to be found there the offers of those dealers who use that department alone but also those of every advertiser represented in the display advertisements. This weekly tabulation is maintained without cost to our advertisers for their benefit and that of our readers and its advantages are shared by every one whom the paper reaches. Don't fail to peruse it. It is a "clearing house" in which the best firms in the trade are always represented.

How about your employees and friends in the trade whom you wish to remember kindly at the Holidays now approaching? Useful gifts are universally favored. Do you know of anything you can give them at the cost of a dollar that will do them better service the whole year through than a paid subscription to HORTICULTURE? The country is teeming with horticulturists of every persuasion who subscribe to no trade paper. The aggregate circulation of all the trade papers together does not half cover the number entitled to receive them. We give a liberal commission on new names sent in by a subscriber. What do you say?

# NEWS OF THE CLUBS AND SOCIETIES.

## NATIONAL CHRYSANTHEMUM SOCIETY.

### Early Flowering Show.

On the 7th and 8th of October last the above society held its first show of the season at the Crystal Palace, Sydenham. The schedule was a comprehensive one, allowing for all kinds of exhibits in the early flowering section of the chrysanthemum, and there were also some grand exhibits of Michaelmas daisies and dahlias.

In the table decoration classes there were 16 exhibits. Vases and baskets of chrysanthemums arranged for artistic effect were numerous, and, generally speaking, displayed considerable taste. The competitive classes were well filled and some fine specimen blooms were shown. We specially noted Mrs. A. T. Miller, a grand white Japanese. Miss Alice Byron, Mrs. G. Mileham, Mrs. R. Hooper Pearson, Sapho, Mrs. W. Knox (one of the finest of yellows), Bessie Godfrey, Beatrice May, Valerie Greenham and a few others of the large early-flowering Japanese.

Trade exhibits, not for competition, were a feature of the show. W. Wells & Co. had a grand group 163 feet long composed of a semi-circular group in the middle with a long table wing on each end. A gold medal was awarded. Among the chrysanthemums the single and quite a feature. Pentstemons and Michaelmas daisies helped to enliven the group.

T. S. Ware & Co. had a gold medal for a fine lot of dahlias and early chrysanthemums, arranged in pyramids and sweet vases. Lotus and peony-flowered dahlias were in fine form and memorable. Another gold medal went to Norman Lavis for a lovely exhibit of Michaelmas daisies and early chrysanthemums arranged on the ground level in the most artistic and simple group.

Dahlias exhibited also received a gold medal for roses, dahlias and Michaelmas daisies. All the well-known pink-flowered dahlias were represented in the group and made a very bold group.

W. J. Godfrey showed early varieties and some new seedling chrysanthemums. Philip Ladds & Co. had a pretty foliage group enlivened with chrysanthemums in pots. Esme Reed, an October decorative variety.

A silver gilt medal was awarded to H. J. Jones for a most conspicuous and comprehensive display of Michaelmas daisies with a front edging of early chrysanthemums. J. Cheal & Sons had a new lot of curious single and pompon dahlias, with a selection of early chrysanthemums. A silver gilt medal was awarded to them.

James Smith & Sons had a very fine and dramatic and other foliage plants in pots. A silver gilt medal was awarded to J. H. Bond & Sons for a very fine and dramatic exhibit of single and double dahlias. They also showed a pretty group of chrysanthemums arranged with ferns and other plants in pots. Messrs. Spooner & Sons had brightly colored fruits that brought the exhibitors a silver gilt medal.

The Floral Committee awarded first-class certificates for the following chrysanthemums: Master James (Jap), Mrs. J. Kempley and Kathleen Lambrick (both early Japs), Shanklin (Jap), Nelly Riding (Single), October Gold (Decorative), Fee Parisienne and Provence (Decoratives). Single dahlia Betty also had a certificate.

C. HARMAN PAYNE.

## CHRYSANTHEMUM SOCIETY OF AMERICA.

### Work of Committees.

Cincinnati, Oct. 16th. Fee Orientale. Cream white. Jap. ref. Exhibited by E. G. Hill Co. Scored 81 points commercial scale.

Cincinnati, Oct. 24th. G. W. Pook. Terra cotta red. Inc. Jap. Exhibited by Elmer D. Smith. Scored 85 points exhibition scale.

Cincinnati, Oct. 24th. Rose Pocket. Buff yellow. Jap. Ref. Exhibited by Elmer D. Smith. Scored 86 points exhibition scale.

Cincinnati, Oct. 24th. No. 58-2-06 White. Jap. Inc. Exhibited by Elmer D. Smith. Scored 88 points commercial and 90 point exhibition scale.

DAVID FRASER, S.

## MINNESOTA STATE FLORISTS' ASSOCIATION.

The Minnesota State Florists' Association met in Columbia Hall, Midway, Oct. 20, with about twenty members present. Among the features of the evening were exhibitions of chrysanthemums, C. Tousey, Virginia Pechmann and Monrovia, shown by Lakewood Cemetery greenhouses of Minneapolis. Some nice White Enchantress and Schroeder carnations were also shown. The Minneapolis Park Board greenhouses exhibited fine specimens of hybrid streptocarpus and Saintnolia ionantha and Saintnolia atroviolacea.

Plans were discussed for a better system of judging at the State Fair and flower shows. A committee of judges was appointed to have charge of the exhibits at the meetings and to perfect a scale of points for use.

This has been made a state organization and promises to be of considerable value to those in the trade.

The judges for the year, as appointed by the president, are as follows: A. S. Swanson, chairman; J. Souden, J. P. Jorgenson, O. Will, Th. Naeel, L. Fouglin, A. M. Kinsman, Frank Gustafson, O. J. Olsen, and A. J. Smith.

Mr. Smith, from Lakewood County, will read a paper on Chrysanthemums at the next meeting. J. P. Jorgenson is to submit a report of the National Flower Show, as well as of the doings of Twin City representatives at the next meeting.

## BOSTON CO-OPERATIVE FLOWER GROWERS' ASSOCIATION.

The banquet season has begun, and from now on until Lent sets in the tillers of the soil and manipulators of its products should wax strong and fat if they take advantage of all the feasts provided in the meantime for their special benefit. The annual banquet of the stockholders of the Boston Co-operative Flower Growers' Association, commonly known as the "Park Street Market," held on last Saturday evening at Young's Hotel, was a success as a curtain raiser, and from oysters down to cigars was "all to the good." President Stickel presided at the function for the 'steenth time and welcomed with beaming cordiality the array of about forty distinguished ornamental horticulturists lined up against the long table, the principal adornment of which was a vase of big blooms of Boston's pet debutante of the season—White Killarney Rose. After getting the best of the swell dinner set before them, a sociable hour was spent in listening to the spellbinders, the list of the orators including stockholders W. H. Elliott, Alex. Montgomery, Thos. Pegler, Wm. Nicholson, A. Christensen and H. L. Cameron and "representatives of the trade press" W. N. Craig, J. W. Duncan and W. J. Stewart.

Then came the annual business meeting and election of officers. The financial statement for the year showed a very prosperous condition, with cash on hand, \$6,837.59, as compared with \$6,702.18 one year ago.

A dividend of \$6.00 per share was ordered.

Officers were elected as follows: W. C. Stickel, president; Wm. Nicholson, vice-president; George Cartwright, secretary and treasurer. The old board of directors was re-elected with Thomas Pegler to fill the vacancy caused by the death of W. W. Edgar.

## GARDENERS' AND FLORISTS' CLUB OF BALTIMORE.

There was a well-attended meeting of the Gardeners' and Florists' Club held on the evening of the 26th. The subject for the evening was the reading of a paper on Soils by Thomas H. White, gardener at the Maryland Agricultural College. The point brought out was that—in an experiment conducted at the college—chrysanthemums on the same soil for several successive years were in every point, except being three inches shorter in the stem, equal to those grown in fresh soil. Specimen flowers from the various plots were exhibited.

The moot question whether sterilizing soil is injurious to the fertility of the soil or otherwise was fully discussed, no conclusion being reached.

Fred J. Bauer, of Govans, who has been ill, was in his accustomed place at the meeting, although not fully recovered.

## CLUB AND SOCIETY NOTES.

The Kentucky Society of Florists will have nomination of officers at its next meeting in Louisville, and every member should be there. Notices will be sent out.

A talk on "Science in Horticulture" by a distinguished gentleman is on the program for the November meeting of the Gardeners' and Florists' Club of Boston.

San Rafael, Cal.—H. Schiffer of the Laurel Grove Nursery was the winner of a silver cup for group of decorative plants, at the flower show of the Marin County Horticultural Society.

At a meeting of the Connecticut Horticultural Society at Hartford on Oct. 23 the committee in charge of the dahlia show reported a balance over expenses. A fine display for the chrysanthemum show on Nov. 5 and 6 is promised. A. J. Webber displayed 300 pansy blossoms from seed planted July 15.

The Menlo Park Horticultural Society opened its fifth annual show at Redwood City, Calif. on Oct. 17, in the Alhambra Theatre. Among the exhibitors were J. B. Coryell, Lynch Nurseries, S. E. Slade, Gorhtzain Bros., C. N. Felton, Timothy Hopkins and many others from Burlingame and San Mateo.

The Bloomington Florists' Club (Ill.) held its annual meeting at the store of A. Washburn & Sons on Oct. 8 and elected the following officers: President, F. L. Washburn; vice-president, A. R. Knowles; secretary and treasurer, Joseph Knowles. Meetings will not be held regularly each month as was the custom last year.

The Elberon Horticultural Society, N. J., met on Oct. 19 and elected officers as follows: President, Anthony Bauer; vice-president, R. R. Hughes; secretary, Adam Worth; treasurer, James Kennedy. This meeting closed the competition for points during the past season. James Knowles was first and took the Rickards cup and Anthony Bauer took the A. Grieb cup.

The annual meeting of the New Hampshire Horticultural Society was held at Milford on Oct. 20. Interesting addresses showing the financial value of the apple crop if properly cared for, the necessity of carefully spraying, etc., were listened to by a good-sized audience. Officers were elected as follows: President, C. G. Shaw, Milford; vice-president, J. T. Harvey; Pittsfield; secretary, E. D. Sanderson, Durham; treasurer, T. E. Hunt, Lakeport.

#### LOCAL EXHIBITIONS.

**Hartford, Conn.**—At Elizabeth Park the display of chrysanthemums promises to be very extensive by November 1.

**Berlin, Conn.**—A. A. Weldon is one of the earliest here to make a display of chrysanthemums and it is attracting much attention.

**Tacoma, Wash.**—Harrington Bros. on Vashon Island are making a gorgeous showing of chrysanthemums. There are a large number of commercial greenhouses on this island.

**Paterson, N. J.**—Supt. McCollum at Eastside park formally opened his houses to the public on October 22, and will continue the exhibition of chrysanthemums as long as the blooms hold good.

#### SPOKANE INTERSTATE FAIR.

#### O. G. FRANCE'S EXHIBIT.

Winner of Chief Prize at Spokane Interstate Fair.

More and better fruit was displayed in the various district, county and individual exhibits at the Spokane Interstate Fair, Oct. 5 to 10, than ever before in the history of the organization. E. L. Stewart, president of the Washington Horticultural Association, was superintendent, and was assisted by H. L. Edwards, an experienced fruit grower, and they arranged the exhibits so that every box and plate of fruit showed to advantage. As a result a majority of the 110,000 persons attending the fair during the week visited the exhibits.

O. G. France of Wenatchee, Wash., carried off two of the most envied honors in the competitions, winning the \$250 prize for the best display of green fruit made by any county, district or individual, also the \$150 prize for the best 10 boxes of commercial winter apples. In the first contest were displays by practically every fruit-growing county in the Inland Empire, while in the second there were eight entries, each of which would arouse interest in any apple belt in the country. The entries in the competition for the 10 best boxes were all so nearly of equal quality that the task of judging them was a difficult one.

Other prizes were awarded as follows: Second prize, \$200, R. A. Jones of the Riverside nurseries, Spokane, whose farm is six miles north of the city; third prize, \$150, to the Yakima County Horticultural Union; fourth prize, \$100, to the Hazelwood Company, 16 miles west of Spokane; and fifth prize, \$50, to Stevens county.

The display of R. A. Jones, like that of Mr. France, included a wide variety of fruits, the chief feature, of course, being the apples. Mr. Jones also displayed a large variety of excellent garden vegetables.

The other prizes for the best 10 boxes of commercial winter apples were awarded as follows: Second prize, \$75, to J. R. Hill of Pasco, Wash.; third prize, \$50, to S. Gatten of Mead, and fourth prize, \$25, to Wright Brothers of Chelan.

The prizes for taste and design in arrangement were awarded as follows: First prize, \$80, to Stevens county; second prize, \$65, to R. A. Jones, Spokane; third prize, \$50, to the Railway Land and Improvement Company; fourth prize, \$35, to Chelan county, and fifth prize, \$20, to Benton county. Of the 15 prizes in the three contests, therefore, five go to Chelan county, three being won by Mr. Jones, one by Mr. Wright and one by the county exhibit.

J. R. Hill, who won the second prize in the best 10 boxes contest, showed in addition to the 10 boxes entered by him in that contest, a large display of commercially packed apples from his Columbia river orchard and a number of boxes of pears, the whole making a display which, while not coming exactly in line of any of the big prizes, would be hard to beat.

Another display of exceptional merit was made by Okanogan county. The exhibit, like several of the others, consists chiefly of apples and was probably brought the greatest distance to the fair of any large exhibit in the department. Another display of merit through an oversight not entered in the competition, was that of J. E. Bowen of Hunters, Wash. It consisted chiefly of plate apples, there being 100 plates representing some nine varieties besides a number of plates of pears and other fruit raised on a Columbia river ranch. The fruit in the Bowen exhibit is highly colored and of exceptional uniform size.

Stevens county growers made a good showing. In addition to the apples and green fruits they showed vegetables, grains and grasses. The Hazelwood farms also made a fine display of high grade fruits. An attractive display in the fruit and vegetable department was made of Kelly's garden of Spokane. This included growing plants in boxes, among them tomato, celery, lettuce and other garden vegetables, a few potted flowering plants and two thrifty looking tobacco plants. A small exhibit of apples, which, al-

though outclassed by the big displays from the more generally recognized apple grower districts, made a showing, was made by Mansfield Bros. of Elmhurst. It consisted of a half-dozen varieties of apples. A card announced that the fruit was grown in a district where there has not been rain enough since last spring to wet the ground for an inch below the surface.

There were numerous other exhibits, among them a display of grapes and byproducts by Robert Schleicher of Lewiston, Idaho, which won the first prize in that class. Other prizes were won by the Yakima County Horticultural Union, the Hazelwood farms, Wright Brothers, Chelan, Wash.; Cheney Horticultural Society, Benton County, Wash.; S. Gatten, Mead, Wash.; Commercial Club, Sandpoint, Idaho, and Vineland, Wash.

#### WASHINGTON CHRYSANTHEMUM SHOWS.

The two chrysanthemum shows which are on the tapis this week are (barring the election) the principal topics of conversation. The one at the Propagating Gardens comprises entirely the single-stemmed varieties. There are twelve hundred plants and more than four hundred varieties and very few are under ten feet in height. Considering the extremely hot weather for this season of the year the blooms are in a wonderfully fine condition. This exhibit closes on the 30th.

The exhibit at the Agricultural Department is of a more varied nature, comprising both Pompons and the Japanese variety. The former were in magnificent profusion, among them being a good many seedlings, some of 1908. The one plant which seemed to attract especial attention by its originality was an English importation, "What Ho," of the thread variety and of a bright canary yellow.

#### ZINNIA RED RIDING HOOD.

This is the most refined and perfect little gem we have yet seen in zinnias. The flowers are about an inch in diameter, deep crimson, perfectly double, showing no stamens in centre. Excellent substance and fine form. Grows about 12 inches in height and makes a first-class edging or line subject, also is excellent for cutting. Zinnias as a rule lack grace and finish, but Red Riding Hood is a notable exception. As soon growing in the Drexel trial grounds it is one of the noteworthy attractions and calls forth encomiums from every visitor. G. C. W.

#### CHRYSANTHEMUM INDIANA.

The creamy white seedling chrysanthemum which received honorable mention at the recent meeting of the Gardeners' and Florists' Club of Boston has been given the name of Indiana by the joint introducers, The Chas. Knopf Floral Co., of Richmond, Ind., and S. J. Reuter & Son, Westerville, R. I. It will be again exhibited at the National Flower Show in Chicago.

Baton Rouge, La.—Director Dodson and Horticulturist Burnette, of the State University Experiment Station, are preparing plans for the orchard portion of the Capitol grounds, in accordance with a recent act passed by the House.

#### COMING EVENTS.

St. Louis, Mo.—St. Louis Horticultural Society, Nov. 3, 6.

Hartford, Conn.—Connecticut Horticultural Society, chrysanthemum show, Nov. 3, 4, 5, Unity Hall.

Shreveport, La.—State Fair, November 3, 4, 5.

Worcester, Mass.—Worcester County Horticultural Society, annual meeting, Nov. 4; chrysanthemum show, Nov. 12.

Red Bank, N. J.—Monmouth Horticultural Society and Elberon Horticultural Society, joint chrysanthemum show, Nov. 4, 5.

Tarrytown, N. Y.—Horticultural Society, show, Nov. 4, 5, 6.

Glen Cove, N. Y.—Nassau County Horticultural Society, show, Nov. 5, 6.

Elmira, N. Y.—Civic Improvement League and Horticultural Society, chrysanthemum show, Nov. 5, 6, 7, Women's Federation Building.

Chicago, Ill.—National Flower Show, Society of American Florists, Nov 6-14.

Boston, Mass.—Massachusetts Horticultural Society, Chrysanthemum show, Nov. 6, 7, 8, 9.

New Haven, Conn.—New Haven County Horticultural Society, show Nov. 10, 11, 12.

Philadelphia, Pa.—Pennsylvania Horticultural Society, annual exhibition, Nov. 10, 11, 12, 13, Horticultural Hall.

Toronto, Ont.—Ontario Horticultural Society, exhibition, Nov. 10-14.

Little Rock, Ark.—State Floral Society, show, Nov. 10-25.

Lake Geneva, Wis.—Gardeners' and Foremen's Association, chrysanthemum exhibition, Nov. 11, 12.

Providence, R. I.—R. I. Horticultural Society, Nov. 11, 12, fall exhibition.

New York, N. Y.—American Institute of New York chrysanthemum show, Nov. 11-13, Berkeley Lyceum Building. Horticultural Society of New York, annual exhibition, Nov. 17, 18, 19.

Denison, Texas—Denison Civic Improvement League, show, November 11, 12, 13.

New Orleans, La.—N. O. Horticultural Society, chrysanthemum and flower show, Nov. 12, 13, 14, 15.

Washington, D. C.—American Association of Farmers' Institute Workers, Nov. 16, 17.

Pittsburg, Pa.—The National Municipal League and the American Civic Association, annual meeting, November 17-20.

Baltimore, Md.—Horticultural Society, Dec. 1, 2, 3, Fifth Regt. Armory.

Spokane, Wash.—National Apple Show Association, Dec. 7-12.

Indianapolis, Ind.—American Carnation Society, Jan. 27, 28, 1909.

#### A PITTSBURGH SHOW PLACE.

The beautiful conservatories of A. R. Peacock were opened to the public Oct. 21st. The exhibit here this year is considered by the many visitors to be the best yet. The chrysanthemums, although late struck stock, are quite up to, if not above, the standard of previous years.

Supt. T. P. Jenkinson is more than pleased and in future intends to depend almost entirely upon late struck stock, which, he claims, is not only much easier to grow, but is also very much easier to arrange, the lowering of the stages not being necessary. Some very fine flowers of Harrison Dick, Pres. Viger, Gleneven, Mr. J. Dunn, Ethel Fitzroy, Valerie-Greenham, Mrs. Brooks, and Beatrice May are amongst the best. While the chrysanthemums form the greater portion of the exhibit, in some compartments the side benches are devoted to fine specimen plants of cyclamens, Begonia Gloire de Lorraine and Primula obconica intermixed with schizanthus, celosia, Lilium Harrisii and other seasonable subjects.

The stove house is particularly attractive with foliage plants. A charming effect is produced in one compartment by a fine arrangement of Cattleya labiata, Odontoglossum grande, Oncidium varicosum, lily of the valley, Lilium Harrisii and adiantums.

Mr. Jenkinson is always striving after novelties in the subjects for his exhibits and in the form of arrangement, and usually evolves some scheme by which his display, instead of being a repetition of former exhibits or of those seen elsewhere, is always an exposition of the best that cultural skill can produce combined with artistic taste in arrangement.

Mr. Jenkinson gave us a courteous guidance over the rose, carnation and propagating sections. The roses are nice clean, healthy plants, for Pittsburg, and the carnations are as fine a batch of Enchantress, Lawson, Winsor and Nelson Fisher as could be seen anywhere. J. HUTCHINSON.

The New England Nurseries, Bedford, Mass., have made plans and specifications for the improving of the grounds of the Crosby Estate at Edgartown, and a part of the work has already been carried out. The house on this estate is over 200 years old and the treatment of the grounds will be in keeping with the place.

## PHILADELPHIA NOTES.

William Graham is now associated with the Graham Floral Co., located at 5615 Germantown avenue and at the Mergenthaler Greenhouses near by.

Frank Polites has completed improvements at his new branch at 13th and Chestnut streets. This will be good news to the growers. They need more outlets and whenever a new flower shop opens they are glad.

A. E. Wohler, Merion, in commenting on the mild fall weather under date of Oct. 26th, says: "We have German iris in full bloom—the variety *falcata*, the only one so far; the rest are on the way. Hoopes, Bro. & Thomas' *Wichuraiana* hybrids are also blooming."

Joseph A. Waxman and Charles A. Kipnis have opened a flower store at 903 Market street under the title of "The Ideal Flower Shop," with branches at 913 Market street, Hotel Vendig, and 1223 Market street. Both gentlemen have had good experience in the business.

Improvements under way at Micrrell's new "Tower Hall" Seed House, 518 Market street, Philadelphia, are fast approaching completion. Two new bulk windows of the latest design are already finished. One shows a handsome array of bulbs, the other a display of mushroom spawn. A new maple floor has been put in and two large electric freight and one electric passenger elevator are now ready for use. A new feature is the large bulk show windows in the rear on Ludlow street, making a very attractive entrance and show place for patrons who may wish to enter from Chestnut street.

## NEWS NOTES.

St. Charles, Ill.—Henry Swaby has recently started in the florist business.

Milwaukee, Wis.—Fire damaged the greenhouse of W. Getzin to the extent of \$7,000 on October 16.

Lynn, Mass.—Henry C. Chase and Thomas H. Jones are to open an office in the Item Building for forestry work. Both young men are graduates of Massachusetts Agricultural College.

News from Japan indicates that Multiflorum lilies have turned out short in spite of the fact that orders had decreased this year. Especially large sizes are short and some of the New York importers are substituting Giganteums in their place. Large-sized bamboo canes have also been advanced in price in Japan.

## CYPRIPEDIUM ACTAEUS BIANCA.

This variety gained a First-Class Certificate when exhibited by Lt.-Col. Holford, C.I.E., C.V.O., at the last meeting of the Royal Horticultural Society. The bloom is of much beauty, and is considered to surpass even the handsome *C. insigne* *Sanderæ*, which

formed one of the parents, the other being *C. leeanum* *Prospero*. The general color is pale yellow, of a smooth and shining surface. The upper sepal is very broad, the major portion of its surface being white; the basal part is a yellowish-green color, it may be added that the plant was exhibited as *C. bianca* *superba*—*Gardeners' Chronicle*.

## AN EXAGGERATED REPORT.

The secretary of the Baltimore Florists' Club intimates that G. Watson has gone to seed. What good is seed unless planted? It will not sprout else. G. W. objects to being planted yet a while. He feels pretty fit. If there are any lions, tigers or elephants that need slaying around Baltimore, a wire or 'phone will bring the mighty hunter down there inside of two hours. The big game in the vicinity of Philadelphia has taken to cover for the present, and any new diversion elsewhere would be welcomed. G. W. feels very much like Mark Twain when some one told him his death had been reported in the paper. He thought the report had been "greatly exaggerated." Being in the seed business is quite a different thing from going to seed personally. You might as well say a man was an archangel because he sold Archangel tar. On the contrary if you ask the editor of HORTICULTURE he will tell you that he has to sit constantly on the safety valve of "the Ginger jar" to prevent explosions. G. C. W.

## KIFT'S New Fern and Berry Globe.

**T**HE newest and latest novelty of its kind. A quick seller. Created a sensation at Niagara Falls. May be filled with either Ferns or Partridge Berries, and retailed at splendid profit. The Top lifts off the Stand for filling or trimming. Perfect ventilation is secured through holes in base. Very attractive and ornamental in appearance, and a rattling good seller. As a Christmas novelty, it will be in great demand. The Partridge Berries and a red silk cord with tassels give it a striking Holiday finish. Three sizes: 5 in. \$3.00 per Doz., 6 in. \$4.00 per doz., 7 in. \$5.00 per doz. Packing free. F. O. B. Philadelphia.

SEND FOR ILLUSTRATED CATALOGUE.

Partridge Berries \$3.00 per thousand sprays.

1725 Chestnut St., - - Philadelphia, Pa.  
Order now to insure prompt delivery.

### A SERVICEABLE TREE STAND.

Here is something new and useful. It is the Hall's Adjustable Tree Holder. Made of iron, weighing but a few ounces, adjustable to any size tree up to 4 1-4 in. caliper, and to larger ones by shaving down the stump. It is sold for the low price of \$3.50 per dozen, and should be included in the regular furnishings of all florist stores for the purpose of supporting trees and large boughs in decorative work. It folds up into small space and will last for years. It is the best thing up to date for holding Christmas trees

and should have a very large sale this year. N. E. McCarthy & Co., Boston.

are sole agents for its sale in this country.

### A GREAT RETAIL FLORIST ESTABLISHMENT.

The firm of Pennock Bros., Philadelphia, of whose delivery service we give pictures, was founded over fifty years ago by Abram L. Pennock, Thomas Cartledge, and John Westcott. There are but few firms in this country that can show so long and honorable a record and still remain leaders in their line of business. It is not so very long ago that even one delivery wagon was considered a sign of distinction for a retail flower shop. This array of Pennock Bros.' vehicles is illustrative of the strides the trade has taken in recent years. The pres-

ent members of the firm are A. B. Cartledge, and J. Liddon Pennock.

### NEWS NOTES.

**Sayre, Pa.**—A. L. Merrill has opened his greenhouses on W. Lockhart street.

**West Chester, Pa.**—Hoopes Bro. & Thomas Co. have purchased a large tract of land for nursery extension.

**East Syracuse, N. Y.**—Ernest C. Benedict, who has recently started in business here, is making a specialty of carnations.

**Negaunee, Mich.**—The office of the Negaunee Greenhouses has been transferred to the new plant, between Gold and Silver streets.

**Concord, N. H.**—The Concord Water department have over 100,000 young pines growing in their nursery on the shore of Lake Penacook.

**Richmond, Va.**—Mann & Brown, florists, Broad street, have installed electric fixtures, laid new floors and put in a new ice box for the fall trade.

**Hunters, Wash.**—The Hunters Land Co. have recently acquired 1080 acres of orchard land and will plant 100 acres to fruit trees at once. George Crossland has taken the position of manager.

**Waltham, Mass.**—Jas. T. Sillman, florist, was tendered a bogus check for \$20 by a woman in payment for a \$15 order, but discovered its worthlessness in time to prevent loss of the goods.

PENNOCK BROS.' DELIVERY SERVICE

# AZALEAS for Forcing—Christmas to Easter

Our stock this season is handsomer than ever. Anybody in want of a quantity will do well to inspect our plants before placing their order. We have only popular American varieties: Schryveriana, Niobe, Paul Weber, Prof. Wolters, Raphael, Simon Mardner, Vervaeana, Louis de Kerchove, Mme. Van der Cruyssen, Deutsche Perle, Dr. Moore, John Llewelyn, Mme. Cam. Van Langenhove, Mme. Jos. Vervae, Paul de Schryver, Memoire de L'Van Houtte, Sigismund Rucker.

## OBITUARY.

### George J. Evans.

George J. Evans, florist and landscape gardener of Flint, Mich., died on October 14. Mr. Evans was a native of England but has been in this country since 1891. A widow, one son and three daughters survive him. The business will be continued by the family.

### Mrs. George Yantz.

Mrs. George Yantz, who, with her husband was engaged in the florist business at Caldwell, Kan., was stricken with apoplexy while visiting her daughter near Little Rock, Ark., October 9 and died instantly. Mrs. Yantz was a native of St. Louis.

### Mrs. Mary E. Johnston.

Mary E., Widow of Thomas J. Johnston, who has carried on her husband's business since August, 1907, died in Providence, R. I., on Oct. 17. She leaves one little boy, six years old.

### Gilbert Rogers.

Gilbert Rogers, aged 74, a florist of Meadville, Pa., was thrown from a wagon October 19 and instantly killed, his neck being broken. He leaves a widow and family.

### Gustav Harrison.

Gustav Harrison of Washington, D. C., died suddenly on October 16 in his forty-second year. He was at one time with the Elizabeth Nursery Co.

## LEONARD SEED CO., CHICAGO.

IS IT AN ACCIDENT?

Duncan and a group picture of the Association taken at Minnehaha Falls.

The Florists' Bibliography. By C. Harman Payne. As foreign corresponding secretary of the National Chrysanthemum Society, corresponding secretary of the Société Nationale d'Horticulture de France and officially connected with a number of other societies Mr. Payne has attained a world wide acquaintance and repute. The publication which is before us is a work which would have been impossible for one not a book-lover and book collector in the realm of horticulture and it will fill a most acceptable place, heretofore vacant, on the desk of the literary worker in floriculture or for any one who wishes to read up on any special topics connected with the industry. The list of books is quite comprehensive in scope but it is to be regretted that works on the Rose have been omitted, although the author explains that this has been done because this flower already has a bibliography of its own, and that there is no need to go over the ground again that has been traversed by Senor Vergara in his *Bibliografía de la Rosa*. Price, bound, postpaid, \$1.00 from office of HORTICULTURE.

"Money in Grasses." Joseph Theodore Barenbrug, Barenbrug Burgers & Co., Publishers, Arnhem, Holland.—This is a book of sterling value to anyone interested in the grass seed industry and to every gardener who has to do with lawns and pleasure grounds. The introduction to this American edition is written by George C. Watson, who is the representative in this country of Messrs. Barenbrug, Burgers & Co., and we agree with Mr. Watson when he remarks therein that "Joseph Theodore Barenbrug has certainly put the agricultural interests and the world generally under a debt of gratitude for a good work well done." The book contains over one hundred pages bound in flexible cloth and there are appended fifteen plates of the leading varieties of natural grasses printed in green. One chapter is devoted to Arnhem and its connection with the grass export trade and is illustrated with many beautiful pictures of that quaint old town which is the centre of the grass seed industry of Europe. The use and value of the natural grasses, how to use the same in mixtures, how to lay down permanent pastures, the use of clovers and other leguminous plants in connection with them are the subjects of the general chapters, which contain minute descriptions of all the varieties with their characteristics and many tables of mixtures for special purposes together with valuable information on the important subject of adulterations. The price of the book is \$1.00 postpaid from the office of HORTICULTURE.

## CATALOGUES RECEIVED.

## CHICAGO PLANT NOTES.

Blooming plants are more abundant in the Chicago market this week, especially chrysanthemums. Robt. Halliday, October Sunshine, Alena, Mrs. A. K. Shaw, Estelle, Zenobia, Annette and Nio are among the varieties now at their best.

Nio, white pompon and Zenobia, yellow pompon, are a splendid pair.

Otaheite oranges, Christmas peppers and Jerusalem cherries are in the market and make very pretty window plants along with cyclamens and primroses.

## PLANT IMPORTS.

Hampton, Jr., & Co., 95 cs. do.; McHutchison & Co., 103 cs. do., 69 tubs laurel trees; Maltus & Ware, 176 cs. plants; C. B. Richard & Co., 56 cs. do.; August Rolker & Sons, 73 cs. do.; Smith & Bolzanthal, 78 cs. do.; Ter Kuile, 40 cs. do., 36 cs. laurel trees; Sundry Forwarders, 51 cs. plants.

Via Havre. H. F. Darrow, 58 pgs. seed; Peter Henderson & Co., 146 pgs. do.; H. Nungesser & Co., 200 pgs. do.; Sundry Forwarders, 236 pgs. do.

From Germany: H. F. Darrow, 1 cs. seed.

From London: Vaughan's Seed Store, 3 cs. mushroom spawn.

## NEW STEAMSHIP LINE FROM JAPAN.

Vice-Consul Walter Gassett, of Kobe, reports that the Asaka Shosen Kaisha, the second largest steamship company in Japan, which has hitherto devoted its attention to the local coasting trade and to that of neighboring oriental countries, has now completed arrangements to start a line to the United States, viz., a semi-monthly service, with six vessels, with Tacoma and Seattle as starting points and Hong Kong as the terminus. An agreement to this effect has been signed with the Chicago, Milwaukee and St. Paul Railway Company, and the service may consequently be opened at the beginning of August, 1909. The six vessels are now being built, three at Kobe and three at Nagasaki.

ceeding season until last year, when  
about twice as many were sold as pre-  
viously. The market widened until  
orders came from cities in the West  
and South for more than could be  
filled. Several firms made a business  
of supplying these globes to the trade,  
and made them by the thousand.

Ordinary fish globes in sizes from  
4-5-6-7-8 inches in diameter were used,  
and covered with a piece of glass, cut  
to fit the top of the globe. This was  
afterward improved upon by having  
a lid or cover of pressed glass made for  
the purpose. A red cord with tassels  
tied in a bow around the neck of the  
globe gives a finish and makes it a  
most complete and acceptable Christ-  
mas gift. These globes retail at a very  
good profit, the selling price ranging  
from \$1.50 to \$2.50 each, or as high as  
\$5, according to size and the trade at  
the stores handling them.

The Partridge Berry, as it is gener-  
ally called, although it is also known  
locally in different places as Squaw  
Berry, Two-eyed Berry, Rabbit Berry,  
Turkey Berry, etc., is botanically

**PHILADELPHIA OFFICE: Central Trust Building, 4th and Market Sts., Philadelphia**

named *Mitchella repens*. It grows all over the United States, east of the Mississippi, particularly in the pine woods, from Canada to Mexico, being most plentiful in the New England states. It is a low-grounding vine with glossy green leaves, bearing berries about the size of peas, of a bright holly red color. These can be gathered from the first of October on, packed in damp moss, and stored in cool cellars or in storage, where they will keep perfectly until wanted. The vines are picked with stems about 4 to 6 inches long, each with a berry, and tied in bunches of 50 sprays.

The trade price for them is from \$2.50 to \$3.00 per thousand sprays. In filling the globes a ball of sphagnum covered with green sheet moss is bound together with thread (Silkline is best), then moistened well and filled with the berry sprays. Three of these about two to three inches long are stemmed together with hair-wire, and made as pointed at the stem end as possible. Some workers place the sprays separately into the moss, using a pair of tweezers to handle them. Care should be taken not to make the ball of moss too large, as it cannot be

placed readily into the globe when finished, and also presents a too crowded appearance should the berries press against the glass. When covered from the air so as to retain the moisture, and stood in a light place, but not in the sun, these globes will retain their beauty in the house for several months, and have given the greatest satisfaction.

A new globe made specially for the purpose is introduced this season and has several points of merit over the old style fish globe, which has been used only because it seemed to be the only thing available. The new design presents a perfect globe, which is of much more elegant appearance. It consists of two parts, the globe or cover and the stand or base in which it rests, both of which parts are of the clearest crystal. The stand is so constructed that there is room for the roots of a fern, and in the larger size for a small earthen pan, which will hold several ferns, so that in its dual capacity as a miniature fernery and berry globe, it can be used at all seasons. When filled with ferns and berry vines combined, it is also, very pretty.

Ventilation is arranged for in the base, which is perforated so as to admit the necessary amount of air required. The accompanying illustrations give a good idea of the construction of the globe and its appearance when filled. **ROBERT KITT.**

### NEW RETAIL FLOWER STORES.

**Brockton, Mass.**—William Jahn, Main St.

**Calumet, Mich.**—Lutey Floral Co., Holman Block.

**Berkeley, Cal.**—Miss I. M. Adams, 2137 Center St.

**Providence, R. I.**—Jos. Kopelman & Co., 21 Washington St.

**Springfield, Mass.**—Frank J. Sullivan & Co., 178 Worthington St.

**Waltham, Mass.**—Waltham Floral Co. at Moody and Robbins streets.

**Racine, Wis.**—Racine Floral Co., Sixth St. Potted ferns were given as souvenirs at the opening.

The Northern Westchester Horticultural and Agricultural Society will hold an exhibition on November 6-8, at Mt. Kisco, N. Y. The Bailey cup is offered to private gardeners for 24 chrysanthemums, not less than eight varieties.

### BUSINESS CHANGES.

**Cleveland, O.**—H. Eickhoff has disposed of his business to Mr. Rock.

**Baltimore, Md.**—Guy Strickland has leased the Patterson greenhouses and will start in business at once.

**Freeport, Me.**—J. J. Turner will run the Casco Castle Greenhouses on his own responsibility this season.

**Waltham, Mass.**—R. W. Powers succeeds R. L. Goinsalvos and the place will be known as the Chestnut Street Greenhouses.

**Brooklyn, N. Y.**—Bonnet & Blake, wholesale florists, have leased a store and basement at 130 Livingston St., for a term of years.

**Darien, Conn.**—The St. John Greenhouse has been purchased by Ezra Hartright of Noroton and will be removed to that town.

### NOTICE

We desire to notify the trade that we are the owners of United States patent No. 489,218 for Floral Figure which claims:

"A florist's letter or figure stamped from a sheet of pasteboard or other suitable material, having an adhesive coating applied thereto and an outer covering of granules of sawdust appropriately colored to represent the petals of the *Helichrysum arenarium* substantially as described."

Letters which are a direct infringement of this patent are being put on the market and we intend to hold all who make or sell the infringing letters to strict account.

The lawful patented goods are in every respect much superior to the infringement.

## Flower Market Reports.

**BALTIMORE** The florists' business, in common with most others, suffers from the depression incidental to the presidential election year, it being reinforced this season by the unsettled financial conditions. With the thermometer rambling between 70 and 80 degrees, flower beds are still brilliant. The effect of the summer weather is seen in some varieties of chrysanthemums, as Pompafton, Amorita, Shaw, Robinson and a few others which have been crowded in several days ahead of their normal season. Roses and carnations are abundant. Sweet peas and violets are in limited quantity only.

**BOSTON** It is not possible to say anything complimentary concerning the flower market this week. There are not words expressive enough in the English language which at the same time would be permissible in type to represent the feelings of growers and wholesalers as they contemplate the magnitude of the supply and the paucity of the demand for their product. There is no choice to be made of any particular class as doing better than others, but perhaps it can be said in fairness that the white carnation is in a little worse predicament than anything else. In roses, if anything sells it is apt to be Killarney.

**CHICAGO** Only the most optimistic can see much change in the condition of the Chicago flower market. Unfavorable weather has prevailed throughout the month, and consequently October business has not been what it generally is. There was stock in abundance—in fact, too much—but it would not hold up after it was taken from the ice box. At the end of the week the weather cooled, followed by a drizzling rain which quickly decreased the quantity of stock, and the last week of October opened up with a slight increase in business, mostly in chrysanthemums. Roses, which had dropped to about one-half their former price when chrysanthemums came in, are not yet restored to normal. Later varieties of chrysanthemums are taking the places of the early ones. Sweet peas are in the market, and *Bouvardia Humboldti* is a specialty at McKellar's. Lilies are not seen in any great quantity. Lily of the valley is in fair supply. Orchids are more abundant, and the price a little lower. *Cattleya labiata*, *Vanda coerulea*, *Oncidium Rogersii* and *Dendrobium formosum* are the varieties now offered. Violets are coming in better as the season advances. The season has been very unfavorable so far both for the growing and the shipping of violets. Out-of-town orders for All Saints' Day are beginning to come in. Bassett & Washburn are filling large orders for chrysanthemums to Texas. Each bloom is wrapped in tissue paper for shipping.

**LOUISVILLE** Business the past week was very quiet, nothing moving any too well. Chrysanthemums sold some and are very plentiful. Roses and carnations are good and abundant, but bring small prices, considering the

quality. Other stock is plentiful, but has only a slow demand.

**PHILADELPHIA** Market last week very congested, and while business was fair, prices were very unsatisfactory on most lines. Immense quantities of low grade to medium chrysanthemums, a large proportion of which went begging. The weather is unseasonably warm, crops unseasonably heavy and demand unseasonably slack. The flower trade may therefore be said to be in the delightful situation of "hell on one side and the iron works on the other." The rose market is about as healthy as any—the supply not being so very far ahead of the demand. If My Maryland keeps its summer and fall pace up during the winter and spring it will prove the greatest thing in many a day, both for grower and retailer. Two lots of White Killarney have been on view at one of the wholesale centres, and it would seem that the keeping qualities of this new claimant have not been exaggerated. Carnations are more plentiful, but we regret to report quality nothing extra. The warm weather has been especially hard on single violets. Pansies are excellent, and meet with ready sale.

**TWIN CITIES** Retailers and wholesalers in the Twin Cities report business picking up. Owing to the warm weather of late it was not as good as might have been expected; but the week past it was increasing and the outlook for the rest of the month seems to be promising. Violets are just commencing to come in. Demand and supply in other cut flowers are about equal, except on lilies, which are scarce. Rice Bros. are shipping roses in bud to Seattle, Wash. where they are used as hatpins after being treated with some solution, so prepared that they are supposed to last for a long time.

**WASHINGTON** There seems to be a tone of improvement in both wholesale and retail markets over last week but the unnatural heat of the past week has very decidedly impaired the quality of the greenhouse products. Cosmos is very much injured by a bug which feeds upon the petals and comes with the warm weather and while there is any amount of the bloom a great deal of it is not fit to handle.

### PERSONAL.

Hernian Myers of Chicago has taken a position with the Columbine Gardens, Westminster, Colo.

Visitors in Boston: L. J. Reuter, Westerly, R. I.; John W. Gibson and Wm. Jurgens, Newport, R. I.; Conrad Schultz, Westerly, R. I.

Four members of the family of ex-Judge W. B. Sands, of Baltimore, have been seriously ill and we regret to report that all are not yet out of danger.

### NEW YORK FLOWER MARKET.

There is no improvement in this market; in fact, conditions are worse than last week. Chrysanthemums are coming in fast more than can be disposed of—and everywhere in the market they are in evidence. White and yellow predominate and prices are very low. Beauties are plentiful, quality good. Brides, Bridesmaid, Killarney, Richmond and other teas are in little demand and averages are low. Carnations are cheaper and in larger supply than usual for October. In fact the market is choked up with every kind of material, for which there seems to be no immediate outlet. Quotations on cattleyas, lily of the valley and violets are lower than ever at this season. Adiantum is not wanted at all, but asparagus can be sold in moderate quantities. Of all the stock coming into the market there is hardly one that appears to have the call.

### A CORRECTION.

In your issue of the 24th inst., you mention C. A. Bayer as the successor to Starke & Co. Please correct same, as I am not the successor, as I have opened up an entirely new business, which bears my own name.

CHARLES A. BAYER.

52 W. 29 St., New York.

### GREEN GALAX.

Best from the woods, per 1000 shipments, regular size, 400, per 1000, small size for bunching Violets, 350, per 1000, discount on 5 cases or more. Kalmia or Mountain Laurel, \$2.00 per case. Holly \$2.50 per case. Bronze Galax, in Dec. and Jan. 400 per 1000.

Terms: Strictly cash. All shipments North and Northwest, made from our Warehouse, Galax, Va. Express and freight rates less than from N. C. points. We are experienced packers. We guarantee satisfaction. Look us up in Town or Brattlestreets.

W. M. WOODRUFF & SON Lowgap, N. C.

## Green Mountain Ferns

We are still gathering ferns among the Green Mountains of Southern Vermont. Let us send you a sample case.

G. J. WALKER, - Savoy Centre, Mass.

# Buyer's Directory and Ready Reference Guide

Advertisements under this head, one cent a word. Initials count as words.

Display advertisers in this issue are also listed under this classification without charge. Reference to List of Advertisers will indicate the respective pages.

Buyers failing to find what they want in this list will confer a favor by writing us and we will try to put them in communication with reliable dealers.

New York.

Kilmdead Tobacco Dust.

For page see List of Advertisers.

"The Fumigating Kind Tobacco Pow-  
der"—The first on the market and the kind  
that has so many imitators, has our guar-  
antee tag of satisfaction or money back,  
and "The Moon Trade Mark" on every bag,  
\$3.00 per 100 lbs. The H. A. Stoothoff Co.,  
Mount Vernon, N. Y., Makers and sellers.

"The Black Stuff Fine Tobacco Pow-  
der"—Green flies, and black ones too, die  
on sight of the bag. 'Tis fine as flour, and  
made from the black strong tobacco; for  
dusting on foliage it has no equal. The H.  
A. Stoothoff Co., Mount Vernon, N. Y.,  
Makers and sellers.

APHICIDE (nicotine paper) costs less per  
effective fumigation than any other paper  
made. We guarantee this. We sell direct  
to the grower; the middleman's profit is  
placed in the nicotine strength of the pa-  
per. 24 sheets, each sheet 24 inches long,  
65c. postpaid; 144 sheets, each sheet 24  
inches long, \$3.50 express paid. 288 sheets,  
each sheet 24 inches long, \$6.50, express  
paid. The H. A. Stoothoff Co., Mount Ver-  
non, N. Y., makers.

We have room for your Advertisement. Anything from Cent a Word in Buyers Directory to a Double Page Announcement.  
If you want Fall Business Get Busy NOW.

Bauler Bros. is the name of a new firm in Jonesville, Mich. Joseph Bauler had charge of the greenhouses of the Guardian Angel Orphan Asylum in Chicago, and his brother, Nicholas Bauler, was an employe at Vaughan's Seed Store. They will have greenhouses and a retail store and expect to grow enough for their own trade and also to ship to the Chicago market. Miss Gunderburg, of the Flower Growers' Market, will handle their stock. Miss Gunderburg is said to be the only woman in the U. S. in the flower commission business.

## A large, dark, cylindrical metal drum or barrel with two handles. It has a weathered appearance with some rust or dirt on its surface.

### Why My New Curved Iceless Eave is Far Superior to Anything on the Market Today

- 1st. No sash bars incased in iron, thereby eliminating all danger of bars decaying.
- 2nd. Can be used in conjunction with iron frame construction, thereby doing away with that very objectionable feature, "columns."
- 3rd. Roof bars with drip grooves, which act as conductors to carry away the condensation: Result, the driest roof ever used for greenhouse purposes.
- 4th. **THE MOST IMPORTANT OF THEM ALL.** The very small increase in cost over the ordinary style of construction which makes it possible to be used for commercial as well as private purposes.

**William H. Lutton,** Horticultural  
Architect and Builder  
West Side Ave Station (C.R.R. of N.J.) Jersey City, N.J.

## Take This U-Bar Palm House, for Instance

and you can see at once how decidedly more effective this curvilinear, circular house is than a square shaped affair, or even one with octagon corners, would be. Fact is, the U-Bar is the only construction that can be used in building a successful circular palm house — it is the most adaptable construction of the day. It is the ideal construction for private estates, parks, public institutions and florists' show rooms. Send for catalog.

## Early Flowering Chrysanthemums

Mr. Brown takes me to task in your last week's number for contradicting myself in regard to English early-flowering chrysanthemums, the difference being between my statement at a lecture in Boston a year and a half ago and my recent notes in the *Florists' Review*.

If Mr. Brown will read my notes of September 24th over again carefully he will find that I was not referring to the early-flowering varieties as that term is generally used, but to a new strain of early-flowering single varieties that Mr. Wells has on trial at present. If Mr. Brown will read my original notes again he will find that I first spoke of the early-flowering varieties meaning the double kinds and gave a list of the kinds that were in flower at that date, and then I passed on to the following paragraph.

"Early singles were represented also by many thousands of plants, a batch of seedlings being quite distinct. I do not think that these singles would flower so early with us, nor as a matter of fact do we want them, since we have no call for stock till the end of September, but I do not see why they should not be largely planted as border plants to flower outside when the early frosts have caught many of the tender bedding plants." That is the paragraph, Mr. Editor, and in the language of Patrick Henry, "If that be treason make the most of it."

To elaborate on this paragraph I would say that Mr. Wells has a new strain of early singles that are not yet on the market and it is to these singles that I was referring as possible useful border plants for us. Possibly my statements may not appear so contradictory with this explanation.

I see no reason to change my statement made before the Gardeners' and Florists' Club that the early-flowering double varieties are comparatively useless with us, judging from my own experience. It does not of course necessarily follow that because a plant will not do in New Jersey it will not do in Massachusetts, but it very frequently follows, nevertheless. My experience in this respect is similar to the experience of other importers who dropped them after one trial.

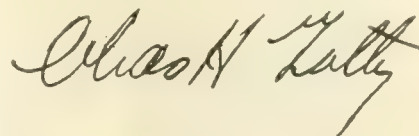

A recent note from W. N. Craig of North Easton mentions that he has had some splendid plants this season and that they were in ahead of any other chrysanthemums. I was very pleased to note this because if they will come they will be warmly welcomed, but to say that they will succeed all over the country, in the light of the knowledge we have, is too sweeping.

Personally I think that our hope for the future lies more in seedlings bred here from the early-flowering types than in importations. An instance of this is seen in Golden Glow which has made good all over the country as an August or September-flowering chrysanthemum. One of the parents of this variety was Carrie, an early-flowering English variety. By getting a start of native styles we may eventually be successful.

Some growers who got a very early bud on Golden Glow found that the flower wilted, as the stem got so hard that the water could not pass up through it so that Golden Glow has its limitations as regards earliness in different localities. It is entirely a question of climate as I see it; where the sun is so hot that the plants get hidebound success is impossible.

I am entirely in sympathy with all the good words Mr. Brown says in favor of the early-flowering kinds, but when he speaks of the profit to be derived from their

culture it is another story. Their usefulness is unquestioned, but there is not much money to be made on chrysanthemums before the end of September or early October. I cannot see how a market can be created in the large cities before the residents get back from the country, and most country florists find asters and such stock ample for the limited call they have at that season. Personally I am looking for a flood of Golden Glow next fall and the market to be glutted right from the first and I can only hope that I may be wrong in my surmise.

Madison, N. J.

## Seasonable Requirements of the Ornamental Evergreens

The summer and, so far, the autumn of 1908 have been noticeable for the absence of good soaking rains; we have not even had the heavy thunderstorms—except very locally—that are usual. High temperature and drouth are the conditions under which red spider and thrips luxuriate. I do not remember a season when these pests have been so abundant as they have this year among the deciduous trees. The oaks seem to have suffered most. It is, however, more particularly to the ornamental evergreen class that attention is directed, such as *Retinispora*, *Thuja*, etc. These mostly have a mass of somewhat fine fibrous roots, not far below the surface, and comparatively close to the base. Where attention to watering and mulching has not been given these have suffered from the drouth, aided by the red spider. Under these adverse conditions this class of plants can not pass through the winter unscathed. Just so soon as the ground is frozen solid, moisture is not available to the roots to supply the plant with that used by transpiration, which through the mass of leafage and the young twiggy wood during bright sunshine, often accompanied by keen drying winds, is much greater than is generally supposed. Thousands of this class of plants are ruined from this cause alone.

The rational means of preventing this loss is to be quite sure that the ground is thoroughly soaked, before freezing takes place, and then heavily mulched with any material except manure. The sap in this class of plants is not nearly so dormant in the winter season as it is often supposed to be. Evaporation takes place quite copiously sometimes, especially toward the spring while the ground is yet frozen solid, sometimes deeper than the roots of the plants extend. This loss from evaporation must be supplied to the plants from the roots by osmosis and unless conditions are such that this can take place the plants must suffer, hence it so often happens that plants which have passed through the winter succumb at this season. Plants when in the nursery rows shelter each other to a very considerable extent and snow remains longer among them by reason of the shade; it is where they are planted out singly or in small groups that the greatest harm is done, and this could be reduced to a minimum, if not entirely prevented by the simple precautions herein suggested.

the result of the election was a most commendable demonstration of common sense on the part of the American people and the balance will surely agree that it promises well for a quickening into new life of our stagnated activities and a new impulse for the current of mercantile enterprise the stopping of which had so rudely interrupted the prosperity of all branches of commercial horticulture.

### For the public good

We give space gladly in this issue and in others of recent date to notices of the public displays of chrysanthemums and other greenhouse flowers which at this season of the year are given in the conservatories of philanthropic citizens of means or at the greenhouses connected with the public parks of many cities. Probably no public expenditure of equal amount goes further as an elevating and refining influence. The tremendous crowds which, as we all know, cannot be coaxed into a flower show of the prevalent type, but take fullest advantage of the park displays, afford sufficient evidence of popularity and, viewed in this light, there can be no doubt of the wisdom of providing the people with these gardens under glass with their sweetness and cheer during the dreary months when outdoor verdure is gone. A great public park system any where outside the limits of perpetual summer and lacking the adjunct of well-kept conservatories certainly falls far short of its possibilities for usefulness.

### The right kind of a florist

We take pleasure also in chronicling the little local shows given at their places of business by enterprising and public-spirited florists, as fall openings to attract the people and interest them in the products of floriculture. A closer acquaintance on the part of the people with the goods which the florist, seedsman or nurseryman have to offer is at all times to be desired and any prestige and stimulus to the business of the toiler in any department of horticulture deserves to succeed, from whatever standpoint we may view it. The man who has the will and the energy to undertake the extra labor and expense of turning his establishment into an attractive and well-advertised show place for a few days at this season of the year is the sort of florist HORTICULTURE likes to encourage. He is pursuing the right policy and is in no danger of annihilation by his rivals who neglect these wise means to an end to attract the notice and foster the good will of the community within their reach.

### Stagnation at home and abroad

The aggravating conditions which have plagued our flower growers so severely during the past few months seem to have a sort of counterpart on the other side of the Atlantic, where they attribute their distress principally to the extraordinary warlike conditions. We read in a London contemporary that the flooding of the markets with abnormal quantities of floral produce has brought about the downfall of prices in every section, "not a lessened demand but a lessened supply" and "at the hour of closing the business day, hundreds of boxes of such perishable stuff as cut lilies, valley, gladiolus and chrysanthemums were unsold." "Ask me what prices buyers are paying this morning," said a well-known flower merchant, "and I will tell you, my money that I can get." This remark sounds very familiar to one who has had occasion to traverse the wholesale flower markets on this side and has undoubtedly been uttered in almost identical words hundreds of times during the past few weeks in New York, Philadelphia and Boston. The buyer, if any, has been making the price of late.

Effect of the election leaving no opening for apprehension, just as we have found it to have it, regardless of the public preferences, the national

election is over and promptly and business men have been able to find confident activity in the land—signs of progress and prosperity. We are sure that a large majority of our readers are satisfied that

## INDOOR FRUIT CULTURE.

Paper Read by William Downs before the  
Gardeners' and Florists' Club of  
Boston.

No doubt to many people it may seem unnecessary in this land naturally prolific in fruits to go to the trouble and expense of growing fruits in greenhouses. Still if we wish (at least in the greater part of this country) to get fruit of the highest order and greatest perfection, we must resort to some method whereby we can control the conditions as regards temperature, moisture and feeding, to achieve that measure of perfection so greatly desired by that critical part of the public who are always ready to pay the enhanced price for the superior article.

## Superiority of Forced Fruit.

Fruit growing is not as yet very extensively carried on in this country, but I venture to predict that in the future it will be to a much greater extent. And the ever increasing travel to the old world will play no small part in that growth. So many of our employers see, whilst over there, what is accomplished in the line of growing fruit in greenhouses and realize how much better flavored it is than the outdoor fruit, that they naturally want to have the same in their own gardens.

My employer said to me once that, previous to eating peaches from her greenhouse, she had never tasted one. She had eaten what were called peaches, but they were generally too hard and unripe, or overripe. Again, too, since forcing strawberries for the table, she does not care for the outdoor ones. A gentleman, this last summer, to whom we sent our forced strawberries, asked the name of them, as he had never eaten such. At that time he had the same variety in his own garden. While we must, I suppose, give the palm for general admiration to our beautiful flowers, still no doubt there is something in a well-grown house of grapes or peaches that no house of flowers can command. Perhaps it is best explained by the old saying, that "the nearest way to a man's heart is through his stomach."

## Side Uses of a Fruit House.

A point of objection sometimes taken is, that fruit houses are for a considerable part of the year of no service. This may be true if they are kept for fruit growing alone, (and right here I would say if they can be so kept so much the better), but with judicious care they can be made very serviceable in many ways. For instance, in the fall they can be used for finishing up bush chrysanthemums and storing other stock of that nature; again, in the spring many things can be brought along when starting up, so that they may be made as generally useful as almost any greenhouse, for any of them must necessarily be at some season or other nonproducing. Therefore on the whole, I think a fruit house as useful as any other greenhouse.

While no doubt the subject of in-

## A GLADIOLUS OF MERIT.

The flower shown (seedling 97), one of E. D. Thompson's productions, a seedling procured after seven years' crossing on *Gladiolus May*, is a much larger flower, pure white, suffused with carmine blush on outer ends of petals.

The brownish tinge on the two lower petals in May is entirely done away with. The color is even, not striped. Full earlier than May, and a strong spike. In intense sunlight, more color shows.

door fruit growing would include apples, plums, pears, etc., it is my purpose tonight to speak of those we more generally understand by the term—grapes, peaches, nectarines and strawberries,—these being the main crops so produced.

## Grapes.

The first consideration in the growing of grapes, is the structure, aspect, and location of the house. As regards the location an open, dry and well-drained piece of ground is necessary, for while you can and must make your house so that it can be perfectly drained, it is so much easier to do so when the ground is well drained naturally. As regards the aspect, I think a house running north and south, in the case of an even span, is the best, for you then get sunshine all over the house at some part of the day. If it is to be a lean-to, a southern aspect would be the best, and while I have seen good crops and fine fruit grown in lean-tos, I should never advise building such a house. I think they are seldom built in these days, from economy if nothing else, as it costs as much if not more to build the wall as it does to erect the other half of the house.

Now right here I am going to mention a part of the subject with which I have had no experience and shall therefore not attempt to advise; but I bring it into this paper with the object of finding out if any one present has had any experience in that line,—namely growing grapes in a green-

house in the natural soil without any prepared border. I have heard of it being done, and it is practised in the Channel Islands, but their climate is not ours.

## The House and Border.

A house twenty-five feet wide makes a good serviceable one, and the matter of length must be left to meet the requirements, but generally from thirty to fifty feet, this giving all the fruit that can be used during its particular season, especially so in the case of early fruit, for any ordinary family.

The border is the next consideration and in regard to this there has been much discussion as to whether it shall be partly inside and partly out or altogether inside; my experience has been that it can be best taken care of and better control kept of it when altogether inside. Some, however maintain that with the outside border the vines will last longer, but unless great care is taken to keep the outside border well covered and warm at starting time, a very indifferent break will be the result. In very wet seasons sometimes, just when you need the minimum quantity of water, your border is getting soaked and cracked fruit is likely to result, as well as shank, that most dreaded trouble of grapes. The border should be excavated to a depth of three feet and a layer of concrete six inches thick laid over it, sloping to a central point for drainage, the walls completing the receptacle for the border.

(To be continued.)

# NEWS OF THE CLUBS AND SOCIETIES.

## FLORISTS' CLUB OF PHILADELPHIA.

The meeting on election night was well attended although no special attraction was on the program. John A. Shellem exhibited his new ruby chrysanthemum "Maurice," also a yellow pompon, very rich and unique. The Moore-Livingston Co. exhibited their new plant stand both the galvanized and the oxydized copper patterns—and these were highly spoken of by the committee. Committees were appointed as follows: Club Room—D. Rust, E. C. Dunham, Geo. Craig, games—Wm. Graham, D. T. Connor, Wm. Robertson; membership—H. F. Michell, Chas. E. Mehan, W. E. McKissick; exhibits—Robert Kift, Leo Niessen, Jno. C. Gracey; novelties—Edwin Lonsdale, Robert Craig, J. W. Colflesh; entertainment—C. H. Grakelow, E. Bernheimer and Arthur Niessen. A smoker concert is contemplated for the first Tuesday in December, and an appropriation was made to help defray the expenses of same. Mr. Grakelow and his able helpers have started out to make this the banner year in fun and frolic, so that even the old pessimists like Adolphe Fahrenwald will feel that they have got their money's worth in belonging to the club. The games committee also promise big things in the near future.

## MASSACHUSETTS HORTICULTURAL SOCIETY.

The annual meeting of the Massachusetts Horticultural Society for the election of such officers for the ensuing year as the by-laws require, and for the transaction of such other business as may be legally presented, will be held at Horticultural Hall, 300 Massachusetts avenue, Boston, at 11.45 A. M., on Saturday, Nov. 14, 1908. The officers to be elected are: A president, a vice-president (for two years), one trustee (for two years), four trustees (for three years), a nominating committee of five members.

The election will be by Australian ballot and the polls will be open continuously between the hours of twelve, noon, and four in the afternoon.

WILLIAM P. RICH,  
Secretary.

## AMERICAN ROSE SOCIETY.

President Poehlmann requests that any and all members of the American Rose Society who can, will attend a meeting of the Executive Committee to be held in the Casino, Chicago, on November 12th.

The judges to act in the National Flower Show for roses as appointed by President Poehlmann and filed with the secretary of the National Show are as follows: Robert Simpson, Wm. F. Gude, John N. May.

This Chicago show is calculated to be the most extensive and elaborate popular exhibition of the floral art ever attempted in a hall of eighty-five thousands of space.

BENJAMIN HAMMOND,  
Secretary A. R. S.

## CHRYSANTHEMUM SOCIETY OF AMERICA.

### Work of Committees—Report on New Chrysanthemums.

No. 5. Yellow. Jap. Exhibited at New York, Oct. 24, 1908, by Howard Nichols, Yonkers, N. Y. Scored 81 points, commercial scale.

Pockett's Crimson. Jap. Color, bright crimson with gold reverse. Exhibited at New York, Oct. 24, 1908, by C. H. Totty, Madison, N. J. Scored 89 points exhibition scale.

Mrs. O. H. Kalm. Jap Inc. Color, mahogany with old gold reverse. Exhibited at New York, Oct. 24, 1908, by C. H. Totty, Madison, N. J. Scored 87 points commercial, 85 exhibition scale.

Charles H. Totty. Jap. Color, bright mahogany gold reverse. Exhibited at New York, Oct. 24, 1908, by C. H. Totty. Scored 88 points exhibition scale.

Golden Harvest. Jap, slightly incurved. Color, bright golden yellow. Exhibited at Philadelphia, Oct. 26, 1908, by Gustavus A. Lotze, Glen Burnie, Md. Scored 90 points commercial, 85 points exhibition scale.

Mary Warrick. Jap. Ref. Color, light pink shading to white. Exhibited at Philadelphia, Oct. 26, 1908, by Warrick Bros., Washington, Pa. Scored 84 points commercial, 86 exhibition scale.

Yellow sport of Miller. Jap. Color, light yellow. Exhibited at New York, Oct. 29, 1908, by A. Herrington, Madison, N. J. Scored 86 points exhibition scale.

The name of variety Golden Harvest will have to be changed as there is a variety by that name already sent out in 1895 by the E. G. Hill Co.

President Loveless has appointed the following committee for Boston: Elijah A. Wood, chairman; James Wheeler and Wm. Nicholson. Ship flowers to Boston Flower Market, 1a Park St., care chairman.

DAVID FRAZER, Secretary.

## SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

### Freight Rates on Cut Flowers.

At the Niagara Falls Convention the Society of American Florists turned over to its Legislative Committee certain matters affecting the rates on empty packages and the cost of gross weight where ice is used. Mr. Edward Reid of Philadelphia, Mr. Alfred Langjahr of New York, Mr. Patrick Welch of Boston and Mr. Geo. Reinberg of Chicago have rendered efficient service in getting definite facts together.

The American Express officials have given courteous assistance and the matter will soon be placed in the hands of Mr. Bradley, 65 Broadway, N. Y., the American Express company's representative in the general board of Traffic Managers of the trunk line express companies.

BENJAMIN HAMMOND,  
Chairman S. A. F. Legislative Committee

## FLORISTS' CLUB OF WASHINGTON.

Promptly at 7.30 o'clock on the night of Oct. 27th two special cars left the station at 12th and Penn. ave. having on board between 35 and 40 florists who were bound for the hospitable home of David Grillbertzer, about three-quarters of a mile out of Alexandria, where the regular meeting of the Florists' Club of Washington was to be held. The meeting was opened at 8.30 by Pres. Kramer, in the spacious parlors of Mr. Grillbertzer's home. The rooms were beautifully decorated in autumn leaves and chrysanthemums. Especial interest centered in the approaching chrysanthemum show. E. C. Mayberry was appointed chairman of the reception committee and John Robertson chairman of the award committee. All predictions point to a most beautiful exhibition. The show will open in the old Masonic Temple on Nov. 12th, and continue through the 15th, on the afternoon of which day there will be a sacred concert. The matter of the adoption of a universal scale of judging points was again taken up and discussed at much length. It was voted that each member submit his ideas of a scale of ratings, these to be forwarded to the National Committee by Nov. 3rd, hoping to have a general scale adopted whereby all table and mantle decorations and "set pieces" can be judged. After more discussion all were invited by the host to adjourn to the packing sheds where well-laden tables awaited the visitors.

An orchestra played during the collation. The walls were artistically draped and carnations, roses and chrysanthemums added their fragrance and beauty to the occasion.

## BUFFALO FLORISTS' CLUB.

The regular meeting of this club being held on the evening of Oct. 29, on account of the regular meeting falling on election eve, the attendance was smaller than usual, but considerable business matters were acted upon, especially the Flower Show and banquet which is to be held at the Iroquois Hotel on Nov. 18. The club extends an invitation to all florists, plantmen, nurserymen and gardeners. The committee is working hard to make this affair a grand success.

## CLUB AND SOCIETY NOTES.

The management of the Portland, Oregon, Rose Show festival held annually in June, has already started on its financial campaign for 1909 and has pledged for nearly \$10,000.

The Hingham Agricultural and Horticultural Society (Mass.) will hold their jubilee dinner on November 11. Ex-Gov. Long will preside. The chrysanthemum show will be omitted this year.

The Detroit Florists' Club held its annual fall outing to Mt. Clemens on Nov. 5th, leaving Detroit by special car at 9 a. m., and visiting the various greenhouse establishments in Mt. Clemens.

## A HITCHINGS HOUSE.

In these days when the product of the rose house goes a-begging and the pocket book of the grower gets more emaciated every day the attention of the wise manipulator is constantly fixed upon the problem of so regulating and directing his crops that when the good-time-coming has put in its appearance he will be ready to meet it with one of those luxuriant harvests from which the dollars stand wistfully ready to jump into his coffers. That was the trick our friend Eber Holmes at Montrose on the outer fringe of Boston's environs was trying to turn, when we looked in upon him the other day. "Cutting out the small wood to induce strong growths to start now for the holiday cut" said Mr. Holmes as he vigorously plied the knife.

It is a big establishment over which Mr. Holmes presides although it consists thus far of but two greenhouses. One of these is 32x500, the other 54x300 ft. The latter is of Hitchings construction, built two years ago and in the good-time-coming is to be extended to a length of 1100 ft. It is 25 ft. from the ground to the ridgepole and N. F. McCarthy, the opulent owner, declares it to be the limit of achievement to date in greenhouse building and a model of perfection, good enough to tie to for many years to come. It is of steel frame and every nut, bolt and foot-piece is electro-galvanized. Each support is imbedded in a cement base one foot square and three feet deep, and the arrangement of the ventilating apparatus is the ideal of convenience and accuracy.

What are grown in the houses? Nothing but roses—Bride, Bridesmaid, Killarney and Richmond—the big 4. There are small plantations of the newer aspirants and among them Queen Beatrice gives especial satisfaction with its productiveness and its beautiful color particularly under artificial light. Keep your eye on the Montrose Greenhouses.

## AN INVITATION.

The Buffalo Florists' Club will hold a Flower Show November 18th at the Iroquois Hotel parlors. Exhibition opens at 3 P. M. and banquet at 8 P. M. The Committee of Arrangements have endeavored to procure flowers of interest to you. A paper will be read by Prof. John F. Cowell on his visit to the National Flower Show held at Chicago.

The Club extends to you an invitation for the afternoon of November 18th, and also to the banquet in the evening. The banquet will be a stag affair; the price of banquet tickets will be \$1.00.

The Club will be very grateful to you should you have any flowers or plants of interest that you could send (not necessarily chrysanthemums, but any other flowers of commercial value will be acceptable). Exhibits sent are at the disposal of the Committee.

Yours respectfully,

BUFFALO FLORISTS' CLUB.

## CATALOGUES RECEIVED.

Peter's Nursery Company, Knoxville, Tenn.—Vegetable Plants.

The Advance Company, Richmond, Ind.—Illustrated Folder of the Advance Ventilating Apparatus, Pipe Carriers, Brackets, etc.

## FOUR GREAT CHRYSANTHEMUMS.

Virginia Poehlmann (Poehlmann).

See Cover Illustration.

An ideal commercial; a round incurved, finishing pure white, stem stiff, foliage perfect; everybody likes it. Oct. 15.

Mile. Marguerite Desjouis (Liger).

A pure paper-white, perfectly globular, a splendid incurring commercial with long stiff stem and beautiful foli-

age, perfecting a very large per cent. of blooms, lasts for a very long time in perfect condition; can be had from September until late November.

Madagascar (Calvat).

A grand yellow—pure deep golden color, very full, slightly reflexing, of

very large size, with stiff stem and abundant small foliage. Oct. 15 to 20. A fine commercial.

Fee Orientale (Nonin).

An "early Guy Hamilton," a very beautiful, informal white with deep

canary center. Oct. 15. A very free, easy doer, perfecting every flower.

The above are all very charming and valuable sorts, splendid additions to our earlies.

*E. G. Hill*

## PHILADELPHIA NOTES.

Joseph Heacock Co., of Wyncote, report October palm business twelve per cent. ahead of the same month last year notwithstanding the panic and the election. Good goods and publicity is a winning team if well driven.

Edw. J. Fancourt will represent the Pennock Meehan Co. at the National Flower Show at Chicago. S. S. Pennock of the same firm also expects to make a flying visit to the great exhibition.

The Moore-Livingston Co. of this city and Lansdowne, Pa., will have their new telescope plant stand on view at Chicago in the exhibit of the Henry A. Dreer Co. E. J. Fancourt will also have samples of this useful invention. The latest pattern is made of oxidized copper, polished like gun metal, just the thing for use in church or parlor decorations.

A fire broke out at the Irwin greenhouse (late Graham's) at Logan on the 28th ult. The boiler shed was destroyed and the ends of four greenhouses. Damage about \$1,000.

Robert Kift is having a big run on his new miniature fernery and berry globe. It is proving one of the best selling novelties ever introduced to the flower trade.

W. E. McKissick announces that on November 2 he took into partnership his two brothers, Ayres P. and Howard E., and that the business will henceforth be conducted under the title of W. E. McKissick & Bros., at the old stand, 1619-1621 Ranstead street.

## PLANT IMPORTS.

Entered at New York, October 28th to November 2nd, 1908:

From Holland: A. T. Boddington, 1 cs. bulbs; H. Bischoff & Co., 7 cs. trees; H. F. Darrow, 17 cs. plants, 2 cs. bulbs; Wm. Elliott & Sons, 7 cs. plants, 11 cs. bulbs; A. Gips, 4 pgs. plants; Wm. Hagemann & Co., 67 cs. plants; P. Henderson & Co., 153 bags seed; W. R. Huntington, 14 cs. plants; Maltus & Ware, 55 cs. plants, 8 cs. trees, 20 cs. bulbs, 3 cs. flower roots; W. A. Manda, 15 cs. trees; Mutillod Marius, 33 cs. plants; P. Ouwkerkerk, 7 cs. trees; Vaughan's Seed Store, 4 cs. bulbs; Sundry Forwarders, 1 cs. shrubs, 30 cs. trees, 43 cs. plants.

From Antwerp: H. F. Darrow, 18 cs. plants; Ph. Einsmann, 21 cs. do.; Wm. Elliott & Sons, 7 cs. do.; Fruit Auction Co., 7 cs. do.; Hussa & Co., 1 cs. do.; W. R. Huntington, 4 cs. do.; McHutchinson & Co., 34 cs. do., 100 tubs laurel trees; Maltus & Ware, 163 cs. plants, 10 tubs laurel trees; Julius Roehrs Co., 4 cs. plants; August Rolker & Sons, 72 cs. do.; J. Ter Kuile, 31 cs. do.; Sundry Forwarders, 5 cs.

Via Southampton: Hussa & Co., 6 cs. plants; Maltus & Ware, 9 cs. do.; Siegel, Cooper & Co., 32 cs. do.; Tice & Lynch, 5 cs. do.

Via Hamburg: Maltus & Ware, 3 cs. plants; J. M. Thorburn & Co., 12 bags seed; Sundry Forwarders, 130 baskets live plants.

## PASADENA GARDENERS' ASSOCIATION.

The First Annual Fall Flower Show was held in the big garage building, No. 161 W. Colorado st., Pasadena, Cal., Oct. 22, 23 and 24. From the beginning to the end the show was well patronized and proved a success in every way.

Although chrysanthemums are late for Southern California there were some very fine blooms, measuring from 10 to 12 inches in diameter, which were the main attraction of the show. A. Urquhart, gardener to D. R. Cameron, took first prize in all classes. F. S. Allen took first for Maman Cochet roses. Roses at this time of the year are rather scarce, but on the whole, made a very fine exhibit. Special award of merit was given to R. MacKenzie for adiantums and another for a magnificent display of orchids.

Certificates of merit were awarded to Mrs. W. S. Lourie for gladioli, Robert Pegg for collection of decorative plants and hanging basket of ferns; Park Nursery for hanging basket of ferns; Edward Rust of the Palm Nursery for Pandanus Veitchii; Howard & Smith, nurserymen of Los Angeles, one for dwarf Jap. trees and another for dahlias. There was also a good collection of fruit and vegetables. I. Lowe was awarded special prize for black squash; Mrs. M. B. Walsh, two awards for quinces and walnuts; Mrs. Dobbins special for strelitzia and other cut flowers; Rev. W. F. Cornett, collection of celosias; J. J. Broomall, special for sweet-scented dahlias; Louis Fried, special for chrysanthemums in pots.

A very fine display of water lilies, including Victoria Regia from the H. E. Huntington place, grown in the open, though not for competition, was the center of attraction. D. W. Coolidge was awarded certificate of merit for a most complete collection of economic plants in California, of which were over fifteen varieties of tropic and semi-tropic fruits grown in Pasadena.

Ross Seed Store was represented by a fine display of fancy gourds, seeds native plants and fruits.

H. E. GEORGE.

## EXHIBIT AT NORWICH, CONN.

A benefit chrysanthemum show under the auspices of the Parish Aid Association was held at the residence of Mrs. Wm. Camp Lanman on October 28. The prizes other than the silver were mentioned in the list were blue, red, yellow and white ribbons. The show was a success. Piazzas were closed in and piazzas and rooms decorated with plants and Japanese lanterns. The entertainment closed with a dance in the barn on the second evening. The sum of \$300.00 was realized. Alfred Flowers, gardener to Mrs. Geo. S. Palmer, Thos. H. Mead, traveler for Schlegel & Fottler and Oswald Laing from the Plant Estate served as judges.

## LIST OF AWARDS.

In the vase classes for chrysanthemums Mrs. W. C. Lanman, gardener Chas. T. Beasley won nine first prizes. Mrs. Frank Roath two firsts, one second and one third, A. S. Gilbert one first and four seconds, Schlegel & Fottler one second, Chas. H. Totty one third. Prizes for best vase arranged for effect, vase of pompons and vase of singles were won by Schlegel & Fottler. (silver tray), Alfred Mitchell, gar-

dener Gus Newman and Mrs. Lanman respectively. The silver cup for best display of named varieties was captured by Thos. W. Head, Mrs. Lanman second. In the plant section first prizes were won by Joseph Smith, A. S. Gilbert and Mrs. Lanman. A special was awarded to Chas. H. Totty for collection of singles. The silver tray for collection of hardy varieties went to Geo. S. Palmer, gardener Alfred Flowers, Alfred Mitchell being second.

Other prize winners were as follows: Basket Mrs. Lanman. Single violets—Mrs. F. L. Osgood, gardener M. Shea. Double violets—ditto. Cosmos—Geo. Palmer, Schlegel & Fottler and Mrs. Lanman. Carnations—Mrs. F. L. Osgood first, Schlegel & Fottler second and third, in all the classes. Roses—Mrs. F. L. Osgood, silver cup. Begonias—Mrs. Lanman first in two classes, Geduldig Estate in one. Specimen ferns—Geduldig Estate. A special silver cup was presented to Chas. Thos. Beasley, gardener to Mrs. W. C. Lanman as the largest exhibitor.

## MARIN COUNTY HORTICULTURAL SOCIETY.

The Marin County Horticultural Society's second annual exhibition held in San Rafael, Cal., Oct. 17, though in many respects not equaling the one held last year was a very creditable affair. As 'mums are chiefly grown out-doors here and the season being somewhat behind the later varieties were shown only in limited numbers. But what was a drawback to the 'mums favored the dahlias and the latter were largely shown, some good seedlings being among the number. Many of the newer varieties of roses (grown out-doors) were among the exhibits and although among them there were some fine blooms yet it was the wrong time of year for roses to be at their best. There was not much competition in the carnation class but some of the newer varieties appeared in good form. One bench contained about two hundred varieties of tuberous begonias some of them out-classing anything heretofore shown in this section. The awards were as follows:

Chrysanthemums—A. Taylor, four firsts, including silver cup for best 100 blooms, 2 seconds. F. B. Anderson, gardener W. Buehl, 2 firsts, 2 seconds, 3 thirds. Hotel Raphael, gardener T. P. Redmayne, 2 firsts, 1 second, 1 third. Mrs. Geo. Coffin, 2 firsts. H. E. Bothin, 1 first. A. W. Foster, gardener R. Lohrman, 1 first, 2 seconds. L. E. Douglas, gardener Garsen,

1 first, 1 third. M. H. De Young, gardener P. Uhlmann, 1 first, 1 second. Geo. A. Pope, 1 second.

Dahlias—A. W. Foster, 2 firsts, 1 second, 3 thirds. Geo. Pope, 2 firsts, including silver cup for best collection of 100, 3 seconds. F. B. Anderson, 1 first, 1 second, 1 third. M. Madsen, 1 first. W. H. Crocker, 1 first, 1 second. M. H. De Young, 2 thirds. S. E. Slade, 1 second.

Carnations—J. A. Carbone, first on 25 white, 25 pink, 25 red, best seedling and best collection; H. E. Bothin, second best pink.

Roses—Twenty-five roses grown outside, J. A. Carbone, first; S. E. Slade, second. Gladiolus—A. W. Foster.

Garden flowers—G. A. Pope, first; Mrs. Jones, San Rafael, T. Pomus, gardener, second.

Chrysanthemum Plants—Three blooms in 8 in. pot, H. E. Bothin, first; F. B. Anderson, second. Six single flowers in 6 in. pot, F. B. Anderson, first.

Six flowering plants—H. E. Bothin, first. Boston Fern in 12 in. pot—A. W. Foster. Decorative plant—Mrs. Gerstle, first; H. E. Bothin, second.

Specimen fern—Mrs. Gerstle.

Group decorative plants and ferns—H. Schluter, Laurel Grove Nursery, a very handsome collection, first; Hotel Rafael, second.

Bridal bouquet—Forest Floral Co.

## SPECIAL AWARDS.

Collection of Tuberous Begonias—H. E. Bothin.

Hydrangeas—M. Madsen.

THOMAS P. REDMAYNE,  
Secretary.

## MADISON, N. J.

The thirteenth annual Flower Show of the Morris Co. Gardeners' and Florists' Society fully sustained its reputation for putting up a high class show. In arrangement the exhibition was strikingly artistic, and the classes were so placed that when the judges came to pass on them they could go from one class to another in schedule order, thus facilitating their work. Practically the same committee of arrangements has gratuitously done this work since the organization of the club, and they improve in this work every year.

Perhaps the most striking object in the show was Wm. Duckham's central group of single chrysanthemums in many shades and colors, 10 feet high, 18 feet diameter. It was surmounted by a fine specimen palm and the vari-

CHRYSANTHEMUM SHOW AT U. S. DEPARTMENT OF AGRICULTURE

ous colors were brought out in relief by the rare foliage plants used in the group.

Arthur Herrington decorated the musicians' stage in the taste with palms, single stem chrysanthemums, Farleyense ferns, etc. The chrysanthemum part, and of course that is the main part, was as good if not better than ever. Wm. Duckham carried off the honors in the 6.6's class with Mary Donnellan, President Viger, C. H. Totty, Montigny, Mrs. N. Davis and Ben Wells. Mr. Duckham showed the possibilities of these varieties.

There may be wonderful novelties in other parts of the country, but it is certain that Totty has a half a dozen dandies. C. H. Totty which Duckham showed, is a giant crimson and they say does not scorch. Mrs. O. H. Kahn is another whopper in a beautiful bronze. Yellow A. J. Miller is better than its progenitors. Pockett's Crimson is fine and so is Lillian Warlick. They ought to make a record in Chicago. But all this does not mean that the old ones have passed. Appleton is with us yet and Merza, Wm. Duckham, Miss Clay Frick, and the "Biggest Flower in the Show," prize for which our genial past-president, John Heeremans sent a \$3.00 check all the way from "Palmetto Bluffs," S. C., where he is now employed laying out the estate for R. T. Wilson Jr., was awarded to a monster bloom of Lady Hopeton, grown by our president, Percy Herbert, of Florham Farms. So once in a while the back numbers are found in front.

A vase of carnation Georgia, from James D. Cockcroft was very fine, being a novelty of decided merit as shown here. It got a certificate of merit. The carnation classes were well filled and the competition was very keen. Wm. Duckham took the R. D. Foote prize for 100 blooms in four varieties with Enchantress, Pink Enchantress, Robt. Craig and White Perfection, all good varieties. Our rose classes were well filled for this time of year which was an agreeable surprise to many of us. L. A. Noe carried off the honors in American Beauties and in many of the other classes too. Peter Duff had four fine specimen chrysanthemums, and Aribur Herrington had one (Mrs. Trantor) with 800 open flowers.

The vegetable part of the show was perhaps the best we ever had. James Fraser of Cedar Court, won the A. T. Boddington and Peter Henderson prizes. The arrangement was exceedingly artistic, this being a requirement in the Boddington prize. H. B. Vyse was a keen second in the vegetable classes and the quality of his stuff was as good as ever shown in Madison. In the groups, John Downing gardener to Dr. McAlpin won the Pierson U-Bar prize with H. B. Vyse a very close second; both groups were 50 sq. ft.

A fine table decoration of orchids, Farleyense and other choice things was set up by John Jones of Convent. White Killarneys from F. R. Pierson Co., and Robt. Scott and Sons were grand and certainly did these exhibitors credit. Certificates of merit were awarded. Nephrolepis superbissima from F. R. Pierson Co., and Neph. Scholzelei from H. A. Dreer also got certificates of merit. H. B. Vyse, gardener to A. R. Whitney, had a superb table of flowers that made people stop and stare.

In the roll of honor for winners of first prizes are Wm. Duckham, James Fraser, John Downing, John J. Derivan, Harold B. Vyse, Peter Duff, Max Snieder, M. B. Metcalf, Philip Cox, C. H. Totty, Wm. Inglis, Arthur Herrington, Wm. G. Badgley, J. W. Wagner, L. A. Noe, Ernest E. Wild, Thos. W. Head, H. L. Hand, and Andrew R. Kennedy. And every one of them earned what they got for competition was never so keen nor the standard so uniformly high.

A few more things should receive especial mention; a display of about fifty plants of Lorraine begonia, pink and white, exceedingly well grown were shown by H. B. Vyse, that certainly did him great credit, and the orchid show of Lager & Hurrell, put a finishing touch to our show. Wm. Muhlmichel's monster Boston fern, too, was admired very much and Wm. F. Lyons' specimen Neph. Whitmanii, Celosia "Cedar Court Perfection" from James Fraser and the orchid display of Ordenez Bros. were worthy of notice. Many more things could be mentioned but neither time nor space will allow.

E. R.

#### PITTSBURG.

Mention of all the chrysanthemum establishments in the Pittsburgh district would be monotonous to Horticulture's readers. Yet it would be unfair to allow the season to pass without mentioning the magnificent flowers at G. M. Laughlin's. H. Price and his able grower J. Kemp have this year a display second to none in the neighborhood. The newer varieties are seen here to their advantage. O. H. Broomhead, purple; Mrs. Girard Foster, white; Mrs. Norman Davis, white; J. C. Neil, pale yellow; Mary Donnellan, yellow; Mrs. Joseph Sinnott, rosy purple, are all good. Wm. Jennings Bryan has been grown here for years. Mrs. Kemp remarked that he is very long winded but has a poor head. The Schenley Park exhibition which opened Sunday, Oct. 25, is quite up to the standard of previous years. This monster exhibit is as popular as ever, vast crowds passing through the greenhouses daily. Three of the largest compartments are given over entirely to chrysanthemums and in another house large groups of solid colors are grouped against the dark green of the permanent temperate plants. In one compartment the colors are mixed; in the remainder massing in solid blocks or grading from white through the varied shades of pink to deep crimson is the plan of arrangement. Some of the finest flowers are Mrs. Joseph Sinnott, Mrs. J. C. Neil, Mrs. Davis, W. M. Moir, Mme. Armand Detroyat, Mrs. Jno. E. Dunn, Mrs. Miller, Cheltoni, Beatrice May, Morton F. Plant, Brighthurst, and Mrs. Carrington. It is something of a relief after seeing so many chrysanthemums to pass into the other compartments where cyclamens, cosmos, lilliums of various species, begonias and other things are tastefully arranged. A number of well-flowered plants of Catleya labiata attracted considerable attention. Listening to the comments of the people who visited the greenhouses, nearly all of whom seem to take a personal pride in everything connected with these beautiful conservatories is not the least enjoyable feature of a Sunday afternoon visit.

J. H.

#### LOCAL FLOWER SHOWS.

**Salem, Mass.**—Supt. McCue, of Greenlawn Cemetery, has invited the public to inspect his fine array of chrysanthemums.

**Minneapolis, Minn.**—The first flower exhibit at the Lyndale Farmstead opened on Nov. 1. Chrysanthemums are the attraction.

**Winchendon, Mass.**—W. W. Rhuland is making an attractive public exhibition of carnation and roses at his Riverside greenhouses.

**Easton, Md.**—A chrysanthemum show was held in the rooms of the Mercantile Library during the last week in October, to which many growers made large contributions.

**Clinton, Mass.**—F. P. Sawyer, florist of Clinton, Mass., has arranged an attractive exhibit at his branch in Shirley, for Nov. 6 and 7. C. K. White is his representative. Floral souvenirs will be distributed.

**Schenectady, N. Y.**—Chrysanthemums were the leading feature at the greenhouses of W. T. Hanson on Oct. 31, when the Woman's Auxiliary of the Ellis Hospital held sway, but orchids, carnations and roses were also in evidence.

**Burlington, Vt.**—The greenhouses at the Experiment Farm were opened to the public last week when the large stock of chrysanthemums was at their best. Prof. Stuart, H. B. de Thestrup and others were in attendance to show the visitors about.

**New Orleans, La.**—The annual exhibition, prior to All Saints' Day, given by the Metairie Ridge Nursery Co., took place on Oct. 25. The New Orleans Horticultural Society were invited to be the guests of the company and a special car was chartered to carry them.

**Lewiston, Me.**—The greenhouses of Gen. S. H. Manning have elicited much admiration for the past two weeks, a huge crop of Black Hamburg, Golden Hamburg and Sweetwater grapes being the attraction. Some eight bushels of this luscious fruit have been disposed of already.

#### COMING EVENTS.

**Chicago, Ill.**—National Flower Show, Society of American Florists, Nov. 6-14.

**Boston, Mass.**—Massachusetts Horticultural Society, Chrysanthemum show, Nov. 6, 7, 8, 9.

**New Haven, Conn.**—New Haven County Horticultural Society, show, Nov. 10, 11, 12.

**Worcester, Mass.**—Worcester County Horticultural Society, chrysanthemum show, Nov. 12.

**Philadelphia, Pa.**—Pennsylvania Horticultural Society, annual exhibition, Nov. 10, 11, 12, 13, Horticultural Hall.

**Toronto, Ont.**—Ontario Horticultural Society, exhibition, Nov. 10-14.

**Little Rock, Ark.**—State Floral Society, show, Nov. 10-25.

**Lake Geneva, Wis.**—Gardeners' and Foremen's Association, chrysanthemum exhibition, Nov. 11, 12.

**Providence, R. I.**—R. I. Horticultural Society, Nov. 11, 12, fall exhibition.

**SHORT TRIPS FOR VISITORS TO  
NATIONAL FLOWER SHOW.**

HORTICULTURE'S representative in Chicago is Mrs. M. B. Hancock. Her address is La Grange, Ill., but she will be in attendance every day at the National Flower show and will be pleased to extend any possible courtesy or information and direct strangers to any place they wish to visit.

Poehlmann Bros. are among the largest flower growers in Chicago. Their greenhouses are at Morton Grove, reached by the Chicago & St. Paul R. R. from the Union Station. Tickets can be obtained at Poehlmann Bros.' city office at 35 Randolph street.

At the greenhouses may be seen a large variety of roses, carnations and chrysanthemums. Special attention might be called to the new white chrysanthemum, Virginia Poehlmann, which originated here last year.

The greenhouses alone are well worth seeing, for they cover over one million square feet of glass, and the new range now building will add 250,000 feet more.

Peter Reinberg's is the home of the new Marshall Field rose. He has grown it for five years and will place it on the market after the first of January, 1909. It is a light pink, has good shipping qualities, is very fragrant and remarkably productive. Chrysanthemums, carnations and roses are produced at this place, which includes nearly two million square feet of glass. It is reached by taking the Ravenswood branch of the Northwestern Elevated to Robey Station, and then walking eight blocks north. Mr Reinberg's city office and salesroom is at 207 Randolph street, where the genial smile of Leonard Kill will welcome Flower Show visitors.

Bassett & Washburn's greenhouses are located at Hinsdale, 18 miles west of Chicago on the C. B. & Q. R. R. Trains leave the Union depot every hour. It is an up-to-date place of state-of-the-art glass, and with the best money in the business of the country. This firm has a book, "The Flower Show," which may be obtained on order. The information given for the year is in the new O. P. Bassett leading the list with 50,000 plants. The O. P. R. is not a cooper but starts blooming about October and the Christmas in full

swing and keeps it up until July. Flowers large clear red, calyx and stem perfect. Visitors can leave Chicago at any time from 7.45 A. M., trains running every hour each way, and during the Flower Show Bassett & Washburn have made arrangements to have carriages meet each train and drive to the greenhouses.

J. A. Budlong's greenhouses are located at the terminus of the Lincoln ave. electric line, and also in close proximity to the Ravenswood branch of the Northwestern Elevated R. R. It is but six blocks from the Reinbergs. This establishment consists of 33 houses aggregating half a million feet of glass, devoted entirely to roses and carnations. All the roses are grafted stock. The entire place is heated from one central heating plant. The stock is shipped to the city store twice a day, and their large out-of-town shipping business is supplied from the latest shipment each day.

The city office and salesroom is at 35 Randolph street, and all out-of-town visitors are invited to call and make arrangements for visiting the greenhouses. Mr. Budlong handles the stock of some 25 other flower growers in addition to his own.

Visitors can reach Weiland & Reisch by taking the Evanston Elevated to Main street and walking just a few blocks to Ashbury ave. Weiland & Reisch were the first to grow Killarney rose in Chicago, and Mr. Weiland will be glad to explain its successful culture to visitors. This firm specializes in new roses. One seedling, light pink, is regarded as of unusual merit. The city salesroom and office are at 59 Wabash ave. If those who wish to visit the greenhouses will call at the office they will be provided with an escort.

Frank Oechslin is one of the leading plant growers in Chicago. During the nine years he has been in business he has built up a remarkable trade and he is recognized as a most successful grower of fine pot plants. His place may be reached by the Madison street car west to the barns, then transfer to the 48th ave. car and get on at Adams street, or take the Griffith Park branch of the Metropolitan Elevated west to 48th ave., then walk north four blocks and west one. Vis-

itors will see a fine lot of Boston ferns and their sports; ferns for dishes, etc., arancarias and rubbers, and several thousand bush chrysanthemums in bloom. They will also see a Christmas stock of poinsettias, Lorraine begonias, azaleas, cyclamens and Jerusalem cherries. Growers of pot plants will get pointers here, for Mr. Oechslin not only knows how, but is one of the few who will impart his knowledge to others.

Chicago has its full share of commission men and they are all found in the vicinity of Wabash ave. and Randolph st. Many of them have been in business here for many years. Here is found also the Flower Growers' Market, where seventeen different firms are represented. This was started six years ago, and three of the founders, Mrs. Frank Beu, John Sinner and Miss Tonner are still there. Mr. Percy Jones is in charge of the floor and will welcome visitors.

At and near the corner of Wabash avenue and Randolph street there are signs bearing names long familiar. Hunt, Kennicott, Randall, Winterson, Amling, Deamud. Some are there in name only but drop in and shake hands with those who are left. Then go upstairs in the Atlas Block and you will find more. Charles McKellar, who is known to the trade as a specialist in flower novelties, you will find surrounded by his stock of orchids, gardenias, violets, bouvardia, etc.

Mr. Benthey, representing the Benthey, Coatsworth Co. of New Castle, Ind., and handling their stock will be found in the corner room.

Across the hall you will find Wieter Bros., Peter Reinberg and George Reinberg. Down the hall are Zeck & Mann and Kruchten all busy.

Vaughan's greenhouses are at Western Springs. Pot plants are grown here exclusively. Western Springs is reached by the C. B. & Q. R. R. from the Union station.

At Geo. Wittbold Co.'s visitors will see the Wittbold Cement Bench and the Wittbold Watering system, both of great interest to the trade. This firm handles decorative plants as a specialty, being generally recognized as the largest plant decorators in Chicago. Their new store is on North Clark street and their other store and greenhouses are on 1657

# AZALEAS For Forcing—Christmas to Easter

Our stock this season is handsomer than ever. Anybody in want of a quantity will do well to inspect our plants before placing their order. We have only popular American varieties: **Schryveriana, Niobe, Paul Weber, Prof. Wolters, Raphael, Simon Mardner, Vervaeneana, Louis de Kerchove, Mme. Van der Cruyssen, Deutsche Perle, Dr. Moore, John Llewelyn, Mme. Cam. Van Langenhove, Mme. Jos. Vervaene, Paul de Shryver, Memorie de L'Van Houfte, Sigismund Rucker**, and others.

## Seed Trade

The statements in certain trade journals that the bulb trade has been remarkably active and that all bulbs will be well cleaned up this fall, does not seem to be borne out by facts. The writer has interviewed some of the large handlers of bulbs and their statements are directly to the contrary. Of course there are a few exceptions, but generally speaking this line of business does not appear to be satisfactory to the large dealers; in fact, trade in general among seedsmen is more or less unsatisfactory. Much of this is charged to politics and it is confidently believed that now the elections are over business in all lines will improve and perhaps net results may after all bring the volume of business up to average.

The fact that the California seed growers are maintaining onion seed prices at such high figures seems to indicate some sort of combination or understanding between them. This opinion is strengthened by the fact that eastern seedsmen are quoting prices on nearly all leading varieties materially below those of the California growers. This may be explained on the ground that the surplus stocks in the hands of the growers are small, and while we have no positive information on this point, the opinion is quite general that there is a considerable quantity of onion seed held by California growers, particularly of the yellow varieties.

It was stated in HORTICULTURE some time ago that the crop of seed produced this year in Ohio and Indiana would approximate 200,000 lbs. This estimate was made by those fairly con-

versant with the situation and is probably not far from correct. Very little of this seed has thus far been offered as the growers are still nursing the belief that they are going to get prices nearly or quite as high as they received last year, and they are waiting for the seedsmen to come to them. It is hardly necessary to say that they are doomed to disappointment in this, and when they become convinced that the seedsmen are not hunting for seed, it is probable that they will begin offering their stocks and before spring will be glad to accept almost any offers made, if indeed they can get any offers at all.

There is always danger in growers or dealers holding their goods too long; many, in the mistaken idea that the shortage in any particular crop is greater than it really is, will not quote prices when dealers are eager to buy for fear that they may not get the top price for their products, and in thus holding their goods too long they are unable to find a market for them, or are compelled to sell them at greatly reduced figures. This habit is largely responsible for the breaks that almost invariably occur towards the close of the season in years of short crops. It is always best to sell goods when people wish to buy, and if the shortage proves really serious quotations can be advanced from time to time as the conditions of the market require.

Notwithstanding the fact that garden truck is generally in shorter supply than usual, prices are uncommonly low and the market gardeners will make very little money from this year's crops. The writer saw fine cauliflower offered by peddlers in New York at 5c. per head, the same ordinarily bringing from 15 to 20c. No doubt the Long Island crop of this choice vegetable is large, but under the same conditions that prevailed two years ago, consumption would be much larger and prices correspondingly high.

The leading dealers have for the most part covered their shortages in such lines as peas and vine seeds. There is still some inquiry for these items, but not nearly the activity which was marked a few weeks ago; and those who have these goods to sell and have held back their offerings are likely to find the trade indifferent when they are ready to place their goods on the market.

Although beans, and particularly the green pod varieties, are in somewhat short supply, there will be enough to meet all requirements at prices not very much higher than last year. There are a few exceptions, of course, one of these being Black Valentines. This variety is undoubtedly short, and there are more inquiries for it than any other. There was a very heavy demand from market gardeners for this

bean last year, and the opinion is general that it will be just as active the coming season. Where prices will be fixed it is difficult to state, but the writer was informed by a dealer that fifty bushels had recently been sold in the south at \$7.00 and the dealer who made this sale declared that he could

CLIFTON, N. J.

have got \$8.00 had he demanded it. As there is not enough of this variety to meet requirements truckers will have to turn their attention to others, and the old standby—the Red Valentine—may again come into its own.

Such crop information as has come to hand indicates but little change from previous estimates given in HORTICULTURE, and we may take it for granted that not much difference will be noted in the status quo in the immediate future.

**San Diego, Cal.**—P. M. Price, of Moline, Ill., has purchased the entire stock of the Harris Seed Co. and will operate it as a corporation.

# IT'S TIME

"To Make a Noise Like an Order,"

IF YOU DESIRE OUR ADJUSTABLE PLANT STANDS

for the coming Fall and Winter Horticultural Displays, as we are rapidly selling up our production until that time, and late comers will be disappointed.

Prize winners this season for display and banking of plants will be those equipped with The Moore-Livingston Adjustable Plant Stands.

With three sizes of stands all heights can be obtained from 6 to 48 inches.

If your seedsman or supply house cannot furnish them, write, phone, wire or cable us and we are "Johnnies on the spot" for a prompt reply as to where they can be obtained.

## AN ANNIVERSARY CELEBRATION.

There was a sound of revelry last Thursday evening on Province street, Boston. It was the annual celebration of their opening by H. M. Robinson & Co., and their friends had gathered in goodly numbers to wish them another prosperous year and accept their hospitality, which was inexhaustible. Complimentary speeches were made by President Stickel of the Flower Market and J. W. Duncan, and happy responses were voiced by the members of the firm. About fifty congratulatory telegrams and telephone messages were received during the evening. It was midnight when the last of the guests departed.

### SOMETHING NEW.

The E. F. Winterson Co have with their usual enterprise secured a quantity of a new green known as Mexican Ivy, to be shown at the National Flower Show. It is very handsome when made up and its keeping qualities are excellent. Mr. Winterson states that it will keep a month without water.

## PHILIP BREITMEYER

MAYOR-ELECT OF DETROIT.

A telegram has been received announcing the election of Philip Breitmeyer as Mayor of Detroit by a substantial majority. We heartily congratulate Mr. Breitmeyer on his preferment, Detroit on her good judgment and the florist trade of the country on the honor in which it has a share. We have known Phil. Breitmeyer intimately from the time he

PHILIP BREITMEYER

was a little chap running about his father's flower store. We have watched the success and honors which have been his uninterruptedly and know that he is worthy of it all. His genial, lovable disposition and sterling worth give him a place in the hearts of his fellows the like of which but few men ever attain. He will make a good Mayor for Michigan's metropolis.

Hans Skipke, of Chicago, has come to Indianapolis, Ind., to take a position with A. Weigand & Sons.

## PERSONAL.

J. B. Barnard has taken a position with the W. C. Smith Floral Co., St. Louis, Mo.

Miss Josepha Then, of the Chicago Flower Growers' Market, is ill, and her place is filled by her mother.

Mrs. Rachel Henderson, a florist, was seriously injured in a trolley car collision recently at Millville, N. J.

On Wednesday, Nov. 4, occurred the wedding of Miss Hattie Schuttler of 754 Bosworth street, Chicago, and Mr. Edgar Nelson. The wedding took place at Grace church, of which Mr. Nelson is the organist. The bride is the daughter of Capt. Schuttler, owner of the large florist establishment at Wilmette, just outside of Chicago, known as the Star Greenhouses.

## NOTICE

We desire to notify the trade that we are the owners of United States patent No. 489,218 for Floral Figure which claims:

**R**

"A florist's letter or figure stamped from a sheet of paste-board or other suitable material, having an adhesive coating applied thereto and an outer covering of granules of sawdust appropriately colored to represent the petals of the Helichrysium arenarium substantially as described."

Letters which are a direct infringement of this patent are being put on the market and we intend to hold all who make or sell the infringing letters to strict account.

The lawful patented goods are in every respect much superior to the infringement.

## Flower Market Reports.

Trade has slackened off considerably within the past few days and is less satisfactory than at any time this season hitherto. There is really nothing on which any improvement can be reported. Roses are longer stemmed and of better quality generally, but they are received in quantity far in excess of the requirements of the market. It is impossible to lift values on any item in the list at the present time, although with freezing weather and Thanksgiving Day only three weeks distant the time for higher rates cannot be far off.

The market for the past two weeks has been in rather bad condition owing to the large amount of stock arriving daily. Chrysanthemums, carnations and roses, also lilies of the valley, violets and in fact, everything in the line of flowers, have been more than plentiful and prices much on the decline. The late chrysanthemums, such as Maud Dean, Broomhead, Bonnaillon and Mrs. Wanmaker are of excellent quality, and select stock sells quite rapidly, while too many ordinary are to be had. Beauties have been rather plentiful and prices rather low. It is hoped that the first week of November will be to the betterment of the market.

Chicago market has not been altogether satisfactory during the past week to the seller. From the buyers' standpoint it was somewhat different. Good flowers could be bought at a very moderate price. The southern orders for All Saints' Day helped very materially to increase the sales for those fortunate enough to receive them. Violets have not sold well and the price dropped to one half during the latter part of the closing week in October. The carnation stock is not uniformly good; many short-stemmed bunches and with small blooms are on the counters in larger quantities than can be disposed of during the week. Chrysanthemums are in the very height of their season and most growers find their stock just as they want it for show week. The market in general is having a brushing up in honor of the many flower show guests to whom Chicago is preparing to give a royal welcome next week.

Business is moving along the regular lines with a shadow of close buying reported in many instances. There are quite a number of weddings but none of very great expenditure. Stock in general is good and supply heavy but no surplus. This indicates, compared with last year, a resumption of the old-time buying we have been longing for. The only retarding feature is the lack of violets, which will not be in much for three to four weeks to come. Some florists are fortunate to have many orchids and these furnish a good substitute for violets.

The market shows a plentiful supply of all kinds of stock. Of chrysanthemums and carnations there seems to be no end. All kinds of fine roses are abundant but suffering for want of demand. The market affords abundant material for fancy bouquets such as cattleyas, lily of the valley, sweet peas, and violets. Well grown potted plants are outselling cut flowers at the present time. There is an increasing demand for all kinds of foliage and greens. There seems to be no outlet for short-stemmed flowers. It cannot be said that October business was anything to brag about. Wedding decorations were numerous but small; funeral and counter work were below the average. The retailers who are catering to the high class trade are experiencing a very quiet fall.

Towards end of week business improved in a marked degree. Halloween, and other functions, combined with the cooler weather had a marked effect. The first seasonable clean-up for many weeks took place last Saturday. An immense lot of stock was moved off at low prices. Chrysanthemums are, of course, the dominant feature now. On account of the warm weather it was impossible for the growers to hold them back. Many batches intended for Thanksgiving trade had to be cut and let go for whatever they would bring. Quality is about on a par with previous years. We have never seen better Bonnaillons than those now on this market. Roses are not quite so plentiful. Growers of American Beauty are nearly all off crop, and a sharp advance ought to have taken place, if the market had been healthy, instead of water-logged with other kinds of flowers on which buyers could switch off the minute a decent price was

asked. Stocks of this item were well cleaned up, however, and we feel that conditions are now ripe for an upward jump. Carnations are still very plentiful but the quality has improved. The orchid crop has slackened up very decidedly. Violets have been suffering with the heat but a few days of this cool spell will tone them up. The violet fakirs are out again on Chestnut and Market streets after an embargo of many moons. Welcome news for all concerned.

Killing frosts have finished up what little outdoor vegetation was still left. Chrysanthemums are everywhere in the greatest profusion and the fancies are bringing remarkably good prices. Carnations are of good size, but owing to the recent hot spell, are very weak of stem. Violets are in but only in limited quantities. Roses are received in greater abundance every day.

### CHICAGO NOTES.

Employees of the Chicago wholesale florists held a dance at Columbia Hall, Wednesday Oct. 28th. A large number were in attendance and a good time enjoyed by all.

The Fleur-de-Lis Club organized by the young lady employees of the A. L. Randall Co., Chicago, will give their first dance at Svithiod Club House on the evening of Nov. 12.

### OBITUARY.

#### Richard Coombs.

Richard Coombs, born in the North of Ireland, March 22, 1845, died at West Hartford, Conn., October 21. He has conducted a successful business as florist and market gardener for many years. He is a brother of John Coombs, the well known florist of Hartford.

### EVERYBODY KNOWS

Park, Cemetery and Lands are not properly done without the aid of an accurate leveling instrument.

Bostrom's Improved Levels, No. 2 at \$15.00 and No. 3 at \$25.00, are sold by all who KNOW to be the only Levels on the market which meet all the requirements, at the price.

Our guaranteed lack of every Level we sell, and satisfied users in every State and the United Nations endorse every claim we make.

#### NEW YORK FLOWER MARKET.

The past week has, we hope, marked the lowest ebb of business, and the tide should now turn and soon flow strong in the upward direction. Nobody expected much for the few days preceding and following election and so the inaction which has prevailed all along the line was no particular disappointment. Roses are slightly off in quantity, but in the enormous avalanche of chrysanthemums and rapidly increasing cut of carnations and violets, their absence is a blessing. Cattleyas have been very much in over supply and gardenias are somewhat in excess of requirements. Let us hope that from the present time on conditions may rapidly improve. Then all will be forgiven.

#### NEWS NOTES.

We have a communication from L. E. Williams, Nottingham, N. H., enthusiastically recommending the new dahlia Jack Rose as a flower of great beauty and sterling qualities.

The Southern Pacific Railway Company, in co-operation with the Department of Agriculture, the State Horticultural Commission, the University of California and the Stanford University, has decided to operate special trains through the state for the dissemination of agricultural and horticultural information.

#### GREEN GALAX.

Fresh from the woods, per mpt shipments, regular size, 40c. per 100, small size for bunching Violets, 35c. 10c. discount on 5 cases or more. **Kalmia** or Mountain Laurel, \$2.00 per case. **Holly** \$2.50 per case. **Bronze Galax**, in Dec. and Jan. 40c. per 100.  
Terms: Strictly cash. All shipments North and Northwest, made from our Warehouse, Galax, Va. Express and freight rates less than from N. C. points. We are experienced packers. We guarantee satisfaction. Look us up in Dun or Bradstreets.

### SAXON FOREST PEST.

A report from Consul Carl Bailey Hurst states that fears are entertained in the Plauen district of Saxony that many of the forests will be destroyed in part, if not altogether, by the ravages of caterpillars of the moth called by local entomologists *Ocnaria monacha*, and popularly known as nuns or black arches.\* Under date of August 29, he writes:

This species is particularly harmful to coniferous trees, in which Saxony abounds. Although at home throughout Germany, its arrival in increased numbers in outlying parts of the country was noticed with some apprehension a few weeks ago. It was supposed that its appearance was only sporadic and temporary. Fostered by no one knows what favorable conditions, literally clouds of the moths have developed of late. Localities that were exempt are now infested by moths which have come by means of the railroad. Attracted by the light, they have clung at night to the slower moving accommodation trains and have been transported from forests where the plague is present to others hitherto free.

Combating with a foe so widespread and elusive, the struggle is an unequal one, with the chances in favor of the moth. In case nothing effective can be accomplished at once, it is believed that by another year the insects will multiply a thousandfold. If their natural enemies, the birds, and their own diseases, which together have in the past kept their numbers down, do not weaken them materially, it is hoped that some climatic change will cause them to disappear with the same unceremonious suddenness that they came.

There is uncertainty as to the best method of exterminating the pest. State and municipal forests are being inspected and moths and caterpillars picked off the trees wherever possible. Private owners of wooded land have had their property gone over with the purpose of destroying as many of the moths, particularly the more dangerous females, as may be caught. In the forests belonging to the municipality 6000 men have been hired within the past few days.

In at least part of the country an especial net value has not been assigned for the destruction of the insects. On the roof of the town of Plauen 1000 powerful searchlights were placed to exhaust pipes, with the result that on a single night 130 pounds were taken, estimated at half a million moths. In the rural districts children have been given a day from school so that they may pick off the moths, for which they are given a couple of cents for every 100 caught. In spite of all efforts, however, the pest is said to be in the same threatening position as before.

### The "T" Bar Curved Eave Greenhouse

Is absolutely Dripless, glass rests on Wood, reducing breakage and condensation, less wood than any other construction, wood all exposed—all steel inside, all wood outside.

### Why My New Curved Iceless Eave is Far Superior to Anything on the Market Today

- 1st. No sash bars incased in iron, thereby eliminating all danger of bars decaying.
- 2nd. Can be used in conjunction with iron frame construction, thereby doing away with that very objectionable feature, "columns."
- 3rd. Roof bars with drip grooves, which act as conductors to carry away the condensation: Result, the driest roof ever used for greenhouse purposes.
- 4th. **THE MOST IMPORTANT OF THEM ALL.** The very small increase in cost over the ordinary style of construction which makes it possible to be used for commercial as well as private purposes.

**William H. Lutton,** Horticultural Architect and Builder  
West Side Ave Station (C.R.R. of N.J.) Jersey City, N.J.

## THEN THERE IS ANOTHER SIDE TO IT

the side that might be called adaptableness — by that we mean the successful way the U-Bar construction lends itself to houses suitable for all sorts of difficult locations or definite, proscribed needs.

This house is built on the steepest kind of a side hill, and is within plain view from the residence terrace, some 100 yards or so up the hill. A case where the purely practical and the ornamental were absolute requisites.

It is the ideal construction for private estates, parks, public institutions and florists' showrooms. Send for catalog.

## The Naturalization of Flowers

"This is an art  
Which does mend Nature; change it rather; but  
The Art itself is Nature."

*Shakespeare.*

How charming, how exquisitely beautiful are those parts of the garden, which, untrammelled and free, are given up to the naturalization of flowers, and especially to the beautiful flowers of spring. There is something fascinating there, a peculiar something which at once catches the eye, and sets one thinking. Here the earth does not require to be trimmed and combed; the airy vistas, and delicate slopes appear ready made.

In such a garden every plant, and every flower always looks at its best, and one almost forgets to be critical; like Nature they are unconventional; like Nature they are conspicuous. In these days when everything that is natural is admired and all formality is deprecated, this style or branch of gardening is most assiduously copied. Such gardens when done well set a fashion, and indeed the fashion is a good one, for the effect of spring flowers set in grassy places, nestling under the trees, growing with a delightful abandon upon the banks of a stream, or along the sides of a pond, gives to the surroundings a cosiness, a restfulness, and an old-world simplicity which is too often lacking in our gardens.

Nature's gardens are the forests and the fields, the swamps and the bogs; from them we get our ideas, but our handiwork can never attain what the hand of Nature accomplished; we can, however, by intelligence and observation adapt our materials as well as the re-

POET'S NARCISSUS IN GRASS

sources of man will allow. As Shakespeare aptly says, we may mend Nature, change it rather, and yet leave it natural.

It is not my intention, with the limited space at my command, to enter deeply into the subject of naturalization. The subject is too broad, altogether too vast to be dealt with fully. It was rather my object merely to remind readers of the great possibilities of this class of work and also to show the wide scope there is for intelligent effort, and original ideas. I might also add that the principal lesson to be learned is, how many natural ideas may be employed in the garden, other than beds, borders and walks which, a great many think, constitute the bounds of the modern garden.

To advise as to the best varieties or class of flower to employ, to secure the most artistic and most natural effects, is by no means an easy task, as so much depends on the tastes to be gratified, natural surroundings and many other things. In this respect we will always find a great difference of opinion among those who play at gardening, merely as a pastime, or a source of amusement, and those hard working disciples of Nature who make a living by it.

The month of October is undoubtedly the best time to start planting such things as daffodils, narcissi, chionodoxas, snowdrops, wood hyacinths, wood anemones, scillas, etc.; they may, however, be planted any time during the first half of November and give good results.

satisfactory adjustment occurs again. There are many defects in the present schedule which are serious obstructions and a perpetual annoyance to the importer and user of horticultural products. We believe those entrusted with the work of revision earnestly desire light on the problems they are called upon to solve for the benefit of one and all and that upon proper presentation of our needs they will try to adjust matters in accordance with our recommendation. So, if you have anything to communicate, get busy at once.

An  
 inspiring  
 example

Considering the general complaint of hard times and scarcity of cash in florists' pockets the attendance at the National Flower Show is inspiring and suggestive. No wonder floriculture goes ahead by leaps and bounds when we stop to think of the amount of traveling done every year by its followers. Carnation convention in January, rose convention in March, S. A. F. convention in August, and a score of minor events all draw their hundreds successively from all parts of the land to one central spot and those who make intelligent use of the advantages thus opened for acquiring knowledge, soon come to a realization of the great mental enlargement and practical business gain which must accrue from a regular attendance. The florists have "got the habit" and what it has done for them as compared with other closely related occupations is plainly in evidence. The example of the S. A. F. and its lively off-spring seems to have at last awakened some of the progressive spirits in the "truck" growing and forcing industry, with the result that a promising start was made a few days ago at Cleveland on lines of action very similar to those followed by the S. A. F. A very good move and one that might wisely have been made years ago. The new organization has our best wishes and we predict for it a prosperous course so long as it takes the blithesome, lusty, virile S. A. F. for its pattern.

A satisfactory  
 beginning and  
 bright promise

According to the National Flower Show all that anyone can claim for it, it remains notably a fact that there has been presented very little in any department which stands out as marking a distinct advancement either in variety or cultural skill. This is probably equally true of the Boston show and, we might add, of Philadelphia and other places, but it was naturally expected that the Chicago affair with its long preparatory work and opportunities for stirring up special interest at home and abroad would gather in from so many available sources valuable material which in the aggregate would make the event exceptional in this respect. That it did not noticeably do so should not discourage those who have so eloquently championed the idea of a series of national flower shows and dilated upon the great potentialities within reach through this means. Of necessity the first essential in this initial attempt was to make sure a financial success, the reasons for which are sufficiently obvious and every reader of these lines probably understands that had the enterprise fallen short in financial returns it would have meant the cessation of all efforts in this direction for many years to come and thus our floricultural progress might suffer a serious retrogression in consequence. The absence of specially sensational cultural accomplishments on this occasion does not imply that the limit has been reached by any means and at the next National Show, held at a more favorable season for varied displays and with strengthened confidence in the financial outcome we may look for something surpassing.

Tariff  
 revision is on

Hearings on proposed tariff revision have already commenced at Washington before the Ways and Means Committee. On inquiry we are informed

that November 18 is the date fixed for the consideration of agricultural and similar products. Hon. Sereno F. Payne is chairman of the committee. Now, if you have any views as to duties on any goods imported to this country make it your business to promptly communicate with S. A. F. Secretary W. N. Rudd, Morgan Park, Ill., "or else hereafter forever hold your peace." It will be many years in all probability before the opportunity for

## AFTER ADJOURNMENT.

The dedicatory exercises of the new building of the Phelps Publishing Company at Springfield, Mass., are taking place as we go to press. An address prepared by President Roosevelt, and addresses by other personages of note, are promised. The building is eight stories above ground, with basement, sub-basement and roof garden, and takes the place of the one destroyed by fire a year ago. HORTICULTURE extends cordial congratulations and best wishes.

The Washington Times for Sunday, Nov. 8, and the florists of the capital city certainly displayed joint enterprise unparalleled in the history of the flower trade in putting before the public a "Floral Section and Flower Show Number" of eight pages, handsomely illustrated and full of enthusiasm about the coming flower show of the Florists' Club and clever references to what the florists of Washington are doing. Kramer and Gude each have a full page advertisement, and practically all the florists of the town have announcements in spaces of various extent. If the florists in some other cities would send for a copy of the paper above mentioned we think it would furnish them with something worth thinking about and point the way to how they might greatly advance their business and enlarge its profits.

The "National Council of Horticulture" has addressed to the American people an almost tragic appeal of which the text is to be found in the opening lines:—

"The cranberry is the least understood and most abused of any of our domestic fruits."

This is known to be true by any lover of nature, who has studied the Cape Cod cranberry in its native lair. Many a cranberry has passed out of this cold and cheerless world, wholly misunderstood, wholly unappreciated; a mute, inglorious Chatterton in pink. No wonder the friends of the cranberry are moved to protest at the unfair, inhuman treatment accorded to this sensitive and timid member of "our domestic fruits." People, right here in New England, have been known to keep cranberries in tin receptacles, and then have wondered why cranberry snortcake tastes so nauseating. Others have covered the cranberries with cold water and allowed them to simmer, and then have wondered why "people like such stuff." In the interests of humanity, of justice, of kindly dealing towards a defenseless berry let us all follow the right. And there is only one way to make cranberry sauce. It probably would be efficacious to attempt to offer that recipe to any reader of The Advertiser in a community where the cranberry has been known, honored and fairly treated for so many generations. Boston Advertiser.

The National Council of Horticulture should not get on such dangerous ground. There is plenty for it to do in its home missionary field, without incurring trouble for itself by trying to stir up the New Englanders.

## PERSONAL.

F. E. Olmstead has taken a position as deputy commissioner of forestry and will be located at San Francisco, Calif.

Carl N. K. Pedersen of St. John, N. B., and Miss Jennie A. Shepherd were married on October 29.

Thos. Breen of Burlingame is now located with Wm. Babcock of San Rafael, Cal., as head gardener.

F. B. Cannell of Brookline, Mass., a popular member of the Gardeners' and Florists' Club of Boston, and Miss Er-

## CYPRIPEDIUM GODEFROYAE LEUCOCHILUM.

This species comes from Siam and has the same dwarf habit as the more common *Cypripedium bellatulum*. Flowers are cream white with dark purple blotches and spots, the variety *leucochilum* having no spots on the

lip. It was introduced several years ago to Europe and has been used with success for hybridizing, some of the most beautiful cypripedium crosses being the products of this variety and various species.

nestine Mae Thielscher were married on November 10.

J. R. Freeman, who has been quite sick at his home, 2319 Wisconsin avenue N. W., Washington, D. C., is convalescing rapidly and hopes to be at his place of business in the very near future.

Among the visitors from Buffalo and vicinity to the Chicago show are Barney Meyers, Lancaster; C. T. Guenther, Hamburg; Prof. J. F. Cowell, Mr. and Mrs. Wm. F. Kasting, Mr. and Mrs. Saanderson.

A beautiful wedding was celebrated on Thursday afternoon, Nov. 5, when Miss Alice Kathrine Maurer, daughter of Mr. and Mrs. Jno. Maurer of Williamsville, N. Y., was married to Wallace H. Eiss of the Wm. F. Kasting Co., Buffalo. The ceremony was performed by Rev. Frank Hyatt Smith of Buffalo. Mr. and Mrs. Eiss have taken a short western trip.

In the presence of none but im-

mediate relatives James Garthley and Mrs. Mattie Kelley were united in marriage Monday, Nov. 9, by Rev. H. L. Brickett, at Marion, Mass. Mr. and Mrs. Garthley left for New York and Washington, where they will spend their wedding tour, and on their return will reside in Fairhaven, where Mr. Garthley is chief gardener at the estate of H. H. Rogers.

Visitors in Boston during the show week included George F. Struck, New York; Henry Hurrell, Summit, N. J.; Timothy McCarthy, Providence, R. I.; W. A. Kennedy, Milwaukee, Wis.; E. Volmer, Rutherford, N. J.; Thos. W. Head, Groton, Conn.; Wm. Swayne, Kennett Sq., Pa.; Wm. Wallace, Walpole, N. H.; E. O. Orpet, So. Lancaster; Peter B. Robb and Thomas Howden, Whitinsville; Fred Varden, Fall River; G. H. Sinclair, Holyoke; Prof. White, Amherst; E. A. Richards, Greenfield; George Wyness, Prides Crossing, F. E. Cole, Beverly, Robert Miller, East Brookfield, Mass.

## THE EXHIBITIONS

### NATIONAL FLOWER SHOW AT CHICAGO.

This interesting event opened on schedule time on Friday, November 6, under the most auspicious circumstances, at the Coliseum, Chicago's great exhibition building. The judges got to work promptly and after the chrysanthemum awards had been made the competing vases were distributed about the hall, adding greatly to the beauty of the show as a whole.

A distinct feature of the arrangement was the introduction of four pergolas each 12x72 ft. under which the crowds of spectators walked and viewed the exhibits. The long tie-lines with their supporting pillars all in pure white were draped with wild smilax. The balconies were also heavily draped with the same green while suspended from the roof hung many little circles of wire wound and draped with the smilax and looking like huge hanging baskets. The effect under the hundreds of electric lights was very pleasing. The large supports on the balconies were skillfully hidden by small flowers. One hundred boxes of the wild smilax were used in the decorations. There was a feeling of regret that the view from the galleries, always the best point from which to see the exhibitions, should have been partially obstructed by the pergolas which were considered by many as too heavy to be in keeping with their surrounding and therefore failing of the desired effect. The booths so much admired last year were missing. Flowers were offered for sale in one booth only which was conducted by the Chicago Florists' Club.

Saturday the attendance was good. The roses had been placed and the much desired prize labels attached by the judges before noon and the people enjoyed to the full the huge vases of Beauties, Mrs. Marshall Field, Mrs. Potter Palmer, Richmond Killarney and others. A vase of 100 roses, My Maryland, grown by A. N. Pierson, Greenwood, Conn., was much admired but could not be entered for competition because they arrived a little late owing to a delayed train.

With Sunday came the news that the National Flower Show was to be a success and on Monday it was reported that the judges were expected. Sunday's attendance was also gratifying and Monday exceeded either of the preceding days. Monday the contest was over and promptly ended and the show was used for the display of the new

features were added on Monday, among them eight table decorations that attracted much attention, Bohannon Floral Co. and Kenwood Catering Co. receiving first prize. Decoration with center vase and corsage bouquets of Killarney roses. Second prize was won by A. Lange and the Richelieu Catering Co. and third was given to Putnam artist, the Grand Pacific Hotel furnishing the service. In each case Killarney rose was used.

Among the sensational novelties in plants was a magnificent specimen of Celosia Pride of Castle Gould which was given a silver medal. It came from Harry Turner of the Howard Gould estate.

### THE CHRYSANTHEMUMS AND CARNATIONS.

As Seen by Wallace R. Pierson

Chrysanthemums at the National Flower Show cannot, I think, be com-

pared to some of the former exhibitions given in Chicago. There are several reasons for this lack and a warm summer followed by unseasonable weather through October is to be blamed. If we could compare the vase of ten Col. Appleton which won the blue for the best ten in the hall after the closest kind of competition from White Puckham, now Mrs. Clay Frick, we could all see the difference in quality for the vases as they run through out the entire exhibit are as far short of the quality of two years ago as are the Col. Appleton at this one inferior to the famous ten.

Golden Eagle we regret was not exhibited being still not ready to cut but to those who know chrysanthemums it is a factor in the race for supremacy among the late yellows.

Throughout the exhibit wherever shown Mary Bonnellan appeals strongly. A deep golden yellow and almost ideal in form, this variety on the exhibition table is hard to beat and whether it has a place commercially is yet to be determined. On the type of H. W. Rieman the variety "Scalardandes" makes a good appearance and should prove a grand shipping variety.

Smith's Seedling 95-3-06, as yet unnamed will also be an acquisition to the list of commercials and from all I could see by which to judge it this seedling has the essentials of a variety of commerce.

Mrs. Elmer D. Smith also comes in as a good one and can safely be

recommended if the exhibit here be a just criterion of its merits. For the exhibition table and possibly for the commercial grower "Yellow Miller" which is a sport of Mrs. J. A. Miller and a bloom of the Yellow Eaton type has a place and in mentioning a variety of Yellow Eaton type, the grand vases of Yellow Eaton itself must not be overlooked or forgotten. Let us then leave the yellow variety and turn to the white classes and again meet old friends, for Alice Byron and Timothy Eaton are the leaders. I well remember the first vases of

Fidelity I saw staged and only the weakness of stem prevented it from being more widely grown. It seems strange to say that almost at every turn where classes are shown with short stems and a good white is seen the label Fidelity is attached. High up in this class is Merza and we know that Merza is not alone a show variety but good commercially.

The sensation of the show from the visitors' standpoint, due to very fine work by the advertising department, was the chrysanthemum W. H. Taft, and why not? If people could not see the gentleman himself they wanted his namesake and strenuous measures were taken to protect the bloom from the public who wanted to fondle it. This new variety coming from the varieties Fidelity and Col. Appleton is a very pure white in color and has very good form. Pres. Roosevelt also was there in the shape of a white chrysanthemum and at the admiration displayed by the ladies, especially for Mrs. Taft the foliage was green with

SOME WINNING EXHIBITS AT CHICAGO

envy and a blush came over this otherwise white variety almost enough to put it in the light pink class.

Virginia Poehlmann was shown and while not up to the standard of the variety the exhibit showed the possibilities. This was from plants benched July 18 from 2-in. pots and the bloom had been held two weeks for the show. Beatrice May had also been held and both this old favorite and the newer variety White Cloud are to be commended as keepers.

Regularity in arrangement of petals and purity in color describe the variety Mrs. H. W. Buckbee, to some extent, and these combined with good stem, foliage and a perfectly proportioned bloom, recommend it to the grower of high-grade stock.

In pink we have a smaller collection to consider and our old friends still in the lead, A. J. Balfour and Dr. Enguehard leading the procession with W. H. Duckham a trifle tired and faded about twenty minutes behind them. Miriam Hankey also made a nice showing but an unnamed seedling exhibited by Chas. H. Totty on the type of Dr. Enguehard looked better to me. Maud Dean was not shown and no comparison was possible with our eastern standard of perfection.

In red there were a number but few that seem worth growing for the market and my attention was more on the bronze in the odd colors, Mrs. O. H. Kohn, Pockett's Surprise, Pockett's Crimson and Glenview attracting my attention. These however are more exhibition varieties than commercial, for bronze is a color that is nice to admire but hard to sell.

But let us leave the giants in the vases and follow the people, for the people who buy rule the people who grow and they are crowded around the pompons with their beautiful colors and their brief names.

Daintiest and prettiest of all is Baby Margaret from the Robt. Craig Co. for the smaller even-shaped pompons appeal to the public and we have in this little white button, the shape of bloom to suit the most critical and this seems combined with idealism in habit.

Nearest to this in color and size is Magnificus shown by E. G. Hill Co. and all compliments to Baby Margaret apply to a certain extent to this variety. In larger sizes Vincent is there with Queen of Whites and it looks good to me. Lula, Mrs. Jas. Boone and Angelique are others in the white pompon class to consider.

Yellow pompons also and good ones, Baby, Savannah, Quinola, Klendike, Emo, Lodi, Sunshine, and Zenobia giving one a choice from the best there is, or if there be better why were not they there?

Pink varieties are plentiful but to find varieties in the collection that it will pay to grow is not easy. Alena, Acto, Utaw, and Leo show to advantage here but under a poor light it is hard to judge and I may be slighting some better variety that did not show to advantage.

The Singles are a big class and my experience with them is limited.

#### The Carnations.

Monday was carnation day and it brought out more competition and

aroused greater interest than had been manifested before, with an exhibit which, for a fall show, was the superior of any exhibit I have ever seen staged. The carnation end of the hall held the attention of the growers and was the chief attraction to the visitors.

What is there that is new that is better than something which we have already? Carnation growers are going slow. I do not wish to say there are no good new ones but we have a grand collection which can be depended upon and the florists in general know it. The day has passed when growers buy a carnation because it is a seedling. That word seedling has been fascinating and has caused many disappointments in the past. We must remember also that no variety can be properly sized up unless it can be seen growing. We cannot all see the new aspirants to favor on their native soil and we have the comparison on the exhibition table as the result.

And what was staged in Chicago? First of all "White Perfection," as all who saw the exhibit must admit. White Enchantress for a good second and a number of other good ones, Mrs. J. C. Vaughan with a good color and form to recommend it. Georgia, (not shown for competition), suffering from a hard trip and the old stand-by Lady Pountiful with its usual shortage of petals which is a fall characteristic of the variety, being the most prominent in this color. In pink we meet a number of good ones and Winsor, Rose Pink Enchantress, Winona and Mrs. Lawson were exhibited in excellent form. One seedling, William Howard Taft, attracted favorable comment. A full name and a good full flower but Mr. Taft has substantial backing while the stem in this case showed the effects of hot weather and has not sufficient underpinning for such a bloom. A nice vase of Afterglow and one of Aristocrat were there to set forth the good points of the respective varieties, while a vase of Splendor spoke well for this free blooming introduction of last season.

In the class of flesh pinks there was nothing but Enchantress. Grand vases of them and we can only regret that Delight shown by Dorner was not properly entered so that the judges could pass on the respective merits of the two. Delight appeals to me as a commercial variety and one that is capable of standing long shipments. We shall hear from it later and hope to see it staged in its proper class. Melody, the Daybreak-colored Mrs. Lawson, showed well.

In scarlet there was a pretty race for first place, O. P. Bassett which is being sent out by Bassett & Washburn receiving the blue after a hard fought finish with Victory and Beacon and we must acknowledge its superiority on the exhibition table and as a high class bloom.

Variegated was represented by Van. Lawson and Mrs. M. A. Patten with a creditable showing of each. In crimson there was very little outside of the seedlings and novelties, while the Prosperity type of bloom was represented mainly by unnamed new comers.

And for the seedling classes there is much to be said and nothing but praise. If there is a new one that looks

good to the grower let him stage it and learn its value by comparison. The public admire the variety and when a freak shows up in this class those who are wise are heard repeating

"In jesting guise but ye are wise  
And ye know what the jest is worth."

Among the new one not previously mentioned, Apple Blossom shows nice form and a good stem, Mrs. Chas. Knopf in the flesh pink class is a good heavy, well formed bloom. Ruby, a dark red, showed to advantage and Wapoka for a very dark colored bloom made a good impression.

A clear yellow James Whitcomb Riley, and Heacock's fine vase of a pink seedling which is to all appearances an improvement on Rose Pink Enchantress, shared honors in attentions bestowed upon them with a vase of Hill's scarlet seedling of the Victory type, while a pink seedling shown by the Miami Floral Co. was there to show us something nice in cerise pink.

On the type of Prosperity F. R. Pierson Co. showed a seedling with nice stem, good calyx and plenty of color. Others there were and good ones from well known carnation men but I couldn't get them all.

One exhibit however could not fail to be noticed—Alvina, a variety for pot culture and for pot purposes. I have never seen a better.

Taking it then as a whole it was an instructive and valuable exhibition of the most popular flower in commerce today.

WALLACE R. PIERSON.

#### THE AWARDS.

##### Friday and Saturday Awards.

Best group of chrysanthemums with foliage plants as accessories—Vaughan's Seed Store, first; Frank Oehslin, second; J. J. Mitchell, third. In 22 other classes for chrysanthemum plants Vaughan's Seed Store won twelve firsts, five seconds, H. W. Buckbee, nine seconds and two thirds; A. McAdams, three thirds; R. T. Crane, one first, one third; M. A. Ryerson, three seconds; A. S. Trade, one third.

Chrysanthemum blooms—Vase of 50 white, Harry Turner, first; E. G. Hill Co., second; Bassett & Washburn, third. 50 pink, Hill, first; Turner, second; M. S. Vesey, third. 50 yellow, Poehlmann Bros. Co., first; Bassett & Washburn, second; Hill, third. 50 any other color, E. D. Smith & Co., first; H. W. Buckbee, second; Poehlmann, third. 40 blooms, 40 varieties, in four vases, 10 in a vase, Chas. H. Totty, first; H. W. Buckbee, second; E. G. Hill Co., third. 40 blooms, 40 varieties, shown on mossed boards, C. H. Totty, first; Buckbee, second; Smith, third. Best collection of anemone varieties, Alois Frey, first; C. H. Totty, second; E. D. Smith & Co., third. Best collection of pompon varieties, R. Vincent & Sons Co., first; Hill, second; Smith, third. Best collection of single varieties, C. H. Totty, first (silver medal); Alois Frey, second; H. H. Porter, third. In fifty other classes for chrysanthemum blooms E. G. Hill Co. won eight firsts, seven seconds, one third; Chas. H. Totty, eight firsts, two seconds; H. W. Buckbee, ten firsts, six seconds, two thirds; Elmer D. Smith Co., twelve firsts, seven seconds, two thirds; Thomas Proctor, five firsts and a certificate of merit, one second; W. J. & M. S. Vesey, two seconds, four thirds; Poehlmann Bros., one first, one second; Vaughan's Seed Store, two firsts; A. J. Loveless, A. Frey, E. M. Barton, Peter Schilt, each one first; R. Vincent, Jr. & Sons, two seconds; Robert Craig Co., J. Prentmeyer's Sons, J. J. Mitchell and Frank Kuenne each one second; Mrs. S. W. Allerton, one third.

Roses—100 American Beauty, Wm. Dittman, first; Poehlmann Bros., second; Bassett & Washburn, third, Peter Reinberg, fourth.

100 Liberty or Richmond, Poehlmann Bros., first; Bassett & Washburn, second; Peter Reinberg, third.

100 Bride, Poehlmann Bros., first; Wel-

lund & Olmger, second; H. W. Buckbee, third.

100 Bridesmaid, Poehlmann Bros. Co., first; H. W. Buckbee, third.

Madame Chateau, Poehlmann Bros. Co., first; Weiland & Olmger, second; H. W. Buckbee, third.

100 Killarney, Bassett & Washburn, first; Poehlmann Bros., second; Peter Reinberg, third.

100 Katherine, August Victoria, Poehlmann Bros., first; Bassett & Washburn, second; Weiland & Olmger, third.

100 any other variety, Peter Reinberg, first; Poehlmann Bros., second; A. N. Pierson, third.

25 blooms American Beauty (private gardeners), J. J. Mitchell, first.

25 flowers, A-lady (private gardeners), R. T. Crane, second.

100 blooms Rose Mrs. Potter Palmer, Poehlmann Bros., first.

In two classes for single specimen rose, Poehlmann Bros. won four firsts and Weiland & Olmger one.

For best new rose, Poehlmann won the prize with Mrs. Potter Palmer.

Orchids—Collection (plants), W. A. Manda, first and silver medal; George Field, second; E. G. Uhllein, third; Cypripedium (blooms), W. A. Manda, first; A. J. Lovelless, second.

### Monday's Awards.

Field Decorations. Tables required to be kept in place one day and evening. Scale of points: Napery, silver and ware, 10 points; quality of flowers, 20 points; color harmony and artistic effect, 50 points; adaptability, 20 points. All tables set complete for 8 covers.

Table decoration, the main feature of which is cut roses, Bohannon Floral Co., first; A. Lange, second; F. E. Butler Floral Co., third. Committee recommends W. J. Smyth receive special prize on account of error in setting ten plates in place of eight.

Palm, Specimen palm, W. A. Manda, first; Geo. Wittbold Co., second; Julius Roehrs Co., third.

Five palms, 5 varieties, W. A. Manda, first; Geo. Wittbold Co., second; Julius Roehrs Co., third.

Group arranged for effect, Geo. Wittbold Co., first; Vaughan's Seed Store, second; W. A. Manda, third.

Private Gardeners' Class. Specimen palm, E. G. Uhllein, group arranged for effect, E. G. Uhllein, gold medal.

Three specimen palms, three distinct species, not less than 10 ft. high Julius Roehrs Co., \$100 trophy.

Collection of palms, to consist of not over fifteen plants, not more than one plant of one variety or species—W. A. Manda, first; Julius Roehrs Co., second.

Group of stove and greenhouse foliage plants exclusive of palms or ferns—W. A. Manda, Inc., first; Julius Roehrs Co., second.

Specimen Nephrolepis elegantissima—J. A. Peterson, cup.

Group of ferns—W. A. Manda, first; E. G. Uhllein, second.

Tree fern of unusual merit—W. A. Manda, Inc. New fern not in commerce—W. A. Manda, Inc., silver medal.

Vase of chrysanthemum blooms, Poehlmann Bros. Co., sweepstakes cup, with Appleton.

100 carnations in eight classes, sweepstakes—Poehlmann Bros., gold medal; Bassett & Washburn, silver medal; Chicago Carnation Co., bronze medal.

5 plants Begonia Gloire de Lorraine, Julius Roehrs Co., \$50 trophy.

5 plants Begonia Azotia, Samuel Muraw.

Specimen flowering plant, exclusive of rose, chrysanthemum or orchid—W. A. Manda, silver medal; J. J. Mitchell, bronze medal.

In forty-one classes for foliage and flowering plants, other than the above, and in 14 bud, event ferns, cypripediums, dracaenas, conifers, azaleas, roses, 10 classes, gardenias, clematis, etc., W. A. Manda, Inc., won the most prizes, first, second, third, fourth, fifth, sixth, seventh, eighth, ninth, tenth, eleventh, twelfth, thirteenth, fourteenth, fifteenth, sixteenth, seventeenth, eighteenth, nineteenth, twentieth, twenty-first, twenty-second, twenty-third, twenty-fourth, twenty-fifth, twenty-sixth, twenty-seventh, twenty-eighth, twenty-ninth, thirtieth, thirty-first, thirty-second, thirty-third, thirty-fourth, thirty-fifth, thirty-sixth, thirty-seventh, thirty-eighth, thirty-ninth, fortieth, forty-first, forty-second, forty-third, forty-fourth, forty-fifth, forty-sixth, forty-seventh, forty-eighth, forty-ninth, fiftieth, fifty-first, fifty-second, fifty-third, fifty-fourth, fifty-fifth, fifty-sixth, fifty-seventh, fifty-eighth, fifty-ninth, sixtieth, sixty-first, sixty-second, sixty-third, sixty-fourth, sixty-fifth, sixty-sixth, sixty-seventh, sixty-eighth, sixty-ninth, seventieth, seventy-first, seventy-second, seventy-third, seventy-fourth, seventy-fifth, seventy-sixth, seventy-seventh, seventy-eighth, seventy-ninth, eightieth, eighty-first, eighty-second, eighty-third, eighty-fourth, eighty-fifth, eighty-sixth, eighty-seventh, eighty-eighth, eighty-ninth, ninetieth, ninety-first, ninety-second, ninety-third, ninety-fourth, ninety-fifth, ninety-sixth, ninety-seventh, ninety-eighth, ninety-ninth, one hundredth.

In twenty-three classes of carnations, three first prizes, one second prize, one third prize, one fourth prize, one fifth prize, one sixth prize, one seventh prize, one eighth prize, one ninth prize, one tenth prize, one eleventh prize, one twelfth prize, one thirteenth prize, one fourteenth prize, one fifteenth prize, one sixteenth prize, one seventeenth prize, one eighteenth prize, one nineteenth prize, one twentieth prize, one twenty-first prize, one twenty-second prize, one twenty-third prize, one twenty-fourth prize, one twenty-fifth prize, one twenty-sixth prize, one twenty-seventh prize, one twenty-eighth prize, one twenty-ninth prize, one thirtieth prize, one thirty-first prize, one thirty-second prize, one thirty-third prize, one thirty-fourth prize, one thirty-fifth prize, one thirty-sixth prize, one thirty-seventh prize, one thirty-eighth prize, one thirty-ninth prize, one fortieth prize, one forty-first prize, one forty-second prize, one forty-third prize, one forty-fourth prize, one forty-fifth prize, one forty-sixth prize, one forty-seventh prize, one forty-eighth prize, one forty-ninth prize, one fiftieth prize, one fifty-first prize, one fifty-second prize, one fifty-third prize, one fifty-fourth prize, one fifty-fifth prize, one fifty-sixth prize, one fifty-seventh prize, one fifty-eighth prize, one fifty-ninth prize, one sixtieth prize, one sixty-first prize, one sixty-second prize, one sixty-third prize, one sixty-fourth prize, one sixty-fifth prize, one sixty-sixth prize, one sixty-seventh prize, one sixty-eighth prize, one sixty-ninth prize, one seventieth prize, one seventy-first prize, one seventy-second prize, one seventy-third prize, one seventy-fourth prize, one seventy-fifth prize, one seventy-sixth prize, one seventy-seventh prize, one seventy-eighth prize, one seventy-ninth prize, one eightieth prize, one eighty-first prize, one eighty-second prize, one eighty-third prize, one eighty-fourth prize, one eighty-fifth prize, one eighty-sixth prize, one eighty-seventh prize, one eighty-eighth prize, one eighty-ninth prize, one ninetieth prize, one ninety-first prize, one ninety-second prize, one ninety-third prize, one ninety-fourth prize, one ninety-fifth prize, one ninety-sixth prize, one ninety-seventh prize, one ninety-eighth prize, one ninety-ninth prize, one one hundredth prize.

Carnation Co. seven firsts, four seconds, seven thirds; Bassett & Washburn, one first, one second; F. R. Pierson, Co. two firsts, one second; Bohannon Bros. Co., one first, Weiland & Olmger, one first, one third; N. Wittbold, one first, one third; N. Zweibel, one first, two seconds, two thirds; E. G. Uhllein, one first, one third; C. C. Pollworth, one first, Pittsburg Carnation Co., two firsts; Frank Ben Sol Garand, H. W. Buckbee, each one second, one third; South Park Floral Co., one second; F. Donnet Sons Co., one second; Jos. Heacock, one third; C. C. Pollworth, one third.

### THE BANQUET.

The Chicago Florists' Club entertained the visiting florists at a grand banquet on Tuesday evening. It was a most notable gathering, rarely equalled in numbers and national character. There were about five hundred ladies and gentlemen at the tables, which were decorated with white and yellow chrysanthemums in special vases from Frankenfelder. On the speakers' table there were also baskets of tropical plants. The banquet hall was beautifully decorated by Duncan Robertson of the Ernst Wienhoeber Co. and made a fitting setting for the brilliant scene. During the banquet there was instrumental and vocal music by noted artists, and Scotch dancing and vaudeville of a high order which was greatly enjoyed. At the "feast of reason" which followed, Leonard Kill, president of the Chicago Florists' Club, graciously welcomed the guests and introduced W. N. Rudd, as toastmaster, who, as usual, was quite equal to the task. President-elect Valentine was called upon and made an interesting speech emphasizing the good money can do in the advancement of horticulture, and applauding the disposition of wealthy men to endow horticultural institutions and to even study the science themselves. J. N. May was in his best vein and eloquently voiced his approval of the presence of the ladies. August Poehlmann expressed regret that the display of roses was not better. F. R. Pierson said that he regarded the show as a whole as a success. J. C. Vaughan, Benjamin Hammond, P. J. Foley, George Asmus, E. V. Hallock, J. F. Ammann and W. F. Kasting were among the speakers who added to the pleasure of a most enjoyable evening. Mr. Kasting expressed his belief that the next National Flower Show would be held in the east and in spring time.

After the banquet eighty couples attended an informal reception and dance given by the employees of the Wienhoeber Company at the Svithold Club. The grand march was led by Duncan Robertson and wife at 10.15 and dancing lasted until 1.30 A. M. All had a good time due to the enthusiastic work of Duncan Robertson, Victor Bergman and Walter Adams.

### CONCISE COMMENTS.

The ladies enjoyed a theatre party on Wednesday afternoon.

On table decoration of orchids Weinhoeber is winner of first prize twice with oncidiums and vandas.

White Killarney made the long journey from the east in good shape and attracted much admiring comment.

It is acknowledged that the eastern contingent did nobly especially in the plant sections, so indispensable for an impressive effect.

J. Rosenwald's Japanese thuya (502 years old?) attracted a great deal of attention. It is about 6 ft. high and

an unusually fine specimen of its kind.

On Wednesday, a merry party journeyed to Joliet as guests of the Chicago Carnation Co. and spent several profitable hours at that progressive establishment.

C. A. Maynard of Detroit was taken suddenly ill and Mrs. Maynard, who is secretary of the Ladies' S. A. F., is consequently unable to attend the Flower Show.

Peter Reinberg exhibited 100 of his Mrs. Marshall Field and a table of other roses, around which a crowd of admirers, particularly ladies, could always be found.

The lighting was very poor and the large amount of southern smilax used for festooning, also covering the four large pagolas in the body of the hall, did not improve it.

The general public seemed to be satisfied with the show but not with the price of admission 75 cents; 50 cents was regarded as sufficient. The music was excellent.

Occupying a conspicuous position in the center of the Coliseum was a glass case in which were displayed the silver cups, gold watch and fob, and the medals to be awarded.

The Geo. Wittbold Co. led off by taking the gold medal offered by the Horticultural Society of Chicago for the best group of plants arranged for effect. The exhibit was a grand one.

There were several exhibits not for competition which added greatly to the beauty of the display as a whole. The South Park and Lincoln Park and C. C. Pollworth displays were excellent.

H. A. Dreer, Robert Craig Company and Julius Roehrs Company and W. A. Manda, with their splendid contributions of decorative plants and orchids were "towers of strength" to the show.

Over two hundred trade visitors were recorded from outside of the neighborhood of Chicago on the registration book. They represented twenty two States. H. Plath of San Francisco came the greatest distance.

Thermometer has gone down several degrees in Chicago, and freezing weather prevails as we go to press. Attendance at the show is increasing daily. On Thursday there were seventy new carnation entries.

The back yard exhibit was all right before—the usual amount of coal ashes, broken bottles, tomato cans, etc. After—the neatly sodded lawn with flower beds, shrubs near the fence, gravel walk and window boxes.

Bassett & Washburn, Hinsdale, Ill., held a reception for the Flower Show visitors who went out on Sunday to see the O. P. Bassett carnation. There were about fifty in the party and they expressed themselves as well pleased with the new red carnation.

The table decorations were again on Tuesday a centre of admiring ladies and the judges once more gave first prize to Bohannon Flower Co. This time the table was done in lily of the valley, banked high around an electric globe, over which fell the water from a miniature fountain. The lights around the centre were tall, slender lamps shaded with white and having deep fringes of light green beads. The soft music of the falling water, the lights of the flowers, formed a combination hard to outdo.

### MASSACHUSETTS HORTICULTURAL SOCIETY.

Boston's annual chrysanthemum show, which was held on Nov. 6-9, was fully up to the record of its predecessors in variety, quality and attractiveness. The attendance was good, especially on Sunday, when the halls were uncomfortably crowded during the afternoon and evening concert.

The disposition, plainly evidenced last year, to widen the scope of the exhibition and make it something more than merely a display of chrysanthemums, was reflected in the schedule and carried out in the show, which embraced gigantic groups of flowering and foliage plants from which chrysanthemums were excluded, groups of orchids for which very liberal prizes were given, vegetables and fruit in extensive array and carnations for which the prizes were unprecedentedly large.

Taking up the chrysanthemums first, we do not find much of unusual importance to chronicle. The enormous trained plants that formerly gave distinction to the Boston shows were missing and those displayed were small but well grown and one of them, a specimen of Garza from Dr. C. G. Wild, was awarded the prize for best plant in the hall, an honor worthily bestowed. The number of plants of the now popular single and semi-double varieties was quite large and these, together with the small neat "commercial" plants of which W. H. Elliott has a good display every year, contributed much to the color effect although their value might be greatly enhanced by the adoption of some more artistic and original method of arranging them other than in regular rows on the level floor. S. Hoffman had one group of Garza arranged in pyramid form with palms against the wall among which boughs of copper beech were used with good effect.

The classes for long-stemmed blooms in vases of ten were not so numerous and seemed less sensational

than formerly. The limit of possibilities in this line has probably been reached and flowers which are merely large no longer excite wonder. The

big china vases of one hundred long-stemmed blooms arranged for effect were admired as much as ever and filled an indispensable place in the impressiveness of the exhibition in the grand hall as a whole. The W. W. Edgar Co. again won first in this class with Major Bonnaillon, the same variety as last year. Second was won by the Morton F. Plant Estate with mixed colors; third by Edgar Co. with Timothy Eaton and fourth by Edgar Bros. with Dr. Enguehard. Again the Gane Memorial Prize for Mrs. Jerome Jones was won by James Nicol with a superb exhibit.

In the class for twenty-five blooms of twenty-five varieties, always an object of engrossing interest for the gardeners, there were four entries. First was awarded to Morton F. Plant Estate, gardener Thomas W. Head, and second to W. A. Riggs. So close were they in quality that sentiment was pretty well divided as to the correctness of the verdict and it certainly must have been a difficult task for the judges to come to a decision. The varieties shown were recent introductions in the main and in both sets the exhibitors had taken advantage of every little point in uniformity and color arrangement. The prize for six best introductions of current year went to the Plant Estate; the varieties shown being Harold Wells white reflexed, Touring Club tawny yellow incurved, W. M. Moir white Jap. in-

VASE OF TIMOTHY EATON, AT BOSTON SHOW

MERZA, BEST SPECIMEN PLANT IN BOSTON SHOW

Exhibited by Dr. C. G. Wild.

curved, May Donnellan deep yellow Jap., Dorothy Goldsmith light yellow reflexed and J. C. Neil pale yellow Jap. incurved. There were many large displays of single and semi-double varieties under name and one set of fifty seedlings, all distinct varieties in yellow, white, pink and bronze, from one seed pod, shown by Langwater Gardens, gardener, W. N. Craig. As the latter were in all respects equal to the average of the named sets the long list of names represented in the regular classes seems hardly worth recording. Most of the collections of these, as well as of the pompons, were displayed in small vases of one or several short sprays, no effort at the decorative effect in which lies the chief value of this class being made.

There were ten entries for the prizes for tables decorated with chrysanthemums or fruit. In the class for dinner tables arranged with chrysanthemums, Ed. MacMulkin won first with centre piece and corsages of small white chrysanthemums with *Whitmanii* fronds and white chiffon; Mrs. E. M. Gill second with Major Bonnaillon Sprengeri and *Whitmanii* centre piece; S. Hoffman third with Pink Ivory and Sprengeri and fourth with orange and yellow chrysanthemums and copper beech sprays. On the fruit tables Isaac H. Locke & Co., were first and Ed. MacMulkin second. The fruit in both cases was of great value but the arrangement too formal.

MacMulkin's winning groups of plants, 300 sq. ft. in extent, were strong features. They were backed by palms and bays towering nearly 20 feet high. Fragrance was supplied by standard heliotropes and gardenias, color by impatiens and geraniums and richness by masses of cattelyas. The groups of orchids were well worthy of the big prizes awarded, being rich in varieties and well arranged with fine ferns. Conifers in pots were shown by Joseph Breck & Sons and New England Nurseries, the latter including a concolor fir of a size not easily found in the nurseries to-day.

One small hall was occupied by the carnations and orchids. On the former Wm. Nicholson & Son were first with six vases of fifty flowers each, the varieties being Afterglow, Beacon, Mrs. M. A. Patten, White Enchantress, Rose Pink Enchantress and plain Enchantress. C. S. Strout with Enchantress, White Enchantress, White Perfection, Beacon, Winsor and Victory was second and Backer & Co., with White Perfection, Rose Pink Enchantress, Eldorado, Harry Fenn, Mrs. Patten and Pink Patten was third. As these prizes were \$40, \$30, and \$20, respectively, the presence of only three entries is surprising. Pretty good value for three hundred carnations.

Certificates of merit were awarded to H. A. Dreer for *Nephrolepis Scholzeli*, the "crested Scottii" and Mrs. H. F. Durant, gardener Thos. T. Watt, for *Vanda Sanderiana* with ten flowers on one spike. Silver Medal to Waban Rose Conservatories for rose White Killarney, Cultural Certificates to Wm. Thatcher, gardener for Mrs. J. L. Gardner, for specimen *Alpinia Sanderæ* and J. L. Smith, gardener to A. W. Blake for *Zygopetalum Mackayi*. Honorable mention to H. H. Barrows & Son for *Nephrolepis magnifica*, a finely divided variety like *Amerpohli*,

"only more so," Philip Dexter, gardener J. Salter, for pink seedling anemone chrysanthemum, W. N. Craig for seedling single chrysanthemums and Miss R. S. Schaller for seedling carnation, white, deeply lacinated petals. Among the notable exhibits outside of the prize schedule were violet Barronne Rothschilds and *Ficus altissima* from F. W. Fletcher, rose Mrs. Jardine from S. J. Reuter & Son, a magnificent collection of rare orchids from Lager & Hurrell and several seedling carnations from Backer & Co.

The vegetables and fruit were displayed in the basement hall. Frederick Mason got a silver medal and Mrs. G. F. Hartshorn a bronze medal for celery, and the exhibits were of a very high order throughout.

#### THE EVENT OF THE YEAR IN PHILADELPHIA.

There are many semi-monthly, monthly, and special shows in Philadelphia during the course of the year—but the crowning horticultural event of them all, is the Annual Fall Show. The exhibition this year opened on the 10th inst. and it is no exaggeration to say that a finer lot of plants and flowers we have never seen. There may have been bigger shows in the past but (except in some isolated instances) for quality and general excellence in arrangement the show this year holds its own very well. There was nothing sensational in chrysanthemums, either plants or flowers, but both these classes showed high culture and standard excellence. The Roebeling, Wiedener, Wanamaker and Newbold collections of orchids added great distinction to the exhibition and the foliage plants from the estates of Drexel, Pepper, Penfield and Schmidt were magnificent.

Another distinguishing feature was the grand display of vegetables in the lower hall. For quality and variety we think this year's exhibit distinctly ahead in every way except that in one or two collections we noticed Dock st. produce mixed in with what was supposed to be strictly home-grown. Danvers Yellow Globe onion was a glaring example of this. The judges were aware of this but pleaded the difficulty of bringing proof. In our opinion the judges ought to disqualify any exhibit, however good, without being required to show proof if the evidence be glaring on even one item.

David Ingram of Sinnott's was the surprise of the show in the big specimen chrysanthemum plants. He came in unexpectedly at the eleventh hour and carried off first. The McLeary and Batchelor lots were fine also but they did not expect to encounter the Sinnott specimens, seeing that Gordon Smith had retired. Batchelor and Robertson were the heroes in the six-inch plants. Kleinheinz and Hedland were copious winners in this line also. In the cut bloom section of chrysanthemums the chief prize winners were Robertson, Kleinheinz and McLeary. Dodds, Robertson, Long, Batchelor, Hobson, McLeary and Harris were the principal prizetakers in the foliage and flowering plant section.

The main entrance to the Show had on the right and left the big ferns from the Drexel estate which excited much wonder and admiration from the public.

This collection included a specimen of *Gleichenia rupestris* twenty-five years old and measuring 6 ft. high and 9 ft. through, a dense, perfectly rounded plant, *Adiantum Dreeri* 4 ft. high and 5 ft. through, *Davallia Fijiensis* 4 ft. high and 6 ft. spread, *Adiantum cardiochoena* 6 ft. high and 8 ft. through and many other remarkable large and fine plants which reflected great credit on Thomas Long, the gardener.

The trade exhibits of Michell and Dreer were both varied, extensive and interesting, consisting of seasonable bulbs, seeds and sundries. Michell's was a bright and artistic arrangement the center being a square bed of red, white and blue hyacinth blooms artificial of course, but most effective. The newel posts were grouped with a collection of evergreens from Meehan's Nurseries while the center stair landings were graced with a similar group from the Wm. H. Moon Nurseries. The sides of the stairways had the big blooms of chrysanthemums twenty five to a vase arranged with autumn leaves and other foliage for effect.

The foliage plants were in the foyer and the main cut blooms occupied the passages leading from there to the main hall, the center of which was devoted to the magnificent display of orchids from James Goodier gardener to C. G. Roebeling, with a background of tall palms separating them all around making an oasis from the sea of white, pink, yellow and crimson of the specimen chrysanthemums in pots. The walls were banked with foliage and flowering plants in groups. In the latter, Jno. Dodds gardener for Jno. Wanamaker easily carried off first honors not only for the rare and well grown plants but for artistic skill in arrangement. Samuel Batchelor, gardener for Clement B. Newbold also had a very creditable group in this section. The front of the stage was occupied by Dreer with foliage plants. The pedestal at the east end of the hall over the stairway was occupied by a grand specimen fern exhibited by Francis Canning gardener to Samuel T. Bodine.

W. K. Harris showed a new begonia of the Lorraine type more upright in growth and looser habit, the flowers being a deeper pink.

A special word is due to the *Adiantum Farleyense* from Drexel's and the crotons from Pepper's. Croton King Hobson will have to look to his laurels. The latter had some magnificent specimens in larger plants 6 to 8 ft. high. *Nephrolepis Schoelzeli* was shown in fine shape by Dreer. *Pere Charon dracena* was among the interesting novelties in Robertson's collection. E. A. Stroud and Thos. Meehan & Sons had splendid exhibits of hardy chrysanthemums. James D. Cockcroft sent a vase of new white carnation Georgia. Jno. W. McIntyre an enterprising commission man of Phila. showed Paris daisies very fine for this season. *Fauleria thalietyrum*, trained globular, fooled lots of people as a foliage plant most of them thinking it was a new kind of *Adiantum*. Heck Bros. showed a new pink chrysanthemum, needle-shaped petals, flower globular. Baby Margaret, white pompon, a sport from Baby (yellow) was shown by R. Craig Co.

Kifts' new Fernery, Moore-Livingston's new plant stand, and new pat-

terns of the Phila. Lawn Mowers were among the interesting things in the lower hall besides the vegetables. Among the latter Burpee's Pumpkin show was a star attraction.

The Meehan silver cup for the best collection of hardy chrysanthemums was won by William Kleinheinz with a well-finished lot, showing splendid culture and distinct colors.

## ST. LOUIS HORTICULTURAL SOCIETY.

The second annual flower show of this society opened in Armory Hall, St. Louis, Mo., on November 3 and continued for four days. The city park department helped out greatly by sending several wagon loads of decorative plants and the Michell Plant & Bulb Co., contributed much to the general effect, with a grotto of rocks and plants. The attendance was fairly good. The Henry Shaw premiums were not so well competed for as in former years. \$475 in cash prizes was offered and a gold medal valued at \$25. Only about one half of the \$475 was taken up.

The Shaw Gold Medal for best plant introduced during present year was awarded to *Nephrolepis Scholzeli*, exhibited by H. A. Dreer.

The S. A. F. bronze medal and a certificate of merit were also awarded to the same plant. A competitor in this class was W. A. Manda's *Nephrolepis exaltata* Alberti.

The \$85 prize for reception room decorated with chrysanthemums was won by Fred C. Weber; second \$75, by Sanders Nurseries, and third, \$65, by J. W. Dunford. All were handsomely done and showed good workmanship. Mrs. W. Ellison judged all the floral decorative work and Messrs. Dunford, Tesson and Irish served in the other classes. Peter Reinberg sent 100 blooms of Mrs. Marshall Field rose, and Bassett & Washburn a vase of O. P. Bassett carnation. W. N. Rudd sent his seedling carnation Mrs. J. C. Vaughan, which scored 83 points. Hummell & Downing Co., Milwaukee, made a display of florists' boxes.

On Wednesday night the society gave a banquet to the visiting florists which was a very enjoyable affair. F. W. Brockman officiated as toastmaster. Most of the visitors proceeded to Chicago to attend the National Flower Show.

Among the visitors were J. J. Karins of Dreer's and B. Eschner of M. Rice & Co., Phila.; Mrs. M. S. Vesey, Fort Wayne, Ind.; Peter Olsen and A. T. Pyfer, Joliet, Ill.; E. G. Bradley, Milwaukee, Wis.; A. C. Brown, Springfield, Ill.; Mr. and Mrs. M. F. Widmer, Highland, Ill.

### SHAW PREMIUMS.

Prizes, first, second and third in order named in each case.

Display of decorative plants—Wm. Schray & Sons; Sanders' Nurseries, Begonias—F. H. Meinhardt. Bemed. plants—Koenig Floral Co.; C. Young & Sons; Sanders' Nurseries. Display of blooming plants, chrysanthemums excluded—Schray; Sanders. Geraniums—Koenig Floral Co. Specimen palm—Wm. Schray & Sons. Specimen fern—Koenig Floral Co. Blooming plant—Koenig Floral Co. Group of variegated foliage plants—Schray; Sanders. Group of chrysanthemums with decorative plants as accessories—Koenig; Sanders. Pompons—Koenig Floral Co. Specimen plants, white, yellow and any other color—Vaughan's Seed Store. Pair of bays—

Young; Schray. Orchids—C. Young & Sons.

### CHRYSANTHEMUM BLOOMS.

48 blooms, 8 varieties, 6 blooms of each—E. G. Hill Co., with Nedie Pickett, L. Affiance, O. H. Broomhead, Gitter, Mary Ann Pickett, Mrs. Mary Mann, Mrs. L. Thorn and G. W. Pock; H. W. Buckbee, second; W. J. & M. S. Vesey, third. 30 blooms on moss—E. G. Hill Co.; H. W. Buckbee; Elmer D. Smith. Pompons—E. G. Hill; Elmer D. Smith.

### MISCELLANEOUS.

50 carnations—J. F. Ammann. 50 roses—Richmond—W. J. & M. S. Vesey. 50 Killarney—Ammann; Vesey. 50 any other pink rose—Ammann with Chateaux; Vesey with Bridesmaid. 50 white—Ammann with Ivory; Vesey with Bride. Hamper of chrysanthemums—Fred C. Weber.

### SECOND DAY ENTRIES.

Carnations, five vases of 50—Chicago Carnation Co., first with Enchantress, Rose Pink Enchantress, Beacon, Splendor, White Perfection; E. G. Hill Co., second, Wedand & Olinger, third, 50 American Beauty—Wedand & Olinger. Roses, six vases of 25—J. F. Ammann, first with Killarney, Ivory, Alice Roosevelt, Mrs. Potter Palmer, Mme. Chateaux and Rhea Reid; Vesey, second. Bridal bouquet—F. C. Weber; F. H. Weber. Basket of roses—F. C. Weber; F. H. Weber; Koenig Floral Co. 50 chrysanthemums arranged for effect—F. C. Weber; E. G. Hill Co.

### THIRD DAY ENTRIES.

Classes for 25 blooms of one variety were all won, first by E. G. Hill Co.; Vesey, two seconds; Hemmer Bros., one third. Classes for 50 carnations were all won, first by Chicago Carnation Co.; Vesey, two seconds; Hill and Ammann, each one second. Violets—Fred C. Weber. Basket of Carnations—F. C. Weber; Koenig Floral Co.; F. H. Weber. 100 roses arranged for effect—W. J. & M. S. Vesey, first with Brides; F. C. Weber, second with Richmond.

### ELMIRA, N. Y.

The Elmira Civic Improvement League and Horticultural Society held a Chrysanthemum Show in the beautiful new hall of the Woman's Federated Charities Building, Nov. 5, 6 and 7, and the proceeds of the show were donated to that institution. The exhibits filled the hall nicely and with the groups of palms and flowers arranged by the local florists, Duand, Leavitt and Backer and by Wm. Pursey, gardener for Hon. J. S. Fassett, made a beautiful display. Music was provided afternoons and evenings. The admission charged was 25 cents and while the attendance was light still a comfortable sum was realized for the Federation over and above the expenses.

One of the most interesting parts of the show was the exhibit from the N. Y. State College of Agriculture at Cornell, of illustrations and specimens representing their work on insects, plant disease and the various horticultural operations of planting, grafting, etc. There were three gentlemanly attendants in charge who took pains to explain to all interested.

Among the most popular exhibits were the beautiful assortment of orchids from Lager & Hurrell, Summit, N. J., the vases of splendid Chateaux and Queen Beatrice roses from the U. S. Cut Flower Co., the large vase of Pennsylvania chrysanthemums and sample of Rudd's Defiance Carnation as grown by H. N. Hoffman, the table full of single seedling chrysanthemums and vases of immense large ones from C. H. Totty and from Elmer D. Smith Co. The Smith Co. exhibit arrived too late for competition. The varieties of carnations exhibited were Pink, White and Rose-Pink Enchantress, Afterglow, Winsor, Lawson, White Lawson, White Perfection, Mrs. J. C. Vaughan,

(from W. N. Rudd) Defiance, Beacon and Sarah Hill.

The awards were as follows:

Chamber of Commerce cup, for best undecomposed variety, to U. S. Cut Flower Co. for a white seedling No. 41, grown by the late G. P. Ransom.

25 blooms, one variety, H. N. Hoffman, 1st, with Pennsylvania; U. S. Cut Flower Co., 2d, with Dr. Enguehard.

12 varieties, one each, C. H. Totty 1st, with Mrs. H. Partridge, Mrs. Wm. Duckham, Glenview, C. H. Totty, Mary Mason, J. C. Neill, Morton F. Plant, Mary Donnellan, Mme. G. Rivol, and S. A. Nacour-Bey; U. S. Cut Flower Co., 2d.

6 Yellow, U. S. Cut Flower Co. with Golden Chadwick; H. N. Hoffman, 2d, with Golden Dome. 6 White, H. N. Hoffman, 1st, J. H. Knapp, 2d, both Timothy Eaton. 6 Pink, U. S. Cut Flower Co., 1st; H. N. Hoffman, 2d, both Enguehard. 6 Red, U. S. Cut Flower Co., 1st, Geo. W. Childs; Single bloom, do., with Lynnwood Hall. Carnations, U. S. Cut Flower Co., 1st; Hoffman, 2d; Knapp, 3d. Tea Roses and American Beauties, U. S. Cut Flower Co., 1st in both. Group of plants, Hon. J. S. Fassett, gardener Wm. Pursey.

## NASSAU COUNTY HORTICULTURAL SOCIETY.

The Nassau County Horticultural Society held its fourth annual exhibition in Pembroke Hall, Glen Cove, N. Y., on 5th and 6th of November. The hall was tastefully decorated and the exhibits effectively placed, giving a good view from all sides. It was one of the best exhibitions given by the Society, both financially and otherwise. A special feature of the exhibition was two pieces of fretwork by Mr. Ingram, Oyster Bay, which received honorable mention. J. H. F. Matz had an elaborate flower piece in the shape of a harp, standing 4 ft. high, which received a certificate of merit. James D. Cockerott of Northport sent twenty-five blooms of his new white carnation Georgia, which received a certificate of merit and attracted a good deal of attention. Music was supplied each evening by Miller's Orchestra. The judges were Geo. D. Hale, Seabright, N. J., and Robert Angus, Tarrytown. Representatives from several of the New York seed houses were present. Awards were as follows:

Group of chrysanthemums—First to A. Mackenzie, gardener to Percy Chubb. Three specimens, one specimen, also specimen foliage plant other than palm and group of ornamental and flowering plants were all won by the same exhibitor.

Specimen: palm—S. J. Trepass, gardener to J. Roger Maxwell; three ferns—first, A. Mackenzie; second, S. J. Trepass. Specimen fern—S. J. Trepass. Asparagus Sprengeri—V. Cleres, gardener to T. S. Smithers.

Chrysanthemum blooms—first and second respectively—White, V. Cleres, George Wilson, gardener to Benj. Stern; yellow, Geo. Wilson, A. Mackenzie; pink, Mackenzie, Wilson; crimson, Cleres, Wilson; bronze, Wilson, Trepass; 25 arranged for effect, Mackenzie, Cleres; collection of outdoor varieties, Paul Reu, gardener to Walter Gibb.

Miscellaneous—American Beauty roses, Cleres, Mackenzie; white, pink and any other color, Mackenzie; 12 carnations, Cleres; 25 do., J. F. H. Matz, J. Ingram; violets, Ingram; table center piece, Henry Gaut, gardener to H. L. Pratt, J. Ingram. Of fruit and vegetables there was a fine display, G. Wilson, F. Petroccia, Paul Reu, S. J. Trepass and A. Mackenzie participating in the winnings.

Special premiums—Collection of outdoor roses, silver cup (to be won three times), to L. G. Forbes; table of ornamental plants, Mackenzie, Trepass; 20 chrysanthemums, Mackenzie, Trepass; 18 do., A. Alius, Cleres; 12 do., Mackenzie, Wilson, Trepass; 6 do., Mackenzie, Alius; 25 carnations, Mackenzie, Trepass; single violets, Petroccia, Trepass; commercial do., J. H. F. Matz; largest chrysanthemum bloom, Alius; collection of singles, Trepass.

J. F. Huss was first on collection of nov-

## News of the Clubs and Societies.

mum show of the Silent Circle of King's Daughters held on Nov. 4, Arthur Dixon and James Cummins represented the professional gardeners among the winners of prizes.

**Schenectady, N. Y.**—The flower show at the conservatories of W. T. Hanson netted \$278 for the Ellis Hospital. Niles Johnson, the gardener, received many compliments on his attractive arrangement of the plants.

**Wichita, Kan.**—C. P. Mueller not only invited the public to inspect his chrysanthemums on Nov. 5 but arranged with the street car officials for transportation to his houses. Needless to say there was a crowd.

**Niagara Falls, N. Y.**—A chrysanthemum show opened in the new Federation building on Nov. 5, and among the commercial exhibitors were The William Scott Co., Buffalo, C. H. Totty, Madison, N. J., and Lager & Hurrell, Summit, N. J.

**New York, N. Y.**—6500 chrysanthemum plants in three houses was the attraction offered in Central Park during the week of Nov. 3. The show will continue through the month and include orchids, etc. Chief gardener C. C. Olsson is in charge.

**Chestnut Hill, Pa.**—The Horticultural Society held its show of flowers and fruits in Joslin Hall on Nov. 4. Edward West, gardener to E. N. Benson, had a fine showing of chrysanthemums, and Robert Morrow, gardener to G. I. Bodine, mammoth squashes.

**Fairhaven, Mass.**—Nov. 6, 7, 8 were visiting days at the greenhouses on the estate of H. H. Rogers, where James Garthley is in charge. Winsor carnations, foliage plants, crotons, etc., vied with the extensive collection of chrysanthemums for admiration.

**Edgefield, S. C.**—The floral fair on Oct. 30 called out an admiring throng from all the surrounding towns. Senator Tillman was among the visitors. Robert Berckmans, of Augusta, Ga., presented the prizes. A floral parade was a feature of the afternoon, followed by a concert and german in the evening.

**Albany, N. Y.**—The annual chrysanthemum show at the Lake-house, Washington Park, was opened to the public Sunday, Nov. 8. The exhibition comprises over four hundred varieties, many of which are not seen ordinarily at the florists' establishments. The show is under the supervision of park commissioners Bender and John J. Welsh, head gardener of city parks.

### PHILADELPHIA NOTES.

A party consisting of Robert Buist, Mr. and Mrs. W. Atlee Burpee and Howard M. Earl started in Mr. Buist's auto from Burpee's Fordhook Farms, on October 28, on a tour of the Long Island seed growing districts.

The new Tower Hall Seed House of the Henry F. Mitchell Co., 518 Market St. will soon be in shape to assist the present store in taking care of the firm's rapidly growing business. The work of reconstruction is progressing rapidly and Mr. Mitchell expects to have the new store open about December 20th.

### DETROIT FLORISTS' CLUB.

Nov. 5, 1908, the day of the excursion to Mt. Clemens, was another red letter day in the Detroit Florist Club's history. An elegantly fitted up excursion car took 65 members to Mt. Clemens, stopping on the way for a short visit at J. F. Sullivan's place. Arriving at Mt. Clemens the first call was made on Leo Mallast, whose houses of very healthy carnations showed a high standard of perfection.

At John Breitmeyer's Sons a substantial lunch was enjoyed. Secretary Sullivan made a felicitous address. Unfortunately former president Scribner was not here, and the scheduled presentation of watch and chain to him had to be postponed. Looking about the greenhouses American Beauty and other roses, chrysanthemums, etc., elicited admiration by their high quality. The next stop was at Klagge's, where the houses showed very promising for a large crop of good roses and carnations, but violets are here, as elsewhere, very far behind.

A short tramp brought the visitors to genial James Taylor's establishment, where extensive improvements are under way and refreshments were again enjoyed. Thence to Carey's, where a very large crop of Liberty rose was seen. The establishment of T. Von Boesllaeger which was next visited is a beautifully laid out and orderly place. Roses and carnations, hospitality, interesting speeches and mirthful songs here filled out the program.

Among the invited guests were the force of the boiler inspector's office. These gentlemen were very much interested in the various heating plants, and as they are working on a change of the present city ordinance, which now requires second engineer's papers of those who tend greenhouse boilers, their visit will no doubt prove mutually beneficial. FRANK DANZER.

### GARDENERS' AND FLORISTS' CLUB OF BALTIMORE.

The meeting of this Club was held on the evening of the 9th. This was Ladies' Night and the attendance was exceptionally large. The main feature of the evening was an illustrated lecture by J. Otto Thilow of Philadelphia on the Flora of the Yellowstone Park and the Puget Sound region. The lecture was ably given and was heartily enjoyed by every one present.

Other features of the meeting were a vase of Craig's white sport Baby Margaret, from the yellow Margaret pompon chrysanthemum, white seedling carnation from Gustav Lotze, also his new white chrysanthemum, Mrs. Lotze, in fine shape and Thomas White, gardener at the Maryland Agricultural College, exhibited some fine specimens chrysanthemum blooms.

Several members of the club will visit the Washington Chrysanthemum show on Friday, 13th, and, incidentally, the Baltimore bowling team will give the Washingtonians a few pointers on bowling.

### NEW YORK FLORISTS' CLUB.

The meeting on Monday evening, 9th inst. was not very largely attended. The transportation committee reported that the attendance from this section to the National Flower Show numbered about twenty. W. F. Sheridan, for the nominating committee, reported the following names for candidates for the offices to be voted for at the December meeting: President, E. V. Hallock, C. B. Weathered; vice-president, W. W. Burnham, Harry Turner; secretary, John Young, H. A. Bunyard; treasurer, J. K. Allen, W. C. Rickards, Jr.; trustees, John Scott, Patrick O'Meara, F. H. Traendly, Robert Simpson, A. H. Langjahr, A. Zeller, Paul Dailedouze. The by-laws were amended, making the cost of life membership \$50 instead of \$75.

Frank H. Traendly, John Young, C. B. Weathered, E. V. Hallock and John I. Raynor were the first five to make application for life membership.

A communication was received from Benj. Hammond of the S. A. F. legislative committee relative to the complaints of excessive express rates, and same was referred to the legislative committee of the club. A letter from Mrs. Alex. Wallace acknowledging receipt of resolutions passed by the club regarding the death of her husband.

F. H. Traendly, just returned from Chicago, spoke of the National Flower Show, which he said was very creditable to the Chicago Florists' Club, also to the eastern exhibitors who had done well. The attendance on the first days indicated a financial success. Artistically he considered the show the best he had ever seen. Mr. Bunyard moved a telegram of congratulation to the secretary of the S. A. F. A. L. Miller moved a telegram of congratulation to Mayor-elect Breitmeyer of Detroit. These were ordered, also congratulations to A. C. Zvolanek on his election as a Justice of the Peace for Bound Brook, N. J. Mr. Zvolanek responded. Chairman Rickards announced complete arrangements for the club smoker to take place on November 18.

The judges reported on the exhibits of the evening, recommending a first-class certificate for Nephrolepis Scholzei from Herman Scholgel and cultural commendation for pompon chrysanthemum Baby Margaret, shown by Robert Craig Co.

### GARDENERS' AND FLORISTS' CLUB OF BOSTON.

The next regular monthly meeting of the club will be held at Horticultural Hall on Tuesday evening, November 17, at 8 o'clock. Eber Holmes of the Montrose Greenhouses will speak on the subject, "How We Can Improve Our Club." Nominations of officers for 1909 will be made and indications point to a big attendance of interested members. There will be short reports on the National Show and as usual some good exhibits. A cordial invitation is tendered to any outsiders who are not yet members and would like to pass a pleasant evening to meet with us on Nov. 17. W. N. CRAIG, Secretary.

# SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

## Cut Flower Rates.—Freight on Ice and Empty Packages.

The two letters following present the case of the Florists' grievance and the reply. The subject is one which may rightly be taken up for consideration by the Florists' Clubs in the centers of trade.

BENJAMIN HAMMOND.

Chairman Legislative Committee,  
S. A. F.

Fishkill-on-Hudson, N. Y.,  
Nov. 4, 1908.

Mr. J. H. Bradley, General Traffic Manager  
American Express Co., 65 Broadway,  
New York City, N. Y.

Dear Sir: On behalf of the Society of American Florists, I beg to lay before you certain matters which pertain to the flower growers and sellers in the principal cities of the United States. Certain grievances were brought up at the last annual convention held at Niagara Falls and were referred to the legislative committee of this National Society for action, with the hope that by laying these matters before an authoritative body controlling rates, reasonable consideration may be given these complaints. The cities of Chicago, Boston, Philadelphia, New York, Washington, Baltimore, Pittsburg, Buffalo, Cincinnati, New Orleans, are all interested. The amount of cut flowers sold in this country reaches in the aggregate a great sum of money and the complaint of the growers and shippers is that there has been a marked increase in the cost of handling goods by reason of the edit which has been put in force by the express companies requiring extra charges on the return of empties, to which the growers have unwillingly submitted. The claim is made that the grower is most seriously handicapped in his business by the excessive charge upon the return of empties. The growers around New York complain against this additional charge, which went into effect May 20, 1908. In Boston the same conditions exist, and the Boston people say that they desire to secure return to the old tariff and the return of empty boxes to regular shippers free of charge. Then again, in the general schedules there is allowance made on nearly three score articles for ice shipment. The people of Philadelphia, Chicago and Denver all particularly take up that point. An allowance of 25 per cent. on the gross weight is made in the schedule alluded to. Mr. Peter Reinberg, a shipper in Chicago, says: "Our cut flower shipments contain a little over 20 per cent. of the weight of ice." Mr. E. H. Hunt of Chicago says: "In the shipment of flowers 25 per cent. ice is used, not on long distance shipments, but of which go to points such as Dallas, Ft. Worth, and Oklahoma, 40 or 50 per cent. ice is used." The Randall Co. of Chicago says: "Our average shipments contain 25 per cent. ice." Loebmann Bros. Co., Montreal, Canada, writes: "We use on an average 20 per cent. ice on the gross weight; we would like to use none but our customers lack that too much for express charges." The company has 1,000,000 square feet of glass for roses. This is but a sample of almost innumerable letters. Mr. Edwin Reed of Philadelphia, says: "In order to be specific in presenting this claim, will say that I made a personal request to the American Express Co. of this city on June 20, 1908, for the discount of 25 per cent. weight allowance on a shipment of flowers made to the Canadian Floral Co., Charleston, S. C., in which it was necessary for us to use ice amounting from 40 to 50 per cent. of the gross weight of the shipment, but the request was ignored."

There is a feeling among the shippers that the action of the express companies is arbitrary and the advice I gave as chairman of the Legislative Committee was to bring the complaints to a body which is properly constituted hereon, and to submit them to the Board of Traffic Managers fairly and straightforwardly, and in my opinion they would receive consideration and if it is possible to get the charges and allowances in a more treated condition. It would be long.

I have a mass of papers on the matter which it is not necessary to burden you with. I have received the general schedule from the American Express Co. and the Wells, Fargo Co. I have also had most courteous consideration from the superin-

tendent of the American Express Co. in New York, and from a traveling representative of the American Express Co. As this company covers more ground and handles more of this product than any other two companies combined, it seems advisable to take the matter up through you. I am enclosing letters from Messrs. Welch Bros., Boston, Mr. Edward Reid, Philadelphia, and Messrs. Loebmann Bros., Montreal, as representative communications.

Respectfully yours,

BENJAMIN HAMMOND,  
Chairman Legislative Committee, S. A. F.

(Copy.)

American Express Company,  
Office of General Traffic Manager,  
65 Broadway, New York, Nov. 6, 1908.  
Mr. Benjamin Hammond, Legislative Com-  
mittee, Society American Florists,  
Fishkill-on-Hudson, N. Y.

Dear Sir: I beg to acknowledge the receipt of your favor of November 4th, and I will at once investigate the question of ice with shipments of cut flowers. I had not supposed that such shipments were being made to any great extent where ice was used for preservation. I am today making inquiry of our agents at the principal cities referred to in your letter, and will give you further reply later.

There is one point referred to in your letter which I may as well say to you now cannot be changed, and that is, the charge on returned empties. Our classification always provided that returned empties must be delivered at the depot by the shipper and taken from the depot by the consignee. We know that our agents did not live up to the classification in this particular and they had been picking up and delivering these empties for certain patrons. Agents at other points did not do so for any patrons and it constituted a discrimination which we were obliged to overcome by putting into effect a classification providing for an additional charge where pick-up delivery service was rendered. Shippers and consignees still have the option of delivering the empties at the depot and calling at the depot for them, in which case there is no additional charge made.

We must not lose sight, either, of the fact that the transportation and delivery of cut flowers during extreme cold or extreme heat, etc., calls for extra service in many cases.

Yours truly,

J. H. BRADLEY,  
General Traffic Manager.

## Name of Hydrangea.

The following statement is made in response to some inquiries, and to settle some apparent misunderstandings regarding the name of the hydrangea registered by The E. G. Hill Company, July 21st, 1908, as *Hydrangea arborescens alba grandiflora*:

Professor Sargent, after consideration, decided that the proper name for this variety was *Hydrangea arborescens grandiflora forma nova*. The registration was corrected to that effect, and the latter is the name accepted and recognized by this society.

W. N. RUDD, Secretary.

November 3rd, 1908.

## THE HORTICULTURAL SOCIETY OF NEW YORK.

The exhibition of the Horticultural Society of New York which opens on Tuesday, November 17 in the American Museum of Natural History, 77th street and Columbus avenue, marks an entirely new era in horticultural matters in New York. Inasmuch as the exhibition is open free to the public, and the normal attendance of visitors at the Museum is considerable, the public interest is guaranteed, but further than that, there will be simultaneously, the gigantic tuberculosis exhibit which has just arrived from Washington, and of itself, will attract thousands of visitors daily. Probably there has never before been so great an opportunity for the trade to secure first class publicity with such little effort. Exhibits

of novelties or specialties are welcomed and communications should be addressed to Leonard Barron, Secretary, 55 Liberty street, New York.

## PITTSBURG FLORISTS' AND GARDENERS' CLUB.

About forty of the members met at Schenley Park greenhouses on Monday, Nov. 2nd. A visiting day amongst the chrysanthemums in the neighborhood was the object for which the meeting was called. The day, however, was too short, and many of the places on the list had to be left out. Ten o'clock in the morning seems to be a little early for most of the Pittsburg florists, many of the tardy ones arriving after a move of inspection had been made. Supt. Burke and Mr. J. W. Jones conducted the party through the Phipps' conservatories, in which were found many things of interest, chief of which were the chrysanthemums and begonias Gloire de Lorraine, some of the baskets seen being superb. The party was then taken over by Mr. Randolph of Randolph & McClements, and transported by special cars to their store. After an inspection of the show houses, store rooms and other places of interest in the large, well equipped retail establishment, the party was conducted to the Dorsett Hotel, where an elaborate luncheon was provided by Randolph & McClements. After a few felicitous speeches by President Burki, E. Reineman and J. W. Jones, which were ably replied to by Mr. Randolph, a move was made to the extensive growing establishment of the firm on Stanton avenue. The crotons here are a feature and are worthy of special mention; thousands of plants of various sizes fill several sections. Mr. Randolph is justly proud of them, and much time was spent in this department. The fern sections were next visited, where ferns of all varieties and sizes are grown in quantity and next many sections devoted to palms, pandanus, cycads, poinsettias and many other things too numerous to mention. There was also a big array of chrysanthemums. The party then moved to the conservatories of A. R. Peacock, calling on the way at the residence of Mr. Reineman. Mr. Jenkinson conducted the party through the Peacock greenhouses.

Everyone was enthusiastic over the outing and expressed a wish that more visiting days of the same kind be arranged for. Such outings are productive of much good, bringing the wholesale and retail men into closer touch with the growers. The private gardener is benefitted by an occasional sidelight on the commercial phase of his profession, while the commercial man gets some idea of the scope covered by the work of the private gardener. The horizon of each is broadened and good fellowship promoted as other phases of the business than their own become better understood.

JAS. HUTCHINSON.

The regular meeting of this club, Tuesday, Nov. 3, was unusually well attended, it being Chrysanthemum Night, which always brings a large crowd. In the absence of the president and vice-president, Jno. W. Jones took the chair.

The private gardeners had a competitive exhibit of chrysanthemums as

## NEW FORCING ROSE

**WHITE KILLARNEY****"WABAN CONSERVATORIES VARIETY"**

A sport from the Pink Killarney, and is identical in form and habit, differing only in its pure white color, and being more double.

AWARDED A SILVER MEDAL BY MASS. HORTICULTURAL SOCIETY, AT BOSTON, NOVEMBER, 6 1908.

ORDERS TAKEN FOR PLANTS AT

**WABAN ROSE CONSERVATORIES, NATICK, MASS.**

— OR —

**SALESROOM—3a SOMERSET ST., BOSTON, MASS.**

It has been carefully grown and only the very best wood selected for propagating; the result of this treatment is seen in the remarkable vigor of the plants.

Own Roots						PRICE LIST							Grafted Stock				
Doz.	100	250	500	1000	2500	5000	Doz.	100	250	500	1000	2500	5000				
\$5.00	\$30.00	\$70.00	\$125.00	\$250.00	\$562.50	\$1000.00	\$6.00	\$35.00	\$82.50	\$150.00	\$300.00	\$687.50	\$1250.00				

**Plants Will Be Ready For Delivery After March 1st, 1909**

follows, thirty dollars being contributed in cash prizes equally by H. H. Negley, G. M. Laughlin and an unknown donor. The chairman appointed as judging committee, Messrs. Langhans, Lilly and Featherstone, who awarded first prize for twelve chrysanthemums, 12 varieties, to H. S. Price, gardener for G. M. Laughlin; second, to N. C. Madsen, gardener for R. H. Boggs; third to T. P. Jenkinson, gardener for A. R. Peacock. Six chrysanthemums, one variety, H. S. Price first for Bright-hurst; David Fraser, gardener for H. C. Frick, second. Specimen chrysanthemum, H. S. Price, first for Garza.

Phipps Conservatories had a large display of chrysanthemums, almost every one a specimen. Mr. Jones, the foreman, left the chair, and taking up the varieties in order, discussed them.

He thinks very well of Mrs. J. C. Neill, a light yellow, and Lady Hopetoun, heliotrope pink. At the conservatories Miss Clay Frick proves one of the best, though it does not do so well everywhere. Other notable varieties he considered to be Mrs. Wm. Duckham, F. S. Vallis, Leila Filkins, Miriam Hankey, Merza, Beatrice May, Mary Ann Pockett and Mrs. J. E. Dunne. At the conclusion of Mr. Jones' remarks Wm. Falconer asked for the chair, when Mr. Negley called the attention of the club to the fact that for several years Mr. Jones had attended almost every meeting, an active and interested participant, and shown quantities of high-class flowers from Schenley Park and Phipps Conservatories; that the same being city institutions he was debarred from com-

petition in any class, and Mr. Negley suggested that the club should recognize his unselfish and valued services by a gratuity. As this seemed to meet with the unqualified approbation the chair appointed Messrs. Negley and Langhans as a committee to decide the form the gratuity should take.

Mr. Jones is recognized as one of the best plantmen in the United States, and the Phipps Conservatories, where he is foreman, challenge comparison with the best institutions in the largest cities. The only wonder is that action in recognition of his services has not taken place before.

Some fine hardy chrysanthemums grown out of doors were shown by Fred Wissenbach, potted up in frames Sept. 20. He received honorable mention.

H. P. JOSLIN, Sec'y.

**BULBS—SPECIAL TO CLOSE OUT**

**LILIUM LONGIFLORUM** Japan Grown. 7-9 in., 300 to the case, \$6.00 per 100, \$50.00 per 1000.

**LONGIFLORUM GIGANTEUM.** 7-9 in., 300 to the case, \$7.50 per 100, \$67.50 per 1000.

**FREESIA REFRACTA ALBA.** We have a small surplus of the largest sized French-grown bulbs. Mammoth bulbs, 3/4-inch up, \$7.50 per 1000 as long as unsold.

**LILY OF THE VALLEY, Cold Storage.** For immediate forcing. Finest quality, case of 250, \$4.00; case of 500, \$7.50; case of 1000, \$14.00; case of 2500, \$32.50.

**DUTCH HYACINTHS.** Selected named varieties. First size, \$5.00 per 100, \$45.00 per 1000. Fine named varieties, second size, \$4.00 per 100, \$35.00 per 1000. Separate colors, singles, \$2.50 per 100, \$23.00 per 1000. Miniature, or Dutch Romans—very profitable stock for growing—finest named varieties in white, pink, and blue, \$2.00 per 100, \$18.00 per 1000.

**TULIPS.** A few of the leading varieties, which we can supply in quantity, as follows: Cardinal's Hat, \$1.00 per 100, \$7.50 per 1000; Duchesse de Parma, \$1.25 per 100, \$11.00 per 1000; Joost van Vondel, \$1.50 per 100, \$12.50 per 1000; La Reine, \$1.25 per 100, \$9.00 per 1000; Pottebakker

White, \$1.25 per 100, \$10.00 per 1000; Proserpine, \$3.00 per 100, \$27.00 per 1000; Rose Griselini, \$1.50 per 100, \$12.00 per 1000; Yellow Prince, \$1.00 per 100; Bouton d'Or, \$1.00 per 100, \$8.00 per 1000; Gesneriana Spatulata, \$1.25 per 100, \$11.00 per 1000; Darwins, \$1.00 per 100, \$9.00 per 1000; Picotee, \$1.00 per 100, \$8.00 per 1000; La Candeur (double white), \$1.50 per 100, \$12.00 per 1000; Murillo (double pink), \$2.25 per 100, \$19.00 per 1000.

**NARCISSUS.** Golden Spur, \$1.75 per 100, \$15.00 per 1000; Empress, selected, double-nosed, \$2.00 per 100, \$18.00 per 1000; Emperor, \$1.75 per 100; Princeps, 80c. per 100, \$6.50 per 1000; Single Von Sion, \$1.25 per 100, \$10.00 per 1000; Double Von Sion, selected double-nosed, \$2.25 per 100, \$19.00 per 1000; Mrs. Langtry, 75c. per 100, \$6.00 per 1000; Orange Phoenix, \$1.25 per 100, \$9.00 per 1000; Paper White Grandiflora, \$1.25 per 100, \$9.00 per 1000; Poeticus, 60c. per 100, \$4.00 per 1000; Barri Conspicuous, 80c. per 100, \$6.50 per 1000; Victoria, \$2.00 per 1000.

**ROMAN HYACINTHS, PINK.** \$2.25 per 100, \$20.00 per 1000.

**SPANISH IRIS.** All colors mixed, 40c. per 100, \$2.00 per 1000.

#### NEW BEDFORD HORTICULTURAL SOCIETY.

The New Bedford Horticultural Society accepted an invitation from James Garthley to hold its monthly meeting in the greenhouses of H. H. Rogers on Friday evening, Nov. 6, this being one of the days of the annual free exhibition.

An interesting discussion upon the culture of chrysanthemums was held. There was a good attendance of old-timers and the discussion was well flavored with reminiscences of the time when New Bedford gardeners could fill the old slating rink with magnificent specimens of the Autumn Queen.

During a recess the houses were inspected and light refreshments served. The general verdict was, that people might travel far and pay fat admission fees and not see better. With the exception of a few very fine plants, the stock was no longer more than usually overgrown, necessitating a looser style of arrangement, and this, combined with the use of a number of pompons,

anemones and double anemones, proved to be the most attractive feature of the exhibition. Mr. Garthley was awarded the Society's silver medal in token of appreciation of the excellent show.

The president, Frank C. Barrows, and Wm. Keith were appointed to represent the Society at a meeting called by the Board of Trade, the object of which is to devise some plan by which the public shade trees of New Bedford may be conserved.

THOMAS WHITE.

#### CLUB AND SOCIETY NOTES.

The Indiana State Florists' Association held its monthly meeting on Nov. 2.

The Albany Florist Club, N. Y., held their annual meeting on November fifth. There was quite a heated discussion on "crape-pulling."

The Dayton Florists' Club met on Nov. 2 at the store of J. F. Young and partially completed arrangements for a banquet to be held next month.

The Toronto Horticultural Society (Ont.) met on Nov. 3 and elected officers as follows: President, H. R. Frankland; vice-presidents, J. S. G. Connell, Dr. Baldwin; auditors, A. C. McConnell, E. R. Greig.

The Southampton Horticultural Society (N. Y.) met on Nov. 5 when an interesting paper on Cereus was presented by W. L. Egner. William Gray exhibited some remarkably old cacti, some of which were in flower and others in bud.

The Illinois State Horticultural Society held its annual convention at Champaign Dec. 8-18. Exhibits and demonstrations of spraying machinery

will be made and manufacturers are invited to correspond with the secretary, W. B. Lloyd, Kinmundy, Ill., for space.

At the annual meeting of the Worcester County Horticultural Society, Worcester, Mass., the following officers were elected: President, George Calvin Rice; vice-presidents, A. J. Marble, Chas. Greenwood, E. W. Breed; secretary, A. A. Hixon; treasurer, C. S. Bacon; judges—on flowers, plants, etc., George McWilliam; on fruits, Herbert A. Cook; on vegetables, Charles Greenwood.

## MISS VIRGINIA MAULE

We have made arrangements by which we now introduce to the trade this **exquisitely lovely new Dahlia**, originated by Mr. Wm. Henry Maule of Philadelphia.

Everything said of **Jack Rose** could be repeated of this giant but delicately beautiful Dahlia. The flower is a revelation in the delicate tints of shell pink; it has a charm that appeals but defies description; a chasteness that the English language cannot adequately describe.

**Virginia Maule** combines all the good qualities of Mrs. Gladstone, Queen of the Belgians, Nymphaea and Mrs. Roosevelt, with none of their faults. No hard center, no open center, no rigid formation, no crooked or drooping stem, no harsh lavender or crimson-pink shade. It is nearly as large as Mrs. Roosevelt, with the delicate pink tip of that international favorite, Mrs. Gladstone; the beautiful center of Nymphaea. The plant is very strong and vigorous, growing 4 to 5 ft. high, branching habit, blooming early and profusely. Flowers are borne with stately grace on long erect stems.

**Virginia Maule** is the **Commercial Light Pink Dahlia**, selling two successive seasons at \$6.00 per 100 blooms; will soon supplant all others of its color in cut flower market, and find its way to every Dahlia collection.

**Price:** Strong plants, April 1, 1909, delivery, 50 cents each; \$5.00 per doz.; \$35.00 per 100. A limited quantity of divided field-grown roots, 50 cents each; \$5.00 per doz.

A few whole clumps (full undivided crowns) while they last at \$1.00 each; \$12.00 per doz. Orders booked now and filled in strict rotation.

## CATALOGUES RECEIVED.

H. L. Crane, Westwood, Mass.—Folder of new Strawberry Barrymore.

Waban Rose Conservatories, Natick, Mass.—Folder and Price List of New Forcing Rose White Killarney.

Peter Lambert, Trier A. Mosel.—Catalogue and Price List of Roses for 1908-9. Has cover in colors and lists many novelties.

New England Nurseries, Inc.—Catalogue of Bulbs, Plants, Evergreens, Roses and Potted Strawberries for Autumn Planting, 1908.

New England Nurseries, Inc.—Catalogue of Bulbs, Plants, Evergreens, Roses and Potted Strawberries for Autumn Planting, 1908.

Anthony Waterer, Woking, Surrey, Eng.—Catalogue for 1908-9 of Hardy Trees, Shrubs, Conifers, Rhododendrons and other American Plants.

W. Atlee Burpee, Philadelphia, Pa.—Preliminary Wholesale Prices of Seeds for 1909. For the trade only. A very complete list of desirable vegetable seeds and choice varieties of sweet peas.

E. C. Heinemann, Erfurt, Germany.—Special Trade List of Novelties, 1909, and some other first-class seeds of former introduction. Handsomely illustrated and contains colored plates of flowers and vegetables of this season's new offers.

Bobbink & Atkins, Rutherford, N. J.—Illustrated Catalogue of "Everything for the Garden." This is a beautiful production, lavishly illustrated with elegant half tones of choice garden trees and flowers. It stands in the front rank as a refined and refining production.

Amos Perry, Enfield, Midx., England.—Catalogue of Pulbs and Tubers; Catalogue of Border and Rock Plants. Both very interesting and decidedly educational. Not much space is devoted to illustrations but the pages are teeming with extensive lists that the planter will find exceedingly useful and suggestive. A beautiful colored plate of Japanese irises accompanies the catalogue.

## PUBLICATION RECEIVED.

Annual Report of the Park Commissioner of St. Louis, Mo. This is a very artistic production and with its many superb full-page pictures makes an album as beautiful as it is interesting.

We are informed that the statement recently made in our columns that the A. J. Pieters Seed Co. had acquired the Lion ranch at Fairview, Cal., is not correct.

Toronto, Can. The Ontario Department of Agriculture has sent a carload of fruit to be shown at the Royal Horticultural Society's exhibition in London, Nov. 26-30. After the show closes it will be displayed at other large English cities.

## PLANT IMPORTS.

Roehrs Co., 2 cs. plants; August Rolker & Sons, 30 cs. do.; Sundry Forwarders, 164 cs. plants, 4 baskets do., 322 tubs laurel trees.

From Germany: H. F. Darrow, 12 cs. lily of the valley pips; Wm. Hagemann & Co., 140 cs. do.; O. G. Hempstead & Sons, 24 cs. do.; Maltus & Ware, 180 cs. do.; Chas. F. Meyer, 213 cs. do.; August Rolker & Sons, 3 cs. plants; Vaughan's Seed Store, 40 cs. lily of the valley pips; Ralph M. Ward & Co., 88 cs. do.; Weeber & Don, 24 cs. do.; Peter Henderson & Co., 207 bags seed; Sundry Forwarders, 25 cs. lily of the valley pips, 4 cs. plants.

Via Havre: Maltus & Ware, 4 cs. trees.

Via Southampton: M. E. Dupuy, 10 cs. plants; McHutchison & Co., 22 cs. do.

Via London: Stumpp & Walter, 5 lags horticult. manure.

Via Liverpool: Sundry Forwarders, 16 cs. plants.

Via Glasgow: Peter Henderson & Co., 240 bls. grass seed.

## NEWS NOTES.

Fryeburg, Me.—Eugene O. Abbott has started in the greenhouse business and will make a specialty of carnations.

St. Louis, Mo.—The Ellison Floral Co. have secured additional quarters in a building to be erected next to their present location.

Phoenix, Ariz.—Horne & Armstrong have made many improvements in their store, and as a new feature in this locality are raising vegetables under glass.

So. Weymouth, Mass.—George Hollis has named a fine, double crimson seedling peony President William Howard Taft, and another one, double pink, Governor Eben Draper.

Fargo, N. D.—The three large greenhouses at the State Agricultural College are nearly completed and Prof. Waldron contemplates a trip to Chicago this month to purchase needed plants.

Houston, Tex.—Prof. H. Ness has been made horticulturist to the experiment station of the Agricultural and Mechanical College, and Prof. E. J. Kyle will give his entire time to instruction in horticulture.

## BERMUDA LILY BULBS.

Vice-Consul W. H. Heyl, of Hamilton, states that the report of the Board of Agriculture of Bermuda just issued contains the following reference to the lily-bulb industry of that island:

The lily-bulb industry is rapidly recovering itself under the direction of the department, the weakest point being the unrestricted export of bulbs not true to type, falsely marked. A "pure-seed" law in America, parallel to the "pure-food" law, would bring the mixed bulb industry in Bermuda to an abrupt conclusion. At present the sale of selected stock, true to type, is being hampered, prices kept down, and confidence in the trade jeopardized; it is manifestly unfair to those growers who have exercised industry and foresight and who have followed with care the advice published from time to time by this department; for the purchasing florist does not know what he has bought until the bulbs are in full growth three or four months after potting.

The superintendent of the Bermuda public garden states that "the disappointment of both grower and customer, caused by the nonflowering of bulbs sent over as *Lilium Harrisii*, but which are not, have combined to reduce the value of the industry in Bermuda by some 80 per cent. Some two or three of our largest growers, I am glad to say, have for the last few years very carefully weeded out during growth the 'hybrids' and longiflorums and can now guarantee their stock absolutely pure *Harrisii*."

At the end of the year it is gratifying to be able to report an immense improvement all round in the lily industry and next year should witness the export of some very fine bulbs. The total number of cases shipped was 6,399, valued at \$46,777.

Boston—The party from Boston to the Chicago Flower Show, leaving on Saturday, Nov. 7, numbered seven, including one lady.

## Of Interest to Retail Florists

POINTS OF SUPERIORITY IN A  
DISPLAY ICEBOX.

The methods adopted by florists for the preservation of cut flowers have been many and varied. The cool cellars where flowers were usually kept in the early days of the flower trade, in time gave way to the ordinary domestic refrigerator, the latter in turn being supplanted by the more pretentious and larger box with glass doors. Today the flower box of the progressive florist is a marvel of beauty, if not in every instance an object of utility. Were half the attention paid to the matter of refrigeration as is bestowed upon outward embellishment, much might be credited to the florist's income, as faulty construction of boxes

causes, in many instances, as much loss of stock as no icebox at all.

Great care should be exercised in designing a display box. A depth of three feet (approximately) from front to back—inside measurement—is ordinarily sufficient, while any height from the flooring consistent with the dimensions of the store and the owner's judgment is allowable, reserving space for the ice chamber. Between the bottom of the ice chamber and the flooring seven feet is sufficient height—inside measurement—for any display and renders the handling of vases of flowers to and from the shelves quite easy. Mirrors or white paint should be used as an inside lining. The temperature of a display box should be kept at 50 to 55 deg. Sliding doors are preferable to those on hinges, as the latter are apt to settle or warp.

Electric lights should be hidden from view from without and controlled by switches on outside of box.

The temperature suggested has been found most desirable, as it does not chill the flowers, but tends to harden and fit them for service when taken from the box.

## "Plant Stand Brothers"

Little "Mike," smallest of the three "Plant Stand Brothers," addresses Society American Florists, with greetings to all:

"Hully Gee!" Look at me,  
I'm the "littlest" of the three.  
But with a "fetch," I can stretch  
Just my double, don't you see?  
Winners we — where'er we be  
In p ant display, o'er land and sea.  
There are two others "bigger" brothers.  
Built on lines just same as me.  
Jim's number two, Bill's number three,  
And we're hot after any job we can see,  
Holding up flower pots full of show,  
For that's what we're built for, don't you know?  
Those who have us think we're great,  
Because with the three of us they can make  
Plant stands, in inches, from six to forty-eight.

The Moore-Livingston Adjustable Plant Stand (Patented)

## NEWS NOTES.

Jacksonville, Fla. New refrigerator,  
wall show-cases, plant stands, etc., are  
among the improvements with which  
Mills, the Florist, will greet his cus-  
tomers this season.

St. Louis, Mo. The florists have  
adopted a scheme of sealing the ribbon  
to the box with wax and stamping  
their private mark thereto, to prevent  
any purloining of flowers in transit.

## NOTICE

We desire to notify the trade that we  
are the owners of United States patent No.  
489,218 for Floral Figure which claims:

"A florist's letter or figure  
stamped from a sheet of paste-  
board or other suitable material,  
having an adhesive coating ap-  
plied thereto and an outer cov-  
ering of granules of sawdust  
appropriately colored to rep-  
resent the petals of the Heli-  
chrysum arenarium substan-  
tially as described."

Letters which are a direct  
infringement of this pat-  
ent are being put on the market and we  
intend to hold all who make or sell the  
infringing letters to strict account.

The lawful patented goods are in every  
respect much superior to the infringement.  
**BOSTON FLORIST LETTER CO.**  
66 Pearl St. N. F. McCarthy, Mgr. Boston, Mass.

## Flower Market Reports.

**BALTIMORE** Business is feeling the impulse given by the more settled financial condition of the marts of commerce and trade since the presidential election. Some improvement is noticeable. Stock of all kinds is fully equal to the demand and as things in general assume the normal condition it is expected that business will continue to improve.

The only marked change in flower market conditions this week is the advance in price of violets, which has been practically doubled. In other material prices remain stationary and no advancement is looked for until the latter part of next week, when Thanksgiving Day influences may be expected to operate. All flowers are very much improved in quality and winter grades are beginning to materialize on roses, carnations and other staples. The mid-season chrysanthemums are already commencing to weaken and the late sorts are in sight.

This is the season of the **BUFFALO** chrysanthemum and one is sure to be greeted on all sides by this flower, in all its gorgeous, flaunting hues. At the wholesalers they were seen in good quantities and qualities, varying in size from an aster to the largest variety. Good stock is moved quite freely but the small stuff needs a good deal of force. Carnations were in over-supply, in fact too plentiful for comfort. The bright weather of a week ago brought them in too fast and there being no demand they simply have been carried along from day to day awaiting an outlet; the same may be said of lily of the valley, which also is good but finds little or no demand. Violets are coming in good and the demand increasing. Beauties and teas are in heavy supply. Narcissi and sweet peas have made their appearance. The social calendar is filled with coming-out parties, teas, etc., and there should be a good awakening soon to put the market back into condition.

Mild, clear weather has given the **CHICAGO** market plenty of first-class stock. Chrysanthemums are still at their very best and though the season for this flower has not been up to the expectations of the growers financially, it is a success as to the quality and number of the blooms. Roses and carnations also are good in quality, the latter remarkably so for the season. Trade started in well on Monday but it dropped off and the middle of the week was rather dull, brightening up again towards the end. The market is made particularly lively by the Flower Show visitors who are hunting up their friends and enjoying the hearty handshake that brings back other days. A large proportion of the callers are eastern men.

Business is improving **DETROIT** steadily but slowly. The shortage of violets is felt very badly; other flowers sell at usual prices with no waste visible. In general, conditions are up to last year less some of the fancy work like large decorations or store openings.

The retailers all report a decidedly dull week. There was little demand for stock of any kind. Flowers of all kinds are plentiful; chrysanthemums, of course, have the lead, and there are many fancy sorts on the market. Roses are of good quality, American Beauty having probably the best demand. Carnations are fine, with a slight advance in price. Lilies are about equal to demand. Violets are improving. Fancy lily of the valley is in good supply, with fairly good demand. Some nice cattleyas are seen and sell readily. The plant market is supplied with well-grown material. Greens are in plenty, with demand just fair.

With the exception of election day, business the past week kept up the improvement noted in last report. By Saturday all stock was well cleared out, and, while there was no advance, quotations held firm. The jump is coming, sure. All it needs now is a little backbone to set the ball a-rolling. Conditions are right; roses in general were equal to all demands, but not over plentiful. Chrysanthemums are of course very abundant and prices rule low. Indoor pompons have a purity and finish not possible with outdoor stock and have the call. Carnations have slackened up a little with a consequent stiffening in prices. Orchids remain normal, with supply much shortened. Violets are scarcer and regular channels have taken all arrivals, so that there have been but few seen on the street lately. Demand for lily of the valley considerably improved. In the greens market there is plenty of everything at normal prices, and quality excellent.

It is refreshing in **WASHINGTON** the extreme to be able to report that the flower business has been more active during the past week than at any time since before summer. All flowers, particularly carnations, are greatly improved in quality; violets have taken on a regular winter tint, and the stem, especially of the Californias, is all that the most critical can desire. Chrysanthemums are everywhere in the greatest profusion and splendor, but the demand keeps fair pace with the output.

### OBITUARY.

#### Andrew Groll.

Andrew Groll, one of the oldest florists in the East Williamsburgh cemetery section of Brooklyn, N. Y., died on October 30, after a brief illness. His wife had been an invalid for nearly eight months. After making all arrangements for her husband's funeral, she failed rapidly and in a few hours expired. Mr. Groll was 63 years old.

#### James Lowe.

James Lowe, a well known gardener about 71 years of age, died suddenly at his home in New Bedford, Mass., on November 6.

#### W. Greiner.

W. Greiner, a florist of Bridgeport, O., was instantly killed in a runaway accident on November 6.

**Lynn, Mass.**—John Abendroth was fined \$200 in the police court last Tuesday for stealing floral designs from graves in Pine Grove Cemetery. His object was to get the wire frames which he afterwards sold to small florists. This revolting pilfering had been going on for about a year.

### EVERYBODY KNOWS

Park, Cemetery and Lands are properly done without the aid of an accurate leveling instrument.

Bostrom's Improved Levels, No. 2 at \$15.00 and No. 3 at \$25.00, are conceded by all who KNOW to be the only Levels on the market which meet all the requirements, at the price.

Our guarantee book of every Level we sell, and satisfied users in every State in the Union heartily endorse every claim we make. Shipping weight 12 lbs. Description on request.

### NEW YORK FLOWER MARKET.

The market is still dominated by chrysanthemums, the better grades and varieties having displaced the smaller kinds. Bridesmaids and Brides are in light supply. Other roses being somewhat more plentiful. There are plenty of carnations and a great difference in quality is apparent. The weather has left its impress on them—stems of Enchantress weak with some growers, and sleepy flowers. They are not selling well and probably will not until the bulk of the chrysanthemums are out of the way. Business in general is sluggish, demand running mostly to Beauties, cattleyas, gardenias and chrysanthemums. Roses are quoted at somewhat higher figures than a week ago, but averages are about the same, owing to the lack of snap to demand. Violets are going at a slightly better price this week. Lily of the valley in lighter supply at present with price stronger. Cattleyas

have slowed up considerably in the past week.

### BUSINESS CHANGES.

Philadelphia, Pa.—Frank Palmer has left M. Heron and taken a position as manager of J. Becker's store at Market and 52nd streets.

New York, N. Y.—O. V. Zangen has removed his wholesale cut flower business to 52 West 28th street, New York, and appointed R. Gretsche as manager. He will continue to give his personal attention to the seed business at Hoboken, N. J.

### GALAX. Green and Bronze

Fresh from the Woods, Green prompt shipment, 40c. 1000; Bronze Galax ready about Nov. 25th, 40c. 1000. Holly (with berries) \$2.50 case. Mountain Laurel Leaves, \$2.00 case. Terms—strictly Cash. Shipments North made from Galax, Va. Express and freight rates less than from N. C. points. We are experienced packers and guarantee satisfaction. Look us up in Denver Bradstreet.

W. M. WOODRUFF & SON, LOW GAP, N. C.

# Buyer's Directory and Ready Reference Guide

Advertisements under this head, one cent a word. Initials count as words.

Display advertisers in this issue are also listed under this classification without charge. Reference to List of Advertisers will indicate the respective pages.

Buyers failing to find what they want in this list will confer a favor by writing us and we will try to put them in communication with reliable dealers.

## "SCALECIDE"

PRATT'S

TRADE MARK REG. U. S. PAT. OFF.

Will positively destroy SAN JOSE SCALE and all soft bodied sucking insects without injury to the tree. Simple, more effective and cheaper than lime sulphur. Not an experiment. Write for FREE sample and endorsement of fruit growers and entomologists who have used it for years. Prices: 50-gal. bbl., \$25.00; 30-gal. tin, \$15.00; 10-gal. can, \$6.00; 5-gal. can, \$3.25; 1-gal. can, \$1.00, f. o. b. New York. One gallon makes 16 to 20 gallons spray by simply adding water. "Pocket Diary and Spray Calendar for 1909 sent FREE. Mention this paper."

### Why My New Curved Iceless Eave is Far Superior to Anything on the Market Today

- 1st. No sash bars incased in iron, thereby eliminating all danger of bars decaying.
- 2nd. Can be used in conjunction with iron frame construction, thereby doing away with that very objectionable feature, "columns."
- 3rd. Roof bars with drip grooves, which act as conductors to carry away the condensation: Result, the driest roof ever used for greenhouse purposes.
- 4th. **THE MOST IMPORTANT OF THEM ALL.** The very small increase in cost over the ordinary style of construction which makes it possible to be used for commercial as well as private purposes.

**William H. Lutton,** Horticultural Architect and Builder  
West Side Ave Station (C.R.R. of N.J.) Jersey City, N.J.

a twelve page circular that you Superintendents and Gardeners will find of especial interest. It is a beautifully printed circular, describing our details of construction in a way that you will appreciate.

We want you to have this circular — want to send one to your employer also. Send us both your names.

**Hitchings & Company**  
1170 Broadway New York

## Our Shadeless Ridge Type of House

Its advantage is, none of the benches are shaded by the ridge.

This section is the 53-ft. Sectional Iron Frame house we furnished Mr. Fred Burki this season. His location on a side hill gives him a grade of about 5 feet in fifty.

Robert Simpson built his two 30 x 46 1/2 feet houses on the level, and graded them inside to meet his particular ideas.

Here then are examples of medium and wide Shadeless Ridge houses of our Sectional Iron Frame Construction. Each owner declares that they are the houses of the future, no matter what you want to grow.

If you are going to build, think these things over and get in touch with us.

**Lord & Burnham Co.**

Main Sales Office: 1133 BROADWAY, N.Y.

BOSTON: 81, Tremont Building. PHILADELPHIA: 1215 Filbert St.

## TAKE THE RIGIDITY QUESTION

You might think on first glance that a house so light, so airy and simple in its construction could not be rigid and enduring. It is decidedly both! You see with the encasing of the roof bars (or core bar as we call it) in the galvanized steel U-Bar, every bar is practically a rigid rafter, although the combining of both gives a member no larger than the roof bar used in the usual flat rafter frame construction. The core bars are chemically preserved against decay, and protected against condensation by the steel U-Bar. The steel U-B is galvanized against rust. It is the ideal construction for private estates, parks, public institutions and florists' show rooms. Send for catalog.

## The Tree Buyer

When the average person buys a tree, he looks for size—he wants it tall, with a full sweeping head and as large a caliper as he can get away with. The matter of the roots is always a secondary consideration and it would be a useless task to attempt to enlighten him on the necessity of choosing a tree that has a good foundation, regardless of the size above ground. The size of the tree, lots of wood, and the price that he is obliged to pay for it appeals too strongly. All trees are the same to him, and as there is no great expense in growing them, he thinks, the price must be very low. When he meets such conditions he buys his tree.

To meet such requirements the nurseryman rises to the occasion and to supply Mr. Bargainhunter with the requisite amount of kindling wood he gives him a tree that has been planted out for some seasons and which has never enjoyed the benefits of a shift from the position where it was first placed. When such a tree is taken up, its roots may run yards off, with a few little feeders at the ends of the straggling roots. This means that the essential parts of the root system are destroyed in digging, and the prospects of the tree living in its new location lessened to a dangerous degree. This is a sample of the field-grown beauty that is sold for a very small price. Such a tree is shown in picture number one. It had, as stated above, long rambling roots and a paucity of fibre.

To give a tree proper attention during the time of its stay in the nursery costs money. This attention, which applies to shifting, pruning, guarding from pests, etc., cannot be given to trees that must be sold for a few cents.

Illustration No. 2.

A tree cared for well, after a few seasons, show a mass of tender feeding roots such as are shown in the second picture. Such trees as these are sure to live if given a semblance of fair treatment but they are never found on the bargain counter. It is difficult to make people understand the necessity of charging a reasonable price for such a tree and with a knowing smile they will say, "Tommy Rot," and take the cheaper tree.

Evidences of these conditions are abundant throughout the country. Even if the tree is all that can be desired it is often subjected to such rough treatment that it cannot reestablish itself when shifted and after lingering through a half-dead-and-alive existence for some months, it dies out.

Want of proper care during the time of transit from the nursery and after it is received at its destination is the cause of this. A tree left with its roots exposed to drying winds is sure to suffer. Even when properly packed but allowed to lay about an express office and on an express team any longer than is absolutely necessary the same is true.

During years' experience with a free tree distribution at the Boston City Greenhouses the greatest difficulty was experienced in getting the recipients of the trees to understand that the trees must be planted immediately and, what was more difficult for their comprehension, not too deep. In many cases inspection showed trees buried to the depth of three feet.

The object of this little screed is to insist upon the fact that a good tree is never sold for a plugged silver piece, and to impress upon the nurseryman the prevalent public ignorance on the subject of tree planting and his duty in consequence.

Illustration No. 1.

## Tree Talks

III.

### OUR DEPENDENCE UPON THE TREES

Almost every branch of manufacture is dependent, more or less, on trees or their products. In the manufacture of the various articles used in commerce, a great portion of the materials used have been hitherto (except for the seaboard towns) the products of our own woods. At the present time we of Massachusetts are dependent on other States for a large portion of the material used in building and manufacture, and every mechanic who works in wood looks every year, more and more, out of the State for his raw materials. Even foreign resources are fast failing, and the forests of Maine, New Hampshire and northern New York are disappearing as rapidly as our own. At this rate the supply of good lumber, in many States, will soon be exhausted; even the large pineries in Michigan are fast disappearing, and every year we have to go further and further away for our supplies. Some manufacturers of wooden ware in Boston have already found it to be more economical to live near the woods where their supply comes from, and have moved their factories out of the State. What takes place in individual cases indicates the necessary but silent movement of the masses, and one by one the woodworkers of the State will have disappeared. This might, in a measure, be prevented by planting at once plantations of trees most useful in the various branches of manufacture. Our legislatures seem powerless to stay the axe of the woodman, though they might do much to encourage the planting of forest trees and thus, in some degree, avert the evil consequences which must surely attend the destruction of our native forests.

### WHAT TO PLANT

The next question is, what shall we plant that is the most profitable? This would, of course, depend in a measure, upon the soil to be planted. I would suggest that the most profitable tree for New England, especially Massachusetts, would, for the worn-out lands, be the White pine (*Pinus strobus*); for ordinary land of fair quality, the Sweet chestnut, beech, Red oak, Paper birch, Tree of Heaven (*Ailantus*), Buttonball, Red cedar, Pin oak, White oak, and Sugar maple. The willows, White ash, Water ash, elm, American linden and Sour gum will do well on moist or wet lands. The nut-bearing trees will grow on any good soil, but to have them grow rapidly it needs a generous soil. The Black walnut flourishes pretty well in the vicinity of Boston. I know of trees planted from seed twenty-five years ago that are now twelve to eighteen inches in diameter and fifty feet high. Most persons who plant butternut White walnut, Black walnut or hickory transplant trees too large; hence so many failures. One or two-year old trees, ranging from six to eighteen inches in height will give better satisfaction in ten years than trees five or six feet high, unless they have been transplanted every two years, to prepare them for their final transplanting.

### CULTURE OF THE WHITE PINE

The White pine should be planted from four to six feet apart each way, on ground that was broken up the year previously if possible, keeping the land cultivated between the rows for the first two years. This

would enable the plants to get well rooted and destroy the coarser weeds which might retard the growth of the young seedling by sapping the land of what little vegetable food it might contain. After this the plants would grow rapidly, and by their dense foliage would soon smother out the weeds, and the annual fall of the pine needles would protect and furnish the growing plants with food. In making the plantations it would be well to have each lot planted with trees of nearly the same size; that is, if the plants are from twelve to twenty inches in height. Sort them as nearly as possible into the two sizes, planting each size by itself, to insure a more even growth. After the fourth year it would be well to trim off smoothly the lower limbs. This pruning should be done annually for several years, until the branches are as high as you could reach. This would throw the vigor into the trunk of the tree, and help reduce the loss by fire, which soon destroys young trees where the branches remain near the ground.

### TRANSPLANTING

Transplanting trees is one of the most important duties of the gardener. It is too often done without sufficient attention to the principles on which its success or failure depends. Yet it is simple enough, if we do not labor to render it confused by too many imaginary refinements. When a plant is taken out of the ground for transplanting, its roots are more or less injured in the process; consequently, it is less able to support the stem than it was before the roots were mutilated. This loss of power will be in proportion to the roughness with which the roots are handled. The importance of the roots of plants is not alike at all seasons; in the summer, when there is the greatest demand upon them in consequence of the perspiration of the foliage, they are most essential; in the winter, when the leaves have fallen, they are comparatively unimportant, as is evident from a very common case. If you cut a limb or a tree in July, when it is in full leaf, it will wilt in a few hours, the bark will shrivel and dry up, and in a day or two the whole will perish. If a similar limb or tree is cut in November or December, after its foliage has dropped, it will often retain its vitality until the following spring, when it will make an effort to grow; and in the case of some trees, such as the willow, they will grow after having lain on the ground all winter. I have seen pitch pine, willow, and several other woods cut and piled, throw out branches six to eight inches long, after standing all winter. It is the powerful perspiratory action of the leaves of deciduous trees, which renders them so difficult to transplant in a growing state; even if the buds are pushing the process should be avoided if possible, as immediately after that period the demand upon the plants is the greatest. In consequence of the smallness of the young leaves, the perspiration may seem feeble, yet the thinness of the newly formed tissue will not enable them to resist the dryness of the atmosphere unless there is an abundant flow of sap from the root; hence the necessity of syringing and shading newly transplanted trees or plants in leaf, so as to supply and preserve as much as possible the evaporation taking place, which, otherwise, would soon exhaust the plant.

*Jackson Dawson*

Arnold Arboretum.

## Laelio-Cattleya Digbyana-Mendellii

Our illustration shows a beautiful hybrid, the result of crossing *Cattleya Mendellii* with the pollen of *Laelia Digbyana*. This is one of the comparatively few cases in orchid hybridization where the best qualities of both parents have been transmitted to the offspring. The flowers are intermediate in color and form; the size of the seed parent, and the extraordinary large lip of the pollen parent have been retained, forming a combination far more beautiful than either of the parent species. The vigor of the hybrids is not the least of the good qualities obtained by the hybridist.

The flowers are large, sepals and petals pale lavender in color. The lip is very large, the basal portion folded over the column, forming a long tube, the throat of which is purple with bright yellow lines, which radiate outward and become lost in a zone of bright yellow which towards its outer margin merges into white. The outer edge of the lip is pinkish lavender, very wavy and crisp, cut into a broad fringe. Hybrids obtained with the pollen of *Laelia Digbyana* are all desirable. They are more generally known under the name of *Brasso-Cattleya*, as the popular name for *Laelia Digbyana* is *Brassavola Digbyana*. Our subject flowered in the collection of Major G. M. Laughlan, Woodland Road, Pittsburg, Pa., Herbert Price, gardener. Mr. Price is an orchid enthusiast and

has got together a fair collection containing many choice hybrids. The chief feature in the collection is the *Dendrobiums* which are the finest, healthiest lot the writer has ever seen.

*James Hutchinson*

## The Naturalization of Flowers

(Continued from Page 633)

When we begin our operations for naturalizing such subjects as daffodils or narcissi, we must keep clear of anything which may approach formality, so that the arrangement as a whole may be free and natural; in fact the more unconventional it is the better they will look when flowering time comes round. The best plan to follow if we wish to achieve this result is to scatter the bulbs broadcast, in rough irregular masses, and to plant them wherever they may happen to fall.

Who has not heard of the Poets' narcissus, so slender, so graceful, so unobtrusive in its breath of subtle perfume, and wax-like beauty? Its very name suggests to us its proper environment. There are two varieties of the Poets' narcissus. *Poeticus ornatus* and the old garden *Poeticus* which flowers somewhat later. Both varieties make capital subjects for naturalizing and make splendid effects in almost any situation. In the accompanying illustration (p. 633) they have been used on the sloping bank of a pond, under the shade of the overhanging trees, and the effect when in flower was simply a revelation of good taste and natural simplicity. What is possible with *Poeticus* is equally possible with a great many other varieties if we bear in mind to keep each distinct, to avoid overcrowding and not to have each mass in too close proximity to one another. Varieties which succeed well on a rather wet location are, among others, *Cyclamineas*, *Sir Watkin*, *Emperor*, *Duchess of Westminster* and *Empress*. For planting in grasslands, or in the semi-wild garden, a good selection would include *Queen of Spain*, *Mrs. Langtry*, *Sir Watkin*, *Barrii Conspicuus*, *P. R. Barr* and *Horsfieldii*.

While on this subject we must not forget the snow-

drops and the crocuses, the flowers of our childhood. How often I wonder does a glimpse of those simple little flowers take one's memory like a flash back through the mists of a lifetime to the days of our childhood. It is perhaps this peculiar something which makes them so popular and so necessary in our scheme of naturalizing. Both crocuses and snowdrops, may be planted almost anywhere and they will never look out of place.

Two other old-world flowers which we must include in our garden to give it that touch of poetical attractiveness are the wild violet, and the old English primrose. What could be more beautiful than the pert little violet peeping in bold masses from beneath its covering of dark green leaves? Where could we find anything so chic, so delightfully pretty as the primrose? No wonder poor old "Dizzy" (Lord Beaconsfield) used to worship them! Can we wonder that the poets should rave over them?

One could fill a book with the flowers of spring and their beauties. Let us not forget, however, the beauties of the *chionodoxas*, the grace of the wood anemones and the sweetness of the *scillas*. Then again in the grove, on the slopes of the wild garden, or nestling at the foot of the trees, nothing would be complete without the feathered hyacinths (*Muscari*). Truly for a simple effect these flowers have no equal. But then all flowers are beautiful no matter what their color may be, if they are planted in the right place.

Let us try and make them feel at home.

*W. W. M. Brown.*

attention of orchid fanciers and noted specialists in this country and abroad on this event which, as proposed, will be unprecedented in magnitude in this country. As all know, the orchid has made remarkable strides within a few years and while it has firmly retained its position as the most precious floral possession of nobility and wealth it has also been brought within the reach of the commercial florist and his appreciative patrons in all important centers in the country where the use of these flowers, in the many lovely species already available, is recognized as giving to floral decorative work a refined beauty unattainable by any other means.

### Chicago for the next National Flower Show.

It appears to be generally accepted that the National Flower Show which closed last Saturday night was a success in all that word can reasonably be expected to imply, taking all the circumstances into consideration. Chicago proved equal to the occasion and the wisdom of the selection of that city as the place in which to pull off the first National Flower Show has been well confirmed. Why is not Chicago the best location for the second National Flower Show which is already talked about? It is central, enthusiastic and, so far as we know, has never had a spring show of any great magnitude and undoubtedly the same elements and conditions which insured the success of the first will be equally or even more effective in a second. Weak spots in the handling of the recent show will have been located and strengthened and from every important standpoint Chicago is the logical conclusion.

### Striking the right chord.

Reports from widely separated sources are generally favorable as regards attendance and general public interest in the flower shows this season. Whether this means simply a transient whim in the public fancy or something more permanent will appear in due time. We are inclined to the belief, however, that the gain is due in some degree to a better understanding of the public's disposition on the part of those at the helm in the management of these exhibition enterprises. Thus the lessons of the past have not been without their salutary effect and the conviction has been driven home where it was most needed, that the public's standard and the gardener's standard of what constitutes an interesting exhibition are often distinctly different. The more thoroughly this fact is appreciated and acted upon the better will be the treasurer's report when the day for settlement comes and the less complaint we shall hear of public indifference.

### A commendable suggestion.

We have heard much favorable comment on the sentiments expressed by President-Elect Valentine at the banquet in the Chicago Auditorium last week suggesting that men of wealth should be encouraged to provide means for the study of plant life and floriculture in schools and colleges. That the instilling into the minds of the young a better knowledge of and familiarity with flowers would act as a valuable refining and civilizing influence of far-reaching effect cannot be questioned. There are few more philanthropic and altogether worthy objects to which endowments can be devoted. The love of trees, plants and flowers is one with affection for home and for humanity, compatible only with sweetness of character and the highest ideals of life. This is an influence which is destined to be more generally recognized than it has been and Mr. Valentine will find not only the S. A. F. and the elements it represents but the general public by a large majority ready to endorse and applaud any movement on the lines suggested in his very timely remarks.

## PROPAGATING WHITMANI FERN.

Editor of HORTICULTURE:

Dear Sir,—I have some *Nephrolepis Whitmani* and *Nephrolepis Amer-pohlii*. I would like to work a stock for next year; can you tell me how to go about it? Any assistance you can give will be gratefully appreciated by  
A GROWER.

To work up a stock of *Nephrolepis* ferns for another spring you should have some good-sized plants to bench at once, say 5 or 6 inch, planted in good soil about 12 x 12 inches. Soil in bench should be about 5 inches deep. The tops of plants should be trimmed of the old upward foliage about once a month, so as to give plenty of light and air for the runners. It is a good plan to mulch lightly with rich soil as the runners work to the surface. Runners are ready to take when they have developed their second frond and should be planted in good rich soil or potted in 2-1-4 or 2-1-2 in. pots, and well shaded until established. *Nephrolepis* ferns do their best in a night temperature of 65 to 70.

HENRY H. BARROWS.

## PLANTING HOLLYHOCKS AND MONTBRETIAS.

Editor of HORTICULTURE:

Dear Sir,—When would you advise planting double hollyhocks and montbretias? Can it be done now?

Yours truly,  
OUTDOORS.

You might have planted double hollyhocks six weeks ago with good results, but it is too late now. It would be better for you to wait until April to plant both the double hollyhocks and montbretias.

## RUFFLED GLADIOLI.

I grew some of Mr. A. E. Kunderd's new ruffled gladioli this season and they are verily the most beautiful type in cultivation. The new *Primulinus* with its deep rich yellow color and peculiar formation of flower is also very beautiful and will probably prove to be valuable for breeding. I made several crosses on different types with this variety the present season, and have some fine looking seed.

L. MERTON GAGE.

## KEEP PEGGING AWAY.

Men seldom mount by a single bound  
To the ladder's very top;  
They must slowly climb it round by round,  
With many a start and stop.  
And the winner is sure to be the man  
Who labors day by day,  
For the world has learned that the safest plan  
Is to keep on pegging away.

You have read, of course, about the hare  
And the tortoise,—the tale is old,—  
How they ran a race—it counts not where—  
And the tortoise won, we're told.  
The hare was sure he had time to pause  
And to browse about and play,  
So the tortoise won the race because  
He just kept pegging away.

A little toil and a little rest,  
And a little more earned than spent,  
Is sure to bring to an honest breast  
A blessing of glad content.  
And so, though skies may frown or smile,  
Be diligent day by day;  
Reward shall greet you after while  
If you just keep pegging away.

—Nixon Waterman.  
American Cultivator.

## During Recess

## THE NEW YORK FLORISTS' CLUB SMOKER.

W. C. Rickards and his staff who fill so acceptably the post of purveyors and entertainers of the critical florist and ornamental horticulturists of the Metropolis added another to the long list of their successful achievements, on Wednesday evening, November 18. The club room was filled to the limit with smoke and members and the singers, musicians and vaudeville entertainers provided for the amusement of the company were right on their job, especially the bagpiper, Captain Cameron who was a never failing center of interest for his countrymen and of subdued awe for those who were not. In the ante-room Joe Manda did the honors with tireless hospitality and if there were any hungry ones left at the wind-up it was not his fault. The company present numbered one hundred or more and was composed, with a few exceptions, of the younger element in the club which is coming forward with commendable energy and rapidly changing the complexion of the activities of the organization. It was nearly midnight when the party broke up, all well pleased with the evening's entertainment.

## NASSAU COUNTY HORTICULTURAL SOCIETY.

The Nassau County Horticultural Society held its first annual ball on Thursday, Nov. 12, in Pembroke Hall, Glen Cove, N. Y., and it was very well attended. Miller's Orchestra supplied excellent music and dancing was kept up till an early hour. A committee including some of the gardeners' wives looked after the refreshments in first-class style.

JAS. KESSON, Rec. Sec'y.

## BOWLING AT ASTORIA.

The Astoria (N. Y.) Bowling Club had a Ladies' Night on Tuesday, November 17, and many handsome trophies were distributed among the bowlers, Mrs. Miesem winning first prize. Phil Kessler and John Donaldson requested that their own scores be buried in oblivion for obvious reasons. The officers of this happy aggregation are W. H. Siebrecht, pres., sec'y and treas.; J. Miesem, capt.

## PROSPERITY STARTS.

Orders already within \$100 of being one half my spring '08 sales, and if it keeps up this way long shall have to refuse wholesale orders by February 1st to protect my retail trade which has heretofore been my best hold. Think '09 will be a record breaker from present indications in bulb trade.

J. L. MOORE.

## MOVEMENTS OF GARDENERS.

James Rust, formerly with P. L. Saltonstall, Hyde Park, Mass., has taken a position on the Merton F. Plant estate, Groton, Conn.

Mr. Wm. Dunman, gardener at the Union Printers' Home of Colorado Springs, has been offered a more lucrative position at the Nebraska University, Lincoln, Nebr.

## PERSONAL.

W. H. Maynard of Detroit is reported quite ill but not dangerously so.

John A. Lambert has taken a position as manager for J. L. Parker, Birmingham, Ala.

L. E. Marquisee of Syracuse, N. Y., is seriously ill with cerebral hemorrhage at his home.

Miss Lusa Graves, of H. W. Field's flower store, Northampton, Mass., is critically ill at her home.

Visitors in Albany: F. B. Green, representing H. Bayersdorfer & Co., Philadelphia; M. J. Beatus, of Dayton Paper Box & Novelty Co., Dayton, O.

Visitors in New York: H. G. Eyres, Albany; Carl Jurgens, Jr., Newport, R. I.; Sidney Hoffman, Boston; John Scott of Brooklyn—his first appearance since his long illness; David Welch, Boston, on a holly inspection trip to North Carolina.

Visitors in Boston: W. P. Craig, Philadelphia; J. N. Champion, New Haven, Conn.; D. F. Roy, Marion, Mass.; C. R. Knickman, representing McHutchison & Co., New York City; T. Mellstrom, representing Sander & Sons, St. Albans, Eng.; E. J. Harmon, Portland, Me.

Miss Bertha Foehlmann, sister of the Foehlmann Bros. of Chicago, will be married Thanksgiving Day to Mr. A. Hoppe of New York. The acquaintance was formed while abroad last year. Miss Foehlmann is an artist of considerable merit.

## NOTES FROM THE ROCKIES.

The El Paso County Horticultural Society, Colo., has just closed up its tenth annual year. Its object is to promote and encourage the cultivation of trees and flowers among the masses and particularly the children, to whom is offered at its annual flower show a liberal amount of cash and other premiums. Its work in civic improvement has been the means of placing this city in the foreground as the most attractive and healthy on the western circuit to the Pacific Coast.

Prof. S. H. Pammel's remarks in a recent issue of HORTICULTURE on the Flowers of the Rocky Mountain Regions had a gratifying effect upon the reader, inasmuch as it brings to the attention of the horticultural readers a few of the floral attractions of this locality. If Mr. Pammel's first trip out here was a revelation to him I would certainly have made his last more so in the indigenous floral line if I had seen him on his recent visit. Few realize that Colorado is the Flower Garden of the Continent.

JOHN BERRY.

## THE EXHIBITIONS

November 21, 1908

### NATIONAL FLOWER SHOW.

#### Concluding Days and Exhibits.

Violets, pansies, lily of the valley and lilies were special features of the last days of the show, with large baskets of flowers from the retail florists of Chicago in the "made-up" section. The violets were all from the east, and F. R. Gillman and Stephen Burns of Rhinebeck, N. Y., received first and second prizes, respectively. Pansies exhibited by Gustave Swenson of Elmhurst won the silver cup. Mr. Toole of Baraboo, Wis., also exhibited pansies. Poehlmann Bros., though not making a specialty of lily of the valley, were awarded first prize. Adam Wolmewicz had a fine specimen of a navel orange tree well laden with fruit and a ponderosa lemon tree, around which were grouped a collection of foliage and geranium plants.

The display of baskets of cut flower was excellent and most of the baskets were of large size. The three Beauty baskets in particular, shown by W. J. Smyth, Schiller and Weinhoeber, were a credit to the stores they represented. Smyth also had a basket of Perle roses; F. W. Schiller and Butler, Killarney baskets. On another table Butler Floral Co. showed a very tastefully arranged basket of white orchids and lily of the valley, another of anemones and pompons in white and still another in pink and white carnations. These two carried off first prizes. Two other beautiful baskets by Lange were one of violets, lily of the valley and mignonette, the other pink and white sweet peas with mignonette. D. R. Robertson won first on basket of Killarneys. A Lange won first on basket of Beauties and also on basket of Richmonds. Frank Ben's seedling carnation won second prize and his new dark yellow pompon chrysanthemum, Mrs. Frank Ben, was much admired.

The annex was filled during the latter half of the week with exhibits by Winterson Seed Store, display of palms and decorative stock, and Swain, Nelson & Co. the Glenview Nurseries. E. M. Barton and Vaughan's Seed Store both put in tables of vegetables and Barton took the silver medal.

Among the roses brought out later in the week was a vine of La Detroit by Geo. F. Hoff of E. Grand Rapids. Mick first prize. The exhibits of W. A. Manda were the wonder of the show. His new fern Polypodium Mandatiana, not yet in commerce, won the silver medal and as a bonus to all his prizes, took the diamond pin for winning the greatest number of premiums.

#### Floral Arrangements.

Just in front of the main hall, roses and lilies, Begonia Mandatiana, four large roses, American Beauty, included. First prize, between A. L. D. and D. R. Robertson. Basket of lilies, main feature, carnations—Cup to Butler Floral Co. Basket of lilies, main feature, cut flowers—Cup to Mrs. R. J. J.

#### Miscellaneous.

Silver cup and 1st prize, J. J. Roehrs Co. for lilies, E. D. Smith & Co. collec-

tion of old and new chrysanthemums; W. A. Manda, Dracena Mandatiana. Silver medals: M. Calvat, seedling chrysanthemums; Howard Gould, celosia; Julius Roehrs Co., Asparagus Duchesse; Phoenix Roehrs; Frank Ochslein, group of decorative plants; C. C. Polliworth Co., group of specimen plants; W. A. Manda, collection of viter colors.

Bronze medals: J. H. Peterson for Begonia Agatha; W. A. Manda, golden privet, collection of economic and curious plants; Thomas Roland, group of cyclamens.

Certificates of merit: F. R. Pierson, Nephrolepis superbissima; Henry A. Dreer, Nephrolepis Scholzei; Alois Frey, seedling anemone and single chrysanthemums; Robt. Craig Co., Baby Margaret chrysanthemum; W. A. Manda, Begonia Mandatiana, Anthurium Cettigiana, Yucca Menandii; J. Roehrs Co., Croton F. Sander; South Park, Chicago, group of plants; Lincoln Park, Chicago, group of plants.

Special cash prizes—H. Lange, flowers as arranged 25 years ago; Julius Roehrs Co., Crotons, Tacoa Chantareirie, Cyanophyllum Magnificence; Howard Gould, single-stemmed chrysanthemums; E. D. Smith & Co., collection of old and new chrysanthemums; Thomas Roland, group of cyclamens; F. Ochslein, collection of miscellaneous plants; Otto G. Koenig, pepper plants; Vaughan's Seed Store, trout and "before and after"; Smith & Peters, cabbage decorations.

Special mention to Adam Wolmewicz, group of plants.

### THE VISIT TO POEHLMANN'S.

The crowd at the union station Thursday morning showed the florists' appreciation of an invitation to visit the Poehlmann Bros' establishment at Morton Grove. They responded in a way that would have overwhelmed almost anyone else. But the Poehlmanns and their capable wives are equal to any emergency, and took such good care of their 350 guests that each one felt at home and enjoyed a day long to be remembered as one of the very brightest spots in their recollections of the great national flower show. A special train was provided and a social half-hour was enjoyed on the way.

After the inspection of the establishment, Mr. Phil. Foley called the visitors to order, and impromptu speeches took up the rest of the time.

Benj. Hammond said the Poehlmann Bros. exemplified the motto, "In union there is strength," by showing what success can be attained by working together. W. W. Coles made a few happy remarks on executive ability. Philip Breitmeyer said that seven years ago a party of men were traveling through this part of the country and they expressed disappointment at what the West was doing. He said one of these men was a guest today and introduced John N. May.

Mr. May said: "I plead guilty," but added that now he could say that not a manufacturing plant in the world today could surpass the Poehlmanns' establishment in its equipment for work, and proposed three cheers for the Poehlmann Bros. and wives.

The Misses Vera and Virginia Poehlmann, little daughters of Adolph and August Poehlmann, recited several times, to the great enjoyment of their guests, and were loudly applauded.

Mrs. Vesey, Philip Breitmeyer and others made felicitous remarks, and the Messrs. Poehlmann responded appreciatively.

### FLORISTS' CLUB OF WASHINGTON.

Seldom, if ever, has the Washington public been treated to such a scene as greeted them on Thursday afternoon, Nov. 12, at the old Masonic Temple. Promptly at two o'clock the doors were thrown open to the public, and from shortly after that time until its close at 11 P. M., Nov. 15, there was a steady throng of people coming and going during the hours when the show was open to the public, viz., 2-11 P. M. Both artistically and financially it was a beautiful success, something to make the Washington florists proud of themselves. The exhibit took in two spacious rooms on the second floor of the temple. From every wall and chandelier hung festoons of southern smilax, while dozens of canaries trilled out their greeting. The stage was beautifully decorated with magnificent specimens of Nephrolepis Whitmanii, Aucuba Japonica, variegated Arborvitae and Japanese junipers in fancy bronzed window boxes. The rich green effect was relieved in the centre by a large vase of Bonnaffon chrysanthemums, and on either side by magnificent specimen plants of Wm. Duckham, exhibited by Pennock-Meehan Co. The centre of the hall was given to Gude Bros.' display. It consisted of a magnificent fountain of over 500 American Beauties, 16 ft. high and 14 ft. at base. From four brass posts was stretched a railing of red velvet; the base of the fountain was composed almost entirely of adiantums, relieved by bunches of Beauties. Woven in and out among the roses on the column were tiny electric lights, simulating dewdrops. Near the four corners of the hall were Corinthian pillars, grouped close together and decorated respectively by F. H. Kramer, Gude Bros., Geo. Shaffer and Geo. Cooke.

Kramer's column at base was decorated with Whitmanii, Piersonii and Bostoniensis ferns and Timothy Eaton and Golden Wedding chrysanthemums. Geo. Shaffer's column, with Bostoniensis fern, autumn leaves, Timothy Eaton chrysanthemums, and American Beauty roses. Gude's column, with Bryanii fern, adiantum and yellow chrysanthemums. Geo. Cooke's column was one bank of Boston fern and yellow chrysanthemums.

On entire side of room were two large semi-circles decorated by J. R. Freeman; these were not in competition. At the top of each stand were immense plants of Kentia Forsteriana and Boston fern, artistically arranged. These were interspersed with specimen decorative plants and the entire effect was magnificent.

Just in front of stage was a fleur-de-lis shaped table of chrysanthemums, roses and carnations, decorated by Gude Bros. It was banked on edges with Bryanii ferns. Corresponding to this at the other end of the hall was a table of similar shape, of roses, chrysanthemums and lilies of the valley. Just back of this was a fine display of begonias Rex and Lorraine, crotons, ferns and dracaenas, the exhibit of Mrs. L. J. Leiter. Through the courtesy of W. R. Smith there was a fine display

by the Botanical Gardens, better described in Mr. Smith's words as being the finest botanical exhibit for the space it occupied, ever made.

#### Out of Town Exhibitors.

A. N. Pierson of Cromwell, Conn., showed six large pots of Farleyense and specimen chrysanthemums; Poehlmann Bros., Chicago, a large vase of Mrs. Potter Palmer rose; Elmer D. Smith, Adrian, Mich., President Taft chrysanthemum; E. G. Hill, Richmond, Ind., Lynwood Hall and Golden Eagle chrysanthemums; The Chas. Knopf Floral Co., of Richmond, Ind., seedling carnations; R. Vincent, Jr. & Sons Co., pompon chrysanthemums in many varieties and colors; Joseph Heacock, Wyncote, Pa., carnation Dorothy Gordon; Wm. H. Moon Co., Morrisville, Pa., arborvitae and other fancy conifers.

The next hall contained table decorations by Mayberry and Hoover, and Marche, and table and mantel decorations by Blackistone, Geo. Shaffer and Geo. Cooke. On the first day, Mayberry and Hoover's table was decorated in a pyramidal effect of Enguehard chrysanthemums and adiantum with streamers of pink lavender ribbon. Marche exhibited a table decorated with bouvardia and white chrysanthemums and furnished with Japanese china. The centre was a large vase of white chrysanthemums. At each corner were red Japanese slippers with bouvardia and one white chrysanthemum. Here and there were placed bunches of bouvardia with plumosus and streamers of pink chiffon. This table was kept intact during the show.

Geo. Cooke's table was especially effective in a red and green effect. In the centre was a tall vase in shape of a half-opened umbrella filled with American Beauties. On each corner were small umbrellas with Beauties protruding from them, while from the centre to each corner came broad red ribbon streamers. His mantel was decorated with Farleyense fern and a large half-open umbrella of Beauties. Geo. Shaffer's table had a centrepiece of orchids and lily of the valley with streamers of adiantum to each corner; mantel of adiantum, orchids and lily of the valley. Blackistone's table had tall centrepiece with mossed tree effect, filled with yellow pompon chrysanthemums and Farleyense fern with light yellow streamers; mantel decoration, ferns and yellow chrysanthemums. In addition to the above decorations was one by Blackistone of a magnificent autumn basket of yellow chrysanthemums, autumn leaves and yellow ribbon; a chancel decoration in white chrysanthemums under a banner of Southern smilax and plumosus; also shower bouquets of roses and lily of the valley by Shaffer. A basinet by Marche made of tiny flowers, the words "Good Morning" in green and a pair of twins ensconced therein, was one of the chief centres of attraction during the entire show. Another unique exhibit was by Blackistone, a bridal maid made of small white chrysanthemums, showered with adiantum and lily of the valley with streamers of white chiffon and white silk cord and tassels. Mrs. Vernon Ley had on exhibition a fine collection of Nephrolepis, including Superbissima the only fine speci-

men exhibited in the commercial entries.

During the entire show Pistona's Orchestra furnished delightful music, winding up on Sunday with a sacred concert. On Friday and Sunday evenings Mrs. Cecelia Howard Fentress sang. On Friday evening, by request, Jas. L. Carberry played his new composition, the Florists' Club Two Step. On Friday evening there was given out by Kramer a handsome floral horse-shoe to the league bringing the largest number of men to the show. The U. S. Plate Printers' League won the trophy with twenty-eight members. There were many other interesting innovations, indicating that the Florists' Club of Washington is in the van with something in the exhibition line making appeal to the public interest as well as to that of the grower. And the public responded accordingly.

#### NEW HAVEN COUNTY HORTICULTURAL SOCIETY.

The eighth annual chrysanthemum show of the New Haven County Horticultural Society was held on Nov. 10, 11 and 12 at Music Hall, New Haven, Conn. It was the finest exhibition ever made by the society, the number of entries being fifty in excess of last year. The arrangement of the hall was excellent. The stage was massed with palms and groups of specimen palms were centrally placed in the hall. Among the large exhibitors were Mrs. Francis Wayland, gardener David Kydd; Yale Botanical Gardens, gardener John H. Murray; Mrs. Thomas G. Bennett, gardener Robert Patten; Mrs. O. B. Jennings, gardener Oscar Carlson; Joseph E. Hubinger, gardener A. Bretschneider; Miss Bliss, gardener J. T. Burns, and Frank S. Platt. The judges were Messrs. Dallas of Waterbury, Mahoney of New London, and Zuger of Hartford.

A certificate of merit was awarded to Wm. J. Howe, gardener to Joel A. Sperry, for a sport of Nephrolepis Whitmanii, also for a new seedling canna. A. Bretschneider, gardener to Joseph Hubinger, was awarded a certificate for a new smilax. The judges awarded a special prize to J. T. Burns, gardener to Miss Bliss, for specimen chrysanthemum bush plants. Certificate of merit to W. H. Shumway, Berlin, for seedling carnations.

#### Awards.

Group of plants and flowers, 100 sq. ft., F. S. Platt, Group, 50 sq. ft., A. Bretschneider. Collection of orchids, Adam Patterson, second prize divided between Messrs. Bretschneider and Burns. On the various foliage plant classes, Robert Patten won four firsts, one second, Ernest Carroll, gardener for N. W. Kendall, one first, one second; F. H. Platt, one first, A. Bretschneider, two firsts, two seconds, Jas. Bruce, two firsts; John H. Murray, one second; Adam Patterson, one first. In the chrysanthemum plant classes, Oscar Carlson won three firsts, one second; J. T. Burns, one first; Adam Patterson, two firsts; John H. Murray, one first, three seconds. In cut bloom classes, John T. Burns received one first, Oscar Carlson, five firsts, three seconds, J. H. Murray, three seconds; Adam Patterson, two firsts. In roses the prizes went to H. L. Hill, Wm. Inglis and John T. Burns. In cactations Wm. Inglis won one first, three seconds; F. H. Kimberly, three firsts; John T. Burns, two seconds, Walter Angus, one first and one second. A. Bretschneider, one first. 100 violas, Walter Angus. Fruit and vegetable classes were well filled.

#### NEW JERSEY FLORICULTURAL SOCIETY.

Despite the fact that it was Friday and the thirteenth of the month, the twentieth annual flower show of this society was held at its assembly rooms in Orange with more than its usual success. The display was limited by the size of the rooms, but was choice. Besides the usual contributions from its strong growers of chrysanthemums, roses, carnations and decorative plants, Peter Duff appeared in what was a new role, as an exhibitor of a display of three hundred blooms of Cattleya labiata staged in one mass, relieved only by its own foliage and edged with adiantum fern. Nothing superior to this has ever been shown in Orange, although the society is strong in orchid growers.

Specimen oncidiums and cattleyas were displayed by D. Kindsgar, gardener for William Runkle. R. Vincent, Jr., & Sons Co. of White Marsh, Md., staged an entire aable of their decorative pompon chrysanthemums, including their choice new varieties, arranged with three varieties of contrasting colors in a vase. First class certificates were awarded both exhibitors. Among the local trade Popkin & Collins received cultural certificate for four vases chrysanthemums and first class certificate for specimen ilex. Other awards were: S. and A. Colgate, gardener Wm. Reed, five firsts on chrysanthemums, second on roses, first on carnations; A. C. Van Gasbeck, gardener John Dervan, on chrysanthemums, three firsts, five seconds, first on roses and vegetables; Chas. Hathaway, gardener Max Schneider, on chrysanthemums, one first, two seconds; A. Pausch, second on carnations, third on roses. John Crosby Brown, gardener Peter Duff, first on display of orchids.

J. B. DAVIS.

#### NEW ORLEANS HORTICULTURAL SOCIETY.

The chrysanthemum show opened on Nov. 12 in Washington Artillery Hall, with the most extensive, beautiful and valuable exhibits ever brought together in this city. The trade has responded generously in every class, but the public has been indifferent, and the disposition now is to abandon this annual show in future. The table decorations were a leading attraction and Joseph A. Schindler & Co. won the first prize. Chrysanthemums were the required flower, but J. A. Newsham had a dainty decoration in orchids and maidenhair ferns that attracted merited attention. In plants Metairie Ridge Nursery won 10 firsts, 5 seconds; Henry Cook's Sons, 2 firsts, 3 seconds; J. A. Schindler & Co., 2 firsts, 2 seconds; Chas. Fble, 2 firsts, 1 second; C. W. Fiedling, A. Most, 1 first each; Henry Kraach, gardener to Lawrence Labacker, 2 firsts, 1 second. In cut blooms the Metairie Ridge Nursery secured practically all the firsts, H. C. Lorscheier and Abelo Bros. dividing honors on the seconds.

Several entries of shrubs and foliage plants, not for competition, received special mention. The Stecher Seed Co. made a fine showing of seeds, garden tools, etc., and received special mention.

### NEW YORK HORTICULTURAL SOCIETY.

The New York Horticultural Society aided and abetted by the New York Florists' Club, made good their promise and presented the New York public with an exhibition this week more in keeping with the possibilities of this great floricultural community than New York has seen for a long time. It was at the American Museum of Natural History, which is a public building, and hence the question of financial returns was eliminated, the funds for the prizes being donated without reserve. The attendance was satisfactory and the promoters feel greatly encouraged as regards the future, this affair being looked upon in the light of an experiment, somewhat. Great things are already predicted for next year.

The class for specimen plants drew cut exhibits which for cultural perfection have rarely been equalled in America. Peter Duff, gardener for J. Crosby Brown, was the winner in every class except one,—that for three specimens—in which W. H. Waite, gardener for S. Untermeyer, led. In cut blooms, Mr. Reynolds, grower for Samuel Thorne, and Harry Turner, gardener for Howard Gould, held precedence, Miss A. Jennings, S. Untermeyer and F. R. Pierson Company leading in the pompon and single-flower classes.

There was a liberal showing of carnations, F. R. Pierson Company being largely represented and winning in all the one-hundred classes; C. L. Bauchere, F. Untermeyer, F. Potter and M. B. Metcalf were the other winners. In roses the entries were disappointingly small, W. Rockefeller, S. Untermeyer, F. W. Howes and J. J. Biker having the classes to themselves.

In the decorative plant section, Julius Roehrs Co., first, and Howard Gould, second, on table of stove and greenhouse plants; Julius Roehrs Co. with 100 ft. group of palms, etc., and E. H. Weatherbee with a table of ferns, Bloomingdale's with ferneries and window boxes, were the main contributors and they all did splendidly. It was in the orchid displays, however, that the greatest interest centered. Here Julius Roehrs Co., Lager & Hurrell, Mrs. B. B. Tuttle, gardener M. J. Pope, Clement Moore and S. Untermeyer came to the front and the combined result of their efforts was a superb triumph of rich and rare tropical brilliancy. *Jos. Mendas* *Laelia Cattleya Irene* won the prize for best novelty not before exhibited.

In the decorations and floral pieces, W. W. Burnham decorator for Bloomingdale's came to the rescue and showed some excellent specimens of bridal work and other floral effects which will undoubtedly be found to his credit and the floral taste of his house, which has been conservative and superior in the past, must have been likely to feel that they had watered out. J. B. P. Nugent, gardener, made a brilliant debut in the department with a floral room in the middle of the valley, the center of the valley being a white photo of one of the New York

for the Rose wedding on Wednesday afternoon. It was commented upon as a novelty of more than usual merit.

Special awards were as follows: Certificates of merit to C. H. Totty for new Pink Canadian seedling chrysanthemum; J. D. Cockerolt, for carnation Georgia; Wanoka Greenhouses for carnation Wa-no-ka; Mrs. B. B. Tuttle, for Vanda Sanderiana; H. A. Dreer, for *Nephrolepis* Scholzeli. Silver medal to F. R. Pierson Co. for a magnificent exhibit of White Killarney rose, Waban variety. Diplomas to Lager & Hurrell for group of orchids; F. R. Pierson Co. for carnation Gov. Hughes. Cultural certificate to Harry Turner for *Celosia* Pride of Castle Gould.

### RHODE ISLAND HORTICULTURAL SOCIETY.

The annual show held at Providence on Nov. 11-12 surpassed any previous effort. While the number of entries in the chrysanthemum classes is not so large as on some similar occasions, the showing was by far one of the finest in point of character seen in many years. Few inferior plants or blooms were to be found. Dahlias, roses and orchids were displayed, the latter from Seth A. Borden of Fall River. Wm. Appleton, Wm. Hill and C. H. Hunt had large exhibits of ferns and foliage plants. Among the dahlias shown by G. H. Walker was his new Gigantea. S. J. Goddard showed carnation Georgia; S. Kinder, a new seedling, carnation, a deep crimson, a beautiful flower. Melrose Gardens showed Rhea Reid and White Killarney roses; John Gerrard violets.

Geo. McWilliam, A. A. Hixon and W. H. Hill were judges and the prizes on chrysanthemums went to John A. Macrae, F. Macrae & Son, and Seth A. Borden. John A. Macrae captured all the firsts on carnations; Seth A. Borden led in display of orchids.

### SUPPLEMENTARY AWARDS PHILADELPHIA FALL SHOW.

William Kleinheinz took first honors in both American Beauty roses and carnations. Jno. Hedland and Samuel Batchelor were also creditable prize winners in this section. A special mention went to the commercial lots of carnations exhibited by the Millbrook Lea Greenhouses and Edward A. Stroud. Joseph Heacock exhibited his new carnation Dorothy Garden, for which he was awarded honorable mention, as was also Edward Towill for roses My Maryland and Mrs. Jardine. Robert Scott & Son received special mention for roses White Killarney, Duchess of Wellington, and Mrs. Jardine.

Among the prize winners in the vegetable department were Mrs. F. C. Bonfield East, Counties Santa Eulalia, gardener John Gaynor, second for collection; William Bell Wright for cauliflower; George T. Bodine, gardener John Morrow. Miss Mort for roses J. D. Brown, Mrs. John Law, and John, gardener J. Little. Mrs. Wm. J. Potts, gardener Wm. J. Henderson; C. B. Newbold, farmer Wm. Holmstrom, J. B. Joseph, gardener Wm. Robertson.

### WORCESTER COUNTY HORTICULTURAL SOCIETY.

The Worcester County Horticultural Society held a very successful chrysanthemum exhibition on Thursday afternoon and evening, Nov. 12, in their hall in Worcester, Mass. The quality of the exhibits and the arrangement of the hall received many favorable comments. Those who have visited other shows this season were of the opinion that the Worcester one had not been excelled.

In the exhibit of cut blooms the greenhouses of Mrs. J. C. Whitin, Geo. W. Knowlton, M. J. Whittall, H. F. A. Lange and L. C. Midgley were well represented by choice specimens of the standard varieties. The feature of the show was considered to be the six semi-circular groups of plants and flowers arranged at the sides of the hall, each group occupying a space 8 x 12 ft. The prizes were for the best arranged group. Edward W. Breed of Clinton led with a display of palms, bay trees, araucarias and ferns, interspersed with cut blooms of Chadwick, Mrs. Jones and Golden Dome chrysanthemums. The border consisted of the anemone flowered Garza and Jerusalem cherries. H. F. Littlefield of Worcester received second with lilies, American Beauties, Bride roses and lily of the valley tastefully arranged with palms, ferns and cherries. H. F. A. Lange had a beautiful display of chrysanthemums, lilies, roses and carnations. The roses in this exhibit were well grown and greatly admired. Among the new ones were Mrs. Jardine, My Maryland and Queen Beatrice. Lorraine begonias, Saintpaulia and Farleyense ferns were used to great advantage. C. D. Mackie displayed fine blooms of Golden Wedding, Eaton and Bennaffon, Killarney roses, lily of the valley, with the new smilax, The Fairy. From the M. J. Whittall greenhouses there were well grown chrysanthemums in variety grown to a single stem, ferns and asparagus. L. C. Midgley of the Worcester Conservatories in his group had a large variety of roses and single chrysanthemums.

In the library the display of apples was of great merit. The prizes given them were from the Eames fund.

### THE MT. KISCO SHOW.

The sixth annual flower show of the Northern Westchester County Horticultural Society was held in Mt. Kisco, N. Y., Nov. 6, 7, 8. It was a nice, clear-cut and well-arranged affair, and reflects credit on all concerned. I wish some of the local men had reported it, as they could do justice to the exhibition. I can merely mention it briefly as I took no notes, being a stranger there. The chrysanthemum part was very good, the most notable class being 22 for the \$100 silver cup given by Howard F. Bailey, a broad-minded and whole-souled merchant of Mt. Kisco. It was won by Wm. Duckham of Madison, N. J. Ed. Jenkins of Lenox, and another, were in competition. The groups and other classes were very creditable. Carnations were very good but the rose classes might have been better. The vegetable classes were very fine. In class 27 for "10 varieties for table use" there were nine entries, and no man need be ashamed

## WE ARE HEADQUARTERS FOR THE **RIGHT STOCK OF WHITE KILLARNEY**

There are other white sports of Killarney, but we consider the stock which we offer — the WABAN variety — superior to all others

### **When You Buy From Us**

You get stock of the variety exhibited by us and the Waban Rose Conservatories this Fall, which was awarded the silver cup at the National Flower Show at Chicago, and which, wherever exhibited, has received the highest commendation. It undoubtedly is

### **The Best White Rose Ever Introduced**

Our attention was called to this rose last winter, and recognizing its great value as soon as we saw it, we purchased half the stock. We are growing it in large quantities in our Scarborough greenhouses, and will be glad to have any one interested in it visit us and see it growing.

The large growers, instantly recognizing its value, have placed orders for large quantities, so that our advance orders are very large, and the demand promises to be very heavy, judging by the number of orders already booked; but we have enough stock either potted or rooted to fill advance orders, and can still promise early delivery of all orders received now.

### **Order at Once to Ensure Early Delivery**

Orders will be filled in rotation as booked, delivery beginning March 1st, 1909.

**Strong Plants, 2 1-2 in. pots, own-root, \$30.00 per 100; 250 for \$70.00; 500 for \$125.00; 1000 for \$250.00**

**Grafted Plants, \$5.00 per 100 additional**

**F. R. PIERSON CO., Tarrytown-on-Hudson, NEW YORK**

of what was staged, for they were as fine a lot as I ever looked at, and it was no cinch to tell whose was the best for they were all fine. A feature of the exhibition was that it was to be open Sunday so as to give everyone a chance to see it. I understand the Garage Building, where it was held, was given free by its public-spirited proprietors.

The offices of this Society are: Pres., Wm. Will, Katonah, N. Y.; Vice-Pres., A. L. Marshall, Katonah, N. Y.; Sec., Herbert Spavins, Mt. Kisco, N. Y.; Treas., Hugh Birch, Bedford Station, N. Y.; committee of arrangements, A. L. Marshall, J. Reilly, M. J. O'Brien and Wm. Barclay; Herbert Spavins, manager. Mr. Spavins was a busy man, not only in his official capacity, but his home was thrown open to guests and visitors, and those of us who were fortunate enough to partake of his hospitality will remember him and the hostess for many a day. R.

#### LENOX HORTICULTURAL SOCIETY.

At the recent exhibition of the Lenox Horticultural Society, Oct. 28 and 29, the following new chrysanthemums exhibited by Chas. H. Totty, Madison, N. J., received certificates of merit: Merstham Blush, Chas. H. Totty, Merstham; Crimson and Mrs. O. H. Kahn, Elmer D. Smith, Adrian, Mich., also exhibited Leslie Morrison, an immense flower, Frank Payne, Mrs. Phillips, and Mrs. G. W. Peck, the first two receiving certificates of merit. E. Jenkins, Lenox, also received a certificate of merit for new single white chrysanthemum, Anna

GEORGE H. INSTONE, Sec'y.

#### A NOTABLE EVENT FOR 1910.

The greatest exhibition of orchids ever given on this continent will undoubtedly materialize from the plans being perfected by the Massachusetts Horticultural Society for an orchid show to be held in the latter part of May, 1910, at Horticultural Hall, Boston. A prize of \$1000 for group of orchids and many other prizes, unusually liberal, with a large number of gold and silver medals, are expected to bring out a big response from foreign as well as American growers of high repute. A year and a half for preparation for such a notable event is considered none too much.

#### LOCAL FLOWER SHOWS.

**High Point, N. C.**—Annual chrysanthemum show, Nov. 5.

**High Point, N. C.**—The annual chrysanthemum show was held Nov. 5.

**Hazlehurst, Miss.**—There was a well attended flower show here on Nov. 12.

**Owings, S. C.**—The Royal Florists' Society held its flower show on Nov. 4.

**Freeport, Ill.**—Mrs. S. S. Meise made her annual display of chrysanthemums on Nov. 7.

**Rochester, N. Y.**—Highland Park chrysanthemum show opened Nov. 8 for two weeks.

**Logansport, Ind.**—G. H. Minx, florist at Longcliff, held a public chrysanthemum show Nov. 3.

**Yorkville, S. C.**—The ladies of the Presbyterian church held their annual flower show on Nov. 1.

**Randolph, Vt.**—H. M. Totman held a public exhibition of chrysanthemums in his greenhouses Nov. 6.

**Marion, S. C.**—Civic League chrysanthemum show, Nov. 6, with exceedingly fine displays and large attendance.

**Crystal Springs, La.**—The Floral Club held a successful flower show on Nov. 12, 13, with a much larger exhibit than before.

**Cashtown, Pa.**—The flower show on Nov. 7 attracted visitors from all parts of the county. The collection surpassed all previous efforts.

**Elkhart, Ind.**—Nov. 12 was chrysanthemum day at Van Aken Bros. and the occasion attracted crowds to their houses.

**Columbus, O.**—4000 people accepted the invitation of Supt. Underwood of Franklin Park to inspect the chrysanthemums on Nov. 8.

**Waynesboro, Va.**—The chrysanthemum show on Nov. 7 attracted visitors from a distance as well as the flower lovers of the town.

**Milwaukee, Wis.**—Mitchell Park was the mecca for 12,000 persons on Nov. 8, and the greenhouses will be open to the public for two weeks.

**Crawfordsville, Ind.**—McDonald & Steele displayed especially fine chrysanthemums on Nov. 13, 14 at the Y. M. C. A. Building. A. S. Pett was in charge.

**Little Rock, Ark.**—The State Floral Society held its flower show Nov. 11-14. H. W. Buckbee's chrysanthemum Arkansas made its first appearance there.

**Moncton, N. B.**—Frazer Bros. held a flower show for the benefit of the Ladies' Aid Society, at which the col-

lection of orchids was especially noteworthy.

**Washington, Ia.**—The Fortnightly Club held a chrysanthemum show on Nov. 10 at the Keck greenhouse. The proceeds go to the adornment of the public parks.

**Danville, Ill.**—H. D. Caldwell, chief gardener at the Soldiers' Home, estimated that 1500 passed through the greenhouses on the opening day of the flower show, Nov. 8.

**Victoria, B. C.**—Carnegie Library was the scene of the flower show on Nov. 5, 6, and among the commercial exhibitors were A. J. Woodward and Fairview Greenhouses.

**Poughkeepsie, N. Y.**—Supt. Howells has an especially beautiful collection of chrysanthemums for the enjoyment of the visitors to the city greenhouse on College Hill this month.

**Washington, D. C.**—"Triumphs of floriculture", the chrysanthemums shown by G. C. Shaffer were pronounced, and his store was thronged the first of November with the interested public.

**Denison, Texas.**—The flower show on Nov. 11 attracted both visitors and exhibitors from a distance, J. W. Vestal & Son of Little Rock and E. D. Smith & Co. of Adrian, Mich, being represented with novelties.

**Alameda, Calif.**—Mrs. J. C. Seigfried opened her conservatories and grounds for the benefit of the Adelphean Club on Nov. 11 and 12. The Seigfried collection is a notable one and attracted a vast throng.

**Chicago, Ill.**—In addition to the unusually fine display of chrysanthemums and orchids at Lincoln Park, Supt. Frey has this year added the charm of music on Sunday afternoon, Tuesday and Thursday evenings.

**Detroit, Mich.**—The horticultural building at Belle Isle was transformed into a bower of beauty by Supt. Unger and his assistants on Nov. 8, the first day of the public chrysanthemum show. 25,000 blooms were in evidence.

In our account of the Lenox, Mass., exhibition, in a recent number, we inadvertently omitted mention of the award of a diploma to H. A. Dreer for *Nephrolepis Scholzei*.

### COMING EVENTS.

**Baltimore, Md.**—Horticultural Society, Dec. 1, 2, 3, Fifth Regt. Armory.

**Indianapolis, Ind.**—State Horticultural Society, Dec. 2, 3.

**Columbus, O.**—Columbus Horticultural Society, flower show, first week in December.

**Springfield, Mo.**—Missouri Horticultural Society, Dec. 8, 9.

**Spokane, Wash.**—National Apple Show Association, Dec. 7-12.

**Lynchburg, Va.**—Virginia Horticultural Society, Jan. 6-8, 1909.

**Indianapolis, Ind.**—American Carnation Society, Jan. 27, 28, 1909.

In the haste due to handling the mass of exhibition reports received last week several errors slipped through our issue of November 14, undetected until too late to correct them. The specimen plant illustrated on page 639 as winner of first prize in Boston was Garza, not Merza. A part of the prize awards at the Hartford show got shunted over to the column of prizes at the Nassau County Horticultural Society. The prize awarded to Poehlmann Bros. for 100 blooms of best new rose at Chicago was for My Maryland.

PRESIDENT TAFT

Elmer D. Smith's New Pure White Incurved Chrysanthemum.

### NOTES ON PROMISING CHRYSANTHEMUM NOVELTIES.

As many of HORTICULTURE's readers will be buying the novelties among the chrysanthemums which will be distributed next spring, and few have had the opportunity of seeing them, I have grown a number and were I asked to name the three best of these I should place Leslie Morrison first, followed close by Frank Payne and the new single Anna; in fact, it is hard to relegate the latter to even third place, as it is a charming pearly white in color, with twisted petals, and is such an ideal grower that it will easily outrank all other singles. The large exhibition kinds described individually are as follows:

**Leslie Morrison.**—A perfect model in foliage, stem and constitution, bloom of the largest and the face of petals a rich crimson with buff reverse. **Merstham Blush.**—A lovely color, and without a fault in habit. **Mrs. Phillips.** The shape of this flower is rather flat, but it is of good breath and as good a pink as there is in existence. **G. W. Pook.**—Very dwarf, grand stem and foliage and a pleasing terra cotta color. **Miss Violet Pearson.**—A large buff flower, sound as a bell when at its best, and a general good doer. **Rose Pocket.**—Color, old gold, with fine twisted drooping petals and the foliage well up to the flower. **Frank Payne.**—Deep blush, good form, very large and foliage of the best. **Pocket's Surprise.**—A large bronze flower with rich crimson petals if reflexed, a good grower. **Mrs. Charles Totty.**—Dwarf in habit, a fine light pink in color and a good keeper. **Mrs. Rider Haggard.**—A very deep flower of a good white color but somewhat poor in growth this year. **President Taft.**—A splendid white, hardly large enough for exhibition. It is the white of Mrs. Jerome Jones and its foliage and stem are perfect. **Hamilton.**—A splendid early pink, good for commercial or exhibition. **Bessie Evans.**—A very tall grower, but a good late pinkish white.

Lenox, Mass. **EDWIN JENKINS.**

**F. R. PIERSON CO. TARRYTOWN-ON-HUDSON, NEW YORK**

## NEWS OF THE CLUBS AND SOCIETIES

### MORRIS COUNTY GARDENERS' AND FLORISTS' SOCIETY.

The November meeting of the society was well attended, everyone being anxious to know how the society made out financially with the flower show. In more than one way it has been our most successful show; and the attendance is the best we ever had. In a great measure this is due to the individual members pushing the sale of tickets. We have a nice balance in our treasury, too, by the way. Officers for ensuing year were nominated as follows: President, Harold B. Vyse; vice-president, Thomas Stokes; treasurer, Wm. Duckham; secretary, Edw. Reagan; executive committee, Percy Herbert, Robert Tyson, A. Herington, C. J. W. Ottolauder, Wm. G. Badgley, A. R. Kennedy, C. H. Totty, Ernest Wild, R. M. Schulz, Wm. Muhlmichael, David Falconer, Joseph A. Manda. Special cash awards were voted to H. B. Vyse for grapes and display of Lorraine begonias; A. Herington for specimen chrysanthemum with 800 flowers,—award goes to the grower, Robert Tyson; Wm. Muhlmichael for his monster Boston fern; Percy Whaites for his honey and seed corn. C. H. Totty and R. M. Schultz gave their impressions of the Chicago show, which were highly complimentary to the western growers. Carnations and roses were beyond anything they had ever seen in the east. The annual election of officers takes place Dec. 9.

E. REAGAN.

### FLORISTS' AND GARDENERS' CLUB OF RHODE ISLAND.

The regular meeting of the Florists' and Gardeners' Club of Rhode Island was held Nov. 16. The following officers were elected for 1909: President, Chas. S. Macnair; vice-president, Robert Johnston; secretary, Wm. E. Chappell; treasurer, Wm. Hill; librarian, E. H. Appleton; executive committee, Cornelius Haristtra, E. H. Appleton, James Hockey.

It was a very spirited meeting with about two-thirds of the membership present. James Dillon of Swan Point Cemetery exhibited a number of branches well-berried of a sport from Euonymus radicans. After the meeting refreshments were served and a jolly good time was enjoyed.

W. E. CHAPPELL.

### NORTH SHORE HORTICULTURAL SOCIETY.

This society held its regular bi-monthly meeting, Nov. 6; the speaker was Eric Wetterlow; subject, Chrysanthemums. A well received paper was read. Chrysanthemums as good as the best were shown from the Thayer, the R. C. Hooper and the Lester Leland estates. The discussion committee reported good results from its circular notices sent out in advance of each meeting. Refreshments were served as usual.

ROBERT A. MITCHELL.

### SPRINGFIELD, (O.) FLORISTS' CLUB.

At the meeting on Nov. 10 a notable display of chrysanthemums and carnations was made by C. L. Reese, who briefly explained his methods of growing and casually added that he grew the vases as well as the flowers. These proved to be shapely gourds. The construction and heating of greenhouses was the topic for the evening, the vacuum system receiving marked attention. Opha Jackson promised an address later on from an expert in this system. Mr. Mellen reported that E. G. Hill could address the club on his European trip on Dec. 14, and it is probable that the December meeting will be changed to that date. C. A. Reese and C. C. Leedle were appointed a committee to outline a plan for a flower show next fall. The new houses recently erected by Chas. Unglaub, Gustav Schneider and the Leedle Rosary Co., with the enterprise of Mr. Reese and other retailers, have given a strong impetus to the business here.

#### GARDENERS' AND FLORISTS' CLUB OF BOSTON.

The club meeting on Nov. 17 was one of the best held during the year, about 150 members being in attendance. The committee on affiliation with the C. S. A. through their chairman, James Wheeler, reported that they did not consider affiliation would be advisable at present; the report was accepted. A communication was read from Prof. E. A. White of the floricultural department of the Massachusetts Agricultural College announcing a special short course for students in horticulture from January 4 to March 10, 1909. Six new names were added to the membership roll.

Nominations of officers for 1909 being in order, F. E. Palmer in a neat speech placed the name of Eber Holmes before the meeting for president; M. A. Patten seconded the nomination; Thos. J. Grey named Wm. Downs; J. K. M. L. Farquhar seconded; James Wheeler named F. E. Palmer. The names of W. J. Kennedy, J. W. Duncan and Kenneth Finlayson were presented for the office of vice-president. For secretary and treasurer there were no nominations except those of the present incumbents of the office, W. N. Craig and Edward Hatch. For executive committee the following were nominated: Peter M. Miller, Robert Cameron, J. K. M. L. Farquhar, William Sim, Peter Fisher, James Wheeler, William Reed and Wilfrid Wheeler.

The tables were well filled with a fine assortment of carnation flowers. The report of the committee was as follows: Honorable mention to Peter Fisher for seedlings No. 1721 and 1910;

E. B. Beals, ten vases white seedling carnations; S. J. Reuter & Son, carnations Splendor and Pink Pearl. Report of superior merit to S. J. Reuter & Son for rose My Maryland. Report of merit to Robert Craig Co. for chrysanthemum Baby Margaret; H. F. Woods, white sport from chrysanthemum Timothy Eaton. Vote of thanks to Peter Fisher for seedling carnation No. 1721, and for vase of mixed seedlings; Montrose Greenhouses, ten vases mixed roses; D. Finlayson, Calanthe Veitchii and Sandhurstiana, and Primula obconica; F. W. Fletcher, violet Baronne Rothschilds.

Peter Fisher spoke favorably of carnation Splendor, which he considered very promising; rose My Maryland at J. H. Dunlop's in Canada looked better than any other when he was there. Mr. Patten spoke of how well that rose showed off at the recent National Show. Duncan Finlayson, speaking of calanthe culture, advised florists to take them in hand; they lasted when cut much longer than roses or carnations; being asked what to feed them with, he replied that cow manure and Clay's fertilizer were his favorite.

Eber Holmes made an eloquent address on how members could help to build up and improve the club. He made many excellent suggestions and hoped every one would work to make the club a pre-eminent one. Joining in the discussion which ensued were Messrs. Patten, Palmer, Kennedy, Wilfrid Wheeler, H. A. Stevens, K. Finlayson, D. Finlayson, and others, all bringing out many splendid ideas. An enthusiastic vote of thanks was tendered to Mr. Holmes.

Mr. Farquhar, speaking of the landscape department of the club, said

that arrangements had been perfected to start a class in a few days, and a teacher had been engaged. The fee would be 50 cents per member per night. On motion of Mr. Craig the sum of \$25 was appropriated to assist the class and Messrs. Farquhar and Pettigrew appointed a committee to see to all arrangements. A letter of congratulation to treasurer Hatch on his recovery and thanks for a box of cigars sent to the meeting was carried. Queries on gladioli for forcing and white scale on cattleyas were answered, which terminated one of the most interesting and helpful meetings the club has ever held.

#### ST. LOUIS FLORIST CLUB.

The regular meeting of the club took place on Nov. 12 at eight o'clock in their new hall in the Knights of Columbus building, this being the first attempt to hold night meetings. Fourteen were present, President Young in the chair. Secretary Bentzen being absent, J. J. Beneke took his place. Among other important questions that of tea leaf waste for fertilizing lawns was discussed and will be resumed at the next meeting. Prof. H. C. Irish promised to give the club the benefit of what he saw and heard at Chicago. A few remarks by our only lady member, Mrs. M. M. Ayres, who made her first appearance, put the members all in good humor. The next meeting will be held on the afternoon of Dec. 10. In January another trial will be given for night meeting as many of our members were in Chicago this week. Should this fail to bring out a large attendance afternoon sessions will be resumed. The president

# THE NEW CRESTED SCOTTII FERN

## NEPHROLEPIS SCHOLZELI

**T**HIS crested sport of Scottii will hold the same position to all the crested forms of Nephrolepis that Scottii now holds to the Boston. It is entirely distinct from all others and will become even more popular than its parent with which it is identical in every way except that the pinnae are subdivided, giving it a beautiful crested appearance.

We have shown the plant at the Exhibitions noted below and have been awarded the following honors:

**Shaw Gold Medal,** St. Louis Horticultural Society November 3rd, 1908. For "Best plant, of decided merit for cultivation, not previously an article of North American commerce."

**Silver Medal,** offered by the Society of American Florists, through the St. Louis Horticultural Society, November 3rd, 1908. For "The most meritorious plants or flowers of American origin."

**Certificate of Merit,** of the Horticultural Society of St. Louis, November 3rd, 1908.

**Silver Medal,** Pennsylvania Horticultural Society, Philadelphia, November 3rd 1908, for the best new plant.

**Certificate of Merit,** Massachusetts Horticultural Society Boston, November 6th, 1908.

**Certificate of Merit,** Dutchess County Horticultural Society, Poughkeepsie, N. Y., Oct. 30, 1908.

**Certificate of Merit,** Morris County Gardeners' and Florists' Society, Madison, N. J., Oct. 30, 1908.

**Certificate of Merit,** Chestnut Hill Horticultural Society, Philadelphia, Pa., Nov. 4, 1908.

NEPHROLEPIS SCHOLZELI

We are booking orders now which will be filled in strict rotation, June 1st, 1909.

Price per dozen, \$3.50; per hundred, \$25.00; per thousand, \$200.00. Twenty-five supplied at one hundred rate and five hundred at thousand rate.

**HENRY A. DREER,** 714 Chestnut Street,  
PHILADELPHIA, PA.

appointed a committee consisting of Messrs. Beneke, Schoenle and Augermüller to prepare for a smoker and entertainment to be held after the regular January meeting, and report in December. After the meeting adjourned refreshments were served at a near-by cafe.

### MASSACHUSETTS HORTICULTURAL SOCIETY.

The annual meeting of this society was held on Saturday, Nov. 14. The sum of \$5000 was appropriated for the use of the prize committee for the year 1909. Officers were elected as follows: President, Stephen M. Weld; vice-president (for two years), Charles W. Parker; trustee (for two years), George B. Dorr; trustee (for three years), William H. Bowker, Peter Fisher, Thomas Roland, Charles S. Sargent; delegate to the State Board of Agriculture (for three years), Wilfrid Wheeler; nominating committee, George V. Fletcher, Thomas J. Grey, Nathaniel T. Kidder, William Sim, William Thatcher.

### CLUB AND SOCIETY NOTES.

Mr. John Farquhar of Boston addressed the Newport Horticultural Society at their meeting on Nov. 10; subject, "Natural Planting of Bulbs and Informal Gardening." There was a large audience and a social hour with refreshments followed the address.

The Ontario Horticultural Exhibition was formally opened on Nov. 9 by Hon J. M. Gibson, the new Lieutenant-Governor, in the St. Lawrence Market. Groups of decorative plants lined the walls and the exhibits were numerous and beautiful. T. Mantion of Eglinton, E. F. Collins of the Allan Gardens, H. H. Fudger, were among the leading prize winners.

The Ontario Horticultural Association convened at City Hall, Toronto, Nov. 10, and elected officers as follows: President, H. J. Snelgrove; vice-president, A. R. Whyte; secretary, J. Lockie Wilson, Toronto; treasurer, H. B. Cowan. Laying out small gardens, window boxes in crowded sections, and best methods of keeping summer-flowering bulbs were among the subjects

discussed. H. H. Groff led in a discussion on the latter topic.

The New England Conference on Resources meets on Nov. 23-24, in Tremont Theatre, Boston. On the afternoon of the 23rd Gifford Pinchot of Washington, chief of the forestry service, will speak on the future of the forest trees in New England. The great opportunity for fruit culture will be discussed by Prof. John Craig of Cornell University. It is expected that the governors of all the New England States will attend. Gov. Guild will preside.

### PITTSBURG NOTES.

It is very gratifying to note that Pittsburgh was well represented at the National Flower Show at Chicago last week, not only as visitors but as successful exhibitors.

The Pittsburgh Rose & Carnation Co. were awarded two first prizes on carnations. Mr. Fred Burki, president of this company, reports that had their shipment of chrysanthemums reached there in time one more prize would have been captured.

An exhibit of Begonia Glorie de Lorraine at the Phipps Conservatory, North Side, is worthy of mention. An extra house is used for this and the condition of plants and baskets are at their best now; it is worth anyone's time to pay a visit. Foreman Moore deserves credit; all local florists should call and show their appreciation.

A beautiful window decoration was seen at A. W. Smith's 6th avenue store last Saturday; a table decoration with a centerpiece of chrysanthemums and roses was the attraction. This firm are extensive advertisers; one of their latest street car advertisements reads: "We get the highest price in the city for violets and still we sell more than any other firm in the city."

The Pittsburgh Cut Flower Co., Ltd., are displaying an artificial poinsettia that is a very fine reproduction of the natural flower. This company had a large sale of the same article last year.

At The McCallum Co., white violets are a novelty.

### CHRYSANTHEMUM SOCIETY OF AMERICA.

### OBITUARY.

Joseph Bradford.

Joseph Bradford, at one time a well known florist in Columbus, O., died on November 9, at the age of 78.

Mrs. Ida S. H. Gorman.

Mrs. Ida S. H., wife of Daniel E. Gorman, of Williamsport, Pa., died on November 4, in her forty-first year.

Dr. James Fletcher.

Dr. James Fletcher, botanist and etomologist of the experimental farm in Canada, died recently at Montreal in his fifty-sixth year.

George M. Kellogg.

With the last stroke of the midnight hour on Nov. 15, George M. Kellogg passed away. Since last March, when

GEORGE M. KELLOGG

Mr Kellogg was stricken with pneumonia, he has never recovered his strength. He has been an active and enterprising business man and will be greatly missed in the community. Mr. Kellogg was born in Westfield, Mass., April 16, 1838; at the age of eighteen he removed to Chicago, thence to Kansas in 1857, and in 1867 to Pleasant Hill, Mo., his present home. He built here his first greenhouses in 1888, and opened a wholesale store in Kansas City ten years later. In September, 1907, his entire plant was wrecked by the explosion of the boilers, but with characteristic energy he at once began rebuilding. Mr. Kellogg served on the executive board of the S. A. F., 1897-1899.

Mrs. P. M. R. Pierson.

Mrs. P. M. R. Pierson died on Nov. 12 at her home in Tarrytown, N. Y., aged 80 years. Three sons, Frank R., Paul M. and Lincoln, and three daughters, survive her. Mrs. Pierson has been bailing for the past year and her death was due to old age. Mr. Pierson died two years ago.

## An Exceptional Opportunity for Investment

The first or ground floor issue of stock of any enterprise is necessarily the most liberal; therefore, the best to invest in. A successful **GOING** concern can obtain all the money required for 6%. A new concern must give more and if you want to make more, you must go in with a new company.

This Company is a new company and has the ear marks of a bonanza right in your own business. We think it is the best proposition in our business in the country **TODAY**.

There is just as much money in the flower business when properly conducted as in any other and, on an average, probably a great deal more, though we generally try to make ourselves believe the other fellow makes his money easier than we do.

The three essential factors necessary for the success of any enterprise, flower business or any other are: A profitable business to begin with; Competent and reliable men to conduct it; Sufficient capital to finance it. This company lacks only the latter.

Robert Miller, President and Manager of the Company, has made a specialty of growing roses for the market for fifteen years and is a graduate of the Waban Rose Conservatories.

The manager will be insured to the Company for the full amount of subscriptions, making the investments absolutely secure, and in case of death, 100% to the good.

The stock is \$10.00 a share, its par value; it is preferred in principal as well as in dividends. It is voting stock, and is participating and non-redeemable, and is probably the most liberal stock on the market today. It is secured in every possible way against risk of loss.

Bonuses of common stock are given with the preferred according to the amount of preferred purchased.

The plant will be located in one of the **Richest Territories of This Country** where there is a **Superabundance of Sunshine, Cheap Fuel, Elegant Soil, A Tremendous Demand for Flowers, and Practically No Competition.**

Do not let this opportunity go by, as first-class investments in our business are not growing any more plentiful, and do not forge the **FACT** that the first issue of stock is the one you must get if you want more than savings bank interest on your money.

Ask for an interview with the President and he will gladly call on you and explain the proposition in detail unless you live far out of reasonable reach.

Send for circular and get in on the ground floor.

This is not a hole-in-the-ground proposition where you can't see or possibly know anything about it, except by taking the say-so of some high finance juggler, but an all above-ground and above-board proposition that you are just as familiar with as any of the directors and you could direct it yourself without any serious trouble.

This is an age of combination of effort and we want your co-operation.

**THE MILLER FLORAL CO.**  
 East Brookfield, Mass.

## Seed Trade

As the time draws near for the annual wholesale and retail price lists to receive their finishing touches before being finally turned over to the printer, seedsmen realize how perplexing a problem they have on their hands to rightly gauge the situation. The statement that this season the problem is one of the most difficult they have ever had to solve will be appreciated by all, yet when the catalogues do appear it will be found that conditions have been pretty accurately sized up. When we consider the great number of varieties listed by the leading houses, we can say with confidence that few lines of business require a higher or more analytical quality of gray matter than the seedsmen's. This statement suggests the query: Why is this fact not more fully recognized by our law makers and servants in the Department of Agriculture who are using the enactment of half-baked measures placing risks and in many instances paralyzing conditions on so important an industry? That there are seedsmen who are no credit to their line of business is not denied, as there are tailors in every trade, and if laws curbing this class which at the same time would not work injustice and injury to the great body of honest seedsmen were enacted, there would be little objection.

If the wish is only to restrain the dishonest dealer, why not call into consultation the leading seedsmen, as with their aid and co-operation measures could be framed which would deal intelligently with all just causes of complaint, without at the same time exercising a baleful influence on honest dealers. The most objectionable feature of all proposed legislation is, that all seedsmen are treated *en bloc*, as dishonest.

Does anyone suppose that in framing legislation affecting the manufacturers of chemicals, the leading men in that industry would not be consulted? Yet the opportunities for, and the frauds that are actually perpetrated in that line are vastly greater than the seedsmen of the worst type could possibly be guilty of, and with infinitely more disastrous results. Is it not possible for the seedsmen to bring this fact home to the consciousness of the leading members of Congress?

The writer has been informed, though how correctly cannot now be stated, that the objectionable Mann bill of last winter is to be re-introduced, and pressed if possible to passage. It is said that certain employees of the Department of Agriculture have most zealously been gathering evidence to prove the necessity of such a law as the Mann bill contemplates. It is reported moreover that this is a counter move on the part of the Department to offset the seedsmen in their efforts to kill "free seeds," and they will have little time to agitate against the free seed distribution. While this probably does not fully cover the case, it is worth remembering.

There is a decided shortage in Burpee's Bush Lima beans, and they are quoted in limited quantities at \$6.00 to \$6.50. Dreer's Bush are quoted at \$6.00 to \$5.50. The new Fordhook Bush will certainly supplant the Dreer Bush.

Burpee's Improved will in time supplant the Burpee's Bush, Quarter Century Bush and Dreer's Wonder Bush; thus there will be only one strain of this variety, a fact which will be hailed with satisfaction by all good men. The great superiority of these new strains over the old types cannot be fully appreciated until they have been compared in the green as well as the dry state, and the old strains will endure only so long as will require to get sufficient stock seed of the new to bring prices down near the level of the old.

The very sudden advent of winter this week has caught many unprepared, and has resulted in some little damage to plants and tender nursery stock, which had not yet been housed. The sudden drop in temperature from 50 or 60 degrees above freezing to 8 above zero, has caused great discomfort, which has not been tempered any by a fall of 6 to 8 inches of snow, and particularly in the cities.

Several of the California growers are on the wing and some of them may be expected in the east at any time.

The pea seed growers are talking of a strong advance over last year's prices, and particularly on the "canners' varieties." What with increased freight rates and advances to the farmers, these varieties are costing the growers practically 25c. more per bushel than a year ago, and the growers are to be congratulated on the determination to advance their prices in turn. It is hoped they will stand firm. The demoralizing competition for business among growers has resulted in the cutting of prices below the profit level, and a corresponding craze to cheapen production, has resulted in completely obscuring what should be the chief aim of every producer—the improvement of types. The outcome in the main has been steady deterioration. This question will receive further consideration in the near future.

It is reported that the Brown Bag Filling Machine Co. has been awarded the contract for putting into packets the seeds for Uncle Sam's annual free seed distribution, but it is also said that the work has not yet been commenced. This is extraordinary, as usually some millions of packets have been put up by this time.

Complaints are coming from the Department of the low germination of beet seeds, not one sample coming up to the Government standard, while most samples tested fall so far below as to cause rejection of the shipments represented.

There has been a most gratifying change in business sentiment since the election, optimism having taken the place of doubt and hesitation, and a real improvement is noticeable in all lines. Let the infection go on unchecked.

# RELIABILITY OF AMERICAN GROWN SWEET PEA SEED.

A firm of English sweet pea seed growers has been making efforts to market its own wares by vilifying the American article. Their claim is that American grown seed has proved in England the past few years "very uncertain and unreliable."

Commenting on this Mr. Howard M. Earl, manager for W. Atlee Burpee & Co., Philadelphia, who are probably the largest growers and exporters of this seed, says:—

"I dare say that America supplies a great deal more than half of the sweet pea seed planted in England. My two British assistants were astonished when I told them of our shipping thousands of tons of sweet peas to England in the course of a season and in fact now we are very busily engaged in filling sweet pea orders. If you had gone to California with me last year you would have seen some very, very poor stock which we obtained from the other side. There are stocks and stocks of sweet peas, as you are probably aware, and if E. W. K. & Co. have been purchasing from unreliable dealers in this country they should not make a statement which infers that sweet peas grown in America are entirely unreliable."

## Of Interest to Retail Florists

### NEW YORK RETAIL FLORISTS ORGANIZE.

At the second meeting for organization at the Savoy Hotel nearly 100 prominent retail florists were present. Chas. A. Dards was chosen temporary and subsequently permanent chairman, or rather president; Marshall Clarke, vice-president; George Stumpff, Jr., treasurer, and Herman Warendorf, secretary. The meeting was animated and to the point. Application for papers of incorporation will be made to the legislature. The organization will probably be known as "The Retail Florists Protective Association of New York." This gives opportunity for extending the society's limits beyond the city if necessary.

While secrecy was requested on the art of those present regarding the principal object of the society, it is not

### A NEW YORK CELEBRITY.

The picturesque form of Luc Aubree, more familiarly known as "Frenchy," is one of interest to all who have the good fortune to behold him while in action. His photograph pictures him in characteristic attitude. Dress is not his strongest point, though personal adornment is advanced to the limit. With a huge bunch of oak leaves strapped to his back, a bird's nest or two carried in his hands and an enormous bunch of wild flowers and grass fastened to the lapel of his coat, Frenchy is ready for business.

Although past 73 years of age, he is as supple and active as most men 30 years his junior; he is abundant in humor and a favorite with all whom he may meet. Every florist in Greater

New York knows and patronizes him.

Frenchy, after serving in the French army—having been twice wounded—came to this country, and for the past quarter of a century has been following his calling of greenhouse pedler.

Most of his time is spent in the woods and swamps gathering foliage, pussy willow branches and ferns, the sale of which enables him to exist. Deserving is he of his sobriquet—"The peripatetic woodsman."

### NEWS NOTES.

Rochester, N. H.—E. A. Corson, florist, resumed business in his remodelled store on Nov. 2.

New York, N. Y.—Schumaker & Kessler, wholesalers, have started in business at 113 West Thirtieth St.

Chicago, Ill.—M. Shattls, western representative of Lion & Co., New York, is located at 19 Wabash avenue.

Hudson, Mass.—E. C. Ross has closed his greenhouses on High St. for the winter and will confine his business to his Gates pond road place.

### BUSINESS CHANGES.

Pittsburgh, Pa.—A. J. Neff succeeds L. I. Neff at Smithfield and Oliver Av.

San Francisco, Cal.—It is reported that the Fourth Street Floral Co. has closed its store.

Olean, N. Y.—The Olean Floral Co. is the name taken by W. D. Best and Harry West since the consolidation of greenhouse appliances in this place.

Weymouth, Mass.—Daniel Iliffe has recently located here and intends eventually to manufacture his various greenhouse appliances in this place.

Iowa Falls, Ia.—J. P. Murphy, whose lease of the Smuck greenhouses expires in July, has closed a deal by which he comes into possession of a florist's plant in Independence. It is rumored that Miss Smuck will return to her houses on the expiration of the lease.

## NOTICE

We desire to notify the trade that we are the owners of United States patent No. 489,218 for Floral Figure which claims:

"A florist's letter or figure stamped from a sheet of paste-board or other suitable material, having an adhesive coating applied thereto and an outer covering of granules of sawdust appropriately colored to represent the petals of the Helichrysium arenarium substantially as described."

Letters which are a direct infringement of this patent are being put on the market and we intend to hold all who make or sell the infringing letters to strict account.

The lawful patented goods are in every respect much superior to the infringement.

# Flower Market Reports.

The market begins to feel the oncoming of Thanksgiving Day, and this, together with the football call for certain specialties and the nearness of the winter season, has a tendency to jack up values, and our next week's report will probably show quite an advance all along the line. At present the only elevation is on certain leading lines, such as American Beauty roses, violets and the fancy grades of chrysanthemums. The latter, especially the finer blooms of Timothy Eaton, are tending upwards every day. Carnations are expected to brace up by next week, but thus far they are a hard proposition. Outside of Beauty the only roses to feel the stimulus as yet are Richmond and Killarney. Supplies in all lines are rather light.

The social calendar is **BUFFALO** well filled with entertainments for the winter and it is hoped that the trade will be benefitted and make up for the dull days that have passed. The past week has been somewhat encouraging, as a gradual demand is arising for Beauties, violets, chrysanthemums, etc. The over-abundance of stock and little values have caused the wholesaler and grower much uneasiness, but as new life is now springing up it is felt that a good season is ahead. The fall season having brought on the carnations too fast, it now looks as if the crops will be off or light picking for the holidays, for such a vast amount of this flower at this season of the year has never been equalled and prices are out of the question. The holiday season cannot come too quickly, as the trade is in training form to handle the business.

The **CHICAGO** market has been up and down during the past week, but with the show over business again started out brisk on Monday. Most of the growers report stock in fine condition for Thanksgiving. Prices are a little higher on Beauties but more because of the longer stems than because of scarcity. On the whole, a little decline in sales last week was anticipated and gave the wholesalers a chance to see their out-of-town friends at the show.

Our market is O. K. We **DETROIT** always thought so and are more convinced since we had an opportunity to compare notes with our brothers in Chicago. There exists a gratifying uniformity of prices in this city. Last Saturday's football game brought the usual increase in the sale of large yellow chrysanthemums. Local wholesale houses shipped 1500 to Ann Arbor florists.

There were too **PHILADELPHIA** many Richmond roses and medium to low grade carnations around last week, but on the whole the tone of the

market was good, especially on Friday and Saturday. The influx of chrysanthemums abated somewhat. White and yellow Chadwicks are now arriving and are among the top notchers. Golden Dome will be on the market about the 20th. The pigmy yellow "Laby" in bunched form, is as popular as ever this year, and is coming in plentifully from half a dozen growers. American Beauty roses have been marked up twenty-five per cent. and in most cases the new scale "goes." The quality is extra fine. My Maryland is in good demand, but there are not a great many coming in. The higher grades of carnations were in good demand and prices hardened. Good violets are still quite scarce. Paper white narcissus and white Roman hyacinths have commenced and meet with fair demand. Orchids and lilies remain normal. Adiantum Croceum is in over supply and very sluggish.

Market conditions show **PITTSBURG** an improvement. Prices are low but a much healthier tone to business is noticed. Chrysanthemums have been very plentiful; the supply this season was much greater than the demand and consequently sold lower than for many years. American Beauties, tea roses and violets are in fair demand and carnations selling slightly better. The outlook for late varieties is better; cooler weather has improved the quality of nearly all flowers, roses in particular.

Correspondence from Albany, N. Y., indicates that there is little sale for the abundance of good flowers with which the market is stocked.

## NEWS NOTES.

**Westville, Conn.**—J. J. Sokol has purchased his brother's interest in the firm of Sokol Bros., florists.

**Brooklyn, N. Y.**—The greenhouse of T. J. Dixon, Canarsie Lane, was damaged by fire to the amount of \$1,500 on Nov. 14.

**Amherst, Mass.**—The Massachusetts Agricultural College will give a ten weeks' course in floriculture, horticulture, etc., beginning January 5, 1909.

**Visalia, Calif.**—C. S. Riley has taken a ten-years' lease of a lot of land in this city and will stock it with citrus and deciduous trees, plants and flowers.

**Baltimore, Md.**—The Park Board have declined to allow the use of the park plants for decorating the Armory during the exhibit of the Maryland they think it establishes a bad precedent.

**New York.**—The New York Cut Flower Exchange has signed a five-year lease of the floor they have been occupying in the Coogan Building, 55-57 W 26th street. The New York Cut Flower Company took similar action some weeks previous on the floor they occupy in the same building.

**Philadelphia.**—Invitations were issued by Fred Ehret to his first annual chrysanthemum show at 702 N. Broad St., November 11, 12, 13. Incidentally he announces this as the first free chrysanthemum show ever offered to the public by a commercial florist in Philadelphia.

### NEW YORK FLOWER MARKET REPORT.

The market shows a little more promising aspect, although the improvement is thus far more in that almost indefinable element — tone — than it is in actual transactions. The supply of chrysanthemums has materially decreased, and the stock seen in several wholesale establishments is of finest exhibition grade, which ought to, and undoubtedly will, henceforth, realize better prices than the market has been able to stand heretofore. Roses are not very abundant, but the demand is very light, and prices have not yet begun to mount, although they are likely to do so by next week. Carnations are plentiful, averaging rather under quality, and are selling poorly, especially the reds. Violets are mixed up in the football excitement and are an uncertain quantity just at present. Lily of the valley is fine from some growers and inferior from others who

PRATT'S  
"SCALECIDE"

Will positively destroy SAN JOSE'S SCALE, and all other scale insects. Fine insecticide without injury to the tree. Sample, more one try and a paper than any other. Not an experiment. Write for FREE sample and literature. It is the best and most reliable. For those who have used it for years. Prices: 50-gal. bl., \$25.00; 10-gal. tin, \$11.00; 10-lb. can, \$8.00; 5-gal. can, \$3.25; 1-gal. can, \$1.00. For New York, One gallon makes 16 to 20 gallons spray by simply adding water. "Pocket Diary and Spray Calendar for 1909 sent FREE." Mention this paper.

B. G. PRATT CO., Mfg. Chemists, 50 Church St., Dept. W, NEW YORK CITY.

## WANTS, FOR SALE, ETC.

Advertisements in this column one cent a word. Initials count as words. Cash with order. All correspondence addressed "care HORTICULTURE" should be sent to 11 Hamilton Place, Boston.

## HELP WANTED

## GOOD MEN

When you need good men, skilled or unskilled, Write:

## THOS. H. BAMBRICK

34 South 7th Street Philadelphia

Help of all kinds, including that for Florists, Nurserymen, Seedsmen and the Horticultural trade generally.

WANTED: First class foreman, fully acquainted with conservatory and plant work, to take charge of outside work connected with a large city retail flower store. Must have had experience in buying plants for store trade, absolutely sober, honest and industrious. None other need apply. Address with references, T. R., care HORTICULTURE.

## SITUATIONS WANTED

SITUATION WANTED—By German, aged 29, in private greenhouse place, by November; not afraid of work; strictly sober. Best of references. Address: H. Long, 132 Second Ave., Albany, N. Y.

## FOR SALE

## FOR SALE

On Favorable Terms

The Mosback Greenhouse Co. offer their plant at Onarga, Illinois, for sale. This plant consists of Light Modern Greenhouses each 25 x 100 ft., well equipped with Ferns and Bedding Plants of all kinds, and several acres of Ferns and Bedding Plants. Also a good sized dwelling house and five acres of land adjoining; also a second lot of 47 acres of additional rich land, about one-half of which is set to Asparagus and Peasants. The business is mainly wholesale sale—very little retail business being done. Any one interested will be furnished with detailed information on application to:

THE MOSBAEK GREENHOUSE CO.  
ONARGA, ILLINOIS

FOR SALE—Retail nursery, sixth year, doing good, steady and increasing trade. Stock in excellent condition. Only local supply for community of 50,000. For particulars address R. N., care HORTICULTURE, Boston.

## TO LEASE

TO LEASE for a term of years, four greenhouses containing about 40,000 feet of glass, stocked with suitable plants and cut flowers. Apply to A. G. Hood, Manchester, N. H.

## DON'T EXPERIMENT

USE

## TO-BAK-INE

and your stock will be free from insects, clean, and the blooms will not be discolored.

### Why My New Curved Iceless Eave is Far Superior to Anything on the Market Today

- 1st. No sash bars incased in iron, thereby eliminating all danger of bars decaying.
- 2nd. Can be used in conjunction with iron frame construction, thereby doing away with that very objectionable feature, "columns."
- 3rd. Roof bars with drip grooves, which act as conductors to carry away the condensation: Result, the driest roof ever used for greenhouse purposes.
- 4th. **THE MOST IMPORTANT OF THEM ALL.** The very small increase in cost over the ordinary style of construction which makes it possible to be used for commercial as well as private purposes.

**William H. Lutton,** Horticultural Architect and Builder  
West Side Ave Station (C.R.R. of N.J.) Jersey City, N.J.

## Some Gutters With Objections AND Some Without

One concern makes their castings heavy enough but their gutter is shaped wrong — it is a square box like affair without enough capacity — water backs up under glass, freezes and wags goes your glass.

Another manufacturer makes them with sufficient capacity, but casts them thin and of brittle iron — and they break.

Still another firm has tough enough iron and thick enough castings but the roof bars are fastened with a screw running directly up from the bottom into the bar, which draws the moisture up and rots the bar.

Lord and Burnham Co. make their gutters so that all these objections are overcome, with several mighty strong points added. So let us put you wise on gutters. Write us.

**Lord & Burnham Co.**

Main Sales Office: 1133 BROADWAY, N.Y.

BOSTON: 819 Tremont Building. PHILADELPHIA: 1215 Filbert St.

## TAKE THE RIGIDITY QUESTION

You might think on first glance that a house so light, so airy and simple in its construction could not be rigid and enduring. It is decidedly both! You see with the encasing of the roof bars (or core bar as we call it) in the galvanized steel U-Bar, every bar is practically a rigid rafter, although the combining of both gives a member no larger than the roof bar used in the usual flat rafter frame construction. The core bars are chemically preserved against decay, and protected against condensation by the steel U-Bar. The steel U-B is galvanized against rust. It is the ideal construction for private estates, parks, public institutions and florists' show rooms. Send for catalog.

## Early Flowering Chrysanthemums

The readers of HORTICULTURE and myself in particular, are much indebted to Mr. Totty for the further information regarding the possibilities of the English early-flowering chrysanthemums. These plants, I am fully convinced, are going to be grown more widely in the future than they have been in the past, and for this reason any information we can get regarding their culture in this country will be warmly welcomed.

Mr. Totty in the second paragraph of his communication made much of an alleged mistake which I made in reading his original article in the Florists' Review. I take it that he means to convey that early-flowering singles on the one hand and the double varieties on the other belong to separate classes and cannot by any means be classed together under the one heading, i. e., early flowering chrysanthemums. Does Mr. Totty mean to say that the so-called new branch of early singles mentioned by him would do better than the doubles in this country? If this is the drift of his argument, then I must ask him to tell us how he has arrived at this paradoxical conclusion.

In the fourth paragraph of Mr. Totty's reply I find the following: "Mr. Wells has a new strain of early singles that are not yet on the market, and it is to these singles that I was referring as possible useful border plants for us." Now, Mr. Totty, so far as I am concerned your explanation does not alter the case one little bit. In the first place I would like to state here that early flowering singles have been on the market, to my knowledge for at least seven or eight years. I myself have grown quite a number of them, as far back as five years ago. I have also kept in touch with Mr. Wells' introductions in this class, and I cannot honestly say that I have ever noticed one point in the habit, growth, or constitution of an early single, which would entitle them to be classed as being more suitable than the double for use as border plants in this country. It may be possible, of course, that Mr. Wells has a batch of seedling singles on trial, for the purpose of adding to the splendid list of border singles which he has already put on the market.

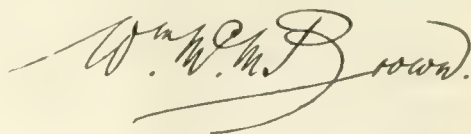

I was greatly pleased to learn that Mr. Totty was in sympathy with all I had said in favor of the early flowering varieties. I was also pleased to have him say that their usefulness was unquestioned, but I cannot agree with him, that there is not much money to be made on them. If their usefulness is unquestioned, then I say, so is their profitableness. The public buy asters and such like for the simple reason that they have no choice in the matter, as that class of flower is about all there is to be had at that time of the year. Give them something new, something out of the usual year-after-year run and then you will see what will happen.

Mr. Totty is looking for a flood of Golden Glow next fall, and I rather think he is about right. If any one wishes to hedge a little, to use a sporting expression, I will give the tip. Try a batch of White Quintus; keep them well pinched at the start, then let them go, suckers and all, and when the fall comes round they will run the Golden Glows right out of the market, and make them look like a two-cent bunch of dandelions.

A very common fault with the early flowering "mums," both singles and doubles, is their habit of running straight into flower, when we get them into their flowering pots. People are apt to get discouraged at this, and dump them straight away, but even in England we will find that the earlies behave in this manner. The best plan is to get your cuttings rooted rather early, and keep them growing in a rather cool house, taking care never to allow them to become pot bound. With most varieties of this class we depend on the suckers and shoots near the base to make the future plant. The plant proper may be cut off after they are potted into their finals.

It is also a good plan to grow them where they will be just a trifle shaded during the hottest part of the day. In most places we can find a situation such as this. If one takes just a little care with them, and makes an effort to keep them growing, plants may be had, the equal, yes, and even superior to those grown in England.

North Easton,  
Mass.

## Chrysanthemum Anna

Our cover illustration for this issue attractively sets forth the merits of the single flowered chrysanthemums. Grown to the neat, symmetrical, free-flowered specimens to which many of them are naturally adapted they make an object of beauty and in the exhibition hall supply the needed contrast with the massive effects of the huge flowered Japanese section. This class of chrysanthemums can hardly be improved by increasing the size of the individual blooms. Rather should the raiser of new varieties strive for richness of foliage, floriferousness and where required in plant form, compact symmetrical habit. For cut flower purposes there are many ways in which long arching sprays may be effectively used. In the latter case the flowers should be produced under glass, as the colors are much clearer than when exposed to the open air and wide extremes of temperature.

The variety illustrated is an introduction of Elmer D. Smith & Co. Edwin Jenkins, to whom we are indebted for the photograph, was awarded a certificate for it at the exhibition of the Lenox Horticultural Society.

that it is not so much that which is past as the promise of what is to come that gives especial cause for thanksgiving and heart comfort. The future certainly looms up in much more inviting aspect to most of us than it did one year ago. That it may prove no elusive promise but may yield abundantly of every blessing and bring to each and every one prosperity and happiness in fullest measure is HORTICULTURE's sincere wish for all who read these lines.

"Men," it has been said, "are but boys of a larger growth." This saying comes to our mind rather pertinently as we contemplate the simple-minded and exuberant pleasure which our great men and women in Washington seem to take in getting seedling chrysanthemums named after one another and the gracious diplomacy with which our friends, the government gardeners, provide a fresh batch of new varieties for this harmless pastime each season. What matters it that these productions with their aspiring titles are never called upon to pass the ordeal of the chrysanthemum committee's searching eye, that their fame makes no stir beyond the charmed circle in which they scintillate and that, in all probability they will never be heard of again. "Tis neither here nor there." Outside of the group of mutually charmed participants the ubiquitous newspaper correspondent seems to be the only party who takes the little comedy seriously.

Following close on the heels of the organization of the retail florists in New York comes the news of a similar action on the part of the violet growers of the Rhinebeck district "for the purpose of encouraging the cooperation of violet growers and for the protection and advancement of their common interests." HORTICULTURE has always been ready to applaud organization. Organization makes possible much that can never be accomplished without it. Wisely used, in the hands of broad minded and capable leaders, organization is a tremendous power for good. We can detect elements of danger, however, in the multiplicity of special class organizations, the component parts of which have interests which under misguidance might become antagonistic. Events in connection with the recent football excitement in New Haven and its relation to the violet trade, for instance, are rather disquieting, if our information is correct, and suggest the need of guarding against unconsidered and precipitate action. Whether growers, wholesale or retail, there is plenty of scope for useful work by each of these trade societies but on questions which vitally concern them all, and for their common interests, the need of some means for conference and cooperation will, we believe, soon become manifest. Here is, perhaps, an opportunity for our young S. A. F. strategists who are now taking the reins of leadership in that organization, to evolve a plan of affiliation between these specialized bodies and the great national association which shall make for harmony through a submission of all disturbing questions to dispassionate consideration of an acceptable intermediary board as they come up.

### Hopeful gratitude

Thanksgiving Day with its time-honored feasting and good cheer inserts its welcome presence between and between the business activities of the week and bids us forget for the moment the cares and worries of past, present and future and turn to view the kindest, sunniest side of our nature. As we sit with kindred and friends in gratitude and felicitation this year many may feel

## Tree Talks

### IV.

#### CARE OF THE ROOTS IN TRANSPLANTING

As soon as a tree has shed its leaves it is as much at rest as at any subsequent period; unless it is frozen its torpor is greater at that time, because its excitability is completely exhausted by its season of growth, and it has had no time to recover it. If at that time the root is wounded a process of granulation will commence, as it does in cuttings, and from that callus, as we call it, will, in the spring, emit new roots, which will soon form reservoirs from which the tree can draw its nourishment from the earth. Since the roots must be wounded more or less in taking up to transplant, the sooner it is done after the fall of the leaf the better it would be were it not for the cold, dry air of our winters. Further South the fall is the best time to transplant trees, but in this State, if it cannot be done before heavy frost, as early as possible in the spring.

The accidents to which the roots of transplanted trees are liable are of such a kind that it is impossible to prevent their being exposed to the air, sometimes for a considerable period. It is, therefore, of the first importance to have the roots kept as moist as possible until they are planted in the moist soil. Many valuable trees have been lost by the drying up of the roots, especially when the buds have started to grow before the trees have been taken up.

Next in importance to the selecting of a fitting season is the preservation of the roots of transplanted trees. The former is of little consequence if the latter is not carefully attended to. Some plants will live and succeed with the rudest of treatment, and bear the most severe mutilation without much suffering, but these are special instances of extreme tenacity of life and do not affect general principles. In taking up trees it is necessary to have every minute fibre of the roots, if possible, but as this can hardly be done the trees should be lifted with the least possible destruction of these important organs, remembering that it is not the coarse, old, woody roots by which the absorption of food is carried on, but by the younger parts, especially the spongioles. The soil should be carefully removed at some distance from the stem of the plant, so as to insure as many young roots as possible, digging well down and undermining the plant, so that with a gentle pull the tree may be removed without straining or stripping the roots, as is often done where a spade is thrust down close to the stem, and, as soon as a few roots are cut, the tree is pulled out with force, which wrenches the bark and strips the roots of most of their fibres. Under all ordinary circumstances the roots will be injured more or less by removal. In that case all the wounds should be cut smooth with a good sharp knife, at an angle of about forty-five degrees, or less. If the ends of small roots are bruised they generally die back a little way, then emit fresh spongioles, but the larger roots, when bruised, lose much of their vitality. Their injured tis-

ues being open to the uncontrolled introduction of moisture, decay in consequence, and often become the seat of disease, which spreads to parts that, otherwise, would be healthy. If the wound is cut clean the vessels contract and prevent an excess of water in the interior, the wounds heal by granulation, formed by the living tissue, and the readiness with which this takes place is in proportion to the smallness of the wound.

#### ROOT PRUNING

It may sometimes be advantageous to remove large roots even if not bruised, the object being to compel the plant to throw out a supply of young fibres. This is a common practice in nurseries where oaks or other large tap-rooted plants are grown, and where large trees are required to be removed, this root pruning is one of the safeguards to success. The reason why cutting off a portion of the principal roots causes a production of fibrous roots appears to be this; the roots are produced by organizable motes sent down from the stem, that water if uninterrupted flows along the main branches of the roots until it reaches the extremities, adding largely to the wood and horizontal growth of the root, but increasing in a very slight degree the absorbent powers; but if a large root is cut off the powers of the stem remaining the same, all the descending water, which would have been expended in adding to the thickness of the amputated parts, is arrested at the time of amputation, and, unable to pass further, rapidly produces granulations to heal the wound, and young spongioles soon establish themselves in the surrounding soil and become the points of the new active fibres.

Root pruning is also of great service in promoting fruitfulness in trees that fail to produce fruit on account of their excessive vigor. If a deep trench is dug around them, at some distance from the tree, and the large roots cut back, the rank growth of the tree will be stopped almost immediately, and by stopping the excessive vigor of the plants fruit buds are formed. Thus a plant in sterile soil and exposed situation will flower sooner and more abundantly than one in a rich and shaded place.

## Coming

The Fourth Annual Holiday and Anniversary Number of HORTICULTURE. If you have anything to sell wake up. HORTICULTURE reaches the buyers.

HOLIDAY TRADE NUMBER WILL BE ISSUED

**December 12—Prosperity Waits**

## An Exceptional Opportunity for Investment

The first or ground floor issue of stock of any enterprise is necessarily the most liberal; therefore, the best to invest in. **A successful GOING concern can obtain all the money required at 6%.** A new concern must give more and if you want to make more, **you must go in with a new company.**

This Company is a new company for growing cut flowers and has the earmarks of a bonanza right in your own business. It is the best proposition in our business in the country **TODAY.**

There is just as much money in the flower business as in any other and, on an average, a great deal more, though we generally try to make ourselves believe the other fellow makes his money easier than we do.

Robert Miller, President and Manager of the Company, has made a specialty of growing roses for the market for fifteen years and is a graduate of the Waban Rose Conservatories, Natick, Mass.

The manager will be insured to the Company **for the full amount of subscriptions**, making the investments absolutely secure, and in case of death, 100% to the good.

The stock is \$10.00 a share, its par value; it is preferred in principal as well as in dividends. It is voting stock, and is participating and non-redeemable, and is the most liberal stock on the market today. It is secured in every possible way against risk of loss.

Bonuses of common stock are given with the preferred according to the amount of preferred purchased.

The plant will be located in one of the **Richest Territories of This Country where there is a Superabundance of Sunshine, Cheap Fuel, Elegant Soil, A Tremendous Demand for Flowers, and Practically No Competition.**

Do not let this opportunity go by, and do not forget the **FACT that the first issue of stock is the one you must get if you want more than savings bank interest on your money.**

Ask for an interview with the President and he will gladly call on you and explain the proposition in detail.

Send for circular and get in on the ground floor.

This is not a hole-in-the-ground proposition where you can't see or possibly know anything about it, except by taking the say-so of some high finance dealer, but an all above-ground and above-board proposition that you are just as familiar with as any of the directors and you could direct it yourself without any serious trouble.

This is an age of combination of effort and we want your co operation.

**Agents wanted to sell stock on commission and partner wanted to take active share in the business.**

**THE MILLER FLORAL CO.**  
East Brookfield, Mass.

## News of the Clubs and Societies

### DETROIT FLORISTS' CLUB.

A very profitable evening was the last meeting of this club on November 18. A fall show of local products which would have been a credit to a much larger body of men than we represent added to the interest. Bassett & Washburn favored us with a display of their grand novelty, carnation Orland P. Bassett. Elmer D. Smith was here personally with an exquisite collection of twenty-five varieties of show blooms—of what, he did not tell us. A veritable encyclopedia on chrysanthemums this man Smith is. He has now 4000 new seedlings, half of them early and half medium and late. He is also working on a strain of chrysanthemums which will bloom out-of-doors in August, but it will be a couple of years yet before any of them can be sent out. Would that not help us in replacing the ever-failing aster?

Aug. Von Boeslager showed a very strong blood red carnation novelty named Clara. Thos. F. Brown took the plum for local product; he exhibited two vases of Timothy Eaton and Dr. Enguehard, the like of which was not even seen in Chicago. A great many other exhibits in chrysanthemums, roses, cyclamens, orchids, ferns, etc., were fully worthy the admiration of a larger public than the local club contingent and it was regrettable that neither prizes nor certificates of merit were offered.

During the regular meeting all enjoyed a paper read by S. S. Skidelski entitled, "The Trend of the Times."

The question box was empty, but our guest, Elmer D. Smith, was sorely tried and innumerable were the questions which he most cheerfully answered for the benefit of all.

FRANK DANZER.

### AMERICAN CARNATION SOCIETY.

For the exhibition to be held in conjunction with our annual meeting at Indianapolis, Ind., Jan. 27 and 28, any grower desiring to have their carnation named in Class B of fifty blooms, named varieties, \$5.00 first, and \$3.00 second prize, (varieties disseminated prior to July 1st, 1908,) can have the variety inserted in the Premium List by sending the name and guaranteeing the payment of the prizes to Albert M. Herr, Lancaster, Pa. It is the aim of the Society to have this list as extensive as possible without too much expense to the Society and we hope that introducers will have enough pride in their introductions to see that they are entered in this list. To secure insertion, names must reach the Secretary on or before Dec. 4th.

#### Carnation Registered.

By F. Dornier & Sons Co., LaFayette, Ind.: "Pink Delight." An even, clear, waxy, shell pink with just a trace of salmon which heightens and holds the color under all conditions.

ALBERT M. HERR, Sec.  
Lancaster, Pa.

### CHRYSANTHEMUM SOCIETY OF AMERICA.

#### Work of Committees—Report on New Chrysanthemums.

No. 20; Inc. Light pink. Exhibited at Chicago, Nov. 7, 1908, by C. H. Totty, Madison, N. J. Scaled 86 points commercial.

Mrs. W. E. Kelley; Inc. Yellow. Exhibited at Chicago, Nov. 7, 1908, by Elmer D. Smith, Adrian, Mich. Scaled 87 points commercial.

Sport from Dr. Enguehard; Jap. Inc. Light pink. Exhibited at New York, Nov. 17, 1908, by John J. Kean, Jersey City, N. J. Scaled 74 points commercial.

Canadian Seedling No. 20; Jap. Inc. Light pink. Exhibited at New York, Nov. 17, 1908, by C. H. Totty, Madison, N. J. Scaled 85 points commercial.

The variety No. 58-2 exhibited by E. D. Smith in Philadelphia and Cincinnati, Oct. 24, which scored 88 points commercial and 90 points exhibition, is the variety which has been named President W. H. Taft.

DAVID FRASER, Secy.

### NORTH SHORE HORTICULTURAL SOCIETY.

At the regular meeting of this society November 20, the lecturer of the evening failing to appear the question box was turned to for discussion. One question brought up the subject of natural rotation of trees and plants in forest lands. Many interesting problems were brought out as to what the plants that appear after fires and lumbering operations spring from, seed or roots. For instance, a crop of wild strawberries immediately after cutting off pine forests; or blackberries after a woods' fire.

R. A. MITCHELL.

### PRACTICAL RESULTS FOR THE S. A. F.

At the National Flower Show, the membership of the S. A. F. was increased by forty-seven annual members and one life member. This is a very good showing in comparison with the convention at Niagara Falls where the accessions to the annual membership were sixty-three and the life members three.

#### CLUB AND SOCIETY NOTES.

The Pasadena (Calif.) Gardeners' Association, at a special meeting on Oct. 30, put themselves on record as opposed to the present plan of the City Commissioners of planting and caring for street trees.

The annual convention of fruit growers, truckers and gardeners will be held in the State House, Indianapolis, Ind., Dec. 2, 3. \$300 in premiums are offered for exhibits. For entry cards, premium list etc., address to B. Flick, Room 11, State House.

Indianapolis, Ind.—State Horticultural Society, Dec. 2, 3.

So. Haven, Mich.—State Horticultural Society in conjunction with the So. Haven and Casco Pomological Society, Dec. 2, 3.

Columbus, O.—Columbus Horticultural Society, flower show, first week in December.

Springfield, Mo.—Missouri Horticultural Society, Dec. 8, 9.

Spokane, Wash.—National Apple Show Association, Dec. 7-12.

Council Bluffs, Ia.—Southwestern Iowa Horticultural Society, annual meeting, Dec. 15-17; National Horticultural Congress, Dec. 14-19.

Lynchburg, Va.—Virginia Horticultural Society, Jan. 6-8, 1909.

Indianapolis, Ind.—American Carnation Society, Jan. 27, 28, 1909.

## FRENCH NATIONAL CHRYSANTHEMUM SOCIETY.

The above-named society held its 13th annual congress at Tours on the 2nd to 5th November, in conjunction with the Tours Horticultural Society. An excellent exhibition of fruit, flowers and vegetables was arranged for the schedule, comprising about one hundred classes. The jury was composed of about forty gentlemen interested in horticulture both locally and elsewhere. Mr. Harman Payne was nominated honorary president of the jury, with Mr. George Bruant, the eminent nurseryman of Poitiers, as vice-president. Among others present either officially or otherwise, were Philippe de Vilmorin, Ernest Calvat, Philippe Rivoire, Pinguet-Guindon Charmet, Chaubrier, Barbier Choulet, Dubrueil, Durand, and other well-known admirers of the chrysanthemum.

The grand prize of honor was awarded to M. Pinguet-Guindon for a remarkable and interesting collection of conifers trained fruit trees, fruit, etc., mostly staged in the large open square called the Place de la Gare. There was also a collection of ornamental trees and shrubs from the same exhibitor. M. Jouanneau showed trained fruit trees in variety.

The major portion of the show was held in an immense tent about 220 ft. long by 125 ft. in width. The exhibits were all arranged in turf-bordered beds on the ground level, and comprised besides chrysanthemums some grand examples of heaths, cyclamens, begonias, etc., which are a specialty of the nurserymen in and around Tours. Ernest Calvat had a fine lot of new seedlings, an enumeration of which must form the subject of a special note later on. Alfred Chaubrier showed new seedlings, as did the Marquis de Pins, M. Dolbois, M. Heraud and others.

The leading exhibitors of cut blooms and plants were Messrs. Reugny, Pellissier, Bachet, Robert de Rochecorbois, Page Laplane, Parrot, Buret-Reverdy, Le Clerc, Dupont, Fierdpied, Allery Aubert, Dalliere Queneau Poirier, Travouillon, Moretster Montigny, Barillet and others. M. Pinon had a remarkable group of trained specimens of all kinds and was awarded one of the leading prizes. The plants were trained as fans, pyramids, immense standards and other designs, and occupied the whole width of the show. Vilmorin Andrieux & Co. had two fine groups of pot plants well flow-

ered and charmingly arranged. There were a couple of large groups of pot chrysanthemums also staged by Bernier-Meunier.

Readily reviewing the Tours Show—for we can do no more, being on our way to the great show in the capital—we may mention the exhibit by August Marile of Begonias Turnford Hall, Glorie de Lorraine, and white Anthesis Perfection. Gladioli were staged by M. Loiseau, a capital lot. M. Guillerins showed a fine lot of Begonia Viady 6 ft. high. Dalliere & Son had Begonia Alleryi in gigantic plants. M. Jubant staged some fine specimens of Begonia gigantea. M. Lionville had some hairy varieties of chrysanthemums which are now seldom seen at either English or French shows.

Vegetables made a fine display. Specially grand and varied in extent were the collection sent by Vilmorin Andrieux & Co., M. Berger, M. Sussier and others. Other exhibitors were Messrs. Bouchaud, Robert, Dupont, Fierdpied, Boucard, and many more, all of whose exhibits would necessitate a catalogue, so numerous were the sorts exhibited. We had almost forgotten to mention a meritorious vegetable exhibit by the Syndicate Horticole de Touraine.

The proceedings were highly interesting all through and the members of the Congress were warmly welcomed by the Tours Horticultural Society. On the first day after the operations of the jury there was a lunch presided over by M. Pinguet Guindon, the President. There was also a meeting of the Congress in the Town Hall, a handsome building placed at the disposal of the Society by the municipality, and in the evening an official banquet, at which the representative of the Minister of Agriculture distributed several decorations.

On the morning of the second day another meeting of the Congress was held, and in the afternoon an enjoyable excursion in motor cars to see some of the famous chateaux in the neighborhood, the vineyard at Vouvray and the famous wine-making establishment and cave of M. Vavasseur. The members of the Congress were also invited to a performance at the Municipal Theatre. On the third day the sights of the town were visited, and then the party broke up, most of them making their way to Paris for the great autumn show of the National Horticultural Society of France.

C. HARMAN PAYNE.

## Some Chrysanthemum Novelties

Mrs. O. H. Kahn.

Frank Payne.

Mrs. Charles H. Totty.

The handsome new varieties illustrated herewith are included in C. H. Totty's list for this year. Following is a brief description of each:

**Pockett's Crimson.**—A glorious reflexed of the largest size, the color of G. W. Childs, crimson and gold. Foliage and stem are ideal. It has received four certificates and won the grand sweepstakes at the Chicago Show, being placed first of all the new kinds exhibited in fourteen classes.

**Charles H. Totty.**—A chestnut scarlet, altogether a bigger and better thing than Mrs. J. E. Dunne, stem and foliage perfect. Certificated by National Society (N. Y.) Florists' Club, Lenox Horticultural Society and Morris County Florists' and Gardeners' Society.

**Mrs. C. H. Totty.**—Light pink, true reflexed, a beautiful refined flower that appeals to every one. Dwarf, sturdy growth with foliage well up to the flower.

**Mrs. O. H. Kahn.**—A bronze with mahogany shading that lights up beautifully. Won the "any other color" classes on both the exhibition and commercial scale in the seedling competition at Chicago and has received five other certificates.

**Pockett's Surprise.**—Rosy crimson, one of Pockett's very best. It is a monster flower and has a very heavy stem that carries the flower perfectly. This as an exhibition flower will rank high, as the petals stand straight out and show to the best advantage.

**G. W. Pook.**—Entirely distinct in shape. Flower is loosely incurving and shows only the salmon bronze reverse. The growth is splendid and foliage enormous; has much more life in the color than Mrs. G. Heaume.

**Frank Payne.**—A light pink, same color as Lady Hopetoun, but has the advantage of making a stem heavy enough to carry the flower erect. It has been certificated in three countries.

**Clara Wells.**—A true incurved and the largest in its type that we have. Color cream yellow. It will be heard from as a commercial grower's flower, as it can be planted closely and every bud produces a perfect flower. As a typical incurved it is the best thing we ever grew.

G. W. Pook.

Pockett's Crimson.

Clara Wells.

### INDOOR FRUIT CULTURE.

Paper Read by William Downs before the Gardeners' and Florists' Club of Boston.

(Continued from page 603)

We built our graperies with low walls, giving a deeper front light than usual, thus giving so much additional rod space for fruiting. For carrying the heating pipes and walks in the place of the usual brick piers we used 2-in. galvanized pipes with uprights resting on the concrete. For drainage I made a regular Telford foundation about 8 in. thick, (having plenty of stone at hand), and over that put good strong sod with the grass down. Now as to the construction of the border itself; it is not necessary to make it more than 4 feet wide the first season and add to it as the roots make their way through it. A good strong loam cut with the grass on, about 6 in. thick, is the best. This should be chopped up roughly, and a good sprinkling of inch bones be added. If there is any danger of the soil becoming close some old lime rubble should be mixed with it, it being very necessary that it should be kept open. To this I would add one-fourth cow manure, as most of the loam we get is inclined to be poor. Yet I would not aim at too strong a growth the first season; by that I mean a soft sappy growth. I remember seeing once a magnificent house of canes the first season and they bore inferior bunches when they fruited. A healthy cane will grow tremendously the first season without much manure.

**Planting and Cutting Back.**

The border being ready to receive

the vines, comes the question of what to plant. I prefer to grow my own canes from vine eyes and plant out of 6 in. pots. We commenced our own houses as soon as the frost was out of the ground and I had good nice plants in 6 in. pots from eyes rooted that spring and they grew splendidly. We grew several of them in pots to fruit the next season and they grew to be ten or twelve feet tall. We also planted some year-old vines at the same time, cut back to one foot from

the ground, and the 6-in. pot vines made just as satisfactory growth as the older ones.

I want to digress here to say that we planted a row of vines on either side of the walk in the centre of the house to fruit temporarily and then, as the permanent ones grew up, to be discarded. These were from the 6-in. pots and the second season carried quite a number of bunches each. In sixteen months from starting I exhibited bunches of Muscat of Alexandra

Chrysanthemum Charles H. Totty.

## SOMETHING TO GROW OVER

*The Best Christmas Novelty Ever Offered*

# POINSETTIAS

With Foliage as Natural as the REAL

This Poinsettia is an Absolute Reproduction of the Natural. Five Sizes.

CHRISTMAS FOLDER AND PRICE LIST READY NOW.

**PITTSBURG CUT FLOWER CO., Ltd.**

222 Oliver Ave., PITTSBURG, PA.

weighing two pounds each. This gave us the fruit while waiting for our vines to grow and doing this gives a greater opportunity to get your vines established before fruiting, and does no harm to the permanent vines. The treatment of the permanent vines is to build up gradually what is to bear fruit a number of years, and must be so considered through the next few years. The growths should be cut back at planting time to about 12-in. from the ground and one strong lead taken, then this cut back the next season to about 4 ft., and this length should be added each year until the desired length is secured.

The second season it will be necessary to determine the buds to be left on either side of the rod to remain as spurs. These are best left alternately about twenty inches apart, this equalizing the crop all over the house, instead of the bunches coming in pairs. In regard to stopping the lateral growths, the amount of space between the vines must determine where to stop; generally two eyes beyond the bunch is considered right. A good system to follow is to cover all the roof with foliage, but not to have it too crowded. The distance between the vines should be not less than 4 ft., and 5 is better. Never allow the growths to develop so that they have to be cut with a knife, as this means a loss to the vines to take off so much foliage. It should be pinched when it is young with the thumb and finger.

### Tying In.

Perhaps here a word as to tying the vines to the wires, (which should be 18-in. from the glass.) Care should be taken that the leader is kept straight, as it gives the rod a much better appearance when straight. In tying a shoot down it must be done gradually—that is, not tied down all the way at once, or probably it will snap off. Another point I have noticed is that vines should be tied down when the sun shines, as there is less danger of their breaking. To help in this I used to sling the main rod about three inches below the wire and then the lateral did not have to be bent so far to get it to the wire. As to the cropping of the vine the second year, a bunch to the vine is sufficient, and one pound to a foot of rod is about the crop to be carried afterwards.

### Pruning.

In pruning back the vines after the

foliage is off, they should be cut in close to about two eyes which are at the base of the shoot close to the rod, as only one eye is necessary; this will avoid large unsightly spurs. They should be pruned early, or they are very apt to bleed; this is caused by the flowing of the sap. Should they bleed they can be stopped by painting over the cut with a mixture of shellac and alcohol. There is more harm done by overcropping the first few seasons than we think. A vine grows so vigorously that we are apt to think it capable of carrying more fruit than it is really able to, and if there is one thing more than another that I would warn the beginner against it is overcropping, as it takes a long time for them to recuperate after it is once done.

Another means of temporary cropping is by pot vines, and is very fascinating to most people. Years ago it was very fashionable in England, as grapes so grown were taken to the dining room and used from the vine. Bunches about one-half to one pound were grown in this way.

Of course to get fine berries thinning must be resorted to and this takes practice to acquire and a knowledge of the vine is necessary, as some varieties grow so much larger than others. A good way is to first cut out all the inside berries and then take all the small berries out, thinning the remainder so that they will fill up solid and not be too crowded. Later you will find that it will be necessary to take a few more out.

### General Cultural Advice.

As to temperature, start with a night temperature of 45 deg.—the day 10 or 15 deg. higher—raising gradually as the buds swell until a temperature at night of 60 to 65 deg. may be maintained, when the vine is in good growth. During the flowering period a rather lower temperature is desirable, and a free passage of air maintained to get the pollen dry. I found even with Muscats that they set better in a lower temperature than in a high one. All I ever did was to give the vines a good shaking while the sun was shining and the ventilation on the house, and in the case of Muscats I drew my hand lightly down the bunch. Another method is to give a very light syringing when they are ready to set. When the seeds are being formed, a rather lower temperature should be kept, and when color-

ing, plenty of air and judicious watering is necessary to bring out the best flavor. Plenty of moisture should be kept in the house when they are starting and growing, until flowering and coloring time, when it should be kept drier, gradually lessening it until the fruit is ripe, when the house should be kept dry as possible. The border should be kept on the dry side but not so dry as to cause the fruit to shrivel.

### Care After Fruiting.

After the fruit is cut, many growers neglect their vines. This should not be. They should be syringed daily to clean the foliage and if any red spider has got in, it can be got rid of in this way. Another good practice is to shorten the growths after the fruit is cut, letting in more light and air to ripen the wood, and also helping to plump the buds near the rod. All the air possible night and day, and even a little frost is what they want, and to keep cool as possible until you are ready to start them. Before starting, all loose bark should be trimmed off, but I don't approve of a regular skinning of the rods. Formerly a coating of mud, soot, sulphur and cow manure was painted on, but either kerosene emulsion or Scalecide is all that is necessary to clean up the vines. The house should be thoroughly washed, and if the vines have been badly infested with insect pests it is well, if not painting, to go over the entire wood and iron work with kerosene.

### Feeding

As to feeding; the grape being a rampant grower, naturally it needs liberal treatment, and I have found that after they get into growth you can give them feed about every time you water them, except perhaps during the stoning period, when they are to some extent at a standstill. I like to fork in lightly at starting time a good dressing of bone, following this up with sheep manure when they are from four to six inches long, as no new roots are formed until that time. Then alternately bone, sheep manure, dried blood and one or two dressings of Thompson's vine manure, one pound to the square yard, when a mulching of cow manure is very beneficial. I think more of blood and bone than of the others, the bone being rich in phosphoric acid builds up in fruiting form the wood produced by the nitrogenous manure. Still if I was tied to one manure I should say that

# THE NEW CRESTED SCOTTII FERN

## NEPHROLEPIS SCHOLZELI

**T**HIS crested sport of Scottii will hold the same position to all the crested forms of Nephrolepis that Scottii now holds to the Boston. It is entirely distinct from all others and will become even more popular than its parent with which it is identical in every way except that the pinnae are subdivided, giving it a beautiful crested appearance.

NEPHROLEPIS SCHOLZELI

We have shown the plant at the Exhibitions noted below and have been awarded the following honors:

**Shaw Gold Medal,** St. Louis Horticultural Society November 3rd, 1908. For "Best plant, of decided merit for cultivation, not previously an article of North American commerce."

**Silver Medal,** offered by the Society of American Florists, through the St. Louis Horticultural Society, November 3rd, 1908. For "The most meritorious plants or flowers of American origin."

**Certificate of Merit,** of the Horticultural Society of St. Louis, November 3rd, 1908.

**Silver Medal,** Pennsylvania Horticultural Society, Philadelphia, November 3rd 1908, for the best new plant.

**Certificate of Merit,** Massachusetts Horticultural Society Boston, November 6th, 1908.

**Certificate of Merit,** Dutchess County Horticultural Society, Poughkeepsie, N. Y., Oct. 30, 1908.

**Certificate of Merit,** Morris County Gardeners' and Florists' Society, Madison, N. J., Oct. 30, 1908.

**Certificate of Merit,** Chestnut Hill Horticultural Society, Philadelphia, Pa., Nov. 4, 1908.

We are booking orders now which will be filled in strict rotation, June 1st, 1909.

Price per dozen, \$3.50; per hundred, \$25.00; per thousand, \$200.00. Twenty-five supplied at one hundred rate and five hundred at thousand rate.

**HENRY A. DREER,** 714 Chestnut Street,  
PHILADELPHIA, PA.

Thompson's was the best. Some growers use phosphates and nitrates but except in the hands of experts they are best left alone. Never apply manures when the borders are dry; rather give them a moderate watering today, then the manure and another tomorrow. This for two reasons: the vine suffering for want of water is apt to take up more manure than is good for it at one time, and it is apt to wash much of the manure through the border if it is very dry.

As much of the surface of the border as possible without disturbing the roots should be taken off each year before starting, and a rich mulch put on. This would be the time I should apply the bone I spoke of at starting time.

#### Syringing and Shading.

Liberal syringing every fine day, and frequent damping through the day, shutting up with sun heat in the afternoon, avoiding cold draughts on the young foliage, yet giving all the air possible to get it hard and leathery, making the vines as sturdy as possible,

are the main points to be followed. A crack of night air whenever possible strengthens the vines and often prevents scalding, which is the result when the ventilating is not attended to early on bright mornings. A slight shade on Muscats seems to be necessary to keep the foliage from burning. Some do not do this, but I fail to see how the best results can be obtained when the foliage is more or less burned. This can be gradually removed when the fruit is ripe, and the color of the grapes will soon show the effect.

#### Varieties.

As to varieties. This is governed mainly by the requirements of the owner. Muscat of Alexandria is no doubt the first favorite, but Black Hamburg can be had a little earlier, and the two grapes can be grown in the same house. In the later house Gros Colmar or Gros Maroc which colors better, are the favorites. Lady Downes Seedling is a good keeper and of fine flavor. Alicante is a good set-

ter, makes a fine bunch, but the flavor is not so good, and the skin is likely to be tough. With the newer varieties I have had no experience; though Apley Towers and Diamond Jubilee are said to be acquisitions to the list of new grapes. I have mentioned only the most generally grown varieties, still there are others which have their merits. Barbarossa or Gros Guillaume makes a very heavy bunch, but of only medium flavor. Madresfield Court, an excellent flavored grape, is difficult to grow, it having a great tendency to crack. Foster's Seedling, an easier grape to grow than the Muscat, but not of so fine a flavor. The Muscat Hamburg is a fine grape, and there are many others, each having their own good points. In planting a grape it is perhaps well to plant a vine of one or two of each of these varieties, then if they are successful and you want more, a second rod can be taken up, or vice-versa one cut out and a rod from its neighbor taken up.

(To be continued)

## Seed Trade

### IMPORTANT DECISION REGARDING A SEED-GROWING CONTRACT.

The District Court of Douglas County, Nebraska, has recently decided an important seed case. An action in replevin was brought by the J. C. Robinson Seed Company of Waterloo, Nebraska, against John Hamilton, J. E. Hively, Citizens' State Bank of Waterloo, Nebraska, and its cashier, H. P. Waldron. The defendant John Hamilton had grown a crop of Stowell's Evergreen sweet corn on land owned by Mrs. Mary T. Robinson and which she had leased to the J. C. Robinson Seed Company. Hamilton went on the farm under a contract with the Seed Company wherein he agreed to do all the work, harvest and deliver the crop to the Seed Company at Waterloo, and he was to receive as compensation for his services such sum as three-fifths of the marketable corn grown would bring at a stipulated price per hundred pounds. The contract also provided that the title to the corn should be at all times in the Seed Company. After the corn was shelled, Hamilton sold three-fifths of the same to the defendant Hively, and gave a chattel mortgage on the corn he sold to H. B. Waldron and the bank. The other two-fifths of the corn was delivered by Hamilton to the Seed Company. The three-fifths of the corn sold by Hamilton was taken possession of under the writ of replevin and at the trial the court held: That the agreement between Hamilton and the Seed Company constituted a cropper's contract; that the relation between the parties thereto was that of master and servant; that Hamilton had no right to sell the corn or mortgage the same, and that the purchaser and mortgagee got no title or lien on the corn. At the close of all the testimony for both sides, the court directed the jury to return a verdict in favor of the J. C. Robinson Seed Company. This case is vitally important to seed men of Nebraska, for there has been an impression, owing to some former decisions, that contracts like the one involved in this suit were not valid in that State. In this trial the court entirely repudiated such claim and held such contracts to be absolutely valid and enforceable.

#### NOTES.

Los Angeles, Calif.—Aggler & Musser Seed Co. succeeded the Johnson & Musser Seed Co.

Green Bay, Wis.—It is reported that the Everett B. Clark Seed Co. will erect a seed warehouse in the spring.

Des Moines, Ia.—James G. Elder has returned to his former position of superintendent of the retail sales department with the Iowa Seed Co.

#### INCORPORATED.

Springfield, Mass.—E. M. Lyman & Son, A. E. Lyman, E. B. Crimmins; to cultivate and sell garden seeds; capital \$200,000.

### APPRAISERS' DECISIONS.

Before Board 3, November 6, 1908.

No. 19927. -Evergreen Seedlings.—Protests 199954, etc., of P. Ouwkerker (New York). Opinion by Waite, G. A.

The following articles were held dutiable as evergreen seedlings under paragraph 252, tariff act of 1897, as claimed by the importer: *Aucuba japonica*, *rhododendron*, and *box tree*. Note G. A. 6169 (T. D. 26772).

No. 19910. -Nursery Stock. Boxwood. -Protest 201912 of American Express Company (Boston).

An article invoiced as *Buxus arborescens* and commonly known as boxwood, which was classified as nursery stock under paragraph 252, tariff act of 1897, was claimed to be dutiable under the provision in the same paragraph for evergreen seedlings.

Waite, General Appraiser: . . . That boxwood is an evergreen is conceded, but the protestants have not sustained their claim that these importations were seedlings. The Government has offered in evidence the testimony of the examiner of nursery stock at the port of New York, whose experience and acquaintance with such merchandise covers a period of forty years. He states that, although it is possible to raise from the seed such plants as imported, as a matter of fact it is not done; that they are started from cuttings, for the reason that too long a time is required to germinate from the seed.

In the light of such testimony and in the absence of any evidence sustaining the importers' claim, we overrule the protest.

No. 19947.—Flower Seeds.—Seeds of Shrubs and Vines.—Protest 296313 of Henry & Lee (New York).

Merchandise classified as seeds not specially provided for under paragraph 254, tariff act of 1897, was claimed to be free of duty under paragraph 656 (flower seeds), or paragraph 548 (seeds which are drugs). Protest overruled.

Waite, General Appraiser: . . . No testimony was taken in the case and no samples produced. The appraiser's report shows the importation in question consists of seeds of *salisburia* (an ornamental tree), *wistaria* (a climbing shrub), *limonia* (shrub), *box* (shrub), and *gueraia* (a tuberous rooted climbing plant). We do not think the seeds of a shrub or tree or a hardy vine, such as holly or wistaria, were intended to be included within the description of flower seeds in paragraph 656. In our opinion, the commodity is not assessable under that paragraph nor under paragraph 548, but is correctly classifiable as seeds not specially provided for and assessable as found by the collector at 30 per cent. ad valorem.

No. 19948.—Seedlings of Pine and Spruce. Evergreen Seedlings. Protest 207142 of Chas. D. Stone & Co. (New York).

The protest related to seedlings of white pine and blue spruce, classified as evergreen seedlings under paragraph 252, tariff act of 1897. Assessment affirmed.

Waite, General Appraiser: . . . The importers claim that "both these varieties of trees shed their foliage in the winter time, and are therefore manifestly not evergreen," but should be dutiable as nursery or greenhouse stock at 25 per cent. ad valorem under the same paragraph.

The above-quoted statement of the protestants, upon which they base their claim, would seem to have been made in error for the trees named are perhaps among the best known of the evergreens. They are found in the forests in the north of our country, and their characteristics are so well known that all authorities agree upon their habit of always retaining their leaves. We consider this to be matter of common knowledge, and the mere statement of the fact suffices.

## THE CAULIFLOWER CROP.

An esteemed correspondent writes us as follows:—

In last week's HORTICULTURE I noticed some remarks regarding the low prices now being obtained for cauliflower and would suggest your calling your correspondent to time for misinforming your readers. Cauliflower is not low in price on account of a big crop as the area planted was not much larger than a year ago. The trouble with the price being obtained for cauliflower is that, owing to the drought, the plants stood still and when rain came they were forced into producing curds very early and practically brought the crop on all at one time instead of extending it over several weeks. If the crop had come on as it usually does there is no doubt whatever but what the growers would have realized just as satisfactory prices as they have heretofore. When I was down on Long Island I heard of a carload of cauliflower being sold at the rate of 25c. a barrel, so you see if the commission men or dealers can buy it for 25c. a barrel they can very easily afford to retail the heads at 5 and 10c. each.

Thomas J. Grey was elected president of the Board of Trade of the city of Chelsea, Mass., on November 21.

baskets for table ornamentation is by  
no means new to the florists of today,  
it is pleasing to note the advances made  
in this line during the past few years.  
With the comparatively recent intro-  
duction of small plants suitable for  
such work, magnificent combinations  
have been made.

A dinner table basket recently ar-  
ranged in this style proved a decided  
success. Plants of adiantum formed  
the edge, while low-grown crotons con-  
stituted the body of the centerpiece.  
Crimson roses, generously distributed  
through the foliage, completed the de-  
sign. The tops of the roses were not  
more than ten inches above the surface  
of the table, thus avoiding any obstruc-  
tion to a full view across it. Baskets  
arranged in this manner may be kept  
fresh for many days after the flowers  
have faded.

A mantel decoration of mixed forms,  
small Paeonias Veitchii and short-  
stemmed American Beauty roses the  
whole bordered with pendant sprays  
of Asparagus Sprengeri, proved an-  
other example of the possibilities of  
plant and flower combination.

## NOTICE

We desire to notify the trade that we  
are the owners of United States patent No.  
489,218 for Floral Figure which claims:

"A florist's letter or figure  
stamped from a sheet of paste-  
board or other suitable material,  
having an adhesive coating ap-  
plied thereto and an outer cov-  
ering of granules of sawdust  
appropriately colored to repre-  
sent the petals of the Hel-  
chrysium, arenarium" substan-  
tially as described."

Letters which are a direct  
infringement of this pat-  
ent are being put on the market and we  
intend to hold all who make or sell the  
infringing letters to strict account.

The lawful patented goods are in every  
respect much superior to the infringement.

## Flower Market Reports.

Thanksgiving brings a fair demand; better than last year, we are glad to report. The weather, however, is against any sensational revival and the market is overloaded with a lot of soft material accumulated by frugal-minded growers or resultant from the unseasonable warmth of the past few days. Even American Beauty roses are lagging, and it is not certain that they will come up to previous records. On the other hand, Richmond has doubled in value and the newcomer, My Maryland, stands pat at an equal figure. It is not yet in evidence whether the latter is due to the fact that it is a novelty or because it has developed staying powers of a most unusual character. We hope it will prove to be the latter. Cattleyas are scarce and violets are not over-plenty, and in both instances schedule prices prevail. As to chrysanthemums it is plain that the end is in sight. The market is badly handicapped by the presence of quantities of chrysanthemums, the wind-up of the season's cut which growers have practically mowed down hoping to do better for Thanksgiving than by cutting the blooms successively. The result is a foregone conclusion. Eaton and Bonnafon are the best sellers as staple stock. Carnations are overstocked in the white varieties, in medium demand in the intermediate shades and find a lively call in the high colors. Stevia, William Scott's protege, is in and sells readily at usual price of \$1.00 per hundred. There is a fair demand, but no great strength, on other items in the regular list. Callas, perhaps, show as much life as any other specialty, but in order to bring the regulation price of \$1.50 per dozen they must be unspotted and pure as the driven snow.

**CHICAGO** Summer temperature and air filled with fog is hardly the best kind of preparation for the Thanksgiving flower supply, but these are the conditions prevailing up to the time of writing, and much of the stock coming in has been soft and unsatisfactory in quality while also too abundant. Growers who have been storing away roses, carnations and chrysanthemums in anticipation of better returns for same as a holiday supply will find little in existing conditions and outlook to encourage them in their course. On the other hand, there is no doubt that first-class fresh material will find a ready and profitable market. In our next report we shall have the story in full.

Everything looks bright and encouraging. Society is waking up, and orders for larger receptions and balls are again in order. Chrysanthemums are very good, but Thanksgiving will see about the end of them. Other crops are improving, violets being the only scarce article.

**INDIANAPOLIS** The past week has been very contradictory, some reporting trade good, others saying that it couldn't be worse, but to a great extent it all depends on locality. Notwithstanding the cool weather, stock is coming into the market quite lively. Chrysanthemums, roses and carnations

are very plentiful. Some good longiflorum lilies are in, but move slowly. Violets are in fair quality and quantity, and sell well. Some Paper Whites are seen, but bulb stock in general is being held back as much as possible until chrysanthemums are cleared off. Lily of the valley, violets, peas and orchids are much used for corsages at the present time. Cyclamens, Lorraine begonias, pot chrysanthemums and primroses are the main factors in the plant line, the prices of which are a little lower than in former seasons. With a continuance of the present cool weather the market will show considerable improvement before long. Adiantum, smilax and plumosus are having a good run.

**PHILADELPHIA** A distinctly better tone was felt here last week along all lines. There was no great jump in prices (if we except violets, which were scarce and high-priced) but the general clean-up was very gratifying and emphasizes the healthy condition of the market. Many of the better sorts of chrysanthemums are now entirely cut out and this shortening up has had a good effect on other stocks, which are now in much better demand. Roses are about as plentiful as anything. American Beauties were never better at this season. My Maryland is scarce, as the growers are now conserving their best stock for propagating purposes. Carnations are much better as to quality, and with shortening supplies of poor stock prices have been marked up thirty per cent. Lily of the valley is bringing regulation rates. The demand for orchids is now closely taxing available supplies. Roman hyacinths, paper whites, bouvardia, mignonette and sweet peas are among

the minor items in reasonable supply and healthy demand.

## NEWS NOTES.

**Virden, Ill.**—J. W. Garner has purchased three greenhouses and will add them to his present plant.

**Rittersville, Pa.**—John F. Horn & Bro. have installed a second large boiler in their plant, the additions made to their greenhouses this summer making it necessary.

**Hemet, Calif.**—Charles Howard, who last spring purchased five acres of land near Park Hill, has planted it to roses and will carry on a wholesale business. A large propagating house has been erected and material for a greenhouse is on the ground.

**Gretna, La.**—B. M. Wichers has brought suit against the New Orleans Acid and Fertilizer Co. for damages to the amount of \$15,615.50, alleging that by reason of the noxious and disagreeable odors emanating from the plant of the defendants his business has been ruined, and that valuable plants have been destroyed.

## DETROIT PERSONALS.

Jas. Taylor is recovering from a serious cold contracted about two weeks ago.

C. H. Maynard, who has been ill and confined to his bed for a week, is out and around again.

Trade papers will soon announce a new steam trap patented by H. Pierce and highly esteemed by local florists.

The genial Walter Taepke will soon have complete use of his right hand again, on which he had suffered a case of blood poisoning.

## EVERYBODY KNOWS

Gardening cannot be properly done without the aid of an accurate leveling instrument.

Bostrom's Improved Levels, No. 2 at \$15.00 and No. 3 at \$25.00, are conceded by all who KNOW to be the only Levels on the market which meet all the requirements, at the price.

Our guarantee back of every Level we sell, and satisfied users in every State in the Union heartily endorse every claim we make.

Shipping weight 12 lbs. Description on request.

#### LOCAL FLOWER SHOWS.

**Greensboro, N. C.**—The annual chrysanthemum show opened Nov. 12 with a splendid array of plants and cut blooms.

**Riverhead, N. Y.**—Eight large houses containing 16,000 blooms is the treat that is offered chrysanthemum admirers by Arthur Lee.

**Beaver, Pa.**—Fitzgerald's greenhouses were visited by admiring throngs Nov. 14 and his big crop of chrysanthemums was highly praised.

**Greensburg, Pa.**—Joseph Thomas' greenhouses were open to the public from Nov. 7 to 15, and hundreds of visitors enjoyed his rare orchids, chrysanthemums, etc.

**Buffalo, N. Y.**—S. A. Anderson's chrysanthemum show Nov. 12-14 attracted a large number of visitors to his store. A Japanese maid filling a vase with the huge blossoms was the window picture.

**N. Augusta, S. C.**—The Boatwright

#### NEW YORK FLOWER MARKET

A rapid reduction of the incoming flood of chrysanthemums as well as unmistakable evidence of infirmity in stock received warns us that the present week will in all probability dethrone the Queen of Autumn and leave the field open for the "other fellow." In the meantime, roses have been gaining in quality,—or, at least, were until the coming of the soft, unseasonable weather prevailing at present. The effect of the muggy temperature of the first half of Thanksgiving week is enervating upon all kinds of flowers, dispiriting to the florist and, as to turkeys, "Ain't it awful, Austin?" All good material ought to bring quoted values on Wednesday and Thursday at least, but there is a cumbersome surplus of low grade stock which, as usual, is likely to get in the way, and Thanksgiving facts will not be known until it is all over.

HORTICULTURE needs a wide-awake representative in every town in the land. Good commission paid on advertising and subscriptions. If you are ambitious, write for terms.

## Obituary

### E. Leedham.

E. Leedham of Santa Cruz, Cal., died on Nov. 7, aged 80. He was the originator of the Leedham Bulb Co.

### J. E. Sills.

John E. Sills, representative of the Charlton Nursery Co., Rochester, N. Y., sustained injuries from a fall on Nov. 12 which resulted in his death. He was 65 years old.

### James Lewis.

James Lewis, at one time in charge of the greenhouses and grounds of the Northern State Hospital for the Insane, and later employed by E. P. Sawyer, died in Oshkosh, Wis., November 7, aged 75.

### J. A. Nisbet.

John A. Nisbet, a well-known landscape gardener and florist of Providence, R. I., died suddenly in an electric car, on November 10. He was born in Seekonk, Mass., in 1844. His widow survives him.

### Frank Beu.

Mr. and Mrs. Frank Beu have the sympathy of the entire Chicago trade in the sudden death of their son Frank, thirteen years old, on Nov. 11. His classmates attended the funeral, each one carrying a chrysanthemum which was dropped in the open grave.

### James Henderson.

James Henderson, who was well known among horticulturists by his development of the Governor Gore estate in Waltham, Mass., of which he had charge for fifteen years, died at his home in Northboro, Mass., Nov. 22, at the age of 80. A widow and four daughters survive him.

### S. W. Flower.

Steven W. Flower, born in Clayton, N. Y., August 21, 1832, died at his home in Toledo, O., Nov. 13, in his seventy-sixth year. Mr. Flower started in the grain and grass seed business in Toledo in 1868 and was widely known as the head of the company that bears his name. He retired from active work some ten years ago and his nephew, C. S. Burge, has had control of the business.

## Big Christmas Trade

YOU CAN'T ESCAPE IT IF YOU ADVERTISE  
FOR IT IN HORTICULTURE'S

## BIG ANNIVERSARY NUMBER

DECEMBER 12

### Why My New Curved Iceless Eave is Far Superior to Anything on the Market Today

- 1st. No sash bars incased in iron, thereby eliminating all danger of bars decaying.
- 2nd. Can be used in conjunction with iron frame construction, thereby doing away with that very objectionable feature, "columns."
- 3rd. Roof bars with drip grooves, which act as conductors to carry away the condensation: Result, the driest roof ever used for greenhouse purposes.
- 4th. **THE MOST IMPORTANT OF THEM ALL.** The very small increase in cost over the ordinary style of construction which makes it possible to be used for commercial as well as private purposes.

**William H. Lutton,** Horticultural Architect and Builder  
West Side Ave Station (C.R.R. of N.J.) Jersey City, N.J.

### GREENHOUSE CONSTRUCTION LUMBER

**John C. Moninger Co.**  
117 E. Blackhawk St., CHICAGO.

The **FLORISTS' HAIL ASSOCIATION OF AMERICA**, insurer of 29,000,000 sq. ft. of glass. For particulars address  
**John C. Esler, Sec'y, Saddle River, N.J.**

## OUR IRON FRAME HOUSE

There is an argument—a strong argument—in favor of putting money into a house that is not an experimental construction. The THEORY of how long a house will last is a good talking point, but the FACT that our Iron Frame Construction has stood the test—the severest kind of tests—makes it the only **SAFE PROPOSITION**.

Send for our illustrated circular—Iron Frame Greenhouses for Private Places.

**Hitchings & Company**

**IF IT  
HAS NOT  
OUR SASH  
BAR CLASP**

## Then It Is! Not! Our Patented Ice-Clearing Eave Plate

The galvanized plate clears the ice, strengthens the house, reduces shade; but it is our special **Sash Bar Clasp** that makes that all important wood to iron joint and prevents end bar rot.

It is not an iron bracket but a **galvanized clasp**, that holds, braces and preserves the bar and strengthens the entire framing.

See Handy Hand Book page 9.

## U-BAR ADAPTABILITY

You know how unattractive, absolutely factory like the usual greenhouse of the ordinary construction is. It isn't the kind of house that will harmonize with the attractive way grounds are being laid out these days.

But the U-Bar construction, because of its graceful lines and extreme lightness of effect makes a greenhouse adaptable to the most exacting requirements. See the illustration.

It is the ideal construction for private estates, parks, public institutions and florists' show rooms.

## Grapes Under Glass

The grapery here illustrated is a part of the range of glass built by Lord & Burnham Co. for Mrs. F. F. Thompson of Canandaigua, N. Y., in 1902. The picture was taken when the vines were four years old. The varieties grown are Black Hamburg, Muscat of Alexandria, Buckland Sweetwater, Foster's Seedling, Black Alicante, Gros Colman, Golden Queen, and Melton Constable, the latter a good late grape of Colman type, but much better flavor. By request I will give a few notes on my method of culture commencing with the treatment from now on (November 1).

The early house is clear of fruit, the side and top ventilation are open day and night to ripen the wood; the border is examined and if too dry is given a good watering as I believe a dry border to be the cause of many failures in grape culture as the surface or feeding roots are kept near the top of the border and many roots die for want of moisture.

### PRUNING AND CLEANING

After the leaves have fallen and the wood is thoroughly ripened the vines are taken down and pruned. I practice the spur system but it takes experience and good judgment to prune a vine. After the cuts are dry I cover with Thompson's Styptic, a preparation to prevent bleeding, which often happens when the vine starts.

The next operation is cleaning the vines which is very important. Remove all loose bark by hand, working carefully around the spurs to avoid damaging the buds and keeping a sharp eye out for that awful pest, the mealy bug. The vines are now washed with a solution of fir tree oil using about a gill to a pail of water. The house is also thoroughly washed with strong soap; this is very essential to keep the house free of bugs as precaution is better than a cure when it comes to keeping the grapery clean.

Everything now being clean, the vines are tied down as near the ground as possible and covered with anything that will keep the sun from striking them, helping to keep the vines dormant until starting time. If the weather is very severe I turn on enough heat to keep from freezing, holding the temperature about 35 degrees as the house must be kept cool and dry.

### STARTING

The first week in February I begin to force. After removing all loose soil for an inch or two, being careful not to disturb the roots, the border is filled to a level with fresh soil then forked up lightly and watered thoroughly. I may add here that this border is all inside, filled with 3 feet of soil from an old pasture. The bottom of the border is a natural bed of shale rock with 6 inches of broken stone on top which carries away the water, making the drainage perfect.

The border having been thoroughly watered the house is started slowly at a temperature of 45 degrees by night and 65 degrees by day, syringing the vines two or three times daily and keeping pans of water on the pipes for evaporation. Air is admitted freely in sunny weather and at all times allowing as much air to pass through the ventilators as is consistent with the proper degree of temperature. In three or four days I give a dressing

of Thompson's vine manure, about two pounds per yard super, following with a light watering.

### CARE DURING THE FLOWERING PERIOD

About the 25th the temperature is raised 5 degrees more allowing the sun heat to become more powerful. The vines being broken along the whole rod they are tied to the wires, and the air syringed frequently to keep moist by evaporation.

The first growth is very rapid. I allow the shoots to grow until the lower leaves are pretty well expanded and the flowers well formed. Any disbudding can be done at this time if possible, being careful as they are very easily broken. Pinching is also done now, cutting back to the first or second eye beyond the fruit. I again increase the temperature slowly 60 to 65 degrees by day rising to 85 degrees with sun heat and 60 at night. Increase towards the last of the month 70 to 75 degrees by day, allowing the sun to raise as high as 95 degrees, keeping 70 degrees at night. At this stage plenty of air is essential, syringing constantly until the vines are in flower; then I stop syringing until the fruit is set when it is again done freely and the pans filled with water.

### THINNING FRUIT AND FINISHING

Now comes a very important part of the work, thinning the fruit, which requires good judgment and patience. I go over a second time and, as the berries swell, support the shoulders by tying to the cane or branches above. At this time I give another light dressing of Thompson's manure, 1 lb. to the yard super, and water the border, reducing the temperature slowly to 80 degrees by day and 60 degrees at night, paying strict attention to air, watering and pinching to finish the crop.

As soon as the berries begin to color all syringing is stopped, bottom air admitted slowly and increasing, gradually reducing the water at the roots. When the fruit is ripe the house is kept cool and dry until it is cut.

*Robert E. Ballantyne*  
Canandaigua, N. Y.

## British Horticulture

### AN AUTUMN FRUIT SHOW

A splendid display of home grown fruit was brought together at the autumn show of the Royal Horticultural Society. This year, in marked contrast to last season, has been more favorable for the growers, with the result that the hall was well filled with a highly meritorious array of well colored and attractive specimens. The nurserymen who make a specialty of fruit were well to the fore. Messrs. Bunyard & Co. had a magnificent collection of Kentish grown fruit, 180 varieties of apples and pears being included. This was awarded a gold medal. The second prize was awarded to Messrs. Cannell & Sons, who also exhibited Kentish fruit. Messrs. J. Cheal and Sons, who were the third-prize winners, had amongst their fine group a new winter dessert pear, *Beurre de Naghan*, a fruit of large size, pale golden in color, with a resemblance of *Duchess d'Angouleme*, but of superior texture. This pear was awarded a certificate of merit from the Royal Horticultural Society. Another novelty was *Encore*, one of the excellent apples which have been raised by Mr. C. Ross, a veteran hybridist. It was produced as a cross between Warner's King and Northern Greening, and is regarded as a good late keeper. Amongst the other commercial growers H. T. Mason had a very creditable display of marketable produce. In the amateur section the exhibits of grapes were particularly fine.

### A CONFERENCE ON SPRAYING

On the second day of the show there was a conference called by the Royal Horticultural Society and the National Fruit Growers' Federation to discuss the important question of spraying. A remarkable feature of the discussions was the wide diversity of opinion amongst the scientific experts as to the value of spraying. The ordinary grower may well be perplexed when he finds this lack of unanimity on an essential part of fruit growing. There, however, appeared to be a consensus of opinion favorable to the use of Bordeaux mixture, provided the proper ingredients were obtained. Several of the growers also urged the necessity of a special department of the Board of Agriculture being set aside for the purpose of dealing with the fruit growing industry. In the course of a paper read by Mr. Getting, a Herefordshire grower, he suggested that a party of British growers should pay a visit to the United States, and investigate the methods of spraying and other allied matters, and report as to their inquiries for the benefit of the industry in Britain. A trip of this character would prove beneficial in extending a knowledge of the American methods, and doubtless the British Government might well follow the lead of the United States in giving additional aid to the fruit growers. At present, in this country, the experiment and researches essential to the guidance of the commercial growers have to be made by enterprising private individuals like the Duke of Bedford and other similar public spirited

men. This is clearly a sphere of work in which the Government could usefully engage for the benefit of an important section of the community. The latest statistics show that fruit growing is on the increase in this country, and this gradual rise has been going on for some years.

### NATIONAL SWEET PEA SOCIETY

This society continues to maintain its prosperous position. Arrangements have now been made for holding the next show at the Royal Horticultural Hall, London, on July 23rd, 1909, and the provincial show will be held at Soltaire on July 13th. A satisfactory report will be presented at the annual meeting of the society which will be held in London on Dec. 11th. The committee have made arrangements for holding another series of trials of sweet peas in the gardens of the University College, Reading. These trials have been a valuable adjunct of the society's work. A full opportunity has been afforded of seeing the new introductions in their natural state before a certificate has been granted. A new arrangement has been made for next season. It is intended to make a charge of 2s. 6d. for each variety sent for trial. Varieties will only be received from the raisers or the original distributors. Further details as to this branch of the society's work are obtainable from Mr. C. H. Curtis, secretary, Adelaide road, Brentford, England.

### THE NICHOLSON MEMORIAL FUND

The council of the Royal Horticultural Society are raising a fund for the establishment of a permanent memorial to the late George Nicholson, who has done so much in the furtherance of horticulture. Mr. Nicholson's name will always be associated with "The Dictionary of Gardening." For many years Mr. Nicholson was a useful member of the Scientific Committee of the Royal Horticultural Society. He took a prominent part in the revival of examinations by the society, and himself acted as one of the examiners. The council, under these circumstances, think that it would be appropriate to perpetuate Mr. Nicholson's memory by establishing a Nicholson prize to be awarded annually after examination to the students at the society's headquarters at Wisley. It is hoped that a satisfactory response will be made to the appeal issued by the Secretary of the Royal Horticultural Society.

## BUFFALO'S UNIQUE FLOWER SHOW.

After a lapse of four years, the flower lovers of Buffalo were treated to another, and in one respect unique, flower show. It was unique in that no prizes were offered, and the florists and gardeners of Buffalo and vicinity, as well as those who sent special cut flowers from a distance, who so freely gave their choicest stock for exhibition, did so from the standpoint of professional pride and not from the hope of gain or even remuneration. This, to the writer, goes far to disprove the common opinion that the average American florist is too mercenary to support a flower show, and that he pays little attention to professional pride which is the chief remuneration of the European florist and gardener. The show was held on the 18th and 19th, in the spacious parlors of Buffalo's best hotel, The Iroquois, three very large rooms being devoted to it.

On the evening of the 18th, a banquet was given in the exhibition rooms, which was declared the best ever given by the Buffalo Florists' Club. The genial William F. Kasting acted as toast-master and a number of after-dinner addresses were made, among them one by Prof. John F. Cowell, who, having just returned from the National Flower Show, where he had acted in the capacity of judge, gave a brief description of that event which all appreciated.

It was the original intention to hold the show for one day only and to invite the florists, their friends, and a limited number of the elite of Buffalo, but the large number and extent of the exhibits, which far surpassed the most sanguine hopes of the committee of management, made it imperative to hold the show open for an additional day and invite the general public, free of charge. The only regret that the committee of management had, was that this was not decided long before the show was held, so that opportunity might have been given to advertise the affair to the public, as the merits of the exhibits demanded.

Too much praise cannot be given to the efficient Flower Show Committee, which consisted of W. J. Palmer, C. T. Guenther, Charles Sandiford, Rowland Cloudsley, David Scott and W. Legg, who labored with untiring devotion to the successful culmination of the show, under the able leadership of the chairman, W. J. Palmer, to whom the success of the show is largely due. Mr. Palmer merited and received the praise of not only the florists but of as many of the public as were aware of his interest in the exhibition. The most glowing praise was given by those who had attended the National Show, Messrs. Cowell, Kasting and Guenther, who said that it lacked not the quality, but only the extent of the Chicago Show. After the close the exhibits were divided between the management of the hotel, and the various hospitals of the city.

The judges were, C. T. Guenther, Chas. Sandiford, and Prof. J. F. Cowell of the Buffalo Botanical Garden.

The exhibits were as follows:

### FROM OUT OF TOWN.

Vases of Golden Bells, from Lawrence Hall chrysanthemums, from The E. G. Hill Co., Richmond, Ind.; Park sport from Jerome Jonas, from Vick & Hel, Rochester,

N. Y. Collection of 15 distinct varieties, staged separately, among which Pres. Roosevelt, Pocket's Surprise, Dakome, Golden Eagle, and Guy Hamilton, attracted attention, the last named flower being the largest in the show, from Elmer D. Smith, Adrian, Mich. Three vases, from the La France Carnation Co., Elmira, N. Y. Seedling No. 29, which is of the Marie Leger type, attracted considerable attention, from Chas. Totty, Madison, N. J.

Two vases of new rose Mrs. Marshall Field, from Peter Reuberg, Chicago. 50 blooms of rose My Maryland, from E. Towill, Hillside, Pa.; 50 blooms of Mrs. Jardine, from S. S. Pennock-Meehan Co., Philadelphia, Pa. Four vases of Tea roses, from the Plantindendron Co., Union, N. Y. Vase of the "Taft Rose," from the Hyde Park Rose Co., Cincinnati, O. Saffano roses, from W. H. Elliott, Brighton, Mass.

Violets, from C. F. Rahmet, Poughkeepsie, N. Y., and E. R. Gullman.

Carnation seedlings Appleblossom and Wa No Ka, from the Wa No Ka Greenhouses, Barneveld, N. Y. (These blooms attracted much attention as they arrived in excellent condition, being shipped in a special cardboard box, so arranged that each calyx was held in a niche in a cardboard strip to prevent the mixing of the blooms. This box was placed on exhibition and was favorably commented upon.) Four vases of standard varieties, also vase of the new seedling No. 500, which attracted a great deal of attention, from The Joliet Carnation Co., Joliet, Ill. Three vases of standard varieties, from The La France Carnation Co., Elmira, N. Y. New carnation Wm. H. Taft, from Schneider & Selzer, Chicago, Ill. Carnation Orland P. Bassett, from Bassett & Washburn, Hinsdale, Ill.

Asparagus plumosus, from The Lake View Gardens, Jamestown, N. Y.

### FROM BUFFALO AND VICINITY.

Twenty vases of chrysanthemums in 20 varieties, from Buffalo Botanical Garden; 3 vases in 3 varieties, from C. Sandiford, gardener to J. J. Appleton; 4 vases of Maid Dean, from C. F. Christensen, Eggertsville, N. Y.; 5 vases in 5 varieties, from F. G. Lewis, Lockport, N. Y.; 2 vases standard sorts, from S. A. Anderson, Buffalo; 12 vases in 12 varieties, from Chas. Sandiford; 2 vases in 30 varieties, from Wm. Edmunds, Corfu, N. Y.; 2 vases Golden Wedding, from the Wm. Scott Co.; 2 vases Golden Wedding, from C. T. Guenther, Hamburg, N. Y.; 3 vases Dr. Engelhardt, from The Buffalo Cut Flower Co.; 6 vases standard varieties, from W. J. Palmer & Son.

Four vases of roses, from W. J. Palmer & Son.

Violets, from Rowland Cloudsley.

Three vases of carnations in 3 varieties, from W. J. Palmer & Son; 7 vases in 7 varieties, from White Bros., Gasport, N. Y.; 6 vases in 6 varieties, from D. T. McCarty, Lockport, N. Y.; collection of standard varieties, from C. F. Christiansen; collection of standard varieties and seedlings, from Wm. Edmunds.

Lilium lanceifolium, from Chas. Sandiford. Collection of berried shrubs and shrubs with bright colored bark, showing winter effect, from George W. McClure & Son.

Twelve specimen chrysanthemum plants in 12 varieties, from Chas. Sandiford; 18 specimen plants in 6 varieties, from the Buffalo Botanical Garden; 6 specimen plants in 6 varieties, from The Wm. Scott Co.; 1 specimen plant, single, from the Wm. Scott Co.

Group of Lorraine and Tripp of Hill gonias, also hanging basket of same, from S. A. Anderson; Lorraine begonia, from Chas. Sandiford and from L. H. Newell; Orchids, from C. F. Sandiford.

Ferns and foliage plants, from J. A. Verma, gardener to Geo. L. L. L. Ferns and Selaginellas, from S. A. Anderson.

Of special interest was a beautiful variegated Primula obconica, which was shown for the first time and which was introduced "Iroquois." Also a beautiful plant of this plant which is placed on the list by Mr. Anderson. It was shown by the German grower Joseph Straub.

The general arrangement of the show was artistic as the exhibits were not particularly arranged in classes, thus detracting from the general effect, as is the usual method. Several of the florists arranged all of their entries together so that the effect in the luxurious parlors of the hotel, was highly decorative. Among these might be mentioned the display of S. A. Anderson with its mass of Lorraine be-

gonias, stove plants, and cut flowers; that of W. J. Palmer & Son with its effective arrangement of mixed cut blooms; that of Chas. Sandiford, the President of the Club, with its fine cut blooms, orchid plants, lilies, etc., also that of T. Veneman, gardener to Geo. Urban, Jr., whose general collection was good and well arranged.

The specimen chrysanthemum plants were exceptionally fine, especially those of the Buffalo Botanical Garden, among them some very large bloomed plants of Merza. Those of Chas. Sandiford were also exceptionally good.

It was with much satisfaction that we noted the very excellent specimen plants of the Wm. Scott Co., as this is the first time in years that any of the commercial florists have taken the trouble to raise large specimen plants. Among the best of these was a fine specimen of Golden Age with very large flowers. Alexander Scott who raised the plants, explained that it was his idea to have fewer blooms on each plant, but of a better quality than is usually seen on specimen plants, and he gave us an ocular demonstration. Another of the specimens was a large plant of the single variety Golden Chain which carried about 4000 blooms and attracted the attention of the ladies in particular.

The collection of berried shrubs and twigs showing bright colors, although an innovation in a flower show, attracted considerable attention, being in the nature of an educational exhibit.

The best of feeling prevails among the Buffalo florists and it is prophesied that a large Flower Show will be held in Buffalo next year.

GEORGE E. McCLURE,  
Chairman Press Com.

### LOCAL FLOWER SHOWS.

**Albany, Ore.**—At the Albany Apple Fair, held last month, the exhibit of outdoor plants was pronounced very unusual for the season. Prof. Peck of the Oregon Agricultural College was the judge.

**San Francisco, Cal.**—Julius Eppstein's exhibit of orchids and other choice flowers was one of the most attractive features at the opening of the new wing of the St. Francis Hotel. P. G. Murray is in charge of this stand.

**Minneapolis, Minn.**—The chrysanthemum show at the Park greenhouses closed on Sunday, Nov. 15. On Monday everything was cut, cleaned out and sent to the different hospitals and other charitable organizations and institutions.

**Alexandria, La.**—The Central Louisiana Floral Society held their first flower show on Nov. 19. Manager Lorton is to be congratulated on the fine exhibits he brought together. P. M. Paley, manager for J. W. Vestal & Sons of Little Rock, was one of the judges.

### COMING EVENTS.

**Kansas City, Mo.**—State Horticultural Society, annual meeting, December 8, 9.

**Brownsville, Tex.**—State Horticultural Society, Nut Growers' Association and Nurserymen's Association, mid-winter meeting, Jan. 13, 14, 1909.

prise as marking the beginning of a new epoch in the culture and marketing of the king of fruits.

Our cover illustration speaks for itself.

A national industry Even the plantsman used to handling exclusively the choicest of Nature's purely ornamental product will look a second

time at the picture and acknowledge the beauty of the subject. We are glad to present it to our readers as showing what our western friends have on which to base their faith in the greatness of their horticultural future. But, fortunately for us all, the apple in its many varieties cares nothing for latitude and not much about longitude and the picture reproduced in our illustration is not an impossibility in any part of our country excepting perhaps the extreme southern portion. At the recent conference of New England governors at Boston Prof. John Craig spoke of "New England's Opportunity in Orchards" and did not hesitate to say that the people of this section were culpably neglectful of the opportunities at hand for profitable fruit growing on their thousands of acres of idle land well adapted to the production of the finest apples in the world. Western growers, however, have nothing to fear from any eastern awakening, however great, for, as has been well said, it will, in fact, never be possible to produce the quantity of first-class apples requisite to meet the world-wide demand.

Tariff revision Among seedsmen, nurserymen and florists, wherever an expression of preference has been elicited, there appears to

be a general sentiment in favor of specific duties in place of the ad valorem tariff on horticultural products which has been a source of continual vexation, annoyance and misunderstanding. The nurserymen have been represented by an influential committee before the Ways and Means Committee at the hearing on tariff revision and the seedsmen are in readiness to present their views. Whether the S. A. F. committee has taken any action we do not know but at the various conventions of that body the topic has been frequently aired and the present opportunity to go on record where it may amount to something should not be neglected. So far as we have been able to judge there is no clamor for abolition of duties where such exist or even for reduction. The amount collected under a specific tax may be as large in the aggregate but what the importer desires to escape is the hardship of delays, penalties and other burdens incident to the operation of the present system and we have reason to believe that the change to specific duties would be equally welcomed by the collector's and appraiser's department. A tax of one dollar a hundred on lilies, two dollars on tulips and four on hyacinths a thousand, for instance, while not likely to reduce the sum total of amount collected would eliminate most of the hardships and abuses that have been complained of under the present tariff. Verification of count would be the only formality required and delays in delivery would be at an end. The immediate effect of such an arrangement would be to promote the importation of a better quality of goods and discourage the bringing in of inferior grades of stock. If, on top of this reform we could have a substantial license fee collected from every itinerant salesman sent over here, thus compelling foreign houses to maintain resident representatives in this country, the bulb and nursery stock business would be placed on a much more satisfactory footing and we believe the foreign dealers would also find it more profitable in the end.

We congratulate our far away western fellow horticulturists on the splendid enterprise and enthusiasm evidenced in the preparations for the great Apple Exposition which opens at Spokane, Washington, next week. Every feature is planned on a scale befitting the occasion and we have no doubt the response from far and near will be of a character to stamp this great enter-

## AFTER ADJOURNMENT.

Cumberland, Me.—A cow got into the greenhouse of C. H. Jenkins and nipped the tops from several hundred carnation plants. —Press Dispatch.

We are sorry for Mr. Jenkins, but are compelled to listen while somebody suggests that that cow ought to give good milk for a "pink tea."

Settle up and insist upon your customers settling up. Shorter credits and a closer approach to cash transactions is what we all most need. Did you ever experience the joy of turning in at night with the knowledge that you owe no man a cent? Delightful sensation, is it not?

The San Francisco Call, in referring to a recent stereopticon lecture in Berkeley by Luther Burbank, says that the "wizard horticulturist" now prefers to be known as the "master plant architect." We don't suppose anybody will have any objection. In its account of this same lecture the Berkeley Gazette, referring to the pictures shown on the screen, tells us that: "Two of the most interesting productions in the flower line were a pink poppy. The pink was made by crossing white Japanese chrysanthemum with an American carnation, which blooms snow white in the morning and turns pink in the sun by noon. The red poppy, the brightest known, was produced by crossing two species of white poppies."

That's "go in' some!"

## LEST YOU FORGET.

Just a word of advice: Whatever department of horticultural work you may be interested in, you'll find offered in our advertising columns about anything and everything in the way of supplies or equipment which you may require. Look in the Buyers' Directory lists, and if you can't find what you want please write to us and we will supply the information. If you have anything to sell which is of value to the profession,

## Please Remember

that an advertisement in HORTICULTURE will carry your offer to the best buyers in every section of the country.

Keep posted on every line of advancement in the business you are following. An intelligent public—growing more intelligent every day in horticultural matters—must be met with superior intelligence, or you must go on the defensive, and that settles you. A salesman who cannot answer correctly any reasonable question concerning the goods he is offering is at a disadvantage and is a losing proposition for the house employing him.

## AN APPROVAL.

Your paper is excellent, getting better all the time. You have a very bright future before you.

WILLIAM C. BARRY  
Rochester, N. Y., Nov., 1908.

The Albany florists report a large Thanksgiving trade chrysanthemums and violets having the largest demand.

## CARE OF STRAWBERRIES IN WINTER.

HORTICULTURE Pub. Co.:

Gentlemen: I would like to know the best way to care for strawberry plants in the winter. We have covered them lightly with straw, then thickly with corn stalks, but it seems to me these stalks are too heavy. Will you or some reader advise me of the right protection to insure strong plants? I will watch your paper for an answer.

Yours truly,

E. C.

In answer to your inquiry about the winter protection of strawberry plants I will submit the following:

If the plants have been grown in hills more care in placing the cover will be necessary than when the plants are grown in matted rows.

For protection in hills begin before the ground is frozen and place, with your hands, about the plants a light covering of dry leaves, being careful that these do not come over the crown of the plant, for leaves are too close a covering for the entire plant, but are excellent as a ground cover to prevent the heaving of the ground in the spring.

This leaf covering is best done the last week in October. About this time (Nov. 20), when the ground is frozen slightly, shake a light covering of straw over the plants, being sure that the leaves are visible through the straw. The straw can be kept in place with brush or light trash wood; don't put boards over the plants.

For the protection of plants grown in matted rows only the straw will be necessary, for the large number of plants that cover the ground will serve the same use that the leaves do in the hill protection. Cornstalks alone on plants grown in matted rows are all right if they are not put on too thick, but the tendency in all covering for the strawberry is to get on too much. The idea that you should have in mind is not to keep the frost out of the ground, but rather keep it in the ground after it is once there.

If there is any chance of water standing on the bed, this must be removed before the plants are covered, and the simplest way that I know of is to dig a few holes in the low part of the ground about three feet deep, filling these holes with leaves; the soil at the bottom of these holes will not freeze and will serve to conduct all surface water away just as a sewer drain on the street does.

The above remarks apply to the protection of the strawberry in eastern Massachusetts, where we do not have an abundance of snow and where we cannot depend on the snow staying when it does come. If snow can be depended upon to stay the winter through, the lighter the covering the better. But it must be borne in mind that the greatest damage is likely to occur in the early spring when we get cold nights and warm days, when the freezing and thawing of the ground causes it to crack open and expose the roots of the plants to drying winds and sun.

WILFRID WHEELER.

Concord, Mass.

A blue verberna at the Dillon Greenhouses, Bloomsburg, Pa., has been given the name of Mrs. William Taft.

## GROWING ASPARAGUS PLUMOSUS FOR FRONDS.

Editor HORTICULTURE:—I have some *Asparagus plumosus* planted in a bench out of 3-in. pots last May; the benches hold about five inches of soil. Would you advise planting in young stock out of 2-inch pots next spring or carrying the old stock on? If so, would you kindly let me know through your valuable columns the treatment of the old stock. If you think young stock would be better, when do you advise sowing seed? I want it for the fronds, not for strings, as I haven't head room enough for strings.

What is the difference between *Asparagus plumosus* and *Asparagus plumosus nanus*?  
A RETAILER.

Replying to inquiry, signed "A Retailer," regarding *Asparagus plumosus*, I would give as my opinion the following:

*Asparagus plumosus nanus* and *Asparagus plumosus*, as far as I know, differ very little, *Nanus* being tacked on to a variety of *Asparagus plumosus* which is supposed to come more dwarf than the original.

As to growing this stock for fronds, I should advise replanting from 4-inch pots, if possible, early in the spring, if grown in benches, while in the solid beds I would not hesitate to leave the old stock in, provided it were healthy and in good condition. Seed can be secured at any time, and if plants are wanted for next spring's planting, they should be established in pots before this.

W. R. PIERSON.

Cromwell, Conn.

## DEFORMED BRIDE ROSES.

Editor of HORTICULTURE:

Dear Sir,—Would you kindly oblige by informing me through HORTICULTURE the cause of the inclosed Bride roses being deformed? The stem and foliage are as good as can be expected. Quite a number of the buds come as you will see the inclosed.

Respectfully,

D.

The Bride roses submitted for an opinion as to the reason for their coming deformed were carefully examined, and although without any information as to how they had been fed, I would say that it looked to me simply a case of over-feeding with a fertilizer having too much nitrogen for a Bride rose. At this season of the year Clay's, or some of the blood fertilizers on the market, would be likely to have the effect on Bride roses seen in the sample to hand.

ALEX. MONTGOMERY.

## DIANTHUS NAPOLEON III.

We have had occasion to mention this hardy pink before, but a good thing can never be spoken of too much, and the longer we know this the more we like it. It was first brought into prominence in this country by Dreer, and we are told that the demand is constantly increasing. From June until frost the plants are covered with a mass of crimson flowers, double, finely formed and delightfully clove-scented. The plants average about 10 in. in height, very compact and commence to bloom when quite small.

G. C. W.

# NEWS OF THE CLUBS AND SOCIETIES

## MASSACHUSETTS HORTICULTURAL SOCIETY.

The Committee on Gardens of the Massachusetts Horticultural Society announces the following list of awards made to noteworthy estates and gardens for the current year.

Special prizes for estates of one to three acres: First, Henry A. Belcher, Randolph, \$50.00; second, Louis P. Hollander, Marblehead Neck, \$25.00.

For the best flower garden: Second, Mrs. James McKissock, West Newton, \$10.00. For the best garden of hardy roses: First, W. J. Clemson, Taunton (J. O. Christenson, gardener), \$15.00; second, Peter B. Bradley, Hingham (Oscar Hay, gardener), \$10.00. For the best collection or garden of peonies: First, E. J. Shaylor, Weston, \$20.00; second, Mrs. James McKissock, West Newton, \$20.00.

Special awards were made to Miss E. M. Tower, Lexington (Otto Strasenburg, gardener), for garden of summer and fall-flowering plants, a silver medal and \$10.00; to Peter B. Bradley, of Hingham (Oscar Hay, gardener), for vegetable garden, silver medal and \$10.00; to E. J. Shaylor, Weston, for superior collection of peonies, silver medal; and to James Garthley, of Fairhaven, \$10.00, for superior cultivation of muskmelons.

The estate of George E. Barnard, of Ipswich, was favorably reported for the first of the three years' test required by the Hunnewell Triennial Premium.

The committee through its chairman, Charles W. Parker, reports a constantly increasing interest in the horticultural improvement and development of suburban and rural estates of both large and small areas.

WM. P. RICH, Secretary.

## GARDENERS' AND FLORISTS' CLUB OF BALTIMORE.

The semi-monthly meeting of this club was held on Monday, Nov. 23rd. Subject of the evening, "The Care of Ornamental Plants," by Professor Thomas B. Symons, state entomologist. The subject was very well handled but nothing new was adduced.

Since the advent of "Gishurst Compound" a goodly number of compounds have been put on the market, some of which have proven fairly good; the others it is good not to mention. All horticulturists are agreed upon this point, that whatever may be used as a germicide, insecticide or any other kind, the three potential factors for success are practical skill, brains and energy. Eternal vigilance at every point on every line is the motto for all horticulturists, and we will yet feel greatly indebted to him who shall invent, or compound, or discover something that will destroy the parasite without injury to the host.

Our meetings are held on the second and fourth Mondays of the month at 8 P. M. If any of the craft visiting Baltimore on these dates will kindly call upon us we shall appreciate it. The meeting place is in the Florists Exchange Building, Franklin and St. Paul streets.

## SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

### Registration of Chrysanthemum.

Elmer D. Smith & Co., Adrian, Mich., offer for registration Chrysanthemum President Taft: Japanese incurved, pure white, height 5 ft., maturing Oct. 25th. Best bud Aug. 30th, but double from later ones. Size 7-12 inches. Parentage Col. D. Appleton x Fidelity.

Use of name authorized by President-elect Taft. Objection to the use of this name should be filed with the undersigned within twenty days, otherwise the registry will proceed.

W. N. RUDD, Secretary.

December 1st, 1908.

### National Flower Show.

Treasurer Bertermann has begun to pay off the cash premiums for which the National Flower Show Committee is liable, the total amounting to \$5,379. Letters notifying the donors of special prizes as to how their prizes were awarded have been prepared by the secretary and mailed. Except in those cases where the prize has already been placed in the hands of the committee, special prizes will be delivered direct to the winners by the donors.

At a meeting of the executive committee in the Kaiserhof Hotel it was directed that Treasurer Bertermann should return at once to all guarantors the money paid in by them. Chairman Kasting was requested to call a meeting at Indianapolis during the Carnation Society convention in January for the final settlement of the show's affairs. It is probable that a dividend can be paid to the guarantors.

J. H. BURDETT, Sec'y.

Dec. 1, 1908.

## FLORISTS' CLUB OF WASHINGTON.

The regular monthly meeting of the club was held at Eagles' Hall on the evening of Dec. 1st with President Kramer in the chair. The recent flower show was reported upon as quite a financial success. Upon motion of Wm. F. Gude a vote of thanks was tendered the out-of-town exhibitors. Jas. A. Patterson of Cincinnati, O., sent a plant of his new begonia, President Taft, to be shown at the meeting and afterward presented to Wm. R. Smith of Botanic Gardens. An invitation was read from J. J. Perry of Baltimore, asking Captain Shaffer to bring his club over on Dec. 2 to the flower show in that city and incidentally to bowl a few games. I. Rosnosky of H. F. Michell Co., Philadelphia, was a visitor.

## CHRYSANTHEMUM SOCIETY OF AMERICA.

### Work of Committees—Report on New Chrysanthemums.

Sport of Helen Frick; Jap. inc. White. Exhibited at New York, Nov. 21, 1908, by Paul Fischer, Wood Ridge, N. J. Scaled 85 points commercial. Exhibited at Philadelphia, Nov. 27, 1908; scaled 85 points commercial.

DAVID FRASER, Sec'y

## THE MINNESOTA STATE FLORISTS' ASSOCIATION.

The monthly meeting of this association was well attended. Messrs. Hastings of A. H. Hews & Co., Cambridge, Mass.; Augsburg, Peoria, Ill.; Underwood, Lake City; Cashman and Hart from the Clinton Falls Nursery Co., Owatonna; and Kinsman from Austin were visitors in the city and attended the meeting. Clinton Falls Nursery Co. exhibited Killarney, Chautenay, Richmond, Rhea Reid roses and Princess of Wales violets, for which they received honorable mention; also Imperial carnations, of which they grow more than of any other carnation, for which they received a diploma. Alois Frey, Lincoln Park, Chicago, sent some of his new single seedling chrysanthemums; certificate of merit. A. J. Smith, Lakewood Cemetery, received honorable mention for cyclamen and L. Boeglin, Minneapolis Park Greenhouses, a diploma for chrysanthemums. The committee on State Fair reported progress. Mr. Underwood of the Jewell Nursery, Lake City, member of the State Fair Board, gave the society encouragement and told them to go ahead in the matter of securing more space and better premiums. T. E. Cashman member of the Minnesota Legislature, promised the society his hearty support in securing financial aid for a horticultural building at the Fair grounds. A. J. Smith read a very interesting paper on chrysanthemums, giving their history as far back as traceable.

## NEW ORLEANS HORTICULTURAL SOCIETY.

We are in receipt of the following further particulars of the exhibition held in Washington Artillery Hall, November 12 to 15:

There were six entries in the classes for floral work. On table decoration, Jos. A. Schindler & Co. won first and Metairie Nursery Co., second. The winning table was arranged with a plateau of yellow chrysanthemums, in which stood a tall slender vase filled with yellow chrysanthemums and Asparagus plumosus. Corsage bouquets and boutonnières were of yellow chrysanthemums also, and the table cloth was trimmed with bows of yellow ribbon and adiantum. An electric light dome with four yellow lights was suspended above, lending a beautiful effect. The judges in this department were Mrs. Carrie Rehm, Mrs. Navra and Mrs. O. H. Simpson. For floral funeral design (lyre on stand), Jos. A. Schindler & Co. were first, Metairie Ridge Nursery Co., second. Basket of chrysanthemums, Metairie Ridge, first; Schindler & Son, second. Basket, other than chrysanthemums, Schindler & Co., first; C. W. Eichling, second. Hand bouquet of chrysanthemums, Schindler & Co., first; Metairie Ridge Nursery, second. Corsage bouquet, C. W. Eichling, first; Schindler & Co., second.

We regret to learn that the show was not so successful financially as it merited.

ELLWANGER & BARRY'S FRUIT EXHIBIT AT NEW YORK STATE FAIR, SYRACUSE, N. Y., SEPTEMBER, 1908

#### NEW YORK AND NEW JERSEY ASSOCIATION OF PLANT GROWERS.

The annual meeting of this Association was held on Tuesday evening, December 1st, at the office of William H. Siebrecht, Jr., the secretary, 277 Broadway, New York. The following officers were elected and installed for the coming year: President, Julius Roehrs, Jr., Rutherford, N. J.; vice-president, A. L. Miller, Brooklyn; treasurer, Herman C. Steinhoff, West Hoboken, N. J.; secretary, William H. Siebrecht, Jr., New York; directors, John Scott, Brooklyn; Herman Schoelzel, New Durham, N. J.; Anton Schultheis, College Point, L. I.; Julius Roehrs, Sr., Rutherford, N. J.; Louis Dupuy, Whitestone, L. I.; Alfred Winnefeld, Hackensack, N. J. Among the other business transacted in the course of the meeting a committee of three was appointed with full power to make arrangements for a banquet to be given by the Association during the month of January, 1909. The committee consists of Messrs. A. L. Miller, John Scott and Herman Schoelzel, and judging from the results of the efforts of these gentlemen, who also acted upon the committee which arranged the Association's clam bake last September, it is expected that this banquet will be a grand affair. This Plant Growers' Association has now been in existence two years, and during that time it has not only served to promote the business interests of its members, but has also succeeded in establishing more friendly intercourse and feeling among the members

#### LOS ANGELES FLORIST CLUB.

The regular meeting of the Los Angeles Florist Club was held at Caledonian Hall, Nov. 14th, Vice-president Houghton occupying the chair. This was one of the most successful and enjoyable events of the season. There were gathered together florists, nurserymen and gardeners from all over the city. An invitation had been extended to the Pasadena Gardeners' Association which was accepted, and almost the entire section turned out in a body. There were addresses and committee reports galore, all of which brought out abundant oratory and songs. The various experiences of florist and nurserymen in California and other parts were talked of. At the conclusion refreshments were served and a most enjoyable time was brought to an end.

H. E. GEORGE.

#### FLORISTS' CLUB OF PHILADELPHIA.

Charles H. Fox gave an entertaining talk at the last monthly meeting of the above named club, his theme being "Salt on the tail of an idea." A smoker followed the business meeting, at which much local and long distance talent entertained the members. Julius Roehrs of Rutherford, N. J., and W. J. Stewart of Boston were among the out-of-town visitors. A splendid vase of White Killarney rose was exhibited by the Pennock-Meehan Co.

#### AMERICAN CARNATION SOCIETY.

##### Carnation Registered.

By Frank Elsner, Great Barrington, Mass.—"William Stanley," parentage M. A. Patten and Harry Fenn, color crimson; size 3 to 3 1/2 inches, fringed full centre; habit vigorous grower

continuous bloomer, not diseased in any form; stem long and strong, calyx never bursts.

ALBERT M. HERR.

Lancaster, Pa.

#### CLUB AND SOCIETY NOTES.

The convention of the California Fruit Growers' Association was scheduled for Dec. 1-5, at Sacramento.

Cards, bowling, dancing, etc., were indulged in at the meeting of the Cleveland (O.) Florist Club on Nov. 16, when the ladies were entertained.

At the annual meeting of the Monmouth County Board of Agriculture held at Freehold, N. J., Nov. 21, D. Howard Jones was elected president.

Thomas W. Lawson and I. H. Hatch were elected president and secretary respectively of the Marshfield (Mass.) Agricultural and Horticultural Society at their annual meeting on Nov. 17.

The Central Illinois Horticultural Society at its recent convention at Hoopeston elected A. M. Augustine, president; A. V. Schermerhorn, vice-president; J. B. Burrows, of Decatur, secretary.

The Indiana Horticultural Society has recently issued a neat illustrated pamphlet of thirty-two pages setting forth the great inducements presented by Indiana to persons who want to grow fruit or truck, or capitalists who wish to make a safe investment.

The El Paso County Horticultural Society met on Nov. 17 in Colorado Springs, Colo., and elected Gen. William J. Palmer honorary president, and the following board of officers: President, J. F. Humphrey; vice-presidents, Dr. Arnold and E. L. Rolston; secretary, Fred F. Horn.

### OBITUARY.

Louis E. Marquisee.

Louis E. Marquisee, the widely known florist and carnation specialist, died at his home in Syracuse, N. Y., on the night of Nov. 24. A year ago Mr. Marquisee was hurt in a fall from his bicycle and has been in poor health ever since. He had a partial stroke of paralysis on Nov. 11, which was mentioned at the time in these columns.

LOUIS E. MARQUISEE

and he failed gradually until his death. He was a native of Utica, but lived in Syracuse since 1869, the year of his marriage. He had been interested in the cloak and millinery business for many years, but in 1887 went into the florist business, believing it would benefit his health. His widow and one daughter survive him.

Mr. Marquisee was specially interested in carnations, and two varieties raised by him attained considerable fame. The Marquis and Flamingo. Another, the Marchioness, is a promising novelty, and will be introduced in accordance with his instructions this season by Mrs. Marquisee, who will continue his business.

Mr. Marquisee was universally respected by all classes of his townsmen and by the florist trade. The American Carnation Society has elected him a member and entertained him at their annual convention at

its annual banquets and other social affairs he was always in request, for he was a clever story teller and had an unlimited supply on hand.

The funeral on Nov. 27 was largely attended, and the rooms were filled with beautiful flowers. He was buried in Utica.

John Archer.

I regret to announce the death of Mr. John Archer, who died at his home in Groton, Ct., Thanksgiving night, of Bright's disease.

Mr. Archer was born in Edinburgh, Scotland, 1855. He worked for the Shady Hill Nursery Co., of Boston, for about nine years. He also had charge of Mrs. Emery's place in Milton, Mass., for a long time. Also of Geo. Draper's place at Hopedale, Mass. For the last five years he had been working on the Morton F. Plant Estate, at Groton, Ct., where he had charge of the construction work, planting, grading, etc.

He was a member of Union Lodge, No. 21, F. & A. M., also Donald McLeod Lodge of Scottish Clans, Hyde Park, Mass. He was buried from his home, Sunday, November 29th, with full Masonic honors.

THOS. W. HEAD.

A. L. Black.

Andrew L. Black, a retail florist in Baltimore, died Nov. 17, aged 67.

### PRIZE APPLES AT PHILADELPHIA.

We have seen many apple exhibits but never anything so eye-opening as the Hallowell display in Philadelphia last week. 266 bushel boxes were shown, comprising eighty of the best commercial varieties. The size and perfection of the individual fruit were remarkable—showing that the Hood River district in the state of Oregon is an apple country par excellence. Part of the exhibit will be sent to London, Eng., and part to New York. The exhibit was held in the Lippincott building and created great excitement among the public. The proprietors of the show did a land office business. They deserved encouragement for their enterprise.

The Economy Bracket made by Buxton & Allard, Nashua, N. H., has been adopted for general use in the greenhouses of the Department of Agriculture at Washington, and by many large plant growers all over the country.

### THE KING OF FRUITS.

Great Exposition at Spokane.

Thousands of exhibits are being gathered together from various parts of the United States and its dependencies, England and her colonies, Germany, France, Denmark and Japan for the National Apple Show in Spokane, December 7 to 12, when the foremost experts of the country, acting as judges, will award premiums amounting to \$35,000 to the growers of the best commercial apples entered in the numerous competitions, which are open to the world.

The primary purposes of this exposition, the first of its kind and scope in the world, are to show the value of the apple as a food and fruit, to demonstrate its manifold uses and by-products, and stimulate an industry which means millions of dollars more annually to the growers and handlers on this continent, thus creating a greater demand by reason of the increased consumption, as well as encouraging the growing of cleaner and better fruit and more of it.

President Roosevelt is enthusiastic in his endorsement of the National Apple Show, as are the heads of the agricultural departments of the United States, Canada and various countries in Europe, and it is also approved by the leading state and provincial horticultural societies and growers' and shippers' associations of North America, and in practically every district in which apples are grown.

The exposition is designed to be one of the most important of the movements that have originated in the Northwest in the last few years. One of the important meetings in connection with it is the fifth annual convention of the Washington State Horticultural Association, of which H. M. Gilbert of North Yakima, is president. There will be several widely known speakers at the meeting, which will occupy four days, December 7 to 10.

The Country Life commission, headed by Prof. L. H. Bailey of Ithaca, N. Y., named by President Roosevelt, will also hold a session in Spokane during the exposition. Besides this party there will be federal officials, growers, irrigationists and representatives of commission houses from all over the country.

Radical changes are necessary in the culture of apples on this continent. There must be betterment of the general conditions of the commercial

Own roots, delivery after February 15, 1909, \$5.00 per dozen plants, \$30.00 per 100, \$70.00 per 250, \$125.00 per 500, \$250.00 per 1000, \$562.50 per 2500, \$1000.00 per 5000. Grafted stock, for delivery after March 1, 1909, \$5.00 per hundred additional.

orchards, else the United States and Canada will be forced in a few years to import apples instead of exporting them. Just how important this is may be gathered from the statement that if it had not been for the enormous crops in the orchards of the Pacific and Northwestern states and provinces this year, an apple famine would have resulted.

Many of the middle, western and eastern states reported small yields this season, due to failures in numerous instances, but generally because of pests. Orchards have been neglected and in scores of places the trees have been permitted to die because of the lack of even ordinary attention, while, again, in others the growers did not know how to combat insects and tree diseases. It is to improve these conditions, by making investigations and suggesting remedies to bring about more satisfactory results, that the growers have been invited to come to Spokane.

Those familiar with the apple industry will recall that in 1896 the total product of the crop of the country was 69,070,000 barrels or 177,675,000 bushels. Since then hundreds of thousands of acres have been added and methods of fruit growing have improved, yet the government reports show that the aggregate crop in all the states in the Union was not more than 25,000,000 barrels or 62,500,000 bushels in 1908. The necessity for greater efforts and for the eliminating of half-heartedness in this important industry must be apparent, and should appeal to every one having any connection with apple growing.

The apple growing industry is a substantial one; in fact, few enterprises offer surer or more attractive profits or more healthful and pleasant employment. A small investment will secure a beginning, and reliable literature can be had readily from the department of agriculture and the numerous excellent horticultural and farm journals published in America.

There will always be markets for apples. There never can be an overproduction of first class stock. It is, in fact, impossible at the present time to produce the quantity of good apples requisite to meet the demand. This is evidenced by the fact that England, Germany, France, Denmark, Australia and the orient are already drawing upon the orchards in Washington, Idaho, Oregon and British Columbia.

**NEW****The Yokohama Nursery Co.****31 Barclay St., NEW YORK****NEW**

When this outside trade is firmly established, the demands upon the growers will be largely increased. This means more new orchards and better care of the older ones.

That the apple is the national fruit cannot be questioned, when in hotels, restaurants, resorts, trains, steamers and homes this delicious fruit is served the year around, but while there are apples everywhere, apparently, the supply is not sufficient, and as a result there must be many places where an apple is regarded as more of a luxury than the commodity it should be. No fruit is capable of being transformed into so many by-products and the highest medical authorities declare that none is more wholesome or healthful.

Experienced and ambitious apple growers in the Northwest and elsewhere see more attraction in the National Apple Show than the magnificent premiums offered by the management. They believe it will prove its greatest success from an educational view point, and without doubt the most important in all history so far as apple culture is concerned.

## Lily of the Valley.

Four-year old clumps grown from Imported Berlin pips, splendid for out of doors or late forcing. About twenty pips per clump. Fall or Spring delivery. Price per 1,000 pips, \$1.00; per 10,000 \$25.00; per 100,000 \$200.00. Cash with order.

**W. A. FINGER, Hicksville, Long Island.**

## ORCHIDS

Our latest importations have been, Cattleya Chrysoptera, Cattleya Gaskelliana, Cattleya Gigas, (Hardyana district), Phalaenopsis Amabilis Schilleriana and others. We will receive in a short time, Cattleya Dowiana, Miltonia Vexillaria and others.

**CARRILLO & BALDWIN  
SECAUCUS, N. J.**

## ORCHIDS

We have some handsome early *Percivaliana* which we positively guarantee to bloom between now and Christmas, as the buds are visible on the sheath. No less than two new strong growths on each plant. The flowers will more than repay purchase of plant. Plants with 7 to 10 bulbs \$1.00 each; from 10 to 15 bulbs \$1.25.

**ORDONEZ BROS., Madison, N. J.**

## ORCHIDS Freshly Imported

We offer a superb lot of *Cattleya gigas Sanderiana* in finest condition; also *C. Bogotensis*, *C. Schroderae*, *C. labiata*, *C. gigas Hardyana* type and *Miltonia vexillaria*.

**LAGER & HURRELL, Summit, N. J.**

## A Schultheis Christmas Spread

ERICAS

DRACENA TERMINALIS  
DAISIES

ORANGES

When the holidays draw near or when the breath of spring reminds one of the approach of Easter, the impulse to visit the plant growers' establishments becomes especially irresistible. In none of these does the caller, whether bent on buying or only seeing, receive a more cheery welcome than at the College Point place, a bit of which is shown in the accompanying pictures.

We have had occasion to write before of A. Schultheis, for "exceeding wise, fair-spoken, and persuading" is he, and not in the least reluctant to tell his brother growers either his experiences or his cultural deductions therefrom. At present every faculty is awake in the preparatory work for the Christmas plant demand which grows in extent from year to year. Among other things we find a house of Lorraine begonias and learn that the stocky symmetry and promise of an exceptional wealth of fresh bloom is due to the fact that every bud that showed previous to Nov. 1 was carefully picked off.

Ardisias are seen in several sizes, the largest heavily foliaged and loaded with fruit which has only begun to color, the lateness being caused by retarded blooming of imported plants. These will be kept in a temperature of from 75 to 80 degrees, as the ardisia should never get less than 60 degrees and will respond to plenty of pushing when in fruit. Seedlings of last April and May are in 3-inch pots and those from the year before are in good shape to bloom next April, which will give them abundant time to ripen up the fruit in time for Thanksgiving, and this, according to Mr. Schultheis, is the ideal method with ardisias.

In one cattleya house an unusual expedient for nailing the destructive cattleya fly is seen in pieces of "tangle-foot" paper set up on sticks at intervals all through the house. The pest came in a batch of established plants purchased last season and has done much damage. Infested bulbs are cut off and destroyed, but the flies are constantly appearing, now and then, and plenty of them are captured by the

sticky paper which has been made more effective by a light sprinkling of sugar. Conversation on this topic drew from Mr. Schultheis some interesting information as to his methods of dealing with other insect pests. Following the experiments of a German professor he has found that water heated to a temperature of 135 to 140 deg. will kill all manner of insects but will not harm the most delicate foliage. A barrel of tobacco water in which a cake of soap is dissolved is heated by steam until a floating thermometer indicates 140 degrees and the plants are successively dipped, precautions being taken meanwhile to maintain the temperature at the killing point. According to Mr. Schultheis, thrips, scale, aphides, "thousand legs," slugs and everything else in insect life that the hot water touches will be killed.

The display of small pot roses of the "Baby Rambler" type is of considerable extent this year and indicates that the introduction of Apple Blossom, Maman Levayasseur, and similar little gems has given an impetus to the production of blooming pot roses for Christmas. Mr. Schultheis' plan is to put these plants from open ground in September. They are set in frames and sprinkled frequently until the stems show fresh plumpness. Air is then gradually given and the dormant plants will be in condition to be taken in as wanted throughout the winter. These are preferable to pot-grown plants and are as reliable for prompt crop of flowers as an azalea. If a batch misses sale when in bloom they can be cut back and another crop will follow along in a short time.

Among the new comers is a lot of camellias in 4-in. pots, each with from 17 to 25 buds. These are sure of appreciation at Christmas. Oranges are particularly handsome this year, being well covered with highly colored fruit. At present the house intended for lilac forcing is occupied with Bermuda lilies planted out in bench, with buds rapidly maturing. One house looks especially brilliant, being filled with poinsettias, dracenas and Jerusalem cherries.

Ericas, as is generally known, are a standard crop at this establishment. The great holiday favorite E. melanthera, called fragrans by Mr. Schultheis, is as good as over. Another named regeminaus, rather stubby in

habit, is slightly fragrant and blooms profusely in very small sizes, being very useful for jardiniere groups. Epacris alba is a "top-notch" among the choice tit-bits.

### PHILADELPHIA NOTES.

John Burton is about again after a three weeks' tussle with the grip.

Edward Reid started on a business trip South on the 30th ult., expecting to be gone a week.

C. H. Kahlert, of the Pennock Bros.' establishment, has been on the sick list with nervous rheumatism for the past six weeks but is now recovering slowly.

E. J. Fancourt, of the Pennock-Meehan Co., has returned from a ten weeks' western tour. He reports business very good in spots and in other places very bad, but with a rather hopeful feeling prevailing everywhere.

Edwin Lonsdale thinks the East should do its share for the National Flower Show. From all we have heard the East kept its end up very well at Chicago. That being the case, all HORTICULTURE's other arguments advocating Chicago for the next national show would stand and are irrefutable. The idea of making another association out of the men who managed the great affair should be frowned on. The S. A. F. with valuable auxiliary help did it. Let matters stay that way. Concentrate your efforts. Don't scatter them.

### A CORRECTION.

Our Philadelphia representative has received the following communication from Howard M. Earle, of W. Atlee Burpee & Co.:

Dear Mr. Watson:

On Monday when I was at the office I called for a copy of my letter of the 10th to you and noted that I had erred in dictating same in stating that we were sending to England thousands of tons of sweet peas, whereas the statement should have read thousands of pounds. It is due the readers of your bright trade journal that this correction be made, for while my firm does a very heavy business in sweet peas there is no need to misrepresent it, intentionally or unintentionally.

Very truly yours,

HOWARD M. EARLE

The committee on tariff of the American Seed Trade Association held a session at Vaughan's Seed Store, New York City, on Dec. 2.

## WE ARE HEADQUARTERS FOR THE **RIGHT STOCK OF WHITE KILLARNEY**

There are other white sports of Killarney, but the stock which we offer —  
the WABAN variety — is very much superior to all others

### **When You Buy From Us**

You get stock of the variety exhibited by us and the Waban Rose Conservatories this Fall, which was awarded the silver cup at the National Flower Show at Chicago, Silver Medal, Horticultural Society of New York, and Silver Medal, Massachusetts Horticultural Society, Boston. It undoubtedly is

### **The Best White Rose Ever Introduced**

Our attention was called to this rose last winter, and recognizing its great value as soon as we saw it, we purchased half the stock. We are growing it in large quantities in our Scarborough greenhouses, and will be glad to have any one interested in it visit us and see it growing.

The large growers, instantly recognizing its value, have placed orders for large quantities, so that our advance orders are very large, and the demand promises to be very heavy, judging by the number of orders already booked; but we have enough stock either potted or rooted to fill advance orders, so that we can still promise early delivery and first-class stock on all orders received now.

### **Order at Once to Ensure Early Delivery**

Orders will be filled in rotation as booked, delivery beginning March 1st, 1909.

**Strong Plants, 2 1-2 in. pots, own-root, \$30.00 per 100; 250 for \$70.00; 500 for \$125.00; 1000 for \$250.00**

## Seed Trade

If the many reports to hand are reliable, the quantity of sugar corn available for seed has been much overestimated, and particularly of the late varieties. It is only a short time since a certain concern was offering in printed circulars which were sent broadcast to country storekeepers and everyone else, Stowell's Evergreen at \$2.50 and Country Gentleman at \$2.25. Now the fact of offering sugar corn of these varieties at such prices to cross-roads buyers is of itself ridiculous, but in view of the actual conditions, and the known shortage, to offer them at such figures, and Country Gentleman 25c. per bushel under Stowell's Evergreen is positively reckless, and it would be surprising if any well balanced firm of seedsmen should patronize a concern so demoralizing to the trade.

The latest information is to the effect that Stowell's Evergreen, Country Gentleman, Zig Zag, Evergreen, Hickox, White Evergreen and Old Colony are going to be a surprise to most of the trade, while even the medium earlies and a few of the first earlies will not be nearly so abundant as seemed probable a few weeks ago.

Now whether these reports are well founded or not, the near future will disclose, but the writer ventures the opinion that the crop available for seed has been much overestimated, excepting possibly Stowell's Evergreen, of which there have been many independent lots grown in different parts of the country, the aggregate of which will greatly relieve the situation and materially affect prices.

It is a fact, though not generally appreciated, that many of the largest packers of corn have this year saved their own seed, particularly of the Stowell's, and will have nearly if not quite enough to satisfy their requirements. To illustrate this, the writer has in mind one packer who last year bought 1500 bushels of seed corn, who this year has seed to sell.

The above facts are worthy of careful consideration, to the end that the dealer may wisely direct his course to avoid the rock of inflated prices on the one hand, or of inadequate supplies on the other.

The closing of contracts for future seed peas has commenced, and the prices drawn fully bear out the predictions made in these columns some weeks ago. On canners' varieties the prices average about 50c. per bushel above last year's, while the advance on the general list will average from 25c. to 50c.

Reliable information to hand is to the effect that growers of peas and beans are having the most strenuous time in their experience to get acreage. A succession of bad crops has discouraged the farmers, and many of the growers, ignoring all the traditional courtesies of the business, have invaded one another's territories and resorted to the most unfair tactics to take away the acreage from the established growers. The result has been a bidding up of the prices to the farmers, and our rural gentlemen are smilingly awaiting the result. Of course, no one will begrudge the

farmers any reasonable increase in the prices they have been getting, but it has compelled the grower to advance his prices in turn. This has been resisted by the canners and seedsmen, but their protests will be vain, and they will have to pay it or take their chances on the market next fall, which in view of past experiences is not a very inviting prospect.

It is very generally admitted by growers that one of the reasons for the very short deliveries of peas, particularly of canner's sorts, was due to their being oversold, and this year there promises to be a repetition of the same conditions. Several of the growers are selling a part of their seed stock, while at the same time they are eagerly drumming for orders and turning nothing down. It is only fair to say, however, that the demand up to this time is less active, especially from the canners than a year ago. Many think that the demand for canned peas will become more active in the near future, and if there is a prospect of the present reserves being consumed before the next pack is ready, there will be an increased demand, not only for spot but future seed. It is to be hoped that this condition may be realized, for even though the demand may not be fully satisfied, it is a healthy state of business when the demand exceeds the supply.

There is to be a hearing given by the Ways and Means Committee of the House of Representatives to the seedsmen, and a committee of prominent seedsmen is planning to present the case of the trade to the tariff tinkers. Inquiry among leading members of the trade discloses anything but unanimity among them on the subject of the tariff. The great majority favors some sort of protection, but while the great majority seems to favor moderate duties, a minority advocate prohibitive taxes, while yet another small minority believe in absolute free trade in seeds. A number advocate specific duties on all seeds, while others favor standing pat on the duties of the present Dingley bill. It is not the purpose of the writer to discuss the different views, but it is believed that the great majority of seedsmen can be counted among the "stand patters." It is the general verdict that the present law has worked well, and while changes on a few items might be desirable, it is feared that any attempt to tinker with the law would render it less acceptable as a whole.

### NOTES ON THE NEXT CROP OF BERMUDA ONION SEED GROWN IN TENERIFFE.

About the month of July of every year the onions warehoused to be used afterwards for seedling suffer many changes before they are again taken down to be planted in September and October. One of the principal causes of the great percentage of useless onions found, is that the warehouses where they are hung up in tresses are not specially built for the purpose, and year after year growers have a large loss on this account, the variations depending on the summer being more or less warm.

Unfortunately this year, of the onions stored, about 40 to 50 per cent.

PHILA., PA.

have turned out rotten or unfit to produce seeds, and this naturally means that, on this consideration alone, the next seed crop in 1909 will be curtailed to the same extent. Of course, the onions already in the ground are liable to many contingencies before the crop is gathered next fall, and even taking for granted that what is planted will be a better crop than the average, the seed will always be 50 per cent. less than what growers had estimated would be produced.

The American buyers who have not already sent their probable requirements to exporters here, will find it later on very difficult to make contracts, and I would advise those who have not done so to immediately write to their respective correspondents here about what quantity of seed they are likely to take.

The weather we are having is not at all propitious for the germination of the onions planted. It is very warm,

H. B. WILLIAMS, Aster Specialist, Baldwinville, N. Y.

and we have not had yet any rainfall. This will in any case put backwards the gathering of the seed crop. American buyers should not be surprised if by the month of June or July higher prices are ruling for any reliable seed available.

I am glad to state that all careful growers and exporters to a man are doing their level best to improve the stock of Bermuda onion seeds, and the time when complaints and unpleasantness was rampant is a thing of the past, provided buyers get their supplies from any of the best firms in Tenerife. My own preaching on the subject has had a very salutary effect on the whole, and every one can look forward with confidence to a more satisfactory state of the trade both in Tenerife and in the United States.

I wish to make it clear to all American onion growers that my seeds can only be obtained through seedsmen and dealers in the United States, and never direct from me.

FREDERICO C. VARELA.  
Teneriffe, Canary Islands.

# IT'S TIME

"To Make a Noise Like an Order,"

## IF YOU DESIRE OUR ADJUSTABLE PLANT STANDS

for the coming Fall and Winter Horticultural Displays, as we are rapidly selling up our production until that time, and late orders will be disappointed.

Prize winners this season for display and banking of plants will be those equipped with The Moore-Livingston Adjustable Plant Stands.

With three sizes of stands all heights can be obtained from 6 to 48 inches.

If your seedsman or supply house cannot furnish them, write, phone, wire or cable us and we are "J. Barnes on the spot" for a prompt reply as to where they can be obtained.

**The Moore-Livingston Co.** MAKERS AND PATENTEES **Lansdowne, Pa.**

PHILADELPHIA OFFICE: Central Trust Building, 4th and Market Sts., Philadelphia

### NEWS NOTES.

Providence, R. I.—T. F. Keller has assigned to J. M. Bligh.

Stratford, Conn.—H. Meacham is rebuilding his furnace room.

Santa Cruz, Calif.—The A. Mitting Calla Lily Bulb Co. is being reorganized for the better conduct of its business.

Chicago, Ill.—Manusos Bros. have closed their flower stand, 176 State street, and will continue the one at State and Van Buren streets.

No. Stratford, N. H.—The greenhouse of Albert Felker has recently been improved by the addition of an

office building and other minor changes.

Salem, Ore.—Chas. A. Kibbe, the aster specialist of Elmhurst, Ill., has taken up his residence at this place in the hope that his son's health will materially improve.

Chicago, Ill.—The Peterson Nursery is consolidating its business offices and landscape department, and both will now be found on the tenth floor of the Stock Exchange Building.

New York.—There are in the State of New York about five hundred nurseries embracing about ten thousand acres of land. These nurseries have 27,535,000 fruit trees, 16,600,000 ornamental trees, 4,750 currants and 16,500,000 grape vines.

New York.—The law in New York providing for apple barrels of standard size is being well enforced this year. The legal barrel contains three bushels and measures 17 1/2 inches head and 28 1/2 inches in length of staves, with a circumference around the largest part of sixty-four inches outside measurement. Barrels below these measurements are marked "short barrel," and are discriminated against by the dealers.

### PERSONAL.

John Wanderle has started in the landscape business for himself in St. Louis.

Hans Jensen, of Central, Mo., has taken a position as foreman at Sanders' Nurseries, St. Louis.

Visitors in New York: L. W. Bowen, president of D. M. Ferry Co., Detroit, Mich.; August Jergens, Chicago; William Jurgens, Newport, R. I.

A. H. Kirkland of Boston, has resigned his position as superintendent for the suppression of the gypsy and brown-tail moth in Massachusetts.

Dana M. Pratt of Bryantville, Mass., has just completed work on the extensive Italian gardens of W. G. Mather, at Cleveland, O.

Visitors in Albany, N. Y.: Mr. Snyder of Rhinebeck, N. Y.; S. E. Prosser, Warrensburgh, N. Y.; Mr. Zirkman, representing M. Rice & Co., Philadelphia.

Otto Will of Minneapolis and Miss Florence Keeling of Caldwell, Kansas, will be married next Wednesday at Caldwell. The wedding trip will be a tour around the world.

Mr. Edward Hatch, of Boston, having

entirely recovered from his recent severe illness, will spend the winter in the South. He has removed his office to the Worthington Building, 31 State street, the spot where for twenty-four years he previously had an office.

Visitors in Boston: George C. Watson, Philadelphia; Paul Berkowitz, of Bayersdorfer & Co., Philadelphia; Louis J. Reuter, Westerly, R. I.; O. W. Cutler, Niagara Falls, N. Y.; H. S. DeForest, of Pierson U-Bar Co., New York; A. Martial, representing Reed & Keller, New York; P. T. Barnes, Suburban Life, Harrisburg, Pa.

### IN BANKRUPTCY.

The Fleischman Floral Company and Joseph Fleischman, individual, of New York City, were petitioned into bankruptcy on Dec. 1. Robert C. Morris has been appointed receiver for the Hoffman House store. Among the largest creditors are John I. Raynor \$2700, and A. J. Guttman \$500.

### NOTICE

We desire to notify the trade that we are the owners of United States patent No. 489,218 for Floral Figure which claims:

"A florist's letter or figure stamped from a sheet of paste-board or other suitable material, having an adhesive coating applied thereto and an outer covering of granules of sawdust appropriately colored to represent the petals of the Helichrysum arenarium substantially as described."

Letters which are a direct infringement of this patent are being put on the market and we intend to hold all who make or sell the infringing letters to strict account.

The lawful patented goods are in every respect much superior to the infringement.

## Flower Market Reports.

**BALTIMORE** The cut flower business has improved not by leaps and bounds but in common with commercial industries it has felt the influence of more settled monetary conditions. Chrysanthemums are well nigh passed. Roses and carnation are in sufficient quantity. Violets are scarce.

**BOSTON** The continued hot weather has created an unexpected dullness, unprecedented at this season. Prices are down and stock moves slowly. Chrysanthemums are gradually disappearing, only a few stragglers being seen. Violets are marked at a low figure. A cold wave has swept in as we go to press, and if it tarries conditions should brighten.

**BUFFALO** Beginning Monday the 23rd, the market opened up brisk and stock moved much better than in weeks past. The first winter holiday being Thanksgiving, and the three days previous being more like April than November (the thermometer registering 60 to 66), trade was much better than expected, although prices had changed but little, and on only one or two lines. The demand was for violets and not a bunch was left over. The supply of chrysanthemums was exceptionally good. The supply of Beauties was light, though with no heavy demand, the high price checking the sales, while long stemmed Richmond filled the bill in many cases where medium quality was preferred. In the carnation line there was a fair demand, but the warm weather showed the effects on those that had been held a day or so and caused a good many to display signs of sleepiness. Selected stock sold well, but high prices were out of the question on anything. Lily of the valley was in good supply, and moved well. Greens of all kinds were in good supply.

**CHICAGO** The Chicago market is waiting for cold weather. Everyone has a large stock and much of it is good, but the warm weather has hurried it along. This is practically the last week for many of the chrysanthemum growers, though a few have late blooms which will probably bring good prices. The Thanksgiving trade as a whole was far from satisfactory. Continued warm weather and rain decidedly reduced the demand. The usual holding back of stock by the growers brought the usual

result, an overstocked market. Much has been held till it was unsaleable, even had there been a demand. At this writing the air is as warm as summer, and a cloudy condition prevails.

**Thanksgiving**  
**PHILADELPHIA.** week was one of the most satisfactory the Philadelphia trade has experienced for some time. All agree that it was better than last year even if average prices did rule lower. The Cornell and Army-Navy games with auxiliary social diversions were the two stirring events—one on Thursday, the other on Saturday. There were plenty of local flowers with the exception of violets. Dozens of growers and wholesalers at outside points (notably Rhinebeck and New York) were called on to supply the deficiency in violets. Chrysanthemums are still a factor in the market. There was no marked advance in rose prices except for some

lots of the very choicest quality. The weather is again warm and immense quantities of flowers of all kinds are being forced in, thus checking the natural upward tendency of prices. Carnations are an exception to this, as the early fall stimulation of this crop has spent itself and supplies are shortening up. Orchids are in such good demand that—with normal supply—Christmas prices already prevail. The same may be said about gardenias. The market is full of such things as bouvardia, mignonette, stevia, candy-tuft, sweet peas, Roman hyacinths, paper whites, lilies and so forth

**Business has been**  
**TWIN CITIES** fairly good the past week; if the weather had not been so mild and balmy, it would have been more brisk. There seems to be a temporary shortage of red roses, otherwise the demand and supply are about equal.

Trade since Thanksgiving Day has suffered from very warm weather which has forced all stock prematurely and unfavorably affected quality. The present receipts are light but demand is sluggish, and it has taken the first half of the week to unload accumulations. Cooler weather has not helped prices, which are very low for the season and general depression prevails.

Business is keeping up very steadily, with prices the same as at Thanksgiving. This week will finish up the chrysanthemums. Violets are improving in quantity and quality. Real good roses are scarce. The demand for fancy ferns and leucothoe is greatly increased over last year.

Thanksgiving trade itself was somewhat lighter than in other years. The future looks bright. Many decorations are booked.

For the past week WASHINGTON weather conditions have resembled September rather than November, but despite this fact, prices took their usual Thanksgiving jump, and they of course will prevail from now on. Violets are scarcer than for several years past at this particular season and prices are up accordingly, although they are not up to their usual standard. Sweet peas are improving in quality and there is a steady demand for them. Carnations are taking on their winter stem but have advanced only a trifle in price.

**WHOLESALE ONLY**  
**Galax, Ferns and Leucothoe**

Direct from the woods to the dealer. Per 1000: Galax, Green, 50c. Leucothoe Sprays (green only), \$2.00. Ferns, Dagger and Fan y., 70c. Special prices on lots of 100,000 and up. Terms, strictly cash, F. O. B. Elk Park, N. C.

**KING CONSTRUCTION COMPANY**  
NORTH TONAWANDA, N. Y.

### Why My New Curved Iceless Eave is Far Superior to Anything on the Market Today

- 1st. No sash bars incased in iron, thereby eliminating all danger of bars decaying.
- 2nd. Can be used in conjunction with iron frame construction, thereby doing away with that very objectionable feature, "columns."
- 3rd. Roof bars with drip grooves, which act as conductors to carry away the condensation: Result, the driest roof ever used for greenhouse purposes.
- 4th. **THE MOST IMPORTANT OF THEM ALL.** The very small increase in cost over the ordinary style of construction which makes it possible to be used for commercial as well as private purposes.

**William H. Lutton,** Horticultural Architect and Builder  
West Side Ave Station (C.R.R. of N.J.) Jersey City, N.J.

## EAVE PLATES

Here are two kinds: our regular Standard Galvanized Steel Eave, which is the simplest and most practical—and the same plate equipped with a Galvanized Steel Drip Gutter. This last is a combination which we patented as long ago as December, 1901.

Both these plates have the cast iron roof bar brackets which firmly secure the bars to the plates and prevent end rot.

**Hitchings & Company**  
1170 Broadway New York

## AS A RESULT EVERY SECTION OF *The Burnham* IS EQUALLY EFFICIENT

The deep cross fire channels with side flue openings do the principal part—the three times back and forth fire travel does the rest. No other boiler has these features.

Burns any kind of fuel.

Get our catalog.

**Lord & Burnham Co.**

## MORE U-BAR—WHYS

We might boil it down to five words—**Make; lightest house; increases endurance.**

All the arguments of all the greenhouse concerns hinge on **our five words.**

When a house becomes a standard for comparison—such as "It is nearly as light as the U-Bar," or "It is not as rigid as the U-Bar house," it is because the U-Bar construction is conceded to be in advance of all others. It is the ideal construction for private estates, parks, public institutions and florists' show rooms. Send for catalog.

## WE ARE HEADQUARTERS FOR THE **RIGHT STOCK OF WHITE KILLARNEY**

There are other white sports of Killarney, but the stock which we offer — the WABAN variety — is very much superior to all others

### ***When You Buy From Us***

You get stock of the variety exhibited by us and the Waban Rose Conservatories this Fall, which was awarded the silver cup at the National Flower Show at Chicago, Silver Medal, Horticultural Society of New York, and Silver Medal, Massachusetts Horticultural Society, Boston. It undoubtedly is

### ***The Best White Rose Ever Introduced***

Our attention was called to this rose last winter, and recognizing its great value as soon as we saw it, we purchased half the stock. We are growing it in large quantities in our Scarborough greenhouses, and will be glad to have any one interested in it visit us and see it growing.

The large growers, instantly recognizing its value, have placed orders for large quantities, so that our advance orders are very large, and the demand promises to be very heavy, judging by the number of orders already booked; but we have enough stock either potted or rooted to fill advance orders, so that we can still promise early delivery and first-class stock on all orders received now.

### ***Order at Once to Ensure Early Delivery***

Orders will be filled in rotation as booked, delivery beginning March 1st, 1909.

**Strong Plants, 2 1-2 in. pots, own-root, \$30.00 per 100; 250 for \$70.00; 500 for \$125.00; 1000 for \$250.00**  
**Grafted Plants, \$5.00 per 100 additional**

## Table Centre Pieces of Growing Plants

A well-dressed centrepiece is a decided addition to the ornamentation of a dining room and the absence of it makes a table look bare and unfurnished.

With the pans ordinarily supplied for this purpose it is difficult to fill them so that the plants will thrive for any length of time. They are too shallow to allow the use of sufficient soil to keep the plants going.

A person purchasing one of these centrepieces gives first attention to the ornamentation of the pan and if this passes muster regardless of its depth, or rather, lack of depth, the question of what to put in it, is discussed. Something very dainty of course to harmonize with these or those furnishings in the room but while these plants must be delicate to a superlative degree, they must also be as tough as boarding-house steak. No consideration is given to the fact that the rooms are furnace or steam-heated, that the temperature is now high and blistering, again low and chilling. This should have no bearing on the case as any collection of plants should be stimulated to luxuriant growth when placed in one of the many artistic metal creations used for centre pieces!

About two weeks in a house works a decided change in the appearance of the plants, and a couple of weeks further stay makes it look as unattractive as a chicken with the "pip." Then comes the reckoning. The pan is sent back to the florist with an impersonal note, bristling with sarcasm, in which the capability of the florist is questioned in no pleasant terms. Such things are calculated to cut deep.

It would be well to explain that to keep a centrepiece looking fresh and attractive it must be renewed about every week and to do this, two or three pans should be filled and when not on duty should be kept in the greenhouse, convalescing. This may seem like an expensive proposition, but it is the only practical way to get results that will keep a smile on the purchaser's face.

The deeper pans solve the problem but the great objection to them is their height. They dress better than the lower ones and the plants actually grow in them, once and awhile.

Water kills more of these decorative contrivances than anything else. An occasional watering is by far better than a regular soaking as it keeps the plants hustling for the little water they get and they forget to die in a hurry.

A few hours in the light, not in the direct sun will be a help toward keeping them going.

Clerks entrusted with the sale of these goods should be competent to properly advise the purchaser as to their care and what they may reasonably expect as to lasting qualities.

*Frederick J. Doogue*

The earth has grown old with its burdens of care,  
But at Christmas it always is young;  
The heart of the jewel burns lustrous and fair,  
And its soul, full of music, breaks forth on the air  
When the song of the angels is sung.

It is coming, old earth, it is coming tonight!  
On the snowflakes which cover thy sod,  
The feet of the Christ-child fall gentle and white,  
And the voice of the Christ-child tells out with delight  
That mankind are the children of God.

— Phillips Brooks.

'Tis the time of the year for the loving-cup,  
When the holly berries shine;  
And with shout and song of man and maid,  
The cedar and fir we twine.

— Margaret E. Sangster

## Tree Talks

V.

The first consideration in tree planting should be a suitable soil. If in a nursery the ground should be well manured and ploughed or spaded from twelve to fifteen inches deep, and well pulverized. If the trees to be planted are for street planting they should be planted from six to eight feet apart each way, so that they can be easily cultivated and worked amongst. This allows of a free circulation of air and gives a chance to form a fine head, and their roots and fibres are always more abundant than when they are planted too crowded; it also makes a more vigorous tree for future use. In planting, the tree holes should be dug broad and deep enough to admit of all the roots without crowding. The centre of the hole should be somewhat elevated to set the tree on. The tree should then be carefully looked over, to see that there are no bruised roots or limbs; if there are any they should be cut smooth with a sharp knife. If the tree has good fibrous roots, little if any of the top should be removed, unless it is a straggling limb that is spoiling the form of the tree; but if the roots are poor and top good, it is well to head in each branch to one or two good eyes or buds, but not to make a mop handle of it by sawing off the top, as is often done. The tree should then be set in the centre of the hole, the roots carefully spread out and the finest of the earth carefully worked in amongst the fine roots. This is easily done in most cases by having one take hold of the tree near the surface and shake it slightly while the earth is being spread over the roots. The earth should be well firmed with the feet if the tree is small, or, if the tree is large, with a rammer such as they use to ram pavements with. The lighter the soil the more necessary the firm planting, but in heavy clay soils there is not so much need—only to firm the tree.

### STREET AND ROADSIDE PLANTING

In planting shade trees along the streets, much more care is required in the preparation of the soil to make it successful. In the first place, in making your streets, all or nearly all the good loam should be removed and its place filled with gravel or small stones, which afford but little nourishment to the growing tree where its roots are confined to that alone. It is true a tree will exist for a long time in a comparatively poor soil, but it will repay the planter in a few years to see that his ground is well prepared in the beginning.

The holes for street trees should be excavated two or three feet deep and eight to ten feet in diameter, the good soil, if any, put on one side and the gravel, clay or stone removed, and the hole filled with good loam. If taken from an old pasture the coarse sods should be put in the bottom and the finer soil on the top. If a portion of well decomposed manure is mixed with the soil, it will much improve it, as it must be remembered that the trees planted on the streets do not, as a rule, get the

annual top dressing that those do that are planted in gardens, neither can the roots for a number of years reach the neighboring gardens, although they will in time, which will show in their increased vigor. On country roadsides, where the road is little more than a few loads of gravel dumped on top of an ordinary soil that has been rounded up to shed the water, it is probably not so necessary to make such a deep excavation for the tree, as it would be in a city or its environs. But even along these surface roads it pays in the end to prepare and plant a tree well. The soil should be allowed to settle a few days or longer, when the tree may be planted in the same way as recommended for the nursery planting. The tree when transplanted should not be much deeper than it stood in the nursery. Two or three inches deeper will not make much material difference, but, at the same time, it is best not to have much of the stem below the ground.

### REMOVING LARGE TREES

Trees of a very great size can be removed successfully if time and money are of no account, but it is an expensive process and should be attempted only where immediate effect is wanted, or in the case of a rare variety that requires to be removed and cannot be replaced otherwise. To prepare a large tree for removal a deep trench should be dug around the tree from five to seven feet from the base of the tree, and working under so as to cut off all the roots possible without disturbing the bole. The ends of the roots should all be cut smooth and the trench filled up with a good compost of peat, rotten sods and manure, and left for a year, when a second trench can be opened at the outside of the first one, and the tree carefully undermined with a pick, so as to remove the soil with as little injury to the young fibres as possible, and the tree carefully drawn over, so as to cut whatever tap root that may have been left. If a supply of bass mats is at hand they can be carefully bound around the ball of earth, and, if it is not too large, it can be loaded on a drag and drawn to the place of planting where the hole has been prepared beforehand. If too large for a drag the ball of earth may be surrounded by boards or layers of hay and straw firmly bound with cords, a few boards passing underneath, and the whole fastened to the stem, which should be well wrapped with hay or woolen material before any force for lifting is applied. It can then be raised with the use of a derrick on to a truck and taken to the desired place, lowered in the hole, the binding taken off, the roots carefully spread and the soil well worked in amongst them and well firmed.

Large trees can also be transplanted by digging around them in winter and allowing the earth around them to be frozen solid, having the ground prepared previously and covered with coarse material to keep out the frost, and removing them on a sled to their designation. There are also many mechanical devices for lifting large trees.

*Jackson Dawson*

Arnold Arboretum.

## Cattleya citrina

*Cattleya citrina*, or "the Tulip Orchid," as it is often called, is quite distinct from the other members of the genus in appearance and general habit. Its beautiful lemon yellow, sweet scented, waxy flowers as well as their peculiar habit of growing downward always attract attention. The best place to grow this cattleya in is a cool, airy house, such as one would grow primulas, cinerarias, azaleas and like plants in. In a house of this kind, *Cattleya citrina* will invariably do better than in a regular cool orchid house. It can be grown either in small pans or on blocks of wood with a little osmunda fibre attached to the block to which the plant is fastened with copper wire until the roots take hold of the block.

The plants require very little water at any time of the year but enjoy a cool moist atmosphere at all times. An occasional dip in weak liquid manure water will help to build up strong pseudo-bulbs and consequently a good crop of flowers. The plant shown in the picture has for the last five or six years produced two flowers to the bulb, the usual number being one; in addition one of the bulbs made two leads this year. I mention this because the species has the reputation of "going back" after a few years of cultivation. Most orchids will go back after a few years of cultivation if they do not get the proper care and food and this we can not always give them because we do not know what their particular requirements are; but once in a while we hit upon the right cause of treatment for certain species, be it accidental or through experimenting and then the plants will go ahead and grow as well or nearly so as they did in their native home.

*M. J. Oape*

Naugatuck, Conn.

## Rose Notes in Season

Vigilance is the growers' watchword these days. The changeable weather brings all sorts of trouble, and any relaxation in the care of the plants, ventilation, etc., affords one or all an opportunity to get busy. The return of firing is welcomed by the red spider—if not by the grower—and it is amazing how rapidly this pest will populate a house of stock if left to his own sweet will. The presence of red spider is indicated by a scorched appearance of the upper surface of the leaves and is easily detected by the grower who "sees." It is, however, preferable not to wait for the appearance of this sign, but to syringe carefully each plant every time the operation is performed, when there will be no occasion for worry during cloudy weather.

Keep the plants neatly tied, the better to facilitate syringing and the subsequent drying of the foliage, as well as to encourage the growth of straight, graceful stems.

Remove the lateral shoots while they are very small. The strength thus diverted will go to the development of a better and larger flower than if they were permitted to remain until a knife had to be used.

If there is any mildew on the stock advantage should be taken of the cold nights to paint the pipes with the mixture of sulphur and lime. If we are persistent, a few nights of this treatment will serve to eradicate the pest.

Green fly can be kept in subjection by fumigating with tobacco or its products, and as this pest multiplies in competition with red spider—or so it seems to me—the house should be fumigated on the occasion of its first appearance and repeated every time a green fly is noticed.

Watering calls for careful judgment as it is during the winter months that roses are in their most torpid state, root action sluggish and the eyes hard to start. Any check to root action, however slight, will strengthen the natural tendency of the plants to take a rest and when they enter on this condition during the winter it is exceedingly difficult to encourage their return to activity.

*J. E. Simpson*

## Chrysanthemum Notes

### CALVAT'S CERTIFICATED NOVELTIES

At the Paris show last November a large number of new seedling chrysanthemums were awarded certificates. Calvat headed the list with eighteen. To those American growers interested in French novelties we quote the names referring them to the raiser's catalogue for descriptions in case of need. Melisandre, Mme. Max Chabriel, Mme. Jules Maggi, Miarka, Chrysanthemiste Durand, Peintre Bienvenu, Belle Esterelle, Mme. Rachel L'abbe, Souvenir de Mme. Bonnefond, General Sauret, Cecilia Monteil, Achille Fenin, Ferdinand de Bievre, Blanche Delcloque, Mme. Julien Ray, Mme. Jouan, Mme. Chas. Lutaud, Claudius Denis.

### SINGLE CHRYSANTHEMUMS

During our rounds this season we have met with many pretty varieties of this popular section and for decorative purposes there are probably few flowers more useful

at this time of year. In our public halls, in the decorative classes at our shows, in the florists' shops and elsewhere the single chrysanthemum makes its annual claim to recognition and succeeds.

Lady-smith is old but its rich color makes it one of the most valuable; Nellie Riding, golden chestnut; Kitty Bowne, yellow; Edith Pagram, Bronze Pagram and White Pagram need no commendation. Annie Stevens is a pretty rose colored variety. Mrs. H. J. Empson, pure yellow. Some newer ones are Narcissus, golden yellow; Doreen, yellow; Mrs. E. Roberts, pale lilac mauve; Pyrethrum, reddish crimson; Miss Gunn, blush pink; Perfecta, rosy purple; Restart, small but fine color, almost scarlet.

#### DECORATIVE CHRYSANTHEMUMS

These pretty little medium-sized Japs are of great value in the border and as pot plants. Baronne de Vinols, a rosy amaranth with white tips, also Knonnar Caprice de Printemps is useful for grouping and much appreciated by the French growers. It has given rise to quite a large family of sports of which Kathleen Thompson, a golden chestnut, is a conspicuous sample. At Paris one exhibitor staged the entire family which we may refer to at some future date. E. Daudet, yellow shaded red; Foxhunter, scarlet crimson with gold reverse; Table Decorator, pale lemon yellow; Clara Verum, rich rosy red crimson with gold reverse; Freda Bedford, golden apricot; Eden, rosy mauve, passing to white, and Mrs. Christie, deep rosy amaranth, are some of Cannell's newest and best.

Charman Payne

### Nerine Fothergilli major

These popular South African bulbous plants are among the most charming and most useful of all early winter-flowering plants. Coming into bloom as they do at a time when flowers of any real choiceness are scarce, we find that this Nerine amply repays the little care and attention which it requires.

For decorative purposes, they stand in a class by themselves and I have yet to see the flower which can beat them for rich effect. Incidentally I may say that one of the finest pieces of table decoration which I have ever seen was a dinner table seated for forty, decorated entirely with Nerine Fothergilli. The effect under artificial light, for beauty and brilliance was simply beyond the power of man to describe.

Perhaps the real secret of success in the cultivation of the Nerines lies in their winter treatment. Quite a number of people are under the impression that Nerines require little or no attention in the way of potting or feeding owing to their well-known partiality for being pot-bound. Neglect in this respect is one of the principal causes of failure in growing these plants.

As soon as Nerines finish flowering, they should be carefully examined to see that the drainage is in good order, and any which may require a small shift should

have it at this time, although excessive potting should always be avoided. They should then be placed in a cool house where they will get plenty of light and air. During the growing period which lasts, as a rule, from November until May, they require abundance of moisture at the root and overhead and, to ensure the thorough development of the bulbs, occasional waterings with well diluted farmyard manure should be given them.

About June the foliage begins to show signs of withering, and water should then be given in lesser quantities and gradually discontinued altogether. During the summer months they may be placed on their sides in some well exposed situation outdoors, where they will get a thorough baking in the sun. As a well ripened bulb is

NERINE FOTHERGILLI MAJOR

absolutely necessary before we can expect it to flower we should see that they are placed where it is dry and where they will get the full power of the sun.

The accompanying illustration shows Nerine Fothergilli var. major grown in a six-inch pot. The plant was one of a large batch, grown and flowered this year by W. N. Craig, North Easton, Mass., who grows them to perfection.

North Easton,  
Mass.

W. N. Craig

## The Carnation Bud Rot

The carnation bud rot is a constantly increasing trouble of the carnation and it is causing some anxiety to the growers. The first indication of the trouble is that the flowers are noticed opening abnormally and though they usually show no external injury, a closer examination discloses the fact that the inner petals cling together at the top while the lower portions are decaying. The peculiar unrolling of the outer petals is so characteristic of the disease that it is not a difficult matter for anyone familiar with it to pick all infected flowers while going over a bench. In the advanced stages of the disease all the petals turn brown. If the decayed portions are carefully torn apart there will usually be found one or more glistening pearly white bodies. When the flowers are in an advanced stage of decay, even when the bud has become a dried mass of tissue, there are usually a large number of these bodies. The writer has counted over one hundred of various sizes in a single decayed bud. These bodies are supposed by growers to be the eggs of some insect. They are the gravid females of a mite (*Pediculopsis graminum*, Reuter) and the shining bodies are the enormously distended abdomens filled with eggs. This portion is so distended that it is often difficult to see the head and thoracic portions of the mite. Anyone can secure the males and non-gravid females by placing some fertile mites in a clear glass vial and in a few days the tiny full grown mites will be crawling about.

The trouble is caused by a fungus (*Sporotrichum* sp.). The mycelium of this fungus is usually seen as a cottony mold in diseased buds that have become somewhat dry. Inoculation experiments on buds of the Queen Louise carnation were in all cases successful indicating that the fungus is the real cause of the trouble. The mites appear to be the means of introducing the fungus into the interior of the buds where the conditions are favorable to its development. The relation of the fungus and mite is shown in the following table:

Variety.	No. Rotten Buds Examined.	No. with Gravid Mites.
Genevieve Lord	54	42
Lady Bountiful	27	18
Red Sport	23	12
Queen Louise	22	15
Mrs. T. W. Lawson	3	1
Estelle	3	2
Total	132	90

A microscopic examination for the non-gravid mites possibly would have increased the figures in the second column. While the fungus spores are disseminated by other means it does not apparently gain entrance to the buds except through the agency of the mite.

The attention of the writer and his assistant was first called to this trouble by the foreman of one of the largest greenhouse establishments in Chicago in October, 1907. In this establishment it was especially injurious to White Lawson. Since this time the writer has found the same trouble at Bloomington, Springfield, Peoria, Pekin and Champaign. A careful study and record was made at Bloomington of the amount of the trouble on several varieties during each week from October to June. The following table gives the results:

Variety.	Flowers Produced.	No. Rotten Buds.
Red Sport	10,806	131
Lady Bountiful	7,500	83
Estelle	1,605	5
Genevieve Lord	21,576	61
White Perfection	3,174	7
Queen Louise	35,408	68

Variety.	Flowers Produced.	No. Rotten Buds
Mrs. T. W. Lawson	9,824	5
Enchantress	6,686	4
Vesper	1,111	6
Beacon	500	2

Each flower produced was examined three times during its development.

The Genevieve Lord, Queen Louise and Red Sport as well as the Enchantress, Lady Bountiful, White Perfection, Vesper, Estelle and Lawson were grown on adjoining benches. The conditions were similar and the results comparable.

As a class the white varieties are more subject to the disease than others but they are not uniformly affected. For example, in this establishment Lady Bountiful was one of the worst injured varieties while Vesper was immune. The former has been found affected wherever I have examined it growing. White Perfection was seriously affected with the disease in November but it disappeared later nor did the trouble reappear on this variety in the spring when it was again in full crop. Queen Louise is a variety subject to this disease and like the Lady Bountiful infected flowers were found all through the winter but in greater numbers in fall and spring. Queen showed some affected flowers but as it was thrown out in January the record is not complete.

Among the colored varieties Genevieve Lord, a pink variety, was one of the worst injured. Most of this loss occurred in a separate house containing one bench each of Lord and Louise. Other benches of Genevieve Lord were less affected but still to a greater degree than Enchantress or Lawson. The latter were not susceptible varieties. Estelle and Beacon were also more subject to the disease than the two standard kinds named above. Red Sport was the worst affected variety of all those studied. This is especially interesting because the impression prevails in some quarters that the disease is practically confined to the white varieties and in still others that Lawson is the kind particularly subject to it. If the White Lawson is meant it should not be confused with other Lawsons.

The susceptibility of varieties was shown in one large house which contained as well grown plants as I have seen in ten years' experience visiting greenhouses. In this house two benches of Louise gave 10 and 5 buds respectively, one Genevieve Lord bench 5 and one bench of Red Sport produced 99 rotted buds. In the low narrow house previously referred to, one bench each of Genevieve Lord and Queen Louise produced 43 and 38 rotted buds respectively. Here the conditions were very favorable to the diseases during May because of the excessive rainfall.

Comparing the two lots of Lord and Louise it will be seen that in large, well ventilated houses the disease was less troublesome on these varieties but that other varieties are very subject to it under the best of conditions.

Although the disease and the mite are troublesome on June grass the writer has not found it a regular consequence of the use of rotted sod. On the other hand some of the worst cases of this trouble that he has examined, followed the use of other soil. It is his desire to get more evidence on this point.

The only remedy known at present is to pick and destroy all the diseased flowers as they appear. This will get rid of spores and mites. Under this treatment I have not found a second infected bloom on a plant.

## Our anniversary

It is four years since HORTICULTURE extended its first "Merry Christmas" greeting to the horticultural workers of our land and asked for their indulgence and support of its efforts to advance the interests of the art and of those making it their life work. That the invoked support was generously given at the start and has been steadfastly continued up to the present time needs no proving to anyone who will glance over the pages of this, our anniversary number, and we take the present opportunity to express in as public a manner as possible our deep sense of gratitude and appreciation for the kindness, enthusiasm and loyalty which have been so ungrudgingly extended and without which success for HORTICULTURE would have been an impossibility. We congratulate the horticultural profession and allied interests on the encouraging outlook and hope that the year on which we are about to enter may fulfil its bright promise for every one. HORTICULTURE wishes you all a Merry Christmas.

## A priceless heritage

After reading the stirring lines contributed from time to time by our nature-loving correspondents, Rev. C. S. Harrison, Jackson Dawson, Prof. Pammel and others, one is forcibly impressed with the thought of the wide gap that forever lies between the best achievements of the most gifted landscape artists and the wonderful handiwork of nature as seen in the virgin forest and the vast primeval gardens unmolested by man. It is well that as much as possible of this sublime scenery be protected from destruction and preserved for the welfare and delight of the people and to serve as examples to which mankind may look, for all time, for inspiration in reclothing and rebeautifying the scarred and forbidding surface of a once-glorious world and every horticulturist should be found in the front rank in support of the widespread movements now on foot for the conservation of whatever is still left to us of our natural resources, more especially the forests.

## An act of folly

A New York florist whose name is familiar from one end of the country to the other, having been petitioned into bankruptcy last week and endeavoring to divert attention from the distasteful insolvency facts has taken opportunity to publicly traduce the business which has given him a living, the men who have generously trusted him and the great flower buying public in a manner that will surprise and offend the many who have been disposed to overlook his escapades in the past and who have admired and respected him for his resourcefulness and self-reliance. Those who know anything about the situation in the New York florist trade are aware that most of the bombast which the daily papers have been all too ready to spread before the public as the expression of this gentleman, is mere fabrication, but the public will accept it as truth and the flower business and everybody connected with it must share in the unmerited humiliation. The flower business stands for too much that is near and dear to the human heart to be thus recklessly villified and so far as the wholesale trade of New York is concerned, a word of gratitude and of sympathy for those dealers who have lost through this affair would be much more creditable than a public arraignment. We hope our friend will be able to carry out his promise to "make good" in all respects with the year, but we would remind him, with the kindest motive behind, never to forget when seeking publicity through the newspapers or otherwise, that

"Fame's very sweet, yet we should careful be  
 That it is fame, not notoriety."

## BRUSSELS SPROUTS.

I wish some reader of HORTICULTURE would enlighten me on the culture of this vegetable so as to get it to produce good solid heads. I have been able to get only soft, loose heads, although the seed was procured from the most reliable source and the plants have had no lack of water, nourishment or room. H.

Brussels sprouts are closely allied to kale, therefore require almost the same treatment.

The first condition of success with Brussels sprouts like that of nearly all other vegetables is the right soil. The best soil is a rather sandy loam, not less than 12 inches deep, the sub-soil under which should be sandy or gravel. A clayey or stiff sub-soil is uncongenial, and, unless drained artificially or naturally by sandy or gravel sub-soil, success is impossible. Experience has shown us that it is always beneficial for the Brussels sprouts crop to plow the land in the fall, not only because when this is thrown up in ridges it gets pulverized by the action of the frost, but also that the turning of the soil exposes the larvae and eggs of insects to the frost, which tends greatly to lessen their number the succeeding year. The best manure I find is half stable and cow mixed together, and always bear in mind that the more thoroughly rotten and disintegrated manure can be had, the better will be the result.

Spread the manure to the thickness of three inches at least and sprinkle some bone dust with this. Plow in and harrow smooth with rake and the bed is ready for planting. Sow the best seed that can be got, for, unless you have good seed, no matter how good the cultivation, the result will be a failure. About April 20th, when seedlings are large enough, transplant into cold frames or, better still, pot into two-inch pots and from twos to fours. I find potted plants do far better than when transplanted from a cold frame; they seem to take hold much quicker and set better too.

Plant out in July, and plant 2 1-2 feet apart in the line and 3 feet between the lines. After planting, it is needless to say that the soil should be kept continually stirred around the roots, and all weeds kept down. During very dry weather they should get plenty of water.

There are several kinds of insecticides in the market, but Slug Shot is one of the best and safest kind I have tried, and keep the plants perfectly clean by using it once or twice during the season.

Brussels sprouts should never be planted year after year in the same place, but should be planted in a new place each year.

The above is my way of growing Brussels sprouts, and I have very good results every year with them.

GARDENER.

## A CORRECTION.

The vase of handsome blooms of chrysanthemum William Duckham, which we illustrated in issue of November 21, was exhibited at Madison, N. J., not at Lenox, Mass., as printed.

## A ROSE GROWER'S PERPLEXITIES.

Editor of HORTICULTURE:

I trust I am not asking too much when I ask for information on the following points:

1. How often to spray roses at this season, when there is no red spider.

2. What to do for mildew when putting sulphur on pipes and powdering the leaves is not effectual.

3. What temperature to keep the house during the day for Brides and Maids.

I know nothing about growing roses, but engaged a grower who claimed to be an expert, but I am fearful he is not, and if you would kindly answer these questions as soon as possible you will help a beginner who is anxious to succeed.

Yours very truly,

J. H. L.

No. 1. At this time of the year we do not have many wholly bright days, so that it is generally necessary to take advantage of each as it comes along, but if you have an exceptionally long bright spell and there is no red spider on the roses we would say that for a while it would be better to syringe not more than three times a week.

No. 2. It is not often that mildew cannot be checked by using sulphur on the pipes and powdering the leaves, providing that the ventilation is attended to carefully. Ventilation, in fact, we believe is the most important item in the checking of mildew. It is not so much a question of the temperature in the houses as it is that of keeping out the slightest draft. If J. H. L. will be particularly careful about this point and continue to keep the pipes with some sulphur on them, using linseed oil with the sulphur to make it hold, he should be able to get rid of this trouble.

No. 3. The proper temperature for Brides and Maids on bright days with air on is 75 degrees; on cloudy days, when it is possible to ventilate only slightly, 64 to 66 degrees is better. Night temperature should be 60 degrees.

It is also important that steam be kept in the rose houses every night and all night at this time of the year, otherwise the air will be too heavy and damp and it will be next to impossible to remove the mildew.

LOUIS J. REUTER.

## A WINTER SONG.

Winter, and splinter of leaf-barren bough;  
Never a thrush with its lyrical vow;  
Down in the garden-close everything sere;  
Oh, for the rose and the prime of the year!

Eery and dreary the night and the noon;  
Gone all the glamour that girdled the moon;  
Gone all the glows from the mead and the mere;  
Oh, for the rose and the prime of the year!

Whirling and swirling of ominous cloud;  
Waves in a walter and earth in a shroud;  
Yet through the snows, love, the dawn will break clear;  
Oh, for the rose and the prime of the year!

Clinton Scollard, in Munsey's.

## CULTURE OF BEGONIA GLOIRE DE LORRAINE.

It is comparatively easy to propagate, by taking leaf or top cuttings from November to March. By taking batches of cuttings at intervals it enables one to have the fine specimens in 8 and 10-inch pans down to the smaller size of 4 and 5 inch pots by Christmas. After taking the cuttings insert them into clean, sharp sand in a temperature of 60 to 65, with a bottom heat of 5 to 10 degrees higher, and give them a good watering; afterwards care must be taken not to keep them too wet until they are well rooted, which will take from six to eight weeks, at which time they are ready for their first potting into 2 or 2 1-2 inch pots, using a compost of two-thirds fine leaf mold and one-third loam with a good sprinkling of good sharp sand. Do not pot them firm or there will be a great loss. After potting, place them on a shelf near the glass, partly shaded, in a temperature of 60 to 65 degrees, taking great care not to let them suffer for want of water, and syringe them on all favorable occasions. As they begin to fill their pots with roots, repot them into larger pots, being careful not to overpot them. By the end of May, or the first week in June, they will be ready for the market growers to fill all their orders, also are ready for repotting, and a good compost is one part flaky leaf mold, two parts loam, with plenty of sharp sand; when spacing give the plants plenty of room, so that they get all the air that's coming to them, for one good specimen plant is worth a dozen poor, weak-looking ones. A sprinkling of soot between the plants at intervals of every three to four weeks is very beneficial; it not only keeps down slugs, insects and spot, but helps to give the foliage that rich, dark lustrous appearance of health. During the months of August and September, Begonia Gloire de Lorraine and Begonia Turnford Hall begin to make rapid growth and will require spacing and repotting into their final pots, using a compost of one part good flaky leaf mold, one part loam, and one part well-rotted cow manure. Now that they are getting quite large they will require a few supports of thin wire, and by using green silkaline they can be tied into attractive shape. A little stimulant will be very beneficial from now on. A little soot dissolved in some manure water is a very good stimulant. I also have great success with Clay's Fertilizer and Ichthemic Guano.

Two of the greatest secrets of successful begonia growing are: first, never to overpot them; and second, never to pot them too firm. A thin shading is all that is necessary at all times—along towards the end of September they can be permitted to full sunshine. The majority of growers grow them in frames all summer long, but they can be grown with as good success entirely inside.

CHARLES THOS. BEASLEY  
Norwich, Conn.

# NEWS OF THE CLUBS AND SOCIETIES

## MARYLAND HORTICULTURAL SOCIETY.

The annual meeting and exhibition was held Dec. 1 and 2 in the Fifth Regiment Armory at Baltimore, as last year, and was even more successful. The immense hall was finely decorated and the exhibits arranged very tastefully, no crowding, everything shown to advantage and the florists and gardeners worked together, making a fine exhibition.

One of the largest exhibitors in plants, cut blooms and vegetables was Geo. Morrison, superintendent of Dr. H. B. Jacobs' estate. M. Harrington, gardener to Hon. James A. Gary, also had some creditable exhibits. There were exhibits from Mrs. T. Harrison Garrett's and other private estates. The florists were largely in evidence. R. Vincent, Jr., & Sons Co., had a bed of new geraniums and another of hardy chrysanthemums skilfully arranged. John Cook, Halliday Bros., H. Fisher, James Hamilton and Edward Hermann had groups and tables of plants. H. Fischer, H. Walker & Sons, and John Cook showed some fine seedlings in chrysanthemums, roses and carnations.

Henry A. Dreer, Inc., Philadelphia, had a table of palms, ferns and other decorative plants, which was given much attention. They also had an exhibit of pumps and spraying apparatus, spraying material, etc.

The Thomson Chemical Co. had a tasty and interesting exhibit of their preparations for spraying for San Jose scale and other troubles of the tree growers.

The fruit exhibit was grand, especially the apples and would indicate that this section may rank as one of the best in the country for apple growing. It was decided to send some exhibits to the National Horticultural Congress at Council Bluffs, Iowa, Dec. 14-19.

There was also a fine exhibition of nuts in great variety.

Microscopes and specimens, enlarged patterns of flowers and insects, used in teaching botany, etc., at the State College were shown and attracted considerable attention.

Thos. Meehan & Sons, Philadelphia, showed some hardy heaths; I. H. Moss, group of fine evergreens and cut roses; James H. Cockcroft, Northfield, L. I., carnation Georgia; Griffith & Turner Co., bulbs, seeds, pumps, tools of all kinds, etc. J. Bolgiano & Son had a fine showing of similar goods. Rawlings Implement Co., International Harvester Co. and E. F. Kaufman of York, Pa., with his York gas sprayer all had interesting exhibits.

The Corn Breeders' Association also had a meeting and extensive exhibit. The bee farmers were also on hand, with an interesting showing and meeting. The State Grange followed on Thursday with its convention, so there was something for everyone.

President Chas. L. Seybold and the other officers and committee are to be congratulated on their management. The daily papers gave interesting reports. A. J. Mauer welcomed the society. The Junior Order made an address on Wednesday afternoon and

in the evening Mr. J. Otto Thilow of the H. A. Dreer Co. gave a very interesting and instructive illustrated address on "Horticultural Progress."

Officers elected for the coming year are: President, W. McCulloch Brown; vice-president, R. Vincent, Jr.; secretary-treasurer, Prof. C. P. Close; vice-presidents for Baltimore City, Chas. L. Seybold, E. A. Seidewitz.

## DETROIT FLORISTS' CLUB.

At the last club meeting Sec. J. F. Sullivan most fittingly eulogized the good work done by Mr. Scribner in behalf of the Club and not only as president, but also as a member. He closed his address by presenting Mr. Scribner with a diamond set locket and chain.

The December meeting was well attended and the two special matters of interest, namely, "Shall the Club move into larger quarters?" and "Shall growers sell to grocers and department stores?" brought forth most lively debates. The affirmative side of the questions was represented by Wm. Dilger and the negative by Mr. J. F. Sullivan.

Mr. Dilger dwelt on the fact that bringing our goods before the people, even through fakirs, is advertising and creates demand which otherwise would not exist. Planting carnations inside of such a limit as to make a glut impossible during the six weeks of spring would cause a famine for the rest of the season and would ruin the trade. Did you ever notice your increase in fern sales, say six or eight weeks after the cheap department store sales? Do you know that Crimson Rambler roses two years old can be imported from France and delivered at your door, freight and duty paid, with canes 4 ft. long at \$5.00 per 100? Why not reduce some of the surplus by more careful selection? See to it that A-No.-1 is nothing but A-No.-1; distribute such stock to florists and the inferior quality stock to the fakir.

J. F. Sullivan, taking the negative standpoint, pleaded for self-respect and following the ethical side, severely condemned the practice and principle of selling our product to people who do not even know the name of it. He cited the action of prominent painters who, in fear that their product might become cheapened, destroy the plates from which copies of their work are printed. The discussion very soon wandered and instead of discussing the subject proper, everybody wanted to know what should be done with the surplus. No end to such a theme, you know!

F. DANZER

## NEW YORK FLORISTS' CLUB.

The regular meeting and annual election of officers for this club will be held on Monday evening, December 14, at the meeting hall on West 23rd street, New York. It is understood that contests are on for all the offices and a big, lively meeting is expected. If the weather permits, the veteran C. L. Allen of Floral Park has agreed to read a paper on "Plant Development," which is sure to be interesting.

## MINNESOTA STATE HORTICULTURAL SOCIETY.

The Minnesota State Horticultural Society held its 42nd annual meeting on Dec. 1, 2, 3 and 4, with President S. B. Green in the chair. About 400 persons, including many prominent growers from practically every section of the Northwest, attended the sessions. Prominent from outside the state were: Col. C. W. Guernsey, Yankton, S. D.; H. M. Speechly, Pilot Mounds, Manitoba; O. O. Churchill, of Fargo, N. D.; C. L. Richardson, Chipewewa Falls, Wis.; J. D. Black, Iowa; J. J. Kellogg, Janesville, Wis.; C. W. Gardner, Iowa; A. J. Philips, West Salem, Wis. The program was a very interesting and instructive one. Among some of the papers read were: "Outdoor Roses and How to Grow Them," E. Meyer, Minneapolis Park Board; "Dahlias for Every Garden," D. W. A. Ruff, St. Paul; "The Gardening of Perennials in Manitoba," Dr. H. M. Speechly, Pilot Mound, Man.; "Possibilities of Cranberry Culture in Minnesota Swamps," Dr. H. J. Franklin, Asst. to State Entomologist; "The Public Square in the Prairie Village," F. Nussbaumer, Superintendent of Parks, St. Paul; "The Distribution of Nursery Stock," C. H. Gurney, Yankton, S. D.; "Legal Protection for Grower and Plants," Wm. F. Coe, Attorney, Minneapolis; "Our Duty Toward the Landscape," an illustrated talk by M. O. McBean, Park Commission of Minneapolis; "Pruning Shade and Ornamental Trees and Shrubbery," Theo. Wirth, Superintendent Parks, Minneapolis.

Five very interesting papers on spraying were read, giving the experience of some of the fruit growers. The spraying in this state is mostly against fungii, apple and plum curculi and codling moth. Minnesota has been lucky so far in not having any San Jose Scale, although experiments at the State Experiment Station showed that the scale confined in a muslin cage survived last winter and was able to kill a small apple tree in one season.

Rev. C. S. Harrison of York, Neb., recommended more pine plantings in the Northwest. He also sees a great future for the by-products of the pine, such as cloth and oil.

S. M. Owen, Minneapolis, discussed the Canadian laws regulating packing, marking, shipping and selling of fruit. A resolution was introduced by Mr. Underwood, Lake City, to have a bill drafted providing for honest and uniform measures, and that the society use its influence to have the bill presented in Congress.

The practicability of a law that would require nurserymen to give bonds and salesmen to have state licenses as a means of protecting the public from injury through the operations of fake nurserymen was doubted. Such a law had been tried in S. Dakota, but has worked as a help rather to the fakirs. The society went on record as condemning the broadcast distribution of seeds by members of Congress at the expense of the government. A resolution was adopted, urging the State Fair management to pro-

vide a building at the fair grounds for the exclusive use of horticultural and floricultural exhibits. While the meetings are mostly for the benefit of the fruit growers, there is quite some interest taken in landscape art and ornamental horticulture.

Professor Samuel B. Green of the State Agricultural College was re-elected president for a third term; George W. Strand, Taylor's Falls, treasurer; A. W. Latham, Minneapolis, secretary; Clarence Wedge, Albert Lea and T. M. Underwood, Lake City, executive board were all re-elected.

C. N. RUEDLINGER.

This society is made up of a band of heroes. When Old Boreas threw down the gauntlet and told them never to invade his domain again, they boldly accepted the challenge. Time and again their orchards were destroyed, until finally they built up an iron-clad tree—hardy from root to top, and now they have met with cheering success. The exhibit of fruit at their 42nd annual meeting, at Minneapolis, was fine, though this was an off year. Last season carload after carload was shipped down to Ohio from a state where until of late we no more expected to raise apples than oranges.

The number of fruit trees planted is something amazing. Enthusiasm is at high tide. The society has a membership of over 2800 and will probably reach the 3000 mark by another year.

The program was full and was started off briskly. Prof. Green is an ideal presiding officer and Prof. Latham is without a peer as an organizer and everything was dovetailed and matched to a perfect fit.

The first paper was on the Bull or ponderosa pine, so well adapted to all the West and Northwest. The writer gave his experience in watching this tree for 25 years. They can be raised in the open as easily as one can raise onions. A man in Manitoba—an ordinary farmer—secured 3,000 from half a pound of seed, with the first cost only 50 cts. per 1,000. This hardy tree grows with great rapidity and admirably fits the dry plains of the West and Northwest; and were it not for the fires would have covered all these regions. He who plants a grove of them plants a flock of sheep. Several manufacturers are now distilling a valuable oil from the needles, and by a chemical process are producing fibre from the long, slender foliage which is converted into cloth, making this tree one of the most valuable that can be planted. The paper will be issued as a bulletin by the Nebraska Park and Forest Society and can be had for a postage stamp by sending to C. S. Harrison, York, Nebraska. There were very interesting discussions on the strawberry led by the veteran of 81 years, Geo. Kellogg, of Janesville, Wis.

There were associated societies which matched their work in with that of the parent society, the Rose Society, Plant Breeders' Auxiliary, Bee Keepers' Society and the Forestry Society which carried out an extremely interesting programme.

Wednesday night was the carnival banquet—the great unbend where there was sense and nonsense, roast and toast, where old men were boys, where there was a "feast of reason and

FIRST PRIZE TABLE DECORATION

At Exhibition of New Orleans Horticultural Society by J. A. Schwindler & Co.

a flow of soul" without the flowing bowl. These meetings are culminate—the last the best, and with reason, for this is probably the largest and best society in the world.

C. S. HARRISON.

#### AMERICAN ROSE SOCIETY.

##### Spring Exhibition 1909.

The schedule for the American Rose Society's Annual Exhibition next March is being revised. \$350.00 is already subscribed as a guarantee fund to the Society's finances. There are three silver cups offered as specials and two prizes for pot plants amounting to \$300.00. The mayor of Detroit offers a special prize for the exhibition to be held in Buffalo beginning March 23rd. Vice President Wm. F. Kasting, park commissioner of the city of Buffalo, says that the people of that city love roses, that it is a place where the Society's motto, "A rose for every home, a bush for every garden," is a concrete fact, and the people will turn out to the show. President Poehlmann has appointed several gentlemen to solicit special prizes. The Schedule Committee are the veteran rose growers, John N. May, Alexander Montgomery, Robert Simpson and Frank R. Pierson and the schedule will be such as to insure a capital display. The annual bulletin is in press.

BENJAMIN HAMMOND, Secretary.  
Fishkill on Hudson, N. Y.

#### MICHIGAN HORTICULTURAL SOCIETY.

A record-breaking attendance, intense enthusiasm and a very interesting programme made the 38th annual meeting of the Michigan Horticultural Society, Dec. 1-3, one of the best ever held. The business meeting showed a most healthy condition of the Society, the T. T. Lyon Memorial Fund now containing nearly \$18,000. It was voted that the Society continue the plan of making fruit displays each year at the state fairs, the premiums earned being used to increase the permanent fund; that the executive board continue the plan of making contracts for spraying materials and fertilizer, to be supplied to society members at cost.

Election of officers resulted in the advance of vice-president Smythe of Benton Harbor to the presidency. C. E. Bassett of Fennville was continued as secretary for the ninth year. James Satterlee of Lansing was re-elected treasurer. New members of the executive board are Chas. F. Hale, Shelby; J. Pomeroy Munson, Grand Rapids and Prof. H. J. Eustace of the State College.

Three state societies are in session this week: Illinois at Champaign, Iowa at Des Moines, and Washington at Spokane.

### PITTSBURGH FLORISTS' AND GARDENERS' CLUB.

There was a good attendance at the club meeting on Dec. 1. The committee having in charge the gratuity to ex-president Jno. W. Jones, foreman of Phipps Conservatories, handed over a large package to Mr. Wm. Falconer, requesting him to act as spokesman. This was a labor of love for Mr. Falconer as Mr. Jones worked with him during the seven years he was superintendent at Schenley Park, and their mutual esteem and friendship is well known. On cutting the wrappings an elegant satchel was disclosed, filled with all the accessories of a gentleman's toilet. As Mr. Falconer said, Mr. Jones is now in shape to attend all the conventions, and, when not in use that way, the satchel can be employed as a cradle. These little incidents seem to help along in the life of the club, and make pleasant memories for all connected with them.

The subject of the meeting was Christmas Plants and Decorations, with a competitive exhibition by the private gardeners, for which prizes had been provided by W. L. Mellon. The prize for most suitable plant for Christmas decoration was awarded to David Fraser for a poinsettia. For three Lorraine begonias, to James Wiseman, and for three cypripediums in flower to James Hutchinson. The judges were E. Blind, J. W. Ludwig and H. S. Price. J. A. Peterson showed a collection of begonias and received a certificate of merit for a new one. H. A. Dreer received certificates for Nephrolepis Scholzei and Begonia Agatha.

Among the home growers represented were Phipps Conservatories with poinsettias, cyclamens and begonias; Allegheny Park Conservatories, North Side, begonias in hanging baskets; Frank Crook, gardener for Jas. H. Park, Dracaena Sanderi, certificate of merit; J. W. Ludwig, decorative greens; Pittsburgh Rose and Carnation Co., carnations.

E. C. Reineman spoke of the recent flower show in Chicago. He was enthusiastic over the display of roses, carnations, chrysanthemums and orchids. Of the roses My Maryland and White Killarney were exceptionally good. The feature of the pergola, so much discussed, he thought suited to the hall, and "Before and After" a splendid object lesson in the treatment of back-yards. The visit to the Poehlmann plant, which he characterized as "the commercial establishment of the world," alone was worth the trip to Chicago.

President Burki invited the members of the club to visit the Pittsburgh Rose and Carnation Company's plant at Bakerstown on Thursday, Dec. 10. The invitation was gladly accepted.

The subject for January meeting will be Roses. H. P. JOSLIN, Sec'y.

### GARDENERS' AND FLORISTS' CLUB OF BOSTON.

The annual meeting of this club for the election of officers for 1909 will take place at Horticultural Hall, Boston, on Tuesday evening, December 15. A large attendance is probable as the contest for presidency has assumed an interesting aspect and an old-fashioned healthy contest seems to be brewing.

### ALBANY FLORISTS' CLUB.

The regular monthly meeting of the Albany Florists' Club was held Dec. 4 at the store of W. C. King. The report of the advertising committee was given by Chairman Danker, and it was decided to continue the agitation against floral solicitors for funerals in the local newspapers for another month. W. C. Kurth reported a resolution from the committee on early closing, recommending that the flower stores remain open during the present month until 8 p. m. The question of having a flower show during the winter was discussed and a committee will be named at the next meeting to make necessary arrangements.

Two tickets were placed in nomination for the officers of the club and are known as the "regulars" and the "opposition." The "regulars" are: President, F. Goldring; vice-president, F. Henkes; treasurer, F. A. Danker; secretary, E. Maney; trustees, H. G. Eyres, W. C. Gloeckner, J. Berberick, Thomas Snare, A. Whittle, H. Riggs and W. C. King. The "opposition" ticket is as follows: President, F. Goldring; vice-president, F. Henkes; treasurer, H. Whittle; secretary, J. Butts; trustees, W. C. King, William Kurth, E. Maney, C. Saunders, J. Snyder and Patrick Hyde. The election promises to be a spirited one and will be held Thursday evening, Jan. 7, 1909. When the contests are settled refreshments will be served and an entertainment given under the direction of a committee, consisting of Frank Briare, F. A. Danker and W. C. King.

Mr. James Snyder of Rhinebeck was a visitor at the meeting.

### CHRYSANTHEMUM SOCIETY OF AMERICA.

#### Work of Committees—Report on New Chrysanthemums.

Mrs. J. Boxall; Jap. inc. Pink. Exhibited at Cincinnati, O., Nov. 27, 1908, by Elmer D. Smith, Adrian, Mich. Scaled 88 points commercial.

Improved Chadwick; white. Exhibited at Cincinnati, O., Nov. 27, 1908, by Elmer D. Smith. Scaled 90 points commercial.

The variety Canadian Seedling No. 20, exhibited by Chas. H. Totty, in Chicago, has been named W. R. Brock.

DAVID FRASER, Secretary.

### AMERICAN CARNATION SOCIETY.

#### Carnation Registered.

By Joseph Hearcock Co., Wyneate, Pa.: "Dorothy Gordon." Parentage, Lawson and Enchantress; color, light pink; habit, etc., flower well built, good calyx, stem and substance, fragrant. A strong grower and a great bloomer. ALBERT M. HERR, Lancaster, Pa.

### CLUB AND SOCIETY NOTES.

The Wisconsin Horticultural Society will hold its convention in Madison, Jan. 12-14.

In the general fruit display at the Royal Horticultural Show, London, England, the gold medal was awarded to Ontario.

### LINCOLN PARK (CHICAGO) ANNUAL EXHIBITION.

To realize the educational advantages of such an exhibit as this the visitor has but to take position in any convenient place and watch the expression and listen to the comments of the throngs of visitors as they pass.

There is so much in a city like Chicago that is repellant to the eye that these opportunities for popular study of the beautiful in nature stand out the more conspicuously.

For two weeks there was a continuous stream of visitors passing through the Lincoln Park Conservatories. Who can measure the influence this has had for better homes and more flower lovers next year? On Sunday, Nov. 15th, it was estimated that fully twenty-five thousand people visited this annual exhibition of chrysanthemums and orchids. The plants were not staged on level tables as in the usual flower show, but flowering plants were mingled with palms and placed on banks 12 to 15 feet high and sloping down to within a foot or two of the walk. There are no straight lines, nor rows of plants, but the banks of gorgeous blooms curve and the walks wind around from one group to another.

Supt. Alois Frey is a master at this work and has most able assistants. In addition to the 175 varieties of large chrysanthemums, seventy-five anemones and fifty pompons, there were a hundred seedlings, among the latter being a number of great beauty and promise.

### DENISON'S FLOWER SHOW.

The third annual flower show at Denison, Texas, held under the auspices of the Civic Improvement League, Nov. 11, 12, 13, was a great success in every respect, and impressively evidenced the splendid effect of the efforts of the League in the interest of civic improvement. Amateur growers made a fine showing and the exhibits of the schools exceeded all expectations. Thousands attended the show, which was kept open one day longer than originally planned, in order that people in nearby towns might attend. Among the commercial prize-winners on chrysanthemums were: Elmer D. Smith & Co., Adrian, Mich.; Jos. W. Vestal & Son, Little Rock, Ark.; Mrs. T. B. Hurt, Navasota, Tex.; D. A. Saunders, Waco, Tex.; Mrs. T. M. Henderson, Paris, Tex., and Mrs. Joe Fritz, Denison. Many premiums were awarded in the amateur classes.

### LOCAL FLOWER SHOWS.

Brandon, Man.—The first chrysanthemum show was held in City Hall on Nov. 20 and proved a success. H. L. Patmore won the silver cup for best display of plants and for cut blooms, and other prizes were awarded to amateurs.

Austin, Tex.—The new greenhouse at the State House, under the care of C. W. Day, was thrown open to the public on Nov. 23, and the fine collection of plants was generally enjoyed.

Denton, Tex.—The first chrysanthemum show will probably not be the last if the enthusiasm and large attendance is any criterion. Roses vied with the Queen of Autumn for attention.

## INDOOR FRUIT CULTURE.

Paper Read by William Downs before the Gardeners' and Florists' Club of Boston.

(Continued from page 713)

## Insects.

The two insects most detrimental to the grapes are mealy bug and red spider. The former is a great problem and if plants can be kept out of the house it should never be found there, but so often it is necessary to use the house for plants and it is almost sure to get in. If it is there kerosene emulsion to paint the vines in winter, and applications of hydrocyanic acid gas in the fall, and alcohol in the hands of a careful man should minimize the trouble. A good plan to keep the bunches clean is to put a wad of cotton batting around the stem, the bug not caring to travel over this. We washed our vines in one place with water at nearly boiling point in the winter and that killed many of them; "after them all the time" is the watchword. In the case of the red spider it should be kept down by syringing; in fact, if syringing is properly attended to this can be almost exterminated; a little sulphur on the pipes helps greatly.

## Peaches and Nectarines.

Another class of fruit which well repays indoor culture is peaches and nectarines, and they can be brought along so as to be ripe before grapes. They are perhaps, on the whole, of easier culture than grapes, and are admired for their beauty, as well as appreciated for their good flavor. I know of nothing more delicately beautiful than a house of peaches and nectarines in full flower, and coming at a time when we are just emerging from the dull, cheerless winter scenes makes them doubly appreciated. Again when ripe, what can equal the blush on the peach, that delicate tinge of coloring which no artist has as yet been able to reproduce. The very name nectarine, conveys to the mind something very luscious, which they are indeed when properly grown.

In regard to the peach house, much that has been said of the vinery applies to that as regards size and border construction, good drainage being essential, and the roots being confined inside. In making the border I would put in no manure except inch bones, with a liberal quantity of lime rubble, or failing this, broken brick bats, the former being preferable. The reason for putting no active manure in the border, is that the tree while young will naturally make strong growth, and this will not produce fruit, it being much more difficult to set fruit on strong wood than on that of medium growth.

## Planting the Peach House.

There are two distinct methods of planting a peach house at the present time, namely planting on the sides of the house, training the trees under the roof, and cross-planting, training the trees to upright trellises. While I have had no experience with trees planted in the latter manner, I think there is much to commend it. It is considerably easier to care for your trees in every way, as insects can be kept down by syringing, you being able to reach

## MELON HOUSE

Estate Geo. W. Vanderbilt, Bar Harbor, Me., Edward Kirk, Gardener.

The accompanying cut was taken in the interior of one of the melon houses on the estate of Geo. W. Vanderbilt at Bar Harbor, Me. The varieties shown are Sutton's "Ringleader," "Superlative" and "Hero of Locking."

every part of the tree, and in tying and training there is a great advantage. It is contended by some that by this method the trees get more shade from each other, as they must necessarily be planted reasonably close, yet I think if the house runs east and west this objection is to a great extent removed, as the sun would shine between the rows most of the day, at least through the hours of the best sunshine. Under this method the trees are planted about 6 ft. apart and in a house 25 ft. wide a row on either side of the walk can be planted, thereby getting quite a number of varieties, even in a house of comparatively small dimensions. Still I think for the best results it would be easier to plant the trees in the middle of the house, and have the walks at the side, thereby giving the trees a greater spread; but not so many varieties can be grown in the same space.

Planting on the sides of the house is the other method and has been the general method, used, I presume, ever since peaches have been grown under glass. We have planted so much closer than they used to be, getting so many more varieties in the same size of a house. In one house 33 ft. long and 25 ft. wide, we planted twelve trees and with the varieties coming in at different times we have had fruit almost every day for ten weeks; this, I think, being a great consideration for family use.

## Training.

Having secured fan-trained trees, if they are grown outside the first season, so much the better, and they can easily be trained by tying to stakes and wire netting and they will be in fine form and condition to plant inside the next winter. This shifting helps to

Mr. Vanderbilt's gardener, Edward Kirk, is an expert melon grower and has great success with them. At the first annual flower show held last August, Mr. Kirk took all the first prizes with his melons. He raises two or three houses each year.

check the rampant growth. They may be allowed (if they have made good growth) to carry about six fruit the second year. The rule to go by is to carry one fruit to every square foot of surface in a healthy tree, yet I suppose almost all of us considerably exceed that number, though I have no doubt it would pay in the end. I have heard the objection raised to this close planting, that the trees will not live so long. Well, if they do not, they so soon come into bearing that they need give us no concern, and the advantage in length of season, by being able to plant more varieties, more than counterbalances the short life.

It would not be possible in so short a paper as this to go into the detail of properly training a peach tree, and with the method I have advocated (close planting), this could not be properly carried out. The main object in view is good fruiting wood distributed evenly over the tree, and to obtain this careful stopping of strong, rampant growths, and pinching of laterals must be carefully looked after.

## Planting and Starting Peaches and Nectarines.

Peaches and nectarines should be very carefully planted, making sure to have the soil firm under the tree, the roots all carefully laid out straight from the trunk, evenly as far as possible, and the extreme ends only slightly pointing down, keeping them nearly horizontal, working the soil carefully between the roots, firming the whole down, a good watering given, and the tree is ready for starting at the proper time. The branches should be tied to the wires and one thing to remember is that the wood swells considerably in a season, so plenty of room should be left to allow of this

swelling, or the tying material is likely to cut into the wood causing gumming and strangulation. At starting time a good watering should be given, and at no time should the border be allowed to get dry, not even in winter when the trees are dormant. If it does, a loss of buds is most sure to be the result.

They should be started at a night temperature of 45 deg.—day temperature 10 or 15 higher. After two weeks this should be increased gradually until they are in bloom, syringing twice a day and shutting up with sun heat in the afternoon; but on no account try to force them too much at first for if you do the wood buds will get ahead of the flower buds and a poor set will result.

#### Care When in Bloom.

When in bloom the house should be kept free from moisture. No syringing, and a crack of night air with a slightly lower temperature is the best condition at this time. When the blooms are fully expanded and the pollen dry, which is generally near the middle of the day, a good sharp rapping of the trees distributes it; a rabbit's tail on a stick or a camel's hair brush is all that is necessary to set the fruit. Once or twice through the blooming season a very slight syringing is very beneficial. This should be done in the middle of the day so that the trees will be sure to get dry before night.

Another means employed is to take a hive of bees into the house. This seems too cruel to me as so many of them die and it is entirely unnecessary when these other means are employed. There is no danger of not enough fruit setting; in this country the trouble seems to be too free setting.

#### Disbudding and Ripening.

After the trees go out of bloom a thorough syringing every fine morning must be resorted to and a higher temperature maintained until the stoning period, when they must be kept cooler and less water given, or cracking of the stone will result. After stoning they will swell very rapidly and almost any amount of heat and moisture may be given them. When ripening, plenty of air, and less moisture both in the house and border must be used, but on no account let the border get dry, or dropping of the fruit may result. Never syringe in the afternoon, except in the earlier stage before blooming, or rust on the fruit will ensue.

After the blooms are set the wood will begin to grow, and disbudding must be taken care of; all surplus growths should be rubbed off, taking care so far as possible to leave one growth at the base of the last year's growth; this will be the wood for next year's fruiting. Of course all surplus growths cannot be taken off at one operation. Generally we take off all the growths on the underside of the limb first and then thin out the others to be taken off as the shoot from the base grows, doing the whole operation gradually before they get too long, though a peach tree seems to resent pruning less than any other tree. These shoots must be tied in, as it is termed, or down to the wires and kept in a line with the limbs, as the straighter the growths are kept, the

better the general appearance of the tree. If any shoots make a rampant growth they can be stopped and will produce two or three medium growths which will make good fruiting wood. The fruit should be thinned as soon as it is possible to determine which will swell, and it will be necessary to go over the tree several times to be sure and leave plenty and not overcrop the trees. A good plan is to leave the fruit rather thick until after they are stoned as sometimes from one cause or another the trees will drop quite a few fruit during the stoning period.

The fruit should be left on the tree until thoroughly ripe and great care is necessary in removing it from the trees so as not to injure it as it is very easily bruised. Going over the trees every day grasping the fruit lightly with a slight twist, without pinching, will take off all fruit that is ready. A man can soon become expert at this when doing it every day and will almost know by sight the fruit that is ready.

After the fruit is taken from the trees do not make the mistake so many do of neglecting the trees; keep them syringed, and this can be thoroughly done now, and go over them and take out all the wood not required for next season's fruit, so giving that remaining all the chance to make up its buds and ripen the wood thoroughly.

I have mentioned in the treatment in regard to watering that the border should never be dry, but on the other hand it should not get so much water that it becomes sour. I never water without first testing the border with a spading fork, and a good plan is to lightly fork over the entire border occasionally, this making it possible to water more evenly.

#### Feeding Peaches.

As to manures, this is a very important part of fruit growing, and must be done with consideration of what you are trying to produce with that manure. If swelling the fruit is the consideration, liquid cow or sheep manure is the best means of applying it, but to make growth and complete that growth so as to produce good fruiting wood, something more than nitrogenous manure is needed, Phosphoric acid and potash are required. The latter exists to a greater or less extent in our soils, so liberal quantities of bone with a manure such as sheep manure will give the best result. Thompson's Vine manure is good and I use it with the others, but I rely to a great extent on bone. If a tree is making very vigorous growth it can be tempered by using bone alone, and on the other hand it can be encouraged by the use of nitrogenous manure to put on more vigorous growth when weak.

Don't overcrop, thoroughly syringe to keep down red spider, watch your border, give plenty of manure and water during the second swelling, and fine, luscious fruit will be your reward. Nice fruit can be grown in tubs; these will come in useful whilst your trees are filling up the house.

Perhaps a few words in regard to the tying of the trees would not be amiss. Too many make the mistake of tying them much too close, not giving room enough for the proper development of the foliage. They should be about 6 in. apart over the tree. Of course judgment must be used in this

matter as it would be ridiculous to tie it so far apart with small growths. I am speaking of healthy trees. The finest peaches and nectarines I ever saw were grown on this plan and peaches of the weight of 17 ounces and nectarines in proportion were produced. They were grown by Mr. W. H. Divers of Ketton Hall, England, now gardener to the Duke of Rutland. Geo. Munroe, that veteran salesman of Covent Garden, told me that they were the finest he had ever seen. I think they were the result, to a great extent, of the growing of the trees with the shoots far apart. Red spider, thrips, mealy bug, and scales are the chief enemies of the peach family. What has been said of them in grape growing applies here also. Thrips can be got rid of by using Nicotinic acid, syringing with fir oil, or Nicotine. Scale can be got rid of by using the gas when the trees are dormant, and a quite heavy dose may be applied at this time. I rid my house of San Jose scale with one dose of it, using in the house 33 ft. long by 25 ft. wide, two pounds of cyanide of potassium. Frequent smokings for green fly will be found necessary whilst the foliage is young and care should be taken to clear them out just previous to the flowers' opening or they will do considerable damage.

Alexandria, Gros Mignonne, Dymond, Goshawk, Violette Hative, Thomas Rivers and Sea Eagle are amongst the best varieties of peaches, while Cardinal, Early Rivers, Lord Napier, Stamwick Elruge, Humboldt and Pine Apple are the best nectarines, and ripen in the order named. Victoria is a late one but I found it of very indifferent flavor.

#### Strawberries.

I now come to the third and last section of fruit grown under glass, viz., strawberries. While with the other two sections it needs special houses to grow them, strawberries can be grown by almost anyone who has a little heat at his command, and they well repay the little care necessary to bring them into fruit. No berry grown out of doors can ever compete for flavor with the indoor one when properly grown. The earlier the runner can be obtained the better; these should be layered in pots filled with good turfy loam, a small stone being placed on the layer to keep it in place; kept well watered, and in about two weeks the pots will be filled with roots. It should then be cut off and left for a few days. It can then be potted up into the fruiting pot, which should be a 6-inch pot. The compost best suited to them is a good turfy loam with one part of old cow manure and a liberal sprinkling of bone. They should be potted firmly in clean pots, put in a shady place for a few days, and then set on or plunged in ashes, carefully watered, when dry given an abundance, syringed frequently, and given all the sun and air that comes. This will build up a good fruiting crown.

They should be plunged in a frame in coal ashes before the frost is severe enough to crack the pots, and kept as near the freezing point as possible until you are ready to start them. About Jan. 1st to the 14th is early enough to bring the first batch in. These should give fruit in April and successive batches brought in every

two weeks will give a regular supply of fruit until the fruit ripens naturally out of doors, the last batches being ripened in the frames.

When preparing to force them, as much of the old soil should be taken off as can be done without disturbing the roots, the pots washed and the drainage looked to, and a mulching of a good rich compost applied and rammed firm.

#### Cultural Rules.

A temperature of 40 deg. is plenty to start them, with a gradual increase as the plants start to grow. Plenty of air on all occasions, a dry cool atmosphere whilst setting, and plenty of heat and moisture when swelling are the main requirements of the strawberry. A good place to swell the fruit is in a vinery or cucumber house, as they revel in that moist atmosphere. It is necessary to go over the flowers with a camel hair brush to set them, thinning the fruit when set to about nine to a pot; sometimes twelve is left. Removing them to a cool airy house when ripening gives them a much better flavor than if kept in so much heat and moisture. I find a shelf in a carnation house an ideal place to ripen them, and at the time they are ripe (April), they do not do any harm to the carnations in the way of shade. It is necessary to support the trusses of fruit, and small forked twigs are the best means; if the stems get bent the fruit never gets a good flavor. Plenty of manure water and a few dressings of a chemical fertilizer will swell the fruit to a good size. Green fly and red spider are about the only insects to contend with, and it is unnecessary for me to repeat the methods to combat them. I find Marshall the best to force, being of good size and color, and the flavor is all that could be desired. I think one variety of strawberry is enough; you can keep up a more steady succession than with more varieties, and Marshall has filled the bill with me. I omitted to say that a temperature of 55 to 60 deg. at night will help them throw out their flower stems, giving a longer stem than when grown cooler.

I have endeavored to make clear the main points of fruit growing under glass, and if I have said anything that will be of service to anyone I shall feel more than repaid for the trouble taken. There is no more fascinating branch of our profession, and we have to go at the present time to the old country for fruit growers, but I don't see why in the future there should not be sufficient work done here to produce men trained in this work.

#### GARDENS ET BASSES-COURS.

The above is the title of a new fortnightly publication devoted to rural pursuits in France. It is edited by Albert Maumene and published by Hochette et Cie of Paris at 4 cents the number or \$0.80 per annum. It is issued on the 5th and 20th of each month. It is illustrated, but the typographical execution is hardly up to the standard of the average American periodical.

C. H. P.

F. H. Kramer has named his seedling rose, hitherto known as No. 116, Eva Cooke. The young lady thus honored is the daughter of George H. Cooke, the florist, of Washington.

### THE CYCLAMEN AS A CHRISTMAS PLANT.

#### CYCLAMENS

Thomas Roland, Nahant, Mass.

There have been some magnificent specimens of cyclamens of highly developed strains shown at the spring exhibitions, particularly at Boston. These plants, however, are usually two years or more old and, as every grower knows, their production with a mass of bloom in April or May is not remarkable. The plants shown in the picture are, however, unusual, as they are but fifteen months from seed and demonstrate the possibilities with the cyclamen as a Thanksgiving Day or Christmas flowering plant. Thos. Roland, Nahant, Mass., recognized as one

of the most skilful plant growers in this country, was awarded a bronze medal at the National Flower Show for his cyclamens shown early in November. We might add that the plants illustrated are not merely a few selected from the many, but are just a fair sample of the thousands which fill three houses, ready for the Christmas demand. So well-liked are these in the Boston market that 8-inch specimens are readily taken at \$36.00 a dozen by the leading retail stores and, no doubt, when other localities can show them, they will find an equal approval.

#### CHRISTMAS AT CRAIG'S.

Philadelphia ought to be thankful. Not every town has within arm's length the wealth of well-selected and skilfully grown flowering and foliage plants that are to be found in readiness for every holiday at the big Craig establishment. In many respects, other than the magnetic personality of its gifted proprietor, this place is unique and a visit to it is an inspiration.

At present, the most attractive sight is probably the Lorraine begonias which are seen in great quantities and remarkable uniformity all the way from little 3 in. pot size for basket filling, up to specimen plants big as a half bushel measure. Cyclamens are fine, as usual, although the recent muggy weather has been rather hard on them. There are azaleas, oranges, ardisias, dracaenas and all the other good things usually provided for Christmas at all well-conducted plant establishments, but the two specialties of this place, crotons and *Ficus pandurata*, are an attraction duplicated nowhere on this continent. Of the great luxuriant rubber with its fiddle-shaped leathery foliage there is a veritable tropical forest, and Mr. Craig says that he finds it impossible now to keep up with the demand for it.

As for crotons, they are simply beautiful. Craigii, the brilliant yellow variety, with its 3-lobed leaves, catches the eye the moment one enters the house. The two best of Mr. Lonsdale's phenomenal batch of seedlings, mentioned in our former notes, have been named Ed. Lonsdale and Robert Craig. They are somewhat alike, with bronzy red and orange entire foliage,

but their special claim to superiority is their free and rapid growth. Mr. Craig asserts that in a selection of the best five crotons these two varieties would have to be always included.

Leaving the plant houses, a glance into the carnation houses will prove interesting. There are several seedlings of unusual character in which high hopes are centred. One is a pure white with outside petals almost smooth-edged, but centre petals deeply lacinated, producing a pleasing frosty effect. Another is scarlet, a great bloomer and, compared with Beacon which is growing on the adjoining bench, it is less grassy than that popular variety and seems to be considerably ahead of it in brilliancy of color. Another seedling which promises great things is what might be called an improved Enchantress. The color is slightly deeper with a suggestion of stripes through the petals, and the flower is higher in the centre and better modeled than Enchantress. It is also very fragrant. A sport from White Perfection is seen, with color of Enchantress and a clear, soft, satiny finish, and all the character otherwise of the parent. The three seedlings above mentioned are the entire saving out of a block of 800 under number. So they ought to be good!

Wellesley, Mass.—Among the notable gifts to the botany department of Wellesley College recently announced are the lichen collection of the late Clara Eaton Cummings, specimens from Mrs. Maud C. Wiegand, 100 European specimens from Mrs. Frances L. Ferrero, and \$500 from a donor whose name is withheld.

## The Moving of Two Iron Frame Houses.

WM. SIM, CLIFTONDALE, MASS.—EBEN JORDAN, WENHAM, MASS.

Wm. Sim's House, 43x200, at Cliftondale, Mass.

The practical portability of the iron frame house of sectional construction, was demonstrated in two very interesting instances this season—William Sim, the sweet pea grower, bought an erected house 43 feet wide and 200 feet long, from T. T. Vandervere, Concord, Mass. Mr. Sim's own men took the house down, loaded it on the cars and re-erected it at Cliftondale, just outside of Boston. With a house of this width, having such long spans of unwieldy rafters to handle, its erection by practically unskilled men is certainly interesting.

Mr. Sim, like our Western friends, does not figure the size of his range as so much glass surface—but as "covering 100,000 square feet of ground space" or that "it takes 375 gallons of paint to go over it one coat." The steam heating arrangement is somewhat of a departure, as all the pipes are placed on the sides and all flows feed from an 8 inch main at one end of

houses, and directly into return at the other end. All flows are valved at each end so any number of pipes can be used.

One 3-inch return, which is placed outside the houses in a plank-lined conduit, carries all the condensation to the automatic pump and then back into the two 125 H. P. boilers. Mr. Sim says, "contrary to impressions, there is

sixty miles to Wenham, and there re-erected. Aside from the replacing of the cypress benches and adding a connecting passage between the work-room, the range in its present location is unchanged.

The new benches for the rose house were made with deep sides for 8 inches of soil, it being the idea of Mr. Abraham, the superintendent, that plenty of room should be had for top dressing where the plants are carried over. He raises his cucumbers and melons in hills without any additional soil in the benches.

Here are two notable examples of the portability of the iron frame greenhouse. Not that any one builds with the idea of removal, but it certainly would seem to be an advantage to have a construction that can be removed with least trouble and expense, should the necessity arise—one in which the frame goes together entirely with bolts and screws and, because of the method of attaching the bars at both plate and ridge, with a sash bar clasp, can be easily unscrewed and taken down without any injury to the bars.

The Jordan Range as it Looked at Plymouth, Mass.

practically no variation in the temperature in any part of the house with his all-side piping."

The Eben Jordan two houses, each 24 feet wide and 12 feet long, which were erected seven years ago at Plymouth, Mass., have been torn down by Lord & Burnham Co.'s men and taken

As the Jordan Range Now is at Wenham, Mass.

# IT'S TIME

"To Make a Noise Like an Order,"

**IF YOU DESIRE OUR ADJUSTABLE PLANT STANDS**

for the coming Fall and Winter Horticultural Displays, as we are rapidly selling up our production until that time, and late comers will be disappointed.

**Prize winners this season for display and banking of plants will be those equipped with The Moore-Livingston Adjustable Plant Stands.**

With three sizes of stands all heights can be obtained from 6 to 48 inches.

If your seedsman or supply house cannot furnish them, write, phone, wire or cable us and we are "Johnnies on the spot" for a prompt reply as to where they can be obtained.

## OBITUARY.

### Henry Pearce.

Henry Pearce, a well known florist of Buffalo, died on November 21. He leaves a widow and three children.

### N. Studer.

N. Studer, one of the pioneer plant growers of Washington, D. C., died at his home in that city on November 23, aged 70. He was a native of Switzerland.

### Prof. J. G. Lemmon.

Prof. J. G. Lemmon, one of the best known botanists on the Pacific coast, died in Berkeley, Calif., November 24, aged 74. He is survived by his widow and a brother who resides in Michigan.

### Peter M. Novik.

The mangled body of Prof. Peter M. Novik, a Norwegian instructor in horticulture at the Maryland Agricultural College, was found on the railroad track at Hyattsville, Md., on Wednesday, Dec. 9.

### W. J. Beatty.

William J. Beatty, born in Belfast, Ire., in 1827, died at his home in Pittsburgh, Pa., November 24. He came to this country in 1850 and was actively engaged as a nurseryman and gardener for many years.

### Walter Slade.

Walter Slade, who for many years carried on the florist business at Franklin, Mass., died in Attleboro, December 5 after a brief illness. He was 63 years of age, and leaves a widow, two sons and two daughters.

### Archibald J. Taylor.

A. J. Taylor, aged 45 years, of Burlington, Vt., was killed on Saturday night, Dec. 5, in an automobile accident. Two other gentlemen who were in the auto with him were seriously hurt—one of them probably fatally. Mr. Taylor, who has been for many years engaged in the florist business in Burlington, sold out three weeks ago to W. F. Peters and was preparing to start on Dec. 7 on a trip to Florida with his wife and ten-year-old daughter.

### John Baker.

John Baker, superintendent for Philip Dexter at Manchester-by-the-Sea, Mass., was killed Dec. 13, by a

premature explosion of dynamite. Mr. Baker was born Feb. 22, 1858 of old Puritan stock. In early life he was engaged in saw-milling and farming pursuits, later in dairying and market gardening. For fifteen years Mr. Baker has been superintendent of the Essex County Club grounds. Recently he took charge of road building, etc. on Mr. Philip Dexter's estate. He invented the Baker Horse Lawn Shoe. Mr. Baker took an active part in

JOHN BAKER

public affairs. He was Past Grand of Magnolia Lodge, I. O. O. F., treasurer of the North Shore Horticultural Society and chairman of the show committee. He was one of the workers who inaugurated the tent shows held on the Essex County Club grounds.

The funeral was at the Congrega-

tional Church, Sunday afternoon, attended by the Horticultural Society in a body, also Magnolia Lodge, 149, I. O. O. F. The burial was with Odd Fellows' rites.

He leaves a widow and six children.  
**ROBERT A. MITCHELL.**

### Mrs. Maria Gertrude Kresken.

Mrs. Maria Gertrude Kresken, wife of H. A. Kresken, died at her home, 808 Vine street, Cincinnati, Tuesday, Dec. 1st. A short time before her death she suffered from a stroke of paralysis from which she failed to rally. The body was incinerated at the Cincinnati crematory Friday, Dec. 4th.

Mrs. Kresken was one of the pioneer florists of Cincinnati, having occupied the same store on Vine street, near 8th, for about 36 years. The funeral was largely attended and there was a wealth of floral tributes expressing the love and sympathy of the florists of this city.  
**F. W. BALL.**

### Martin R. Smith.

It is with sincere regret that we record the death of Martin R. Smith, President of the National Carnation and Picotee Society, at his home in Hayes, Kent, England, on November 8. Mr. Smith was known on both sides of the water as the raiser of border and Malmaison carnations, and a long list of this specialty attests to his painstaking efforts.—Childe Harold being his first success and John Ruskin his last effort. Mr. Smith was among the first sixty horticulturists who received the R. H. S.'s Victoria Medal of Honor. He was a genial, kindly, unassuming gentleman, and will be a great loss to horticulture.

## PLANT BULBS IN THESE WINDOW BOXES

They are as useful for winter indoors as for summer outside. They are self-watering and will set without minding. All you need is to show them to your patrons.

**THEY ARE GOOD CHRISTMAS SELLERS**

Water your needs retreating but once in two weeks. Made of galvanized iron. Rust proof, leak proof, beautifully finished, and will last for many years. Made in all sizes.

**Send \$2.00 for Sample Box**

37-in. long, and see how quickly you can double your money and also increase the sale of your plants. Illustrated booklet sent free on request.

## CHRISTMAS TRADE IN PHILADELPHIA.

And Some News Items from That Busy City.

Growers of flowering and foliage plants for the Christmas trade have been busy the past week packing and shipping their early orders. There is a good demand, and the choicest stock is being rapidly picked up in some lines, notably in cyclamens and poinsettias in pots and pans.

Palms are going unusually well. The Joseph Heacock Company and others making a specialty of this item, are well pleased with trade so far and say the advance bookings are away ahead of last year. Mr. Heacock gives exceptional value in his Kentias, especially in the "made up" pots, which have come to be leaders among the standard Christmas favorites.

Dennis T. Connor, of the Lord & Burnham Co., left for Baltimore and Washington on the 7th inst. He reports a revival of interest in building and supplies, and a hopeful outlook not only in this territory but further south.

Godfrey Aschmann is one of the busiest men in town, waiting with his perennial Christmas smile on the crowds who visit his establishment daily from all over the country. All wonder how he can do things so astonishingly cheap and good, and are often surprised to find that the goods are just as advertised. When Mr. Aschmann offers a fifty-cent araucaria in HORTICULTURE it is still fifty cents when the customer gets there, and not a dollar as some of his chagrined competitors try to make out.

Ardisias are a little green as yet but will be just right for Christmas, as they color up very quickly. We saw some very fine at Craig's.

The trade in cut boxwood has assumed important dimensions. The Pennock-Meehan Co. seem to be headquarters for this, if one may judge from the hundreds of barrels, boxes and crates of it constantly being rushed off from the shipping department.

Our good friend Anton Schultheis, of College Point, N. Y., must have been getting some good orders from Philadelphia on his last week's offer of Ericas, etc., in HORTICULTURE, to judge from the excellent showing many of our wide-awake florists are making of this here.

Holly, mistletoe, lycopodium and

other green headquarters, is as usual around Michell's, where Philip Freud is working night and day to get off the orders. A new idea this year is assorted boxes of berried greens, etc., all ready to take home. Holly is excellently berried and well-colored this year.

## CHICAGO'S CHRISTMAS OUTLOOK.

A series of trips in and about Chicago shows that there is plenty of stock for the Christmas market. It is a peep behind the scenes before the curtain goes up. Trade is rather quiet this week as it usually is preceding a holiday.

Anton Then, who grows both plants and cut flowers, has fine poinsettias and cyclamens that are in extra shape for Christmas.

Frank Beu grows cut flowers only, having about 50,000 carnation plants. His pompon chrysanthemum, Mrs. Frank Beu, which received mention at the Flower Show, is still in excellent condition and Mr. Beu expects to cut blooms for the holidays. It is full, of a very deep yellow, and makes an ideal pot plant.

Mr. Collins of the Parkside Greenhouses will add to the Christmas supply with cut poinsettias and nice azaleas and cyclamens.

At Sinner Bros. it looks now as if Richmond rose would be especially fine for the holidays. Mr. Sinner considers Victory, White Perfection and Aristocrat three of the best carnations for general purposes. He finds Aristocrat will stand more unfavorable conditions in the field than Lawson.

N. C. Moore Co. have only a small plant but will have some good carnations and green stock.

The Geo. Wittbold Co. is offering among other things exceptionally fine Lorraine begonias. Mr. Wittbold thinks the outlook for the winter is decidedly good.

At Sam Pearce's place on the North Side we find the azaleas are unusually advanced for this time of the year and poinsettias, lilies, Roman hyacinths and Paper Whites all in excellent shape.

Ernest Oechslein has a well established business at River Forest. He grows plants only and his Christmas stock consists mostly of cyclamens and poinsettias. It would be hard indeed to grow too many of these plants for the Chicago market at the holiday season.

Bentley & Co. say that the prospects for a fine cut of roses are very promising. Brides, Bridesmaids and Killarney roses will be in good crop. The supply of Beauties will be limited; carnations will be of excellent quality. Extra fine mignonette is in sight as well as sweet peas.

A look in at Wiator Bros. plant shows there is plenty of good stock here. They specialize in roses and carnations.

Zeck & Mann grow roses and carnations. Richmonds and Killarneys promise to be especially fine for Christmas.

Frank Oechslein has his stock in prime condition for Christmas. The poinsettias number well into the thousands and both in pots and pans are even better than usual. Azaleas are very good. Simon Mardner, Vervaneana, Hexe, Mme. Petrick and Deutsche Perle are the leaders. Cyclamens are at their best, strong and well covered with bloom. Primula obconica and Lorraine begonias, ardisias, cherries, peppers and oranges are exceptionally fine. Mr. Oechslein is not given to much talking but he is very optimistic over the Christmas outlook.

Bassett & Washburn expect a record breaker in their new red carnation, O. P. Bassett, as they have benched 50,000 plants and they are in full bloom for Christmas. Giganteum and Formosa lilies are here in plenty. Beauties will be of fine quality but very scarce. In mixed roses Killarney and Richmond will be most in demand.

Peter Reinberg is cutting from ten to fifteen thousand of the new rose, Mrs. Marshall Field, per day and expects also to have a big supply of Beauties for Christmas.

J. A. Budlong grows for cut flowers only. His place is well stocked with Maid, Bride, Richmond, Killarney and Beauty. In carnations, Mr. Budlong's Enchantress, White Perfection and Aristocrat promise a big crop for Christmas.

Poehlmann Bros. are cutting twenty thousand carnations daily; twenty-five to thirty thousand lily of the valley are ready and no end of lilies. It looks now like a big cut of Richmond, Killarney and other tea roses. A few chrysanthemums will be left of the Merry Christmas variety.

Vaughan & Sperry, Percy Jones, Ed. Winterson and the rest of the commission men are all ready for big things. Charles McKellar specializes in orchids and promises a rich assortment.

***Prepare For Christmas!!! Open Your Eyes!!!***

**Biggest cut in Araucarias the world has ever seen. Just think!! CUT THE PRICE IN HALF, so low as to allow the entrance of this noble Evergreen Decorative Plant to be the welcome guest of every household at Christmas. ## A WEST VIRGINIA ESTATE.

A few days ago I had the good fortune to visit the beautiful home and estate of Mr. E. W. Oglebay in West Virginia. It is not my intention, in these few lines, to give a description of all I saw there, in such a short article I could not do justice to even one of the several departments, over each of which an expert presides, under supervision of the general manager.

Rome was built on seven hills, and one could almost say that Mr. Oglebay's country home at Waddington Farms, Elm Grove, West Virginia, occupies a thousand hills with a thousand valleys situated as it is in an ideal position, and at such an elevation where hills and valleys far and near are seen in every direction.

When this, one of the largest Colonial houses and estates in the South, came into the possession of Mr. Oglebay, it was at once enlarged, beautified and embellished to such an extent that it is now one of the most perfect country homes in America. No money has been spared in building good drives, ideal lodges, and gates, and laying out very extensive pleasure grounds, shrubberies, etc., where every desirable flowering and ornamental tree and shrub both deciduous and evergreen have been planted.

A Pergola at Waddington Farms

A drive sweeping to the east and some distance from the mansion faces first an annex for the overflow of guests, then a number of plant houses, —erected by Lord & Burnham, about which I shall have more to say. Then come the estate offices and assembling rooms for the heads of departments. Beyond, on the north side are the driving stables adjacent to which there is a large, square yard surrounded by unique and ideal buildings for the accommodation of the high bred stud.

In the extensive glass house among many interesting things, I had my attention drawn to some seedling carnations, two of which are of special merit. One has been named "Sarita of Waddington," the other, after the type of *Sorbetier de Malmaison* has not been named yet.

Mr. Oglebay intended this estate to be a model where college graduates and others can take a post-graduate course and become fitted by this special training to accept other such duties as the country or social department. Out of such men or men with sound practical training, many wealthy gentlemen from following Mr. Oglebay's example or, having done so, may come to the same in disgust.

GEO. A. BISHOP.

# Hardy Roses and Ramblers

## FOR FORCING

The right time to buy Roses is when they are fresh and well-ripened. Roses potted up in the Fall or late Winter become better established and force better, and are far more satisfactory in every way, and you can retard or force at your leisure. We recommend the American-grown "Ramblers." Don't attempt to force imported Ramblers; the general experience is that they are failures.

## HARDY PERPETUAL ROSES

We offer extra strong forcing two-year old dormant, low budded stock, in the following varieties, TRUE TO NAME:

Price, 75c for 5 (of one variety), \$12 per 100, \$110 per 1,000, (Immediate delivery.)

Alfred Colomb. Carmine.  
Anne de Diesbach. Bright carmine.  
Ball of Snow. Pure White.  
Baronne de Ronstetten. Dark crimson shaded.  
Baroness Rothschild. Satiny pink, extra.  
Captain Christy. Delicate flesh color.  
Duke of Edinburgh. Bright vermilion; very fine.  
Fisher Holmes. Dark rich scarlet.  
FRAU KARL DRUSCHKE. The finest white in existence.  
General Jacqueminot. Rich velvety crimson.  
General Washington. Beautiful red, shaded carmine.  
John Hopper. Beautiful rose pink.  
La France. The finest light pink.  
Margaret Dickson. White, pale flesh center.  
Magna Charta. Clear rosy pink.  
Mme. Gabriel Luizet. Light satiny pink.  
Mme. Plantier. White.  
Mrs. John Laing. Soft pink, most desirable variety.  
Paul Neyron. Beautiful dark pink.  
Princess Camille de Rohan. Velvety crimson.  
Ulrich Brunner. Cherry-red.

## CRIMSON RAMBLER

American Grown, The Only Stock for Forcing.

Large, heavy plants, two years old, mossed and packed in bundles of 10.  

	10	100
2 to 3 feet	\$1.25	\$12.00
3 to 5 feet	1.75	15.00
4 to 6 feet	2.00	18.00

## PHILADELPHIA RAMBLER

Extra Fine, American-Grown Stock.

	10	100
3 to 4 feet	\$1.75	\$15.00
4 to 5 feet	2.00	18.00
5 to 6 feet	2.25	20.00

## DOROTHY PERKINS

Resembles the Crimson Rambler, except in color, which is a lovely shell pink, holding a long time without fading. \$1.25 for 10, \$12 per 100.

## TAUSENDSCHON

The new Rambler Rose. The name translated means a "thousand beauties." Color, beautiful rose, shading to pink. \$2.25 for 10, \$20 per 100.

## LADY GAY

A seedling from the popular Crimson Rambler, which it resembles in habit and general effect. The flowers are of a delicate cherry pink color, which fades to soft white. Strong plants, field grown, \$2 for 10, \$18 per 100; extra strong, \$5.50 for 10, \$50 per 100.

## THE BABY RAMBLER

(Mme. Norbert Lavavasseur)

Strong field grown plants, \$1.50 for 10, \$15.00 per 100.

## THE TREE BABY RAMBLER

Grown as a Standard.

The popularity of the Baby Rambler has suggested the growing of it as a tree or standard. The variety is too well known for description enough to say, it retains all its characteristics of free blooming qualities, etc. 35c. each, \$3.50 per doz., \$25 per 100.

## TWO NEW BABY RAMBLER ROSES

CATHERINE SEIMETH. A White Baby Rambler Rose, larger and better flowers than the type. \$2.25 for 10, \$20 per 100.

BABY DOROTHY. The Pink Baby Rambler, and found to find favor where the Baby Ramblers are popular. Same color as Dorothy Perkins. \$2.75 for 10, \$25 per 100.

# Forcing Gladiolus

## Gladiolus Gandavensis Hybrids

Many florists plant these in boxes, or among their carnations, in the Winter. They are excellent for decorative purposes and realize good prices, either wholesale or retail. Gladiolus are a good catch crop and take up but little room. The following are the best for this purpose:

America. The flowers, which are of immense size, are of the most beautiful flesh pink color. \$4.00 per 100; \$45.00 per 1000.

Augusta. The florists' best white Gladiolus. First size bulbs, 1 1/2 inches and up. \$2.00 per 100, \$18.00 per 1000.  
Bulbs 1 1/2 to 1 3/4 in. \$1.75 per 100, \$16.00 per 1000.

Shades. Pure white and rose. \$4.75 per 100, \$45.00 per 1000.

May. Pure white, flaked rose, among the best for color. Selected bulbs. \$4.75 per 100, \$45.00 per 1000.

Branchlevensis. Pure white. Selected bulbs. \$4.00 per 100, \$40.00 per 1000.  
First size bulbs. \$1.75 per 100, \$16.00 per 1000.

Boddington's White and Light Extra.

Selected bulbs, 1 1/2 in. and up. \$1.50 per 100; \$14.00 per 1000.

Bulbs 1 1/2 to 1 3/4 in. \$1.25 per 100; \$10.00 per 1000.

American Hybrids. A mixture of the choicest varieties of Gladiolus in cultivation. \$1.00 per 100; \$9.00 per 1000.

## Gladiolus, Colvillei and Nanus (type)

Plant some of these among your carnations; they will come in handy at any time.

Blushing Bride. Flowers are large, pure white with delicate pink spot. Useful for early forcing, 85c. per 100; \$7.00 per 1000.

The Bride (Colvillei Alba). This lovely white miniature Gladiolus makes a useful cut-flower for early Spring use; will stand forcing 75c. per 100, \$7.50 per 1000.

Queen Blossom. The most beautiful of all the Colvillei type of Gladiolus; the color is a lovely soft pink, on the order of the K. Perry rose. \$2.00 per 100, \$18.00 per 1000.

Ackermannii, Salmon orange, with white edges, edged scarlet, very pretty. 85c. per 100; \$7.50 per 1000.

## ASTER SEEDS—CROP OF 1908

**A New Branching Aster, Smith's Peerless**

This new variety originated with us three years ago. In offering this new Astor to the trade we have fully considered those now in commerce, having grown the branching varieties known as Semple's, Vick's, Henderson's Invincible and Carlson's.

Smith's Peerless surpasses them all in high grade blooms. Color pure white and so double that it is a very shy seeder. We have only limited quantity which will be sold in sealed packets only as follows: Retail pkts. (about 40 seeds) 25c. Trade pkts. (about 250 seeds) \$1.00. In the standard sorts we have the best in Early, Midseason and Late varieties. All our own grown and guarantee them unsurpassed in quality, purity and vitality. If interested write us.

Seed jobbers requiring larger quantities will be quoted on application

**ELMER D. SMITH & CO.,** Successors to Nathan Smith & Son, Adrian, Mich.

Now is the time to compare notes on catalogs and to plan for 1909.

¶ The ideal catalog can only be produced on the lightest and most opaque paper consistent with good printing results.

¶ That is just what B. P. F. Catalog Paper is made for. We have a handsomely printed sample to prove our claim that the use of B. P. F. paper on your catalog will increase sales and decrease cost of postage and paper.

MAILED FREE ON REQUEST.

**GEO. W. WHEELWRIGHT PAPER CO.**

95 Milk Street, Boston, Mass.

## Seed Trade

**Cincinnati, O.**—J. Charles McCullough has moved his office and cleaning department to 5th and Lock streets.

**Santa Clara, Cal.**—C. R. and L. M. Kimberlin succeed to the business of J. M. Kimberlin, retaining the title of the Kimberlin Seed Co.

**New York, N. Y.**—W. E. Marshall & Co., have annexed the adjoining store and are now well prepared to meet the demands of their increasing business.

**Springfield, Mo.**—The Planters' Seed Co. has again increased the floor space and now occupies the entire building at 220 and 222 W. Walnut street.

**John Chas. Badger of John Badger & Sons, Gordena, Cal.,** started Dec. 1st for a two months' business trip throughout the Eastern States and Canada.

**Mr. Eugene Schaettel, representing Messrs. Vilmorin, Andrieux & Co., of Paris, France,** who has been in this country several weeks, will sail for home on December 12th, on steamer Kaiserin Augusta Victoria.

The sweet pea farm of John Badger & Sons, Gordena, California, is in full operation, sweet pea sowing having begun. In addition to their own 330 acres they have rented another 220 acres which is devoted entirely to the growing of lettuce and sweet peas.

The Aggeler & Musse Seed Co. Los Angeles, Ca., have taken in the adjoining store which is 40 ft. by 125 with a warehouse in the rear. They have added a new department of tree and palm seeds, nursery stock and flowering plants. Their nursery yard is at 1635 Millard avenue under the management of P. B. Eastrada.

Vice-Consul C. L. L. Williams of Chefoo reports, concerning American horticultural interests in China, as follows:

All kinds of flower and garden seeds should be on sale here. The seeds now of-

fered are not up to the standard, the variety is very limited, and the price asked is prohibitive, so far as the Chinese gardeners are concerned. No effort is being made to sell foreign seeds of any kind to the Chinese, who must ultimately become very large buyers. A nursery agency should be established in two or three Chinese ports from which salesmen could be sent out and goods delivered to any point.

Special Agent Roland R. Dennis reports that an official of a European Government purposes establishing an experimental station supplied with all modern machinery with a view to developing the agricultural resources of the country. To insure success he desires to secure the services of a thoroughly practical agriculturist from the United States to take entire charge of the station. The salary will be \$4,000 a year, with a contract for a term of years and free rent, together with all additional labor needed. Special knowledge of the raising and utilization of corn is desired.

## PLANT IMPORTS.

Entered at New York, Nov. 18th to 24th, 1908:

From Antwerp: H. F. Darrow, 4 tubs laurel trees; Maltus & Ware, 2 cs. bulbs; C. B. Richards & Co., 258 pgs. trees and plants; Ter Kuile, 2 cs. plants.

From Havre: H. F. Darrow, 4 pgs. plants, 159 pgs. seed; Fountain Grove Vineyard Co., 9 pgs. plants; Vaughan's Seed Store, 129 pgs. seed; Sundry Forwarders, 1133 pgs. seed.

## SALT ON THE TAIL OF AN IDEA.

Read before the Florists' Club of Philadelphia, Dec. 11, 1908.

Gentlemen of the Florists' Club: With your kind permission I am going to tell you tonight how I put "Salt on the tail of an idea." We all know success is the result of hard work, no luck in it, simply getting right down to it and hammering away at it; not only hard work but energy directed in the proper channels, focused in one direction, concentrated until it crystallizes into *Success*.

### Ideas Are Crystallized Thoughts.

So it is with *Ideas*. First you see or hear, then you *Think*, then you *Remember*, then you *Imagine*. If you drop either of the four after you have seen or heard, you will *Never* have an idea. *Ideas* are crystallized thoughts, and you will not have ideas unless you see or hear. Lots of people see things but do not see. To get ideas we must first cultivate our power of observation; for instance—I want to get a new wagon, I do not know what I want; but I do know I want something smart and different from anything about town. I start the observation car going, and every fine wagon that goes by me I notice. I see wagons everywhere, partly unconsciously. Then I start the tinkery going, and I think about what I have seen, then I remember through thinking about them, then after thinking and remembering what I have seen I start the imagination factory going. Oh! I will get all kinds of crazy notions in my head, but gradually I will have to sift them out one by one, and finally settle on one shape or style, but the *Idea* is not yet clear. Now I have to work harder, I have to get a little salt. I drop a little on the tail of that last thought or idea and it becomes a little clearer. Now I throw out a few more fantastic ideas, and in a few more days I have to add a little more salt, and gradually I come to something entirely different and yet practical. You can get this result on any subject if you simply hang to it, and keep on adding salt.

### Creating Ideas.

Now to create *Ideas* in any specific line it is necessary to surround yourself with the proper environment—the right sort of atmosphere. You will not get sporting ideas in a church, neither will you get moral or religious ideas in a saloon. If your hobby is baseball, and you are a very enthusiastic score-card man you will not see anything else in the newspapers or on the street but score cards. If automobiles are in your mind you will see every new automobile on the road, know all about transmission and gear and the resiliency of the tires. So I am trying to show you how very necessary it is to have the proper environment and atmosphere about you to make a success in any given line. You can draw from it continually, you have something before you to see, to think about, and to exercise your imagination upon when you rest at night.

Ah! gentlemen, this is, I think, the great secret of *Ideas*. Your outer office, the eyes and receptive brain, are busy all day seeing things and taking them in, storing them up until you rest. Then your inside office, the subjective brain takes it up, works it out, moulds your thought, your imagination, your

enthusiasm into the crystallized product, *Ideas*.

### Enthusiasm Essential.

Right here is another important factor I almost forgot to mention, *Enthusiasm*. It is high impossible to take the initiative, to originate anything, to get an idea without enthusiasm. You must believe in yourself, in your goods, and in the appreciation of the general public. I do not care who you are, you are bound to get credit for any really good work or thought you create. Right here I want to tell you about my Surprise Box. The idea was the result of observing and taking up a remark; a gentleman, a good spender, came into my store, nothing was too good for him, but he was always looking for something better. One evening, after buying a corsage bunch of violets and orchids worth \$20.00, and while I was arranging it in what I thought a very good looking violet box, he leaned over the counter and said, "Why don't some of the florists get up something new in the way of a fine box that would present the flowers to the best advantage as soon as it was opened?" My ears caught it, I thought about it that evening going home in the car, I don't believe I would have seen a five dollar note on the floor of the car that night. I saw nothing but boxes, boxes, all kinds of boxes. It took fully one year thinking, remembering, imagining to produce the Surprise Box.

While I was experimenting with this, the box-maker first of all said I was crazy, "another one of these fan-dangled ideas of yours." But I said, "Never mind, you make it this way." "But it will never work," he replied. "Make it," I said, "I will pay for it." I had confidence in my goods, in myself, in the man who wanted something to present the flowers to their best advantage. I first used paper; it would not work as the dampness of the flowers made it soft and limber; then I used regular doilies, they were too stiff, so I bought lace and had them made our own style and it worked perfectly. I sent the first ones to a few prominent people and they have been friends and customers ever since. I had confidence in the public, I was enthusiastic about it and told them so and they became enthusiastic too and bought them.

### About Flower Boxes.

Speaking of boxes:—I have just brought a few with me to demonstrate the evolution of the florists' boxes. When I first began my experience in the business, every now and again my boss would say, "Charlie, run up to the shoe store and see if they have any boxes for us. If they haven't go across the street to McCreary's and get some collar and shirt boxes." I can well remember what acrobats those carnations and roses were; they had to bend the crab, and do every other stunt, squeezed in tight as in a coffin. Then after I got a lot of boxes I had a steady job pasting on our labels over the shoe merchant's. After this we had boxes made with nice green paper and gold trimming. Once in a while we would change to yellow with white labels. Then the ever-handy cheap folding boxes came into use. When the board got wet the string would cut through and hold the flowers to the lid. At

last we had boxes made in different sizes to suit our goods, all but American Beauties. You can to-day see fine Beauties coming out of fine shops with the end cut out of the box and the stems sticking out as long as the box itself. What right has a florist to send roses out in this style? Would a dry goods merchant do it? Can you think of any other line that would? It is the first impression that counts every time and especially in our business you can't command a price if you yourself do not value the goods worth a decent box.

*Ideas* are always created through a desire for something: *Think, Remember, Imagine*. First you think about what is wanted. You see things suggestive. You remember them, you build on them, you imagine; put on a little more salt and you create.

### A Need Must Precede an Idea.

We had a lot of one-sided begonias, then the thought came, "what can I do to enhance the value of these plants to sell them at a good profit?" Mats were old, heavy and unsuited to the plant. They needed some kind of a crazy basket to hide the defects. I walked through the supply houses but couldn't find anything to suit. Must make it myself. I am not a basket maker, but here she goes; got a basket maker to make a skeleton and we did the rest; here is your plant worth four times the price in the basket and something new in the bargain. But it took enthusiasm, thought, confidence in the goods, in ourselves, in the public to create it. In creating ideas you will get lots that are not practical and that may be ridiculous or fantastic. But they are divided into two distinct classes easily defined and I have always found this is a good rule to observe:—An idea is only a genuine idea when it conveys your thought and your thought should come from some useful want or desire; there must be an excuse for doing it or twisting a shape in a certain way. It must express that thought to your customer without any explanation from you, then you have a genuine idea worth having.

### The Misuse of Ribbon.

I believe the use of ribbons with flowers has a great field and enhances the beauty and value of them. Remember that last suggestion, "value." A bunch or basket with an appropriate bow artistically placed makes it worth as much again, if you are not simply selling merchandise. But, put the ribbon where it belongs, where the eye suggests the need of something being tied. To put a red necktie on an araucaria is as bad taste as chiffroning an azalea with a lot of fussy stuff puffing out here and there. It does not do the azalea any good and wastes the ribbon. You can use some receptacle with the plant that offers an excuse to tie on a bow of ribbon and you at once have the satisfying effect on the eye. Lots of people will notice these defects but not really know what it is that does not appeal to them. They may buy them, but it will not have that satisfying effect on them as something that conveys and carries out the thought would have.

**Welch Bros.,** 226 Devonshire St., Boston

Phones 6267, 6268, 5419, Main

tions: I remember how it impressed me when a boy starting in the business. The word decoration carried with it the thought of one half day's hustle and bustle, the tearing out of the well-arranged greenhouse, breaking of pots, freezing of plants, and then the next day everything repeated, bringing them home. And all this for about as much as a tailor would charge for a good suit of clothes. The reason for this is, we sell our brains by the load, so much a load, plants, brains and work thrown in and get them all back again the next day. This idea of getting them back again is so impressed on the public that you will not get a good price for your flowers and work because you sell them by the load and get them all back. Sell them something they will keep; you do not want them back, and your customer will be satisfied to pay your price. It is the mental law of sale, something they will get for their money, belongs to them and which they have the desire to possess. Do not take it away the next day by the load. Take up cut flowers, use them everywhere, they can be used to good advantage in vases, clusters and garlands. Now I do not wish to be misconstrued; we do not want to eliminate plants altogether; we always want to use plants but let them be specimens, plants that you can set anywhere on their own merits.

Has it ever occurred to you how incongruous and bad taste it is to fill a house with a lot of stuff you would not otherwise dare show a customer individually? Using pot covers and pedestals that are anything but ornamental to a finely appointed house, removing all the subjects of art and bric-a-brac and building in place banks of plants. Fill vases with cut flowers, arrange them on the mantel and you will get a better price and will not have to take them back the next day.

#### Ideas Again.

You cannot get ideas or produce new

#### CARNATION MARCHIONESS.

Our illustration is taken from a photograph of a house of Marchioness, which originated with the late Louis E. Marquisee four years ago, and of which he thought very highly from the first for its full perfect flowers, high clove fragrance and splendid keeping qualities.

It comes in early and the flowers mature very quickly and is a wonderfully free bloomer: as a proof of this,

things if your surroundings are out of harmony with your soul. You must first get in line with your inner self and nature, then you must radiate that feeling, that sincerity, that enthusiasm to those about you. Create the atmosphere of happiness, advance good cheer around your assistants, elevate their thought and standing,

it is stated that over 3,000 perfect flowers were picked from one house during the month of October, and that last season strict count was kept of one bench, and the plants averaged 30 to 36 blooms each.

It will be disseminated in January, as Mr. Marquisee intended. There is not a sign of rust or stem rot to be seen, and Mrs. Marquisee would like to have all who are interested call and see it growing.

make them respect themselves, their business and you. Pay them well so they can say with pride "I am a florist." Then charge well for your goods and brains. That is the only way to evolve ideas. You, your assistants, your store must be in harmony with the most beautiful things of nature—flowers.

#### CARNATION GEORGIA.

Carnation growers should now visit the establishment of James D. Cockcroft, at Northport, Long Island, the home of the sensational new white carnation Georgia which is to be disseminated this season. This up-to-date establishment is devoted entirely to carnation growing and during the years of its development much attention has been given to the crossing and hybridizing of the best of the standard varieties and novelties, so Georgia is by no means a chance product. It is the result of a cross between Prosperity and Morning Glory. The plants are of vigorous habit and are now covered with a profusion of blooms of large size and ideal form, and calyx. Georgia will no doubt meet with an appreciative welcome from carnation growers. Mr. Cockcroft has 40,000 cuttings in the sand, one-half being Georgia and the other half standard varieties.

Boston, Mass.—Henry M. Robinson & Co. have just received the largest shipment of southern smilax and holly they have ever handled. Cut boxwood and galax are also in heavy receipt and indicate confidence in a largely increased holiday trade.

### THE MONEY IN HOT BEDS.

Hot beds and cold frames are used for these two objects: 1st, to get ahead of the weather and, 2nd, to get ahead of competition.

By growing plants in winter weather ready to set out half-grown in the spring just as soon as the ground will do, one gains half the growing season—a gain of one to two months.

By gaining one to two months the grower has flowers or vegetables to sell when they are a luxury and are worth two to ten times as much in the market as they would be when everybody has them.

The sash advertised by the Sunlight Double Glass Sash Co., of Louisville, Ky., in this issue, are half an inch thicker than the ordinary sash and are made of Louisiana Red Cypress, the most lasting and suitable wood for the purpose. Their main improvement over the ordinary sash is in the use of two layers of glass instead of one. Between these layers of glass is a dry air space 5-8 of an inch thick—a perfect non-conductor of either heat or cold. It lets the sunlight in to warm up the bed and does not let the warmth out. It does away with the use of boards or mats and saves the labor and expense of covering and uncovering when cabbage, cauliflower, lettuce, violets or any half-hardy plants are being grown, and even for tomatoes, peppers and other tender plants, it is said to be rarely necessary to put any covering over the two layers of glass.

A minute account of this sash is given in the catalogue of the above named firm and we advise our readers to send for a copy.

### CARNATION EDWARD.

This new carnation being disseminated by W. H. Shumway, Berlin, Conn., is four years old. It has attracted the attention of all who have seen it growing, and has

Carnation Edward.

received high recognition wherever exhibited. Mr. Shumway says: "I am impressed with its wonderful habit of producing flowers without being what is termed a 'cropper.'" While I do not claim it never splits, I claim that the percentage of good blooms is above the average, many of them measuring four inches and over in diameter.

"It is easy to grow and comes into bloom early. The flowers are deep pink, fringed petals and very full centre."

### BUSY PEOPLE.

To realize what the above title means, stroll in, or rather, make the attempt to peer in through the piles of holiday greens and specialties to be found just now at New York's two big depots for this class of material—The Kervan Co. at 113 and George Consonas & Co. at 50 West 28th street. Palms, smilax, log mosses and pines from Florida and Alabama, laurel and ferns from Massachusetts and Vermont, hemlock and spruce from Maine, ground pine from Michigan, mistletoe from across the Atlantic, galax and leucothoe from North Carolina and holly from Delaware and Maryland are constantly coming and constantly going out in big loads in bulk or made up in festooning and wreathing to supply the big florist trade in all directions. It is estimated that no less than four hundred million galax leaves are picked every year, mainly in the mountains of North Carolina. Of this enormous quantity New York alone uses seventy-five million and fifteen million are sent to Europe, and the industry is still growing. The bronze galax for this year have been received so far only in small sizes from plants growing on dry, exposed hillsides. The cold, frosty weather, which gives this prized coloring, reaches to the moist, shady woods where the big leaves grow, a little later. The early fall demand must, therefore, be supplied mainly from the cold storage stock.

Steelmanville, N. J. Walter Shane has named a new pink seedling carnation Mrs. Mary S. Fleming.

## THOMAS F. GALVIN, 124 Tremont St., Boston

### PERSONAL.

Miss Rogers has withdrawn from the Zenobia Floral Co., of Toledo, O.

John Byers, Chicago, has taken a position with the Alpha Floral Co., Kansas City, Mo.

A. F. Rice, of Rice Brothers, Minneapolis is confined to the hospital since last week with typhoid fever.

Charles Leopold, of San Francisco is now connected with the firm of Pelicano, Rossi & Co., florists.

Visitors in Boston: F. A. Danker, Albany, N. Y.; E. J. Harmon, Port-

land, Me.; Ed. Roehrs, Rutherford, N. J.

Samuel Beck of Boston, salesman for James Tulis, florist, was married on December 2, to Miss Rose Koral of Roxbury.

Jens Jensen, superintendent of the west side parks, Chicago, is to be promoted to the position of consulting engineer, it is stated.

Philip L. Carbone of Boston, was married on the afternoon of December 1, to Mlle. Y. Vonne Viaud, of Paris, France, who arrived on the Cymric.

Mrs. C. H. Maynard and Mrs. Wm Dilger started from Detroit Tuesday morning, Dec. 8, for Fort Wayne, Ind. to attend a meeting of the Ladies' Society of American Florists.

Among the visitors in New York last week were Mr. and Mrs. W. J. Palmer of Buffalo, who sailed on the Bermudian for a short period of recuperation in the balmy atmosphere of Bermuda.

J. K. Allen, the well-known wholesale florist of New York, has been re-appointed by the Mayor of Kearney, N. J., for a second term of five years as a member of the Carnegie Library Committee.

M. J. Crow has purchased an interest in the Leonard Coates Nursery Co., of Morganhill, Calif. In addition to a general nursery stock this firm is making a specialty of the eucalyptus, and will have 528,000 of this tree for the coming season.

Chicago visitors: Mr. and Mrs. J. J. Soper, Rockford, Ill.; J. L. Carney, Mishawaka, Ind.; J. A. Peterson, Cincinnati, Ohio; C. G. Dwight, Dwight Greenhouses, Janesville, Wis.; Jas. McHutchison, of McHutchison & Co., New York; Mrs. Sprickman & Son of Sandwich Greenhouses, Sandwich, Ill.

Miss Lottie Belle Heckman, daughter of A. C. Heckman, the Covington, Ky., florist, was married to Mr. Jas. Burden, Wednesday, Dec. 2nd. The knot was tied by the Rev. Mr. Williams. After dinner the happy couple left for Cynthia, Ky., to visit the parents of the groom. The wedding was a private affair, but nevertheless there was a large gathering of relatives present, and the home was beautifully decorated with smilax and chrysanthemums.

### THE WASHINGTON SEASON.

Despite the warm, murky weather which has prevailed almost ever since Thanksgiving, prices have not dropped. Everywhere trade is brisk, and with the opening of Congress on the 9th inst., the retailer will have no time to loaf. Violets still continue phenomenally scarce, and green is at a premium, especially plumosus, but with most other things the supply is fully equal to the demand.

### ALBANY PERSONALS.

W. C. King, the Steuben St. florist, is confined to his home as the result of an accident.

F. A. Danker and W. C. Gloeckner are in New York buying goods for the holiday trade.

A large mercury light has been placed in the store of W. C. Gloeckner.

Visitors at Albany: Wm. B. Lake, Philadelphia; Mr. Zirkman, representing M. Rice & Co., Philadelphia.

### NOTICE

We desire to notify the trade that we are the owners of United States patent No. 489,218 for Floral Figure which claims:

**R**

"A florist's letter or figure stamped from a sheet of paste-board or other suitable material, having an adhesive coating applied thereto and an outer covering of granules of sawdust appropriately colored to represent the petals of the Helichrysum arenarium substantially as described."

Letters which are a direct infringement of this patent are being put on the market and we intend to hold all who make or sell the infringing letters to strict account.

The lawful patented goods are in every respect much superior to the infringement.

### NEWS NOTES.

Oakland, Cal.—The flower store of H. M. Sanborn was entered by burglars on November 29 but nothing of value was taken.

Schenectady, N. Y.—The beautiful home of Fred A. Howe, florist, on Upper Union street, was completely demolished by fire on the evening of Nov. 30th.

Somersworth, N. H.—G. S. Ramsburg, florist, already has plans under-

way for the reconstruction of his burned buildings on a larger scale than before.

## Flower Market Reports.

Things are pretty quiet here, the local trade being especially dormant. Shipping calls are considerably better than the city demand, so far as cut flowers are concerned, but on greens of various kinds activity is seen on all sides. We noticed a good supply of that valuable sweet-scented orchid, *Zygopetalum Mackayi*, at Welch Bros. This good keeping choice flower should have a better appreciation than seems to be accorded it. Carnations, particularly the white sorts, hang fire, and there are accumulations in all wholesale marts. Of roses there is a supply of moderate proportions in all the regular varieties, but the demand is light. Richmond, Killarney and Bridesmaid have the best call. Violets show a downward tendency and can be bought considerably lower than last week. Quality on all lines is up to standard. The plant growers report a satisfactory advance trade in flowering and ornamental foliage stock.

An assortment of all kinds of weather the past week did not help the market to any extent, there being a good supply of everything and prices have been lower on many lines. Chrysanthemums are about gone, which has given the carnation and rose a much better chance. Killarney, Richmond and Bridesmaid roses have been received in fine quality; in fact everything is in good supply, with trade not active. The stock seems to remain with the wholesalers to carry along. Christmas greens and holly are in and a light demand has already arisen for this stock. The outlook is bright for a good hustling holiday business.

The second week in the Christmas month starts out decidedly dull. However, everything is in favor of an early improved condition. The weather is clear and cold, the stock is very fine and the supply is abundant, with a few exceptions. Violets of the single varieties as grown about Chicago are very late this year and will not be much in evidence till after the holidays. Rhinebeck violets are handled by several of the commission men. Chrysanthemums are nearing their close but some are still seen, noticeably the pompon variety. Roses are of good substance, color and stem. Carnations are plentiful with the strongest demand for red. The supply of green is good, *Asparagus plumosa* especially fine. The demand for orchids seems constantly growing. Mignonette, stevia and paper whites, are in, but sell a little slow. On the whole, what the Chicago market most needs is customers.

Business has been satisfactory, some stores experiencing very heavy days. Receptions and balls are putting some of the old-time ginger into the business. Prices are same as last year except on violets, which are somewhat higher, although the supply is better.

Thanksgiving business was as large if not larger than any previous year. The quantity of stock was much larger than ever before, but prices were lower. Judging

by the volume of stock sold the amount of business should have exceeded that of other years. Nevertheless all seem to be satisfied and full of hopes for Christmas. The supply of chrysanthemums has decreased considerably; one more week will probably see the last of them. The demand for roses and carnations has increased to some extent but with colder weather we all look for a decided improvement in demand for everything. Roman hyacinths, Paper Whites, lily of the valley and violets are holding their own; fancy sweet peas are finding ready sale. Poinsettias have made their appearance. There seems to be quite a demand for Southern smilax evergreens and Christmas festooning.

Conditions took a PHILADELPHIA backward step here last week and we regret to report that the market did not hold its own as compared with the rosy aspect of Thanksgiving week. There was a slackening of demand and the genial weather brought in far too much stock so that storage facilities in the wholesale districts were blocked to the doors. November prices were expected to hold firm and gradually go up for the rest of the season but instead of that things are back again to the October standard. Stock has to be super excellent at present to get anything like a price and the amount of prime, medium, and low grade awaiting buyers is enormous. About the only exceptions are violets and orchids. These hold their own well in view of general market conditions.

Cut flower business in the Twin Cities for the week past has been rather quiet. Roses are

practically off crop. Carnations are held back. Some scarcity in all graded stocks. My Maryland, Queen Beatrice and Mrs. Marshall Field do not appear in the market and are not yet grown here. Kate Moulton is grown extensively and brings a good price, ranging from \$6.00 to \$14.00 per 100. A few late chrysanthemums are still coming in, but they will soon be off the market. Sweet peas have not yet appeared.

## BUSINESS CHANGES.

Rochester, N. H.—Folsom & Neilson, florists, have dissolved partnership. Mr. Neilson goes to Portland.

San Jose, Cal.—Frank W. Street, florist, has accepted a position with the Fairview Greenhouse Co., Victoria, B. C.

St. Paul, Minn.—Will Bros. have taken the flower stand formerly run by T. Comandros in the Golden Rule department store. W. Topel is in charge.

Darien, Conn.—Thomas Crawford has leased the greenhouses on the Wuerz place and is putting them in good condition. He will continue his business at New Canaan and Mrs. Crawford will take charge of the Darien end.

Providence, R. I.—Brooks & Macrae have bought out the store and business of the late T. J. Johnston. Ed. Brooks has been manager of the store for years and Al. Macrae is the son of the late Farquhar Macrae, so both the young men constituting this firm have good experience and qualifications for a successful business.

## EVERYBODY KNOWS

that cannot be properly done without the aid of an accurate leveling instrument. Bostrom's Improved Levels, No. 2 at \$15.00 and No. 3 at \$20.00, are owned by all who KNOW to be the only Levels in the market which meet all the requirements, at the price.

Our guarantee is that every Level we sell, and satisfied users in every State in the Union heartily endorse every claim we make. Shipping weight 12 lbs. Description on request.

### NEW YORK MARKET.

Business in the wholesale flower markets has been anything but brisk. The disappearance, first of asters, then dahlias, and lastly chrysanthemums, from the field, on which successive predictions of genuine milk-and-honey days have been based, seems to have failed in the case of chrysanthemums as well as with the chrysanthemum's predecessors. While an occasional spurt has been experienced, lasting a few hours, or a day or two at most, yet there has developed nothing this season equivalent to the timely revival which experience in the past has led the grower and dealer to look for as a regular thing in late November, and it can truly be said that all the predictions of "old-timers" have gone awry and few know "where they are

at." It cannot be said that the product coming to this market is excessive in quantity, and it certainly is fully up to standard as to quality, so it only requires a bracing up of demand. In the meantime prices are favorable for the buyer and florists at a greater or less distance from the city, who are trying to slide through on local material of varying quality would do well to take advantage of the present opportunity to stock up with high-class gilt-edge material such as the New York wholesalers are carrying, at prices which afford them an ample profit—a course which should have a very spiriting effect on their local patrons. Read the big offers of the wholesalers in this issue and take a try. A little sensationalism just now is needed to set the wheels a-turning at winter speed.

# Buyer's Directory and Ready Reference Guide

Advertisements under this head, one cent a word. Initials count as words.

Display advertisers in this issue are also listed under this classification without charge. Reference to List of Advertisers will indicate the respective pages.

Buyers failing to find what they want in this list will confer a favor by writing us and we will try to put them in communication with reliable dealers.

**NATIONAL FARM SCHOOL.**

The season's work of this institution at Doylestown, Pa., is now in full progress and the results of the intelligent work of the students in the horticultural departments, under the able guidance of Professor Walter F. Fancourt, are already beginning to show. The first shipment of greenhouse-grown tomatoes was sent last week to Felix & Spatola, Philadelphia, and, being of better color and more suitable size than could be obtained elsewhere, brought 5c. per lb. over the market price. It pays to take pains and put brains into the work whether it be growing tomatoes or anything else. Mr. Fancourt has been highly complimented by the faculty on the success of his work so far, and has the brightest prospects for the future in his efforts to turn out a lot of able and efficient young men to tackle the horticultural work of the future.

G. C. WATSON.

A western grower who has made a big success in growing high grade asters—the kind that wholesale for six to eight dollars a hundred—sets his plants two feet apart in the rows, and the rows are 4 feet apart. An enormous quantity of water must be supplied from the time buds are formed. If extraordinary results are sought, plenty of room and plenty of water is the key.

**MASSACHUSETTS AGRICULTURAL COLLEGE.****A Short Course in Floriculture.**

During the past few years there has been an increasing demand for educational advantages along all lines of agriculture and horticulture. This demand has been felt keenly at the Massachusetts Agricultural College and this year a short course will be offered for the first time by the department of floriculture. That no holiday season may break into the course, lectures will begin Jan. 5, ending March 10, before the Easter rush begins.

This course is outlined with the idea of furnishing young men who have not the time to devote to a longer course, with the theoretical and practical considerations which are essential for success in floriculture. The course will cover as thoroughly as time will permit those aspects of the work of special interest to the growers. Greenhouse construction, greenhouse details, such as ventilators, gutters, benches, etc., greenhouse furnishings and equipment, heating, florists' crops, and florists' trade are some of the topics to be considered.

In addition to the regular lecture work of the course which is given by Professor E. A. White it is expected that talks will be given by experts in greenhouse design and construction, greenhouse heating; in growing special crops such as roses, carnations, violets, orchids, wholesale marketing, retail marketing, etc. The co-operation of several of the most up-to-date practical florists has been secured for these talks. This course will consist of five exercises each week.

The work given in soils and fertilizers, greenhouse insects and diseases of greenhouse crops will also be required of men electing this course. Because of lack of accommodations this year the course in floriculture will be limited to fifteen.

The cost of the course will be as reasonable as possible. Tuition will be free and the cost of board and rooms in private families varies from \$4 to \$6 per week. Board at the college dining room may be obtained for \$3.75. A circular describing fully these courses may be obtained of Prof. J. A. Foord, Amherst, Mass.

**NEW ART VOLUME ON GARDENING.**

An edition de luxe of a new gardening book is no rarity in these days and indeed we oftentimes wonder who it is that buys the many handsome books that are continually coming out. What promises to be one of special interest is entitled *An Artist's Garden, Tended, Painted and Described* by Anna Lea Merritt. With 16 full-page illustrations in colors by the author. The garden here described and illustrated lies in one of the most beautiful and quiet valleys of Hampshire. The book will be found serviceable, as it abounds in hints useful both for the beginner and expert in gardening. The author is an artist well known for her work, but it is an unusual thing for an artist to be also the gardener and the author of the book she illustrates. The price is \$5.25 plus postage.

C. HARMAN PAYNE.

**JACK ROSE DAHLIA AND A MILESTONE.**

"Jack Rose was also among the number but, owing to the cold nights which prevailed a short time ago, the color was not as good as I have seen, although it was still the color of Jacqueminot rose, when that great rose was past its best. Yet it was not 'Magenta,' as my good friend George C. Watson states in this week's issue of Horticultural he sees in it. He must have seen the Jack Rose Dahlia at a great disadvantage, but George is very much given to disputation. On one occasion one of his best friends accused him of disputing the figures on a mile post."—Ed. Lonsdale, in *Florists' Exchange*, Oct. 31.

What I said about the color of this new dahlia of Mr. Peacock's was simply that it looked to me more like magenta than a good Jacqueminot color, and that I thought Katherine Duer would beat it as to color. But I am quite willing to revise this opinion if, as I am now informed, the blooms from which my impression was formed were not at their best. It is but justice to Mr. Peacock to make this statement. As to Mr. Lonsdale's charge that I am by nature "disputatious"—I deny it. I always accept everything I am told without discussion. Threshing a subject out to get at the facts I consider an absolute waste of time. As for the milestone yarn—I deny that also. It was merely one of Robert Craig's inventions. But if one be on a journey and very tired it is sometimes hard to believe even a milestone. That I ever had the temerity to dispute any statement made by my grave and reverend seniors, Messrs. Craig and Lonsdale, may appear wonderful to them, but at least, it shows my courage and it is far better fun talking to them than with a milestone. You might as well talk to a milestone as with some people, but Messrs. Craig and Lonsdale are not in that class.

G. C. WATSON.

**DURING RECESS.****Chicago Florists' Club.**

This club instituted a new feature last Thursday evening in the shape of a Ladies' Night. It proved highly successful. About one hundred sat down at a luncheon in the banquet hall above the Union restaurant, where the club usually meets.

At the close of the repast President Kill heartily welcomed the members and guests, and introduced P. J. Foley, who after a few happy remarks announced the programme. This consisted of speeches expressing pleasure at having the ladies present, music of a high order and specially-arranged-for speeches by two men supposed to be newcomers among the florists' employees. These captured the house, being professionals in a humorous line. One was introduced as Mr. Roy Weed and in recounting his varied experiences as a "Weed" among the flowers so carried his audience with him that few suspected the joke being played upon them.

The meeting broke up just before twelve, and all wished that Ladies' Night should become a regular part of the club's entertainments.

### NEWS NOTES.

**Pittsburg, Pa.**—Harris Bros. have moved from Fifth Ave. to Market St.

**New Britain, Conn.**—The florist business of the late T. E. Bennet is being carried on by his wife.

**Spokane, Wash.**—Fire supposed to have started from spontaneous combustion in a coal pile, damaged the Barber greenhouses to the amount of \$200 November 30.

**Waukesha, Wis.**—The old greenhouses of Schneck & Bleise were destroyed by fire with a loss of \$2,500 on November 28. The new buildings, recently completed, were saved.

**San Fernando, Cal.**—W. J. Mann, the present secretary of the San Fernando Nursery Co., succeeds to the position of manager made vacant by the retirement of H. E. Middlekauff.

**Springfield, O.**—The Schmidt & Botley Co. has completed its organization by the election of the following officers: President, Adam Schmidt; vice-president, Robt. H. Botley; secretary and treasurer, C. W. Schmidt.

**Everett, Mass.**—Clifford Tilton, florist, was made the victim of a bogus check worker on December 8 to the amount of \$49. Floral pieces for a dead sister were purchased, and the name of the mayor-elect used.

**Chicago, Ill.**—The failure of the Fleischmann Floral Co. in New York does not affect the company of similar name in Chicago, as B. F. Rubel, the president, states that Mr. Fleischmann has had no interest in that business since 1903.

**Riverhead, N. Y.**—Arthur Lee's greenhouses in this Long Island village have been extended from year to year until they now number fifteen. The place is a good example of how to build up a local trade and develop a valuable clientele.

**The La Crosse Florists' and Gardeners' Association** has been formed at La Crosse, Wis., with seventeen charter members. Officers were elected as follows: President, J. S. Medary; vice-president, C. E. Schaefer; secretary, W. R. Ellers; treasurer, Paul Zoelner. Meetings will be held at Hotel Stoddard the second Tuesday of each month.

### IN BANKRUPTCY.

**Washington, D. C.**—J. J. Harty & Co., wholesale florists, are reported as failed, and Mr. Harty has disappeared from the city.

### MISCELLANEOUS WANTS

**WANTED**—*Alsophila australis*, in smaller sizes. State price and quantity in stock. J. F. Anderson, Short Hills, N. J.

## Troy's WANT Corner

### WANTED

Large Koster's Blue Spruce running from 5 ft. to 8 ft. high. State size and price and how many you can supply.

Write giving full particulars to

**J. H. TROY,**

Care "The Rosery,"

24 East 34th St., NEW YORK CITY.

### HELP WANTED

## GOOD MEN

When you need good men, skilled or unskilled, Write:

**THOS. H. BAMBRICK**

34 South 7th Street Philadelphia

Help of all kinds, including that for Florists, Nurserymen, Seedsmen and the Horticultural trade generally.

## SALESMAN WANTED

For nursery stock from an old established nursery. Must have experience and knowledge of the business. Good salary and expenses. Address J. K., Horticulture.

**WANTED**—A working nursery foreman and salesman, one who understands the value of imported plants. Reply to Salesman, care this paper. Correspondence considered private.

**HELP WANTED**—Experienced man to take charge of our plant and bulbous department. S. J. Reuter & Son, Inc., Westbury, R. I.

### SITUATIONS WANTED

**SITUATION WANTED**—By practical landscape gardener and florist: private or commercial; middle aged; married. J. Hodge, 44 West St., Fitchburg, Mass.

**SITUATION WANTED**—In some well established greenhouse plant or in some florists' store, in or around Boston preferred. A-No. 1 references. Address H. G. Hampe, 19 Spring Park Ave., Jamaica Plain, Mass.

### FOR SALE

## FOR SALE On Favorable Terms

The Mosbaek Greenhouse Co. offer their plant at Onarga, Illinois, for sale. This plant consists of Eight Modern Greenhouses each 25 x 100 ft., well equipped with Ferns and Bedding Plants of all kinds, and several acres of Perennials. Also a good sized dwelling house and five acres of land adjoining; also leasehold for 47 acres of additional rich land, about one-half of which is set to Asparagus and Plant. The business is mainly wholesale—very little retail business being done. Any one interested will be furnished with detailed information on application to

**THE MOSBAEK GREENHOUSE CO.**  
ONARUA, ILLINOIS

**Anything of Value**  
to the profession  
**CAN BE SOLD**  
through advertising in  
**Horticulture**

### Why My New Curved Iceless Eave is Far Superior to Anything on the Market Today

- 1st. No sash bars incased in iron, thereby eliminating all danger of bars decaying.
- 2nd. Can be used in conjunction with iron frame construction, thereby doing away with that very objectionable feature, "columns."
- 3rd. Roof bars with drip grooves, which act as conductors to carry away the condensation: Result, the driest roof ever used for greenhouse purposes.
- 4th. **THE MOST IMPORTANT OF THEM ALL.** The very small increase in cost over the ordinary style of construction which makes it possible to be used for commercial as well as private purposes.

**William H. Lutton,** Horticultural  
Architect and Builder  
West Side Ave Station (C.R.R. of N.J.) Jersey City, N.J.

# MERRY CHRISTMAS

Here we are again at Christmas and another year almost gone. It is time to be making plans for next season and taking thought as to how this year's work can be improved on in 1909. If you have greenhouses you are probably thinking of making an addition; if you are a retailer you expect to make your store nicer and neater than ever, possibly build a conservatory or a show house. If you have anything in the greenhouse line don't forget to consult us before you build and get our prices. We can interest you in our material if you only give us a chance. . . This is our 40th successful year. We wish you all a Merry Xmas and much success for the New Year.

# BUILD GRAPERIES Now

**H**AVE grapes the first year—grow them in pots while your border planted canes are getting established, ready to bear next season. This pot was grown in one of our Curvilinear Vineries, by John Ash at Miss E. J. Clarke's range, Pomfret, Conn.

His potted fruit house is also our Sectional Iron Frame Construction. You know the curvilinear house gives a chance for longer vines, or more head room for the potted fruit. The house below was recently erected at Taunton, Mass. A splendid combination of the ornamental and the every way practical.

If you will fill out this coupon sending us **both your and your employer's name and address**, we will send you our beautifully illustrated Greenhouse Book. We will also place your name on the list to receive all of our interesting booklets and catalogs as fast as they are issued from time to time.

But get started—take the matter up with at once.

Send Me The Greenhouse Book.

# MAY DAY

"We desire to call the attention of the trade to our seedling carnation May Day. We have been growing this variety at our place for the past five seasons, and only within the last few days have we decided to disseminate it. It is a deep satin pink, indescribably bright, and holds its color admirably under all conditions. Stem good, calyx all one could desire. Its freedom is unequalled by any variety, it being no unusual thing to be able to count from 20 to 25 flowering shoots on one plant at a time. Its habit of growth is perfect. We have grown this variety in quantities for the past three years for its flowers and find the demand for it much greater among our customers than for the well known variety Enchantress. We attribute this to its exquisite shade of color and remarkable keeping qualities."

PRICES: 100 \$12.00; 1000 \$100.00; 2500 \$95.00 PER 1000; 5000 \$90.00 PER 1000

To be disseminated early in 1909.

We endorse Mr. Grave's description; the variety has a splendid habit, a good stem, strong calyx, and we know of nothing freer, while in color it is unapproachable, that soft, brilliant shade universally admired; beside this it is one of the finest keepers we have ever handled.

ORDERS BOOKED NOW, AND FILLED IN ROTATION

Florists attending the Indianapolis meeting of the Amer. Carn. Society are invited to stop at Richmond and see the variety growing

## Notes From the Arnold Arboretum

The chief attraction of the woods and shrubberies at the Arnold Arboretum in their present wintry aspect is the wealth of ornamental fruiting shrubs. Many kinds and many colors are there, but the most conspicuous and showy are the shrubs with red and scarlet berries, as by their bright and glowing color they present a marked contrast with the dull tints of the bare branches and warm the wintry landscape. One of the best of them is undoubtedly *Berberis Thunbergi* which keeps its scarlet berries unchanged until next spring; it is now so well known and appreciated, particularly as one of the best shrubs for low ornamental hedges, that it needs no further recommendation. Equally well known is the common Barberry, *Berberis vulgaris*; though its berries shrivel more or less, the color remains almost unchanged during the whole winter. Similar are the Asiatic *Berberis Regelia* (*B. Sieboldii* and *B. Hakodate* of some gardens) and *B. amurensis* with shorter and denser racemes profusely produced; they are of more upright habit and the latter grows into a higher shrub than the common kind. The true *B. Sieboldii* is a low shrub only a few feet high with brown branches and smaller fruits remaining through the winter.

A very conspicuous climbing shrub is *Celastrus orbiculatus* with its scarlet fruits borne profusely along the branches; it is handsomer than the native *C. scandens* which bears the fruits in clusters at the end of the branchlets. *Celastrus orbiculatus* is very well adapted for covering rocks and for climbing among low shrubs which it adorns in fall and winter with its wealth of conspicuous fruits.

To the most showy shrubs belongs the High Cranberry-bush, *Viburnum Opulus*, with its drooping clusters of large scarlet berries which though shriveled keep their bright color through the whole winter and as the shrub is tall and the clusters are borne at the end of the branches, it attracts attention more than any other fruiting shrub.

Of the Mountain Ashes, *Sorbus Americana*, and its larger fruited variety *decora* often confused with the Asiatic *S. sambucifolia*, have this year lost their fruits, probably eaten by birds, though it usually stays during the first part of the winter, but the European *S. Aucuparia* is still adorned with its drooping clusters of scarlet fruits and so is *S. Matsumurana*, a Japanese species with dense clusters of small light scarlet fruits; the latter is still very little known in cultivation, and is to be recommended not only for its handsome fruits, but also for its graceful foliage and the large corymbs of white flowers.

The closely related Red Chokeberry, *Aronia arbutifolia* (*Sorbus* or *Pyrus arbutifolia*) is now also very attractive with its bright red fruits and so is *A. atropurpurea* with purple or dark purple, sometimes almost black fruits which ripen earlier than those of the first species and begin to shrivel now. It is sometimes con-

fused with *A. nigra* which, however, drops its shining black fruit soon after ripening in August.

Among the most beautiful fruiting shrubs is *Ilex verticillata* and *Ilex laevigata* with their scarlet fruits usually borne in great abundance along the branches and often produced so profusely that the whole shrub appears from a distance as a glowing red mass. The Japanese *I. serrata* with its varieties *Sieboldii* and *argutidens* is similar but less showy, as its fruits are smaller. The most beautiful is, however, the well known evergreen Holly, *I. opaca*, the popular symbol of Christmas cheer. All the Hollies are *dioecious* and cannot be expected to bear fruits, if not staminate are planted together with the pistillate shrubs; the former may be planted in the background.

Several of the Hawthorns still hold their fruits, as *Crataegus Crus-galli* and *C. Fontanesiana* with bright red and *C. Oxyacantha* with darker red fruits. A very handsome tree is *C. cordata* now loaded with clusters of small bright scarlet fruits. Also the shrubby *C. macracantha* holds still its scarlet fruits though somewhat shriveled. A very distinct species is *C. Dawsoniana* with orange yellow fruits.

Some Roses as *R. virginiana* (*R. lucida*) and *R. humilis* are very attractive with their numerous scarlet hips and dark red branches and particularly handsome is *R. multiflora* with its panicles of pale red pea-sized hips lasting all winter.

The evergreen *Euonymus radicans* var. *vegeta* with its drooping clusters of pinkish pods disclosing the orange yellow seeds is very pretty; this is the hardiest variety of the evergreen *Euonymus* and is easily distinguished from the other forms by the broad roundish leaves. The *E. radicans* var. *Carrieri* neither fruits as profusely nor is it so hardy, but it is handsomer on account of its lustrous foliage.

A very striking shrub is the Indian Currant, *Symphoricarpus orbiculatus*, on account of the unusual crimson color of its fruits borne in dense clusters along the arching branches.

Of the shrubs with white fruits *Symphoricarpus racemosus* is the only one which keeps its fruits but little changed during the early part of the winter.

All the shrubs with conspicuous yellow fruits are varieties of those with red fruits; there are yellow fruited forms of *Ilex verticillata*, of *Crataegus Oxyacantha* and of others.

The fruits of the Waxberry, *Myrica carolinensis*, show a peculiar grayish white color which gives dense and profusely fruiting masses of this shrub a somewhat misty appearance.

Also the fruits of some Privets as *Ligustrum amurense* and *L. Ibo* have a pale grayish color on account of the glaucous bloom which covers the originally black fruits, while *L. acuminatum* (*L. ciliatum* and *L. medium* of gardens) has almost and *L. vulgare* quite black and glossy fruits. Other black fruited shrubs are *Rhamnus dahurica* and *R. cathartica*, several species of *Smilax*, *Rhodotypos Rerrioides*, and *Panax sessiliflorum*, a tall shrub with dense heads of black fruits at the end of the branches. In *Ilex crenata* and *I. glabra* the black fruits are almost hidden by the evergreen foliage and therefore of little account.

like the latter, however, it is believed that the parcels post will prove a profitable financial venture for the Department and help to cut down rather than increase the annual deficit. No doubt, the establishment of a parcels post will be fought to a finish as it has been from the start, by the Express monopoly. But the attitude of the people toward this and some other reforms has undergone a change, of late, from that of indifference to that of eager interest. In no place is this fact better understood than in the halls of Congress and Express domination will be promptly overthrown as soon as the people show that they are emphatically in earnest in calling for this forward movement which should have been made long ago. After the barefaced plundering which florists, nurserymen and others have had to submit to in order that transportation monopolies might continue to pile up millions of surplus and pay huge stock dividends it ought not to require any urging to awaken the horticultural interests to activity on behalf of a measure which alone seems to hold out the promise of substantial and permanent relief. Write to your representative in Congress. Do it now.

### Appreciation at home and abroad

*Pear Dana's Hovey.*—This is a rather small, russety pear, but of soft buttery flesh and very pleasant sweet flavor. It is by no means new, as it has been grown in various parts of England for some years. On stiff soils it is liable to come gritty, but on drier soils and worked on the quince stock the fruits are sweet and very pleasant eating. It is a mid-winter pear, as the fruits often keep well till January. For some reason or other it has not previously been sent to the Royal Horticultural Society's fruit committee. It was so much liked that on the 24th ult. it received a practically unanimous award of merit. Shown by Messrs. James Veitch and Sons, Chelsea. The variety is said to have been raised by Mr. Francis Dana of Massachusetts, and by him named after Mr. C. M. Hovey of Boston.—*The Gardener*, London, Dec. 5, 1908.

Quite so; this excellent little pear was raised by Francis Dana of Roxbury, Mass. On November 13, 1852, it was exhibited as "Seedling No. 16," before the Massachusetts Horticultural Society at Boston. At the autumn exhibition of the same society in 1865 it was awarded under the name of Dana's Hovey, the "prospective prize for best new seedling pear after a trial of five years." In the meantime it had been fully described in Downing's "Fruits and Fruit Trees of America" and regularly since that time it has had a place in the yearly prize lists of the Massachusetts Horticultural Society. The good old adage, "Taste and try before you buy" seems to have been very thoroughly practiced by our British friends in this instance, it apparently having taken them nearly half a century to appreciate the Dana's Hovey. Seemingly they are not so precocious across the water in everything as our Philadelphia friend Ed. Lonsdale wishes us to believe when in his recent notes concerning the rose Rhea Reid, in a contemporary, he says that "this is not the first time a rose has had to go to Europe and win recognition before it was appreciated in its native home!" Which moves us to remark, most modestly, that nearly three years before its triumphal visit to Paris, HORTICULTURE appreciated this rose sufficiently to have a photograph made of it for use as a cover illustration and in our accompanying notes we were not stinted in our praise of its good qualities and bright promise. Reverting to the pear—had the pear men for the past twenty years shown the same enthusiastic enterprise that Francis Dana and his associates did in their time or that the rose men have shown of late, undoubtedly the Dana's Hovey and other old standards would have been superseded long ago.

It is very pleasant to know that the recent National Flower Show netted an actual profit sufficient to pay a bonus of ten per cent. to all contributors to the guarantee fund. We hope, however, that a different disposal of this surplus will be made. The subscribers to the fund which made the show possible were not actuated by any prospect of profit and now that their money has been returned to them in full we believe that it would please them best if the surplus could be turned over in full to the custody of the treasurer of the S. A. F., or, perhaps, the Horticultural Society of Chicago, to be held in trust as a nest-egg for the next national exhibition.

It now begins to look as though we are about to get a domestic parcels post. Possibly in a tentative form but, once a start has been made, a general extension may be looked for, as was the case with rural free delivery. Un-

### Relief in sight

## The Man with the Scissors

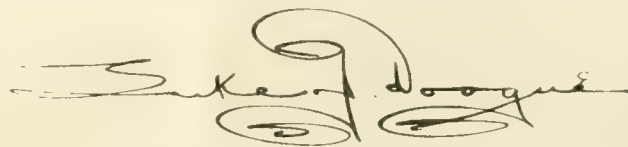

At some time during the spring and fall you are apt to find gently tapping at your door an individual bearing unmistakable signs of having an acquaintance with the soil and plants and flowers. When you find him your eyes will be attracted by a pruning shears that he dallies with as deftly as a cow-puncher handles his shooter. There is a method in this scissors play, serving to emphasize the fact that you are in the presence of a gardener, should you fail to be impressed by the other distinguishing marks.

To the man in the business this stage play produces no results but to the householder who, at these periods of the year finds himself in need of such a man's services, the results are sure and certain. There is always something to be done around a house in the gardening line, and it is with the knowledge of this fact that this itinerant gardener presents himself. His strong point is in the manipulation of the shears. If there are any shrubs around the house he will convince the owner that they need pruning. If given the job he will go at the plants, regardless of the suitability of the time of the year, like a bull at a fence, filling the air with flying branches. The average person watches and hopes for the best but the results, of course, only evidence themselves too late. The scissors man has flitted to other fields and will not return, perhaps for months, or until the victim's anger has subsided.

As a recent practical example of what this class of imposters can do we have in mind a house around which there were as many as fifty shrubs of different kinds, including a couple of Crimson Ramblers. It was upon these that one of these gardeners alighted and what he did and how he did it would take but few words to tell. He cut everything off level and the only things that escaped the slashing were the very low bushes that, happily for them, had not reached his line of horizontal beauty. After reaching the Ramblers, either from remorse of conscience or more probably because the scissors had made his hand sore, he contented himself with cutting off only the tips of the branches and leaving masses of hard canes that should have been removed, seasons before. This is not an unusual case but unfortunately a good example of what is being done on an extensive scale.

A man who is willing to work and has ability can pick up a good living by such jobs as these and once he

has proved his worth to those that employ him, their patronage can be depended on yearly. There is in every community plenty of work for the jobbing gardener who understands shrub and tree pruning. Thus far he is a rare commodity.

## An Innovation in Conservative Architecture

Our cover illustration this week shows the possibilities in U-Bar construction. The conditions which were overcome in erecting this house were most difficult. The space was very limited and from necessity the house had to be located on an exceedingly steep grade, which made the usual greenhouse treatment out of the question.

The house is 60 feet long and divided into two compartments. Being very close to the residence, it must of course be more or less ornate.

The lower part is used for a potting room, and the greenhouse is reached by a spiral stairway, which has been handled very effectively.

The gardener's cottage is just at the left, in the cellar of which is the boiler which heats both it and the greenhouse.

You will note how the architect has taken advantage of the little notes of accent which the side wall ventilation gives. In effect it is almost a continuation of the feeling of the balustrade at the front of the greenhouse.

Le Brun, architect of the famous 48-story Metropolitan tower; who designed the residence, also designed the greenhouse.

# NEWS OF THE CLUBS AND SOCIETIES

## GARDENERS' AND FLORISTS' CLUB OF BOSTON.

The meeting for election of officers for this club, on the evening of Tuesday, December 15, was, as was expected, a "rouser." There were no less than 150 members in attendance and much interest was manifested.

The first thing that transpired after the reading of the secretary's report was the withdrawal of their names from the ballot of Eber Holmes and Kenneth Finlayson for president and vice-president, respectively, and this was approved by vote rather weakly. Balloting for officers was as usual on the "Australian" method and a check list was used so that it consumed much time which was filled in with brief remarks by ex-presidents P. Welch, W. J. Stewart and W. H. Elliott and various interesting queries and replies. Marguerite foliage disfigured by the attack of a leaf miner was shown and one member said that he had tried the application of Nicotum juice for this trouble with considerable success, the juice seeming to soak in through the tissue of the leaf. Azalea foliage infected with galls was shown but nobody could give any information on this singular trouble.

The tellers reported the result of the balloting as follows:

For president, William Downs 90, F. H. Palmer 57; vice-president, J. W. Duncan 74, W. J. Kennedy 66; secretary, W. N. Craig and treasurer Edward Hatch reelected by unanimous vote. For executive committee Robert Cameron and Peter Fisher with one hundred votes each, J. K. M. L. Farquhar with 78 and Peter M. Miller with 86 were the winners.

The fortunate ones were then severally escorted to chairs on the platform where they presented an imposing appearance, the fact that those present (Mr. Hatch being in Florida) comprised five Scotchmen and two Englishmen being jocularly commented upon. Each was called upon in turn to stand up and say a few words. President-elect Downs expressed his thankfulness for the distinction and promised to do all possible to justify the confidence placed in him. He said he would know no party or clique and every member would stand on same ground during the coming year so far as in his power to so order. J. W. Duncan promised to work as vice-president for the furtherance of the interests of the club. Secretary Craig agreed to uphold the reputation of the organization and make members pay dues promptly. The executive committee, Messrs. Cameron (third term) Fisher, Farquhar and Miller all expressed their readiness to get into harness and work with a will for the glory of the cause and encouraging applause was given unstintedly to each.

On the exhibition table were some very fine exhibits. The list and the awards by the judges follow.

Peter Fisher, carnation Winona, light pink, and Viola Sinclair cerise, honorable mention to each. The former is well known, the latter not so well but fully deserving to be. M. A. Patten, carnations Sara Nicholson, crimson, and Geneva, white, both

fine; F. W. Fletcher, violet Baronne Rothschilds and Salvia Zurich; Willis E. Hamilton, chrysanthemum Bellast, laybreak pink in color; John F. Flood Co., mushrooms. All of the above were given a vote of thanks. Most admired of all was a brilliant collection of blooms of zonal pelargoniums from W. N. Craig which were given a well deserved report of cultural merit. Just as the meeting closed a box was received containing

WILLIAM DOWNS

William Downs, president-elect of the Gardeners' and Florists' Club of Boston was born in a hamlet of South Lincolnshire, England, in the year 1861. Early in life he went into gardening pursuits and after a good all round experience and training in various places finally worked himself up to be foreman on a large estate in Grantham. He went thence to Rathfriland, County Meath, Ireland, as foreman, and on the death of the owner, returned to England and took a position with that redoubtable old gardener, Richard Gilbert of Bury, foreman in fruit and forcing houses. From there he came to America and managed some orange properties in Florida for four or five years, but the hot climate not agreeing, he came to Massachusetts, and, resuming his old profession, spent two years with E. O. Orpet at South Lancaster, and then took his present position in charge of the Dunne's estate at Chestnut Hill, Mass., where for twelve years he has demonstrated his abilities as an expert gardener, and made a host of friends among his townsmen and in the horticultural profession. He has been vice-president of the Gardeners' and Florists' Club during the past year, and his elevation to the presidency of this progressive organization is a recognition well merited.

flowers of four seedling carnations from E. B. Beals, unfortunately too late to be shown.

## AMERICAN CARNATION SOCIETY.

### Carnation Registered.

By Mrs. Mary S. Fleming, Steelmanville, N. J. Mrs. Mary S. Fleming. Color bright pink, parentage a two year seedling and Mrs. Francis Joost, size of flower 2 1/2 to 3 inches. Grown in heavy or light soil. Good stems and the best keeper we have had. Grows best at 60, have had it bloom from October until August 15th.

ALBERT M. HERR.

Lancaster, Pa.

## MORRIS COUNTY GARDENERS' AND FLORISTS' SOCIETY.

The annual election of officers for the ensuing year took place on Dec. 9th with the following results:

President, Harold B. Vyse; vice-president, Thomas Stokes; treasurer, Wm. Duckham; secretary, Edw. Reagan; all of Morristown, N. J. Executive committee, Arthur Herrington, Madison; Wm. G. Bagley, Chatham; David Falconer, Chatham; Chas. H. Totty, Madison; C. J. W. Ottolander, Springfield; Percy Herbert, Madison; Andrew R. Kennedy, Madison; Wm. Muhlmichel, Madison; Ernest E. Wild, Morristown; Robt. Tyson, Madison; Robt. M. Schultz, Madison; Joseph A. Manda, Orange.

The election was entirely harmonious, as has always been the custom. Nominations were in order at this meeting as well as the last one so that all might have their say. Seven of the executive committee are commercial growers so they have a small balance of power in their favor. The officers-elect made, each of them, their speech of acceptance, promising to do their best. A rising vote of thanks was tendered the retiring officers.

President Herbert responded feelingly to this evidence of confidence and thanked members and officers for their loyal support during the year. Although this is our 13th year and our "smoker" occurs the 13th of next month, we haven't been hoodooed as yet. Our society is stronger, numerically than ever and our patrons have taken a greater interest in us this year than ever before. We had as good a show as we ever had and a larger attendance. Our finances were never in so good a shape. Our members are most social and harmonious, and to cap it all, we are preparing to have the best smoker we ever had, and we already have had 12 events of that kind. Now if any of our sister societies can tell us something better, we shall be glad to hear it.

The committee of arrangements for the smoker is A. Herrington, C. H. Totty, Wm. Duckham and Robt. Schultz. They are the "Old Guard" and we expect yeoman service from them this time.

E. REAGAN.

## HORTICULTURAL SOCIETY OF CHICAGO.

The Lecture and Exhibition Schedule of this society is now ready. The lectures will be held in Fullerton Hall, Art Institute, the exhibitions in the Art Galleries. Exact dates will be announced in the bulletins. December: Exhibition of Christmas and house plants; lecture on the use of plants in interior home decorations. January: Exhibition of carnations; lecture on floral decorations. February: Exhibition of roses and orchids; lecture on orchids. March: Exhibition of Easter flowering plants; lecture on spring flowering bulbs. April: Exhibition of potted roses, hydrangeas, etc.; lecture on decorations of home grounds. May: Exhibition of violets, sweet peas, pansies, etc.; lecture on annuals. June: Peony show.

Store Closes at NOON Christmas Day.

### NEW YORK FLORISTS' CLUB.

Election of officers was the chief business on hand at the December meeting of the New York Florists' Club which was held on Monday evening, 14th inst., and a large attendance was present, the interest centering especially in the contests for president and treasurer. The result of the voting showed the following gentlemen to be the choice of the club for the various offices for the coming year:

President, E. V. Hallock; vice-president, Harry Turner; secretary, John Young, reelected by unanimous vote; treasurer, W. B. Rickards, Jr.; trustees, F. H. Traendly, Paul Daille-douze, John Scott and Robert Simpson. Previous to the voting, H. A. Bunyard for secretary, W. W. Burnham for vice-president and Patrick O'Mara and Alfred Zeller for trustees asked to have their names withdrawn from the ballots and permission was accordingly granted.

On the exhibition table were a number of fine exhibits, prominent among which were vases of superb flowers of White Killarney rose, brought by Mr. Ponohoe in person from Waban Conservatories, Natick, Mass., and from F. R. Pierson Company, Tarrytown, N. Y. The judges awarded 86½ points and the committee will observe it growing at Mr. Pierson's place before making final judgment. A vase of seedling carnation "66" from E. L. Enggren, Aqueduct, L. I.; cerise in

color, got 85 points and a preliminary certificate. Votes of thanks were given Jacob Voght of New Rochelle for a Christmas tree support and to Moore-Livingston Co., Lansdowne, Pa., for their adjustable plant stand.

The interest and enthusiasm displayed at this meeting and the representative character of the men in attendance speaks well for the healthy

W. B. RICKARDS, JR.

vigor of this club, and president-elect Hallock can be depended upon to carry on the work and maintain the high character of the organization in a manner which will redound to his own credit and the best interests of the members.

### NEWPORT HORTICULTURAL SOCIETY.

The Newport Horticultural Society held its annual meeting Dec. 8th, when the following officers were elected for the ensuing year:

President, James Robertson; first vice-president, Samuel Speers; second vice-president, William G. Postings; treasurer, Andrew K. McMahon; recording secretary, Patrick F. Reynolds; financial secretary, Andrew S. Meikle; sergeant-at-arms, William F. Smith. Executive committee: John T. Allen, Bruce Butterson, Alexander McLellan, Stewart Ritchie, James Boyd, Robert Patterson, William J. Matson, Winfield S. Sisson, and all the above officers.

Much regret was expressed by the members that John T. Allen, the retiring president, would not accept the position for another year. He has been a very painstaking and efficient president.

D. J. Coughlin, the past recording secretary, has been quite sick for several weeks but we are pleased to learn that he is on the mend and we hope soon to see him around again.

At the above stated meeting James H. Cockcroft of Northport, L. I., had on exhibition a vase of his white seedling carnation Georgia, which was awarded a certificate of merit. Thomas Galvin of this city had on exhibition a plant of a pink seedling begonia of the Gloire de Lorraine type which was also awarded a certificate of merit.

The report of the treasurer showed the society to be in a very prosperous condition.

**BAR HARBOR HORTICULTURAL SOCIETY.**

The Bar Harbor Horticultural Society's rooms were formally opened for the winter on the evening of Dec. 3rd at its regular business meeting for December, when its charter closed with a membership of about two hundred.

Practically every gardener in the vicinity has joined the society as well as many of the leading business men in the town, three of its ministers and most of the professional men, besides many summer residents.

Over one hundred members were present, including the president, George B. Dorr, who came down from Boston to preside at the meeting and be present at the opening of the rooms, in the arrangement of which for the Society's winter use he has taken the greatest personal interest, spending on it not a little work and time.

The rooms were beautifully decorated with great taste by a special committee consisting of Wm. T. Burton, John Renwick and Joseph Kirk. Very artistic garlands were skilfully made by a committee consisting of John Brown, Clifford Came and Kenneth McLean, assisted by others. Flowering and decorative plants were furnished by members of the society.

Secretary Chas. S. Shand made a few very appropriate remarks upon the aim and object of the society, emphasizing the seriousness of its purpose in the promotion of good gardening and scientific horticulture at Bar Harbor.

At the close of the meeting an orchestra provided by the musical committee, of which C. S. Shand was the chairman, was much enjoyed, while the inner man was most generously provided for by the social committee, over whose welcome to the members Mr. Edward Kirk presided most genially and effectively, assisted by Messrs. Stalford, Renwick, Came, Morris, Deney and Dow. Later in the evening speeches from the Rev. Stephen H. Green and Senator L. B. Deasy were much enjoyed, their humor causing not a little merriment. A smoker and much pleasant talk together, with cards, checkers, chess, and other games

brought the evening to an end most pleasantly.

A well-prepared paper upon the winter protection of plants was read at the weekly meeting, Dec 10th, by Wm. T. Burton, chairman of the committee on lectures and discussions, a recognized authority on this subject, which is one of vital interest to the gardeners here. It was well received and followed by much educational discussion by Messrs. Shand, Stalford, Styles, Renwick, Fillietaz and others.

A paper by Mr. Styles upon Tea and hybrid tea roses will be given Dec. 17th.

WILLIAM MILLER.

**LENOX HORTICULTURAL SOCIETY.**

The annual meeting of the Lenox Horticultural Society was held Saturday, Dec. 5th, and was largely attended. Letters were read from several of the judges at the recent exhibition, congratulating the members upon the magnificent display and questioning if the same exhibit could be duplicated outside of Lenox. The treasurer and secretary read their annual reports, which showed the society to be in a prosperous condition both financially and otherwise. The following were elected officers for the ensuing term: President, Allan Jenkins; vice-president, Ernest Marsh; treasurer, F. Heeremans; secretary, George H. Instone.

Before leaving the chair, President Jack thanked the members for their loyal support during his term, and assured them that although out of office, his interest in the society would not diminish, and trusted that the same good feeling would always exist among the members. He also dwelt at length upon the good work the society has done, to further the interest of horticulture, and the high esteem in which the society was held. E. J. Norman, Erskine Park, was accorded a hearty vote of thanks for some exceptionally fine Flamingo carnations, the color being especially good. The newly-elected president, A. Jenkins, has lately been appointed superintendent on the S. P. Sholter estate.

GEORGE H. INSTONE, Sec'y

**GARDENERS' AND FLORISTS' CLUB OF BALTIMORE.**

The semi-monthly meeting was held Monday, the 14th. The attendance was excellent. R. Vincent, Jr., gave an interesting talk on what he saw in Europe.

Mr. Vincent having been in England in the spring and early summer, the surprising quantity of hardy and half-hardy spring flowering material used by our cousins across the Atlantic attracted his particular attention.

The fact is that at many places where the family leave the home in the early summer to travel, spring bedding, as it is called, is made a special feature and almost everywhere Uncle John pays considerable attention to spring embellishment of the flower garden. Although they have a longer springtime than we have, where "winter lingers in the lap of spring" and we not infrequently pass with a bound from chilling frosts to midsummer heat, yet, nevertheless, there is abundant opportunity for improvement in our almost universal lack of floral adornment in the spring season.

It is not absolutely necessary that we have for so many months of the year so large a surface of stark, bare beds to look at, which might by a little skill be rendered beautiful, not, of course, by the garishness of sub-tropical gardening, albeit none the less delightful because the coloring is of a more subdued character.

Our gardeners' clubs and other organizations would do well to bring matters of this nature before their meetings occasionally and those who possess the knowledge might impart it to their less fortunate fellow craftsmen, thereby awakening an interest in those matters tending to break the monotony of a season of coleus and cannas to be followed by a much longer season of barrenness. Although sociability and good fellowship ought always to be a prominent feature at these gatherings of the clans, the elevation of the profession should be the predominating factor.

BOSTON, MASS.

### NEW JERSEY FLORICULTURAL SOCIETY.

The monthly meeting and annual election of this society took place on December 11. The topic for discussion was "How to Increase the Usefulness of the Society," opened by President Malcolm Mac Rorie. The organization of a Bowling Club was proposed by Joseph A. Manda. George Smith made the suggestion that it would be better to have something in which all might take part, that there was a form of parlor bowling, and also rubber quoits. Edwin Thomas would have refined vaudeville made up of talent in the society, framed upon the plan used in a neighboring church and which had proved attractive. The matter was finally referred to the essay committee.

A letter was read from James D. Cockcroft, offering carnation Georgia for the exhibition, received too late for action. The floral display consisted of vases of mixed carnations by William Reid, narcissus Paper White and Roman hyacinths by Mrs. Schneider, mixed roses by John Der- van and Cypripedium insigne Lagerae by Edwin Thomas. The latter the re-

cent new hybrid by Lager & Hurrell which only three persons at present possess and which is to the dark form of this genus what the Sanderæ is to the yellow variety. It was remarked that its estimation by John E. Lager was shown in the name given after his wife.

The election resulted in the following officers: President, Malcolm MacRorie, re-elected; vice-president, Edwin Thomas; secretary, John Der- van; treasurer, William Reid, re-elected, and an arbitration committee of A. T. Caparn, William Reid and John Hayes. J. B. D.

### ORCHIDS Freshly Imported

We offer a superb lot of *Cattleya gigas Sanderiana* in finest condition; also *C. Bogotensis*, *C. Schroderae*, *C. labiata*, *C. gigas Hardyana* type and *Miltonia vexillaria*

LAGER & HURRELL, Summit, N.J.

### ORCHIDS

Our latest importations have been, *Cattleya Chryso- toxa*, *Cattleya Gaskelliana*, *Cattleya Gigas*, (*Hardyana* district), *Phalaenopsis Amabilis* *Schilleriana* and others. We will receive in a short time, *Cattleya Dowiana*, *Miltonia Vexillaria* and others.

### ORCHIDS

We have some handsome early *Percivaliana* which we positively guarantee to bloom between now and Christmas, as the buds are visible on the sheath. No less than two new strong growths on each plant. The flowers will more than repay purchase of plant. Plants with 7 to 10 buds \$1.00 each; from 10 to 15 buds \$1.25

ORDONEZ BROS., Madison, N. J.

## FORCING GLADIOLUS

### Gladiolus Gandavensis Hybrids

Many florists plant these in boxes, or among their carnations, in the Winter. They are excellent for decorative purposes and realize good prices, either wholesale or retail. Gladioli are a good catch-crop and take up but little room. The following are the best for this purpose:

**America.** The flowers, which are of immense size, are of the most beautiful flesh-pink color, \$4.00 per 100; \$35.00 per 1000.

**Augusta.** The florists' best white Gladiolus. First size bulbs, 1 3/4 inches and up, \$2.00 per 100; \$18.00 per 1000.

Bulbs 1 1/2 to 1 3/4 in. \$1.75 per 100; \$16.00 per 1000.

**Shakespeare.** White and rose. \$4.75 per 100; \$45.00 per 1000.

**May.** Pure white, flaked rosy crimson; the best forcer. Selected bulbs, \$1.75 per 100; \$15.00 per 1000.

**Brenchleyensis (true).** Fiery scarlet. Selected bulbs, \$1.50 per 100; \$13.00 per 1000. First size bulbs, \$1.25 per 100; \$10.00 per 1000.

**Boddington's White and Light.** Extra selected bulbs, 1 3/4 in. and up, \$1.50 per 100; \$14.00 per 1000.

Bulbs 1 1/2 to 1 3/4 in. \$1.25 per 100; \$10.00 per 1000.

**American Hybrids.** A mixture of the choicest varieties of Gladiolus in cultivation. \$1.00 per 100; \$9.00 per 1000.

NEW YORK CITY

## GERANIUMS

Our stock is the largest and most complete in the country. We have an immense lot ready for shipment from 2 in. pots. We do not send out rooted cuttings. We have good standard sorts at \$2.00 per 100, \$18.50 per 1000 and up to newer varieties at 50c each.

We will send 1000 good plants, 50 each of 20 good varieties, our selection, single and double, for \$18.50 Cash. A splendid collection to stock up on.

### LOBELIA

**KATHLEEN MALLARD.** The new double blue Lobelia, nice stock from 2 inch pots, 50c per doz., \$2.00 per 100.

### HARDY CHRYSANTHEMUMS

We have been the acknowledged leaders in Hardy Chrysanthemums for the past 15 years, and are now preparing the best collection for next Spring that we have ever sent out. Send for List. Let us book your order early, \$2.00 per 100. Special Prices on Large Lots.

**R. VINCENT JR. & SONS CO., White Marsh, Md.**

### ASTER SEEDS—CROP OF 1908

#### A New Branching Aster, Smith's Peerless

This new variety originated with us three years ago. In offering this new Astor to the trade we have fully considered those now in commerce, having grown the branching varieties known as Semple's, Vick's, Henderson's Invincible and Carlson's.

Smith's Peerless surpasses them all in high grade blooms. Color pure white and so double that it is a very shy seeder. We have only limited quantity which will be sold in sealed packets only as follows: Retail pkts. (about 40 seeds) 25c. Trade pkts. (about 250 seeds) \$1.00. In the standard sorts we have the best in Early, Midseason and Late varieties. All our own grown and guarantee them unsurpassed in quality, purity and vitality. If interested write us.

Seed Jobbers requiring larger quantities will be quoted on application

# New Rose **White Killarney**

Come and see White Killarney growing at our Scarborough houses, and you will say at once, as every one does who has seen it, it is

## The Best White Rose

they have ever seen. You need it if you want to be up to the times, and it will pay you better than any other white rose that you can plant. You will regret it if you do not plant it this year, and you will not regret it if you do.

Big lots are being booked. Get your order in early. Send us order at once, while you think of it. Get early stock. It will not cost you any more to order to-day, while you think of it, than it will two months from now. Be the early bird that catches the worm.

Strong young plants, 2 $\frac{1}{4}$ -inch pots, own-root, ready for delivery beginning February 15th, 1909. \$30.00 per 100; 250 for \$70.00; 500 for \$125.00; 1000 for \$250.00. Grafted plants, ready for delivery beginning March 1st, 1909, \$5.00 per 100 additional.

## MY MARYLAND

This new rose, which was introduced last season in a limited way, has proved to be one of the best roses ever introduced. Every one is enthusiastic in regard to its merits, and it will be planted very largely by the largest, most progressive and most up-to-date growers, who have already placed large orders for it.

It is a strong, healthy, and vigorous grower, producing long stems and long pointed buds, exquisitely fragrant. The color is a soft salmon-pink. This is a rose that we can recommend in the highest terms, as we are sure it will prove very, very satisfactory. It is a welcome addition to our limited list of really first-class varieties for indoor culture; and it is not only a fine midwinter rose, but is also unusually good during the summer months.

Strong plants, 2 $\frac{1}{4}$ -inch pots own-roots, \$10.00 per 100, \$90.00 per 1000.

Grafted plants. \$2.00 per 100, \$150.00 per 1,000.

**F. R. PIERSON, Tarrytown-on-Hudson, NEW YORK.**

## Prepare For Christmas!!! Open Your Eyes!!!

**KENTIA Forsteriana**, 6 to 7-in. pots, 36 in. high, \$2.00 each; 6-in. pots, 25 to 30 in. high, \$1.00 to \$1.50 each; 6-in. pots, 20 to 25 in. high, 75c.; 5 to 5 $\frac{1}{2}$ -in., 50c.  
**Of BOSTON FERNS** we have a house full: 5 $\frac{1}{2}$ -in. 40c.; 6-in. 50c.; 6-in., very large, 60c.; 7-in. 75c. to \$1.00.  
**Scottii Fern** 5-in. 35c.; 5 $\frac{1}{2}$ -in. 40c.; 6-in. 50c.; 7-in. 75c. to \$1.00 each, very large.  
**Whitmani Ferns**, in pans, 8-in., 3 large plants in a pan, 75c. per pan; 9-in. pans at \$1.50, as big as a wash tub; 7-in. pots, as big as a bushel basket, \$1.00 to \$1.25.  
**Whitmani Ferns**, 6 in. 50c. to 75c., hard to beat. We have a house full of them in excellent shape. Never so fine and so big as this year.  
**WILSONI FERNS**, in 6-in. pans, 30c.; 5-in. pots, 25c.

### Primula Chinensis

Everybody looks for Chinese Primroses at Christmas. You know this from your own experience.

We have a big middle bench full, in fine condition, partly in bud and bloom now, and will be in full bloom for Christmas and the holidays.

We have the best John F. Rupp improved strain. Price, per dozen, 5 $\frac{1}{4}$ , 5 $\frac{1}{2}$  to 6-in. pots, \$2.50 to \$3.00.  
**Primula Obconica**, 6-in. pots, full of flowers and buds, 25c.

**REMEMBER WE ARE ALSO HEAD-QUARTERS FOR THIS SO MUCH ADMIRE CHRISTMAS NOVELTY: BEGONIA GLOIRE DE LORRAINE.**

In the past 5 years we made a special study of this plant, and under our special treatment we have obtained such results that we are now able to offer to our customers the *Begonia Gloire de Lorraine* in a more improved condition. The color is a deep rosy one, and the plants will stand well in headed or cold frames. Plants are partly in bloom now, and will be in their full glory for Christmas and New Year. The flowers will keep in bloom until February or March, and will stand shipping well. Price: 5 $\frac{1}{2}$  to large 6-in. 50c. to 75c.; 6 $\frac{1}{4}$ -in. extra large, \$1.00; 7-in. \$1.25 to \$1.50.

All nicely staked up with three green stakes, wrapped in tissue paper when packed for shipment. Shipped either in their original pots or paper pots, just as customers desire. Please advise when ordering.

**JERUSALEM CHERRIES** or *Solanum*, full of berries, 6-in. pots, 25c., 35c., 50c. each.

**FICUS Elastica**, (Rubbers), 5-5 $\frac{1}{2}$  in. pots, Belgium and home-grown, 25c., 35c.

**Areca Lutescens**, 4-in. pots, made up with 2 plants in a pot, 25c. per pot.

**AZALEAS**, 4 best varieties in bloom for Christmas, 75c., \$1.00, \$1.25, \$1.50, \$2.00.

Cash with order please.

All goods must travel at customer's risk. Mention whether desired in or out of pot.

**GODFREY ASCHMANN, - 1012 W. Ontario Street, Philadelphia, Pa.**  
 Importer, Wholesale Grower and Shipper of Pot Plants

## Seed Trade

At the meeting of the Wholesale Seedsmen's League in New York, Dec. 4, Messrs. Wood, Willard and Stokes were appointed a committee to observe and report on any proposed further legislation in Congress upon the subject of "Pure Seeds." A telegram was sent as follows to F. W. Bolgiano, who was at the time in Washington representing the American Seed Trade Association.

"Mr. F. W. Bolgiano, Washington, D. C.:  
"Dear Sir: Kindly file with the Secretary of the Ways and Means Committee the following:

"Hon. Squire E. Payne, Chairman Ways and Means Committee, House of Representatives, Washington, D. C.

"The Wholesale Seedsmen's League by its Directors have today unanimously adopted the following:

"Resolved, That we heartily approve and endorse the American Seed Trade Association's resolutions and schedule for specific duties on Seeds and Bulbs, dated December second, and filed this third day of December with your honorable Committee.

Robert Buist, Philadelphia; W. Atlee Burpee, Philadelphia; S. F. Willard, of Constock, Ferre & Co., Wethersfield, Conn.; John L. Hunt, of Jerome B. Rice Seed Co., Cambridge, New York; Henry W. Wood, of T. W. Wood & Sons, Richmond, Va.; F. W. Bruggerhof, and E. E. Bruggerhof, of J. M. Thorburn & Co., New York City; Charles H. Breck, of Joseph Breck & Sons Corporation, Boston, Mass.; Burnett Landreth and S. Phillips Landreth, of D. Landreth Seed Co., Bristol, Pa.

F. W. BRUGGERHOF,  
President;  
BURNETT LANDRETH,  
Secretary.

The telegram was accepted and filed by the Congressional Committee before three o'clock, on the 3d, and will be printed in connection with the representations of the Seed Trade Association.

Mr. Breck prepared a very full and satisfactory report from the Manager of the Credit Bureau of the Seedsmen's League. This report and its recommendations so impressed the Board that a Committee was appointed to confer with the Manager of the Credit Bureau as to the practicability of greatly extending its usefulness to the Seed Trade in general. This Committee consisted of Messrs. Breck, Burpee and Wood.

The subject of a rectification of the suggested wholesale values of seeds adopted the 24th of September was then taken up, and changes were made as follows:

On peas, 8 advances and 4 reductions; bush beans, 2 advances; pole beans, 4 advances and 1 reduction; beet, 1 advance; cucumber, 7 advances and 1 reduction; egg plant, 2 advances, tomatoes, 1 advance.

R. & J. Farquhar & Co. have leased the entire four-story building, No. 8 and 9 South Market street, Boston, adjoining the one they are now occupying at No. 6 and 7. When the two stores on the street floor are thrown into one and other contemplated improvements completed, the establishment will be the finest of its kind in New England.

Chicago, Ill.—John, N. and James Sluis have started in the seed business at 644 West 63rd street under the firm name of Sluis Seed Store.

## NEW YORK AGRICULTURAL EXPERIMENT STATION.

Bulletin No. 299.

A factor of predominating importance in fruit culture is the weather at blossoming time. As records given in Bulletin 299 of the Station at Geneva show, in 13 years out of the 25 between 1881 to 1905, unfavorable weather during mid-May seriously affected fruit yields. Little can be done to control such injury after fruit plantations have been established, but in deciding upon locations and varieties to be set careful consideration should be given to weather conditions, since many factors, both general and local, influence frosts, rain storms and winds. The bulletin mentioned above discusses the various climatic features which make up "weather," the manner and extent of injury to fruits due to each, methods of preventing such injury and the resistance of the different species and varieties of fruit to climatic stresses. Topographic and weather records are given for 100 localities in the State; so that the prospective orchardist can study intelligently the problem of locating his plantation.

The bulletin, like others of the Station, will be sent free to those who write to the Director, at Geneva, for it.

Bulletin No. 302.

Dipping nursery stock in lime-sulphur wash or other insecticides has recently been much advocated as a substitute for fumigation with hydrocyanic acid gas. The Station at Geneva finds, however, that this treatment, if used at all, must be handled with care to secure scale destruction without injuring the trees. With the sulphur wash, exposure of the trees for too long a time or at too high temperature resulted in injury; while with any of the materials used, exposure of the roots to the mixture resulted in serious injury to the stock. For nurserymen, the Station still recommends fumigation as most effective and least liable to injury; and would advise orchardists to use the lime-sulphur as a spray after the trees are set, rather than as a dip when they are received.

Those interested may secure the Bulletin discussing the subject, No. 302, by writing to the Station for it.

Bulletin No. 304.

In good time for use in careful winter consideration of fertilizer needs, the annual Inspection Bulletin of this State is now being distributed by the Station at Geneva. Every fertilizer dealer and user should possess and profit by this Bulletin; so if you belong in these classes and are not on the Station mailing list, drop the Director a card asking for Bulletin 304.

### PUBLICATIONS RECEIVED.

Departments of Parks of the City of Boston. Thirty-third Annual Report of the Board of Commissioners for year ending January 31, 1908. Contains the report of the various officials, that of Superintendent J. A. Pettigrew being especially interesting in the portion devoted to an account of the success attending the oil treatment of roads for dust suppression. The total cost of the reservations within the city limits (2,381.15 acres) for land and construction amounts to \$18,798,080.90.

The West Chicago Park Commission-

ers' thirty-ninth annual report shows that a vast amount of work has been done during the year covered by the report, (up to January 1, 1908) in the rehabilitation and improvement of the great West Chicago park system and that the financial condition is excellent with funds available for all requirements. The volume comprises 132 pages of which 30 are full page half-tone pictures showing scenes of great beauty in Humboldt, Garfield, Douglas, and minor parks, all under the charge of Jens Jensen as superintendent.

### PLANT IMPORTS.

Entered at New York, December 2d to December 15th, 1908:

From Rotterdam: H. F. Darrow, 75 cs. plants, 4 cs. bulbs, 22 bgs. seed; Peter Henderson & Co., 2 cs. bulbs; McHutchison & Co., 25 cs. plants; Maltus & Ware, 292 cs. trees and shrubs, 50 cs. bulbs, 12 bgs. seed; P. Ouwkerk, 40 cs. trees; Julius Roehrs Co., 60 cs. shrubs; Stumpp & Walter Co., 2 cs. plants; J. M. Thorburn & Co., 2 cs. bulbs, 36 bgs. seed; Vaughan's Seed Store, 11 cs. trees; Sundry Forwarders, 7 cs. plants, 7 cs. trees, 7 cs. bulbs, 13 cs. flower roots, 107 bgs. garden seed.

From Antwerp: H. Bayersdorfer & Co., 7 cs. dried plants; Maltus & Ware, 4 cs. plants.

From Germany: H. F. Darrow, 274 cs. lily of the valley pips; McHutchison & Co., 469 cs. do.; Maltus & Ware, 109 cs. do., 1 cs. flower seed; Chas. F. Meyer, 430 cs. lily of the valley pips; F. R. Pierson & Co., 125 cs. do.; August Rolker & Sons, 65 cs. do.; S. Stern, 32 cs. do.; Ralph M. Ward & Co., 10 cs. do.; Peter Henderson & Co., 45 bgs. seed; T. C. Pollock, 122 cs. do.; Anton Schultheis, 1 cs. plants; Sundry Forwarders, 462 cs. lily of the valley pips.

Via Havre: H. F. Darrow, 339 pgs. seed; August Rolker & Sons, 34 cs. plants; Sundry Forwarders, 1003 pgs. seed.

Via London: H. F. Darrow, 24 bgs. seed.

Via Southampton: M. C. Hall, 59 crts. mistletoe; R. F. Lang, 4 cs. plants; McHutchison & Co., 8 cs. do.; Siegel, Cooper Co., 2 cs. do.; J. A. Simmons, 15 bbls. mistletoe; Sundry Forwarders, 3 cs. plants, 2 cs. trees.

From Glasgow: H. F. Darrow, 9 cs. trees; Perry, Ryer & Co., 12 pgs. plants.

clal conditions, causing quotations in  
the matrimonial market to fall a little  
below the average for the season. Ma-  
terial of all kinds is fair in quality,  
and in quantity is slightly in excess of  
the demand, violets alone being an ex-  
ception.

#### BUFFALO

The holidays are near-  
ing and all are prepar-  
ing for the expected  
hustle. The shop windows and stores  
are being decorated with greens, fes-  
tooning and blooming plants. Every  
indication points toward a good trade.  
Holly is in good supply, well berried  
and green, also laurel and other decor-  
ative goods.

#### CHICAGO

Chicago again finds her  
retail florists calling  
"Give us more plants."  
Ten days before Christmas and the  
largest growers are sold out. The  
stock was elegant, azaleas and poin-  
settias, cyclamens and Gloire de Lor-  
raines, Christmas peppers and Jerusa-  
lem cherries all came in perfection  
from some of Chicago's expert growers.  
Orders came from far and wide, and  
only those who bought early could be  
supplied.

## ATLANTA FLORAL CO.

41 Peachtree  
Street,

ATLANTA, GEORGIA.

Counter sales show a **DETROIT** rapid falling off, which is an annual occurrence near holidays. Orders for receptions, etc., are coming in as usual. Everybody is busy getting ready for Xmas and everybody expects at least the same as last year, in fact signs are many which point for a better trade.

Azaleas and cyclamens are plentiful and in good shape; the same may also be said of poinsettias in pot or cut.

The Pittsburgh retail **PITTSBURGH** men admit an improvement in business. The shops are looking their best just now, all of them being filled with beautiful ferns, begonias, primulas and a general assortment of seasonable stock. Retailers all declare that they are going to cut out high-priced flowers and sell plants. But all the same it is safe to say that if they see an opportunity to sell a box of flowers on which the profit will be three times what it would be on the plants they will not be likely to force the plant sale very hard for the time being. There is plenty of room for the plants but the necessity for the cut flowers still exists and buyers will be in the market for them, however reluctantly.

#### CHRISTMAS PLANT SUPPLY IN NEW YORK.

Retailers all anticipate a very good holiday plant trade, and are buying accordingly. Flowering stock as it appears up to present time is hardly up to the standard of last year in quantity or quality, but everything in sight is being eagerly taken up. Poinsettias, contrary to earlier indications, will probably run scarce, as will also cyclamens and heather. Of Lorraine begonias, azaleas and ardesias there will be plenty for everybody. Plenty of primroses but quality only medium.

#### NEW RETAIL FLOWER STORES.

Rockford, Ill.—M. C. Sadewater, 322 East State St.

Denver, Colo.—L. A. Kintzele, 5249 West 38th Ave.

Providence, R. I.—John F. Wood, 167 Westminster St.

Charlotte, N. C.—The J. Van Lindley Flower Co., Guilford Hotel block.

Waterbury, Conn.—Olson & Lundén, 143 East Main St., E. S. Bavier, manager.

#### PERSONAL.

H. Hayashi, a florist of Alameda, Calif., was married on Dec. 2 to Miss Ken Mayeda.

J. F. Huss and Mrs. E. E. Hamilton were married at Hartford, Conn., on Wednesday, Dec. 9.

Robert Blackwood, formerly of Weld Gardens, Brookline, Mass., has taken a position as gardener with M. N. Eastman of Rochester, N. Y.

John Cummings of Norwood has taken a position with Peter Fisher of Ellis, Mass., Stanley Fisher, whom he succeeds, having located in the west.

Boston visitors: J. J. Karens, representing H. A. Dreer, Philadelphia; P. Ouwerkerk, New York; L. J. Reuter, Westerly, R. I.; E. A. Orpet, South Lancaster, Mass.

Chicago visitors: J. H. Newhall, of Aurora Greenhouse Co., Aurora, Ill.; Ed. Calvert, of Calvert & Son, Lake Forest, Ill.; A. C. Rott, of Thompson, Florist, Joliet, Ill.

W. W. Burnham, for many years in charge of the floral department of Bloomingdale's, New York, has accepted the position of general superintendent for Abraham & Strauss' department store, Brooklyn.

#### BUSINESS CHANGES.

Providence, R. I.—O. H. Williams & Sons Co., have taken the retail florist store formerly occupied by T. F. Keller on Mathewson street.

Fargo, N. D.—T. D. Smedley has purchased the business of the McClellan Floral Co., and will change the name to the Fargo Floral Co.

#### IN BANKRUPTCY.

Hannibal, Mo.—Thomas A. Culp has filed a petition in bankruptcy; liabilities, \$8108.82; \$6200 secured; resources, \$4075.

New York City.—D. J. McIntosh, florist, 1144 Broadway, was granted a discharge from bankruptcy by Judge Holt on December 7.

Wakefield, R. I.—Burnett & Moss, florists, have purchased a farm at Jacksonville, Vt.

### PITTSBURG NOTES.

Karl Klinke, of the McCallum Co., has also been under the weather lately.

It is reported that Geo. Garland is about to become associated with the Finleyville Floral Co.

Wm. Baker, who has been in the hospital for some weeks suffering from typhoid fever, is convalescent.

Mr. Theo. Allen, of Lock No. 4, has leased his greenhouse to Mr. Linn, formerly connected with the Finleyville Floral Co.

There is an agitation among some of the members of the Floral Club for a spring flower show. Why not? If Chicago can what's the matter with Pittsburgh?

The Pittsburgh Cut Flower Co., were badly inconvenienced last Saturday through delay in receipt of their regular violet shipment, the train being reported snow bound.

### PHILADELPHIA NOTES.

The stockholders of the Robert Craig Co. announce that they have been paid 100 cents on the dollar with interest for their holdings, the origin of the said holdings being a transfer of their claims against the old firm of Robert Craig & Sons for double the amount in stock of the Robert Craig Co. This fortunate outcome is a result of a recent sale of part of the real estate of the company. We extend congratulations to Mr. Craig on his sagacity in this creditable business deal.

A. E. Wohlert, landscape architect and engineer, Merion, has purchased the Krueger place at Narberth, and will make his headquarters there, with a branch office at Merion. The new place will be improved in modern landscape style after removing the greenhouses, an attractive office built, and salable nursery stock planted in the rear.

# FOR CHRISTMAS

## Flower Market Reports.

**BOSTON** Cut flower business is nearly at a standstill this week. Buying is only done under the incentive of a transient call for funeral or other sudden need. Retail florists in town and out of town are alike busy on plants and holiday greens, and they have no time for flowers which seem to be a side issue for time being. A few days more will undoubtedly change the aspect and nobody is worrying, as the supply on all lines promises to be moderate.

Trade for the past week **BUFFALO** was not as bright as it should have been, but every day the volume of business is growing. Select roses have not been plentiful, the demand growing stronger each day on Richmond, Beauty and other favorites, while excellent carnations and plenty of them were had, prices advancing but little. Narcissus, Roman hyacinths, lily of the valley, etc., are plentiful, also sweet peas are coming in in heavier quantity and selling rapidly. Harrisii and Japan lilies, stevia and other stock are in good supply.

**INDIANAPOLIS** Colder and more seasonable weather now prevails. This has appreciably reduced the output on flowers, and business is fairly good. Chrysanthemums are practically done, as far as choice in stock is concerned. Roses of all kinds are less abundant, prices averaging better than a week ago. Carnations are of fine quality, with a reasonably good demand. Violets are still scarce, but sell better than anything else. Stevia, Roman hyacinths, lily of the valley, paper whites, sweet peas, Easter lilies and callas are equal to demand. Pot plants are moving better at the present time. The outlook for a heavy supply of flowering plants for Christmas is good. Quantities of poinsettias are seen but have a limited sale. Plenty of green material is to be had at reasonable prices.

**PHILADELPHIA** There was a fair market last week with some slight advance in quotations. Stocks cleaned up reasonably well and a much better feeling now prevails than did at date of our last report. Mrs. Jardine rose is proving a surprise to the retailers and is now generally voted the best pink rose for the mid-winter season. Some magnificent blooms of White Killarney are arriving and these are eagerly snapped up by the best stores,

although the price is necessarily rather steep as yet. The cooler weather has helped roses generally which are now coming in in fine shape. Carnations have improved and are now close to high water quality. Advance bookings for Christmas are confined mostly to reds. On an average reds command about one third more than other colors for the Christmas market. Cattleyas are in moderate supply, prices firm. Plenty of cypripediums. Violets from local points are coming in more freely. Sweet Peas are very good and find ready market. All other items are in good supply. Adiantum Croweanum is the best thing on the market in the adiantum line.

**PITTSBURG** The general market conditions seem to have improved all around and prices on roses and carnations were advanced by Saturday night to near where they should be at this season. Special Beauties were much in evidence and lilies and Paper

White narcissi were in good supply. Taken all in all it was a good week for the wholesalers. The first shipments of Christmas trees are here.

The Illinois Central Railroad Company supplies its whole system with cut flowers and plants from its greenhouses at Champaign that are under the supervision of H. A. Bode. Beginning at New Orleans in April the work of planting out around the stations is carried on until the middle of June. Plants for the stations are sent directly to each city, but the cut flowers and small plants for the dining cars are arranged at Champaign and sent to Chicago for distribution. All shrubbery for the system is grown at the nursery at Flossmore under the supervision of G. B. Moulder who also has charge of laying out new work. The Illinois Central was one of the first roads to give special attention to the decoration of its station grounds and they consider it a paying investment.

### EVERYBODY KNOWS

that leveling cannot be properly done without the aid of an accurate leveling instrument.

Bostrom's Improved Levels, No. 2 at \$16.00 and No. 1 at \$25.00, are conceded by all who know to be the only Levels on the market which meet all the requirements, at the price.

Our guarantee back of every Level we sell, and satisfied users in every State in the Union heartily endorse every claim we make. Shipping weight 12 lbs. Description on request.

### NEW YORK MARKET.

Rose receipts are lighter than last week, with a consequent stiffening in prices. Beauties record the greatest gain. Carnations are not in large supply, but are more plentiful than roses; but the demand for everything is light and buyers resist every attempt to advance prices. The best grades of roses move the slowest, with the exception of Beauty. Carnations do not enjoy a ready sale, particularly if higher prices are demanded for them; Cattleyas hang fire somewhat. Lily of the valley is plentiful enough to supply all demands. Of narcissus, stevia, ferns, smilax and asparagus there is a plenty. Violets are quoted 25 per cent. higher than last week, with fewer coming in to the market.

Bowling Green, Ky.—The Mammoth Cave Nurseries is a new firm organized to do a wholesale business in specimen trees and plants, and gen-

eral landscape business. W. E. Campbell is the head of the concern.

WHOLESALE ONLY

### Galax, Ferns and Leucothoe

Direct from the woods to the dealer. Per 1000: Galax, Green, 50c; Leucothoe Sprays (green only), \$2.00; Ferns, Dagger and Fancy, 75c. Special prices on lots of 100,000 and up. Terms, strictly cash, F. O. B. Elk Park, N. C.

**PITTSBURG FLORISTS' CLUB.**

The members of the Pittsburg Florists' Club responded to Pres. Burki's invitation to visit the Pittsburg Rose & Carnation Co. on last Thursday. A number of them started early in the morning and took in the places at Allison Park and then joined the main body which left on the 1 o'clock train.

There was a party of over fifty, among them the following from out of the city: John Walker, Youngstown, O.; John Hellstem and friend, Wheeling, W. Va.; Geo. A. McWilliams, Natrona, Pa.; and C. A. De Muth, Connelville, Pa.

The Pittsburg Rose & Carnation Co. have a 250 acre farm with a village of one hotel and 12 dwelling houses for their employes who look after their stock, under a quarter of a million feet of glass. The stock grown are Killarney, Richmond, 'Maid, Bride, Chateney, Jardine, Perle, Cuisine and Bon Seline, all the best carnations, Asparagus plumosa and Sprenger.

After an inspection of stock, houses, heating system and packing and cooling facilities the visitors sat down to a bountiful lunch presided over by the ladies of the place.

Before leaving, John Bader in a few timely remarks, congratulated Mr. Burki on the splendid condition of his stock and thanked him and the ladies for their kindness on this, the second field day of the Club.

**OBITUARY.****Harry C. Smith.**

Harry C. Smith, gardener for E. r. Morse, Medford, Mass., died on December 12, aged 55. He was born in England, was a member of Company B, British Naval Veterans, and was buried with military honors in Mount Hope Cemetery.

**Mrs. David Weir.**

We extend our sincere sympathy to David Weir, Brookline, Mass., whose wife died of heart failure on Nov. 17, aged 63 years. Funeral was from her late residence on Nov. 20, and burial at Walnut Hills Cemetery. Mrs. Weir was born in Scotland. She has been a resident of Brookline for 13 years, and was beloved by a large circle of friends among neighbors and the gardening fraternity.

## PENNSYLVANIA HORTICULTURAL SOCIETY.

Clement B. Newbold of Jenkintown was elected president of this time-honored society at its annual meeting on the 15th inst. Randall Morgan, H. F. Michell, Dr. J. Cheston Morris, and J. G. Cassatt were elected vice-presidents; Sydney W. Keith, treasurer; David Rust, secretary. A silver medal was awarded to Mrs. Geo. B. Wilson, gardener Charles Bond, for Laelio-Cattleya Madame Charles Maron. Chas. J. Roebling, Trenton, N. J., gardener James Goodier, exhibited *Cypripedium Leeanum magnificum*, for which he was awarded a certificate of merit; *Cattleya Eureka*, and a collection of eighteen varieties of *Laelia anceps*, both of which exhibits were honored with a silver medal. Prizes were awarded to Wm. Kleinheinz for Queen Beatrice rose; to Walter Scott and John Hobson for mushrooms. Special mention went to Anglo-American Spawn Co., Kennett Square, and Dingee & Conard Co., West Grove, for fine exhibits of mushrooms.

## ST. LOUIS FLORIST CLUB.

This organization held its regular monthly meeting on last Thursday afternoon and President Young was especially cheered by the presence of a goodly number of members from out of the city who seem to take a much greater interest in attending these meetings than those who live close by in the city. Chairman Augermuller reported for his committee that the "Smoker" would be held the latter part of next month and a good program would be presented. Julius Schafer made application and Wm. Mackle was elected to membership. It was decided to hold all meetings in future in the afternoon at two o'clock, the night meetings having proved a failure. The old quarters have been re-engaged for three months until the trustees find a better. The club recommended W. C. Smith as next S. A. F. vice-president for Missouri. A. S. Halsted, president of the St. Clair Floral Co., Belleville, Ill., staged their new carnation, Twentieth Century.

## CLUB AND SOCIETY NOTES.

The new officers of the Milwaukee (Wis.) Florist Club, as elected at their meeting on December 3, are: President, C. Dallwig; vice-president, G. Rusch; secretary, M. P. Vallier; treasurer, J. Heitman.

The new officers of the Rhode Island Florists' and Gardeners' Club, of Providence, are: President, C. S. Macnair; vice-president, Robt. Johnston; secretary, William E. Chappell; treasurer, William Hill.

The Montgomery County Horticultural Society met at Dayton, O., on December 2 and elected the following officers: President, J. J. Fromm; vice-president, F. W. Ritter; secretary, Rev. D. Berger; treasurer, John Ewing.

## A CHRISTMAS GIFT EVERY GARDENER WILL PRIZE.

A Garden Diary.—Underwood. Each day of the year has a page, and each page is divided into four parts, for the record of four years. It is equal to a shelf full of books. Price \$3.25; by mail, \$3.55.

Will burn 5 or 6 hours without attention.

Will exterminate aphids absolutely with one operation.

Write for prices of all Supplies for the Grower

**WILSON PLANT OIL & FERTILIZER CO. CHATHAM N. W. Jersey**

### GREENHOUSES BUILDING OR CONTEMPLATED.

Boise, Ida.—Boise Floral Co., range of houses.

Wooster, O.—Wooster Nursery Co., one house.

Maywood, Ill.—Charles Cassier, two houses, each 25 x 100.

W. Manchester, Mass.—Mrs. Lester Leland, orchid house 8 x 100.

Charlotte, N. C.—The J. Van Lindley Nursery Co., four houses.

Poughkeepsie, N. Y.—Conrad Gindra, three houses, each 30 x 120.

### NEWS NOTES.

Buffalo, N. Y.—An overheated furnace was the cause of a fire in the greenhouse of John Debloff, 197 Leroy Ave., damaging it to the extent of \$300.

Los Angeles, Cal.—A. C. Stower and Henry Englehart of Glendora, have purchased a large tract of land in Cherry Valley and will start in the nursery business.

Bristol, Va.—The Globe Nursery Co., recently purchased the Falm farm near Blountville, Tenn., containing 500 acres, for nursery purposes. It is said that \$25,000 was the price paid.

Jacksonville, Fla.—The business of Sawyer &amp; Payne has been organized

into a company with J. H. Payne president, H. L. Sawyer, vice-president, C. E. Heston, treasurer and A. N. Duncan, secretary. This will enable them to increase their nursery grounds, build new houses, and a little later open an up-to-date store.

The Detroit Park Board has received an offer of the larger part of a collection of 30,000 orchids from the heirs of the late Jos. Berry. This collection, which has been widely known, was started with 200 plants some twenty years ago and has been in charge of Henry Fruck even since. Some very valuable varieties are among them now and the city will undoubtedly accept this generous gift.

Owing to the proximity of Christmas, the exhibition of the Horticultural Society of Chicago at the Art Institute on Dec. 12 did not materialize. However, a special effort is being made for the January one. Carnations will be the special feature and under the management of W. N. Rudd there is no doubt as to its success.

# MERRY CHRISTMAS

Here we are again at Christmas and another year almost gone. It is time to be making plans for next season and taking thought as to how this year's work can be improved on in 1909. If you have greenhouses you are probably thinking of making an addition; if you are a retailer you expect to make your store nicer and neater than ever, possibly build a conservatory or a show house. If you have anything in the greenhouse line don't forget to consult us before you build and get our prices. We can interest you in our material if you only give us a chance. This is our 40th successful year. We wish you all a Merry Xmas and much success for the New Year.

### Why My New Curved Iceless Eave is Far Superior to Anything on the Market Today

- 1st. No sash bars incased in iron, thereby eliminating all danger of bars decaying.
- 2nd. Can be used in conjunction with iron frame construction, thereby doing away with that very objectionable feature, "columns."
- 3rd. Roof bars with drip grooves, which act as conductors to carry away the condensation: Result, the driest roof ever used for greenhouse purposes.
- 4th. **THE MOST IMPORTANT OF THEM ALL.** The very small increase in cost over the ordinary style of construction which makes it possible to be used for commercial as well as private purposes.

**William H. Lutton,** Horticultural Architect and Builder

West Side Ave Station (C.R.R. of N.J.) Jersey City, N.J.

## PURLIN FACTS

We believe in the angle iron purlins, and know that screwing the bars to them, gives an accurate spacing with no chance for side slipping.

Our "Cling Tight" purlin and column fitting allows the column to be placed directly under the purlin, and makes it impossible for the angle purlin to turn, or the fitting to snap off. Send for our new circular—it's a bundle of other interesting building facts.

**Hitchings & Company**  
1170 Broadway New York

## WHAT DO YOU KNOW ABOUT OUR NEW INDESTRUCTIBLE CAST IRON BENCH?

Do you know that it is indestructible?

Do you know why it has 5% more room than a wooden bench of the same size, and from 5% to 10% more than a concrete bench?

Do you know why two men can easily put up 500 square feet in a day?

Then send for our 6 page circular which fully describes and illustrates it.

**Lord & Burnham Co.**

Main Sales Office: 1133 BROADWAY, N.Y.

BOSTON: 819 Tremont Building. PHILADELPHIA: 1215 Filbert St.

## ON THE INSIDE AGAIN

Here is an interior of one of the houses erected last year at Tuxedo Park, N. Y. You see it is an even span house with the center bench left out to accommodate the tall growing, potted plant. We are glad to get the photo before the house was filled, because it shows the arrangement better and you get a most convincing view of the U-Bar curved eave with its web like construction. Nothing to obstruct the light, from vent header to sill.

It is the ideal construction for private estates, parks, public institutions and florists' show rooms.

## Angraecums

The genus *Angraecum* contains some very beautiful and curious species, among which *A. sesquipedale* and *A. eburneum* are perhaps the two best known in collections, the former certainly being both curious and beautiful, with its ivory white long-spurred, star shaped flowers. *A. eburneum* is also a beautiful object when in bloom, and its pure white flowers last several weeks in perfection. *A. Sanderianum* with long pendulous racemes of white flowers is another fine species well worth growing. *A. Eichberianum* is quite pretty too, of climbing habit, producing numerous solitary flowers from the axils of one and two-year-old leaves. The sepals and petals are narrow, greenish white, lip spoon shaped, white in front, green at base, provided with a green spur about as long as the lip itself.

The home of the *Angraecums* is tropical Africa and adjacent islands and they will therefore require warm treatment. A night temperature in winter of 60 deg. to 63 deg. with a rise of 10 deg. to 15 deg. during the day, suits them well. During the summer months 70 deg. at night with a rise of 10 deg. to 20 deg. through the day will be none too warm. Their treatment is almost identical with that of the *Vandas*, except that they require a little more water at the root at all times; in fact, they should never be allowed to get real dry.

The pots in which the plants are growing should be filled with rocks to within an inch or so of the rim, then the whole is surfaced off with clean live sphagnum moss, which should be kept growing and should be renewed in the spring if it has turned sour during the winter. I find that they respond generously to an occasional water-

ANGRAECUM SESQUIPEDALE

ing with weak liquid manure. Give them all the light available at all times without scorching the leaves, and as much fresh air as the weather will permit.

*Angraecums* are not difficult to grow and one wonders why they are not often met with in collections.

*M. J. Ope*

*Naugatuck, Conn.*

## A Duty You Owe

We think every one who receives this paper is under obligation to devote a little time to a perusal of the advertisements. A duty, first, to the advertiser, without whose co-operation and financial support no periodical of this kind would be possible, and secondly, to himself, for in no way can he better inform himself as to the progress and present status of his business than by finding out what the foremost cultivators and business men have to offer. Again, there are legitimate bargains to be found in the advertising columns of every issue. Look them through and you can save money and trouble for these are reliable houses. Give them your order for what you need and don't forget to help *Horticulture* by mentioning where you saw the advertisement.

nounces for next winter "the greatest horticultural congress ever held in the west." All of which goes to show that orcharding is beginning to assume an importance in the west little realized by anyone who has not been watching developments closely. We look to see it grow in volume and intensity for the passion for horticulture, once well started, is wonderfully prolific and all must agree that the results will be good—good for the west, good for the east, good for the whole world and good for the best avocation open to mankind.

This is HORTICULTURE's last word for 1908 good-bye 1908. For many of our readers the year about to pass into history has been one of apprehension and disappointment. In common with other business interests, everyone engaged in horticultural pursuits has felt in greater or less degree, the pinch of financial stringency and the burden of business depression and enforced retrenchment. Yet with all this cloud upon its record we must admit that 1908 has not been wholly bad and that it should be credited with the fact that in its latter weeks, conditions have shown a gratifying improvement, and its passing away is with a kindly benediction and unmistakable signs of returning prosperity. We do not need to tell our readers that HORTICULTURE has more than held its own throughout the period of general adversity, for the evidences are plainly written in its well-filled advertising pages, which bear witness to the fact that the business interests are wide awake to the purchasing power behind its excellent circulation. Our friends far and near have not been slow to repeatedly express their approval of HORTICULTURE's course on questions of vital interest to the trade as these have come up from time to time. So it is with a feeling of grateful satisfaction that we pen these final lines for the volume which closes with this issue.

Communications have recently been received at this office in numbers sufficient to indicate beyond a question of doubt that shippers, large and small, are rapidly nearing the limit of endurance under the treatment accorded them by the freight and express transportation companies. Documentary proofs of over-weighing, over-charging and falsifying have been shown us which, on a bare statement, we could hardly have given credence to. Delays, rough handling and breakage seem to be a daily experience with those who are constantly shipping goods, and it is alleged that complaints are shelved or held up for months regardless of all appeals. On top of it all, rates are advanced at will and the contention which some of our correspondents make, that the attitude of the railroads and express companies towards the public of late is actuated by motives in which resentment figures strongly, would seem to be pretty well supported by pertinent facts. A measure of relief is looked for in the proposed Parcels Post Bill, but even that will be of little help to the general shipping trade unless its scope is extended very much beyond its provisions as now contemplated. In

### Booming the fruit industry

The largest apple exhibition in the world's history closed recently at Spokane, Washington. Council Bluffs, Mo., has just been through the excitements of the "greatest horticultural congress ever held," and St. Joseph, Mo., not to be outdone an-

the light of information at hand, we would earnestly advise those of our readers who have occasion to ship either by express or freight, to incorporate among their reforms for the new year, some system whereby weights and charges based on weight, can be readily verified, and whereby charges on prepaid packages cannot be again collected at destination without the certainty of detection.

## Tree Talks

### VI

#### FOREST PLANTING

In planting trees in large quantities, as in forest planting, the land should be ploughed during the summer if possible, and the following spring marked out in rows four feet apart each way, and the young trees planted at the intersections of the furrows. All deciduous trees, that is, trees that drop their leaves, should be planted as early as the weather will allow, which in New England is usually from the last of March to the middle of May; evergreens from the middle of May to the first of June. The roots should be well spread and planted firmly, the same as older trees. If a cultivator could be run both ways between the rows four or five times, each season until the end of the second season, it would be of great benefit to the trees. After this the trees would begin to cover the ground and further cultivation would be unnecessary. If the land is such that it cannot be ploughed, the trees may be planted in the sod ground the same distance apart, merely making a small hole to plant the tree in by turning over the sod with a spade.

All trees for forest planting should be small, say from one to three years old. The roots of all trees, whether old or young, should never for a moment be allowed to become dry; and, if the weather is very dry, it is well to puddle them, that is, taking a pail of water and stirring in a few shovels of earth, making it about the thickness of gruel, and dipping the roots of the young tree into it before planting; this keeps the roots from drying up.

#### CARE OF STREET TREES

All large trees should be well watered in extremely dry weather, especially those on city streets. A little dash of water is no good; make a large basin around the tree that will hold a half barrel or more; fill this up, and as it has soaked in the ground, fill again, so that the roots of the tree may be well moistened; then fill in the loam and mulch around with short manure or other material. A tree treated in this way will seldom need more than one or two waterings during the season, unless exceptionally dry. All street trees, or, in fact, any large or even small trees should be properly staked, so that the wind will not have any effect upon them, and also to keep them straight. Street trees need but little pruning, although they are often well butchered. It is true that many old trees might be in part renovated by

pruning or cutting in the tops. (For a treatise on this subject get "Tree Pruning, by Alphonse de Caws, translated by Prof. C. S. Sargent from the French, for the Massachusetts Society for Promoting Agriculture.) We have used this system to renovate very straggly, worn out oaks in the Arnold Arboretum, and the result has been good.

#### TOO MUCH PRUNING

Young or ordinarily healthy trees need but little pruning; the thinning out of any limbs that interfere with each other, or where they may be too crowded, and the shorting in of any straggling limb to balance the tree is usually enough. Generally there is too much tree pruning; the tree is cut and hacked to death by irresponsible persons, who will persuade you that your trees need pruning whether they do or not; and, to show how much it needed it, the tree is hacked to pieces.

In the large parks and cities there should be a nursery for the training and growing of trees to a suitable size for street planting. Select from ordinary nurseries strong, finely developed young plants of the kind needed, and have them trained, pruned and grown to the size and shape required.

#### SYSTEM IN PLANTING

All tree planting should be under the care of an intelligent man or men, who understand their business and who have the time and opportunity to study the ground and surroundings; otherwise, where each abettor plants the trees he likes the best, assorting to his own taste, it involves much diversity and inequality in the selection of trees, both in shape and size. Each street should be planted with one kind and size, as nearly as possible, and at proper distances from the curbstone and each other. Uniformity in this respect can be obtained only when the work is done under municipal authority. This method has been successful in the leading cities of Europe, and in Washington, which is probably the best planted city in the world, where the street has been graded and planted under the authority of a special commission, which had faithful men who followed out the plans of their leader and understood the habits of the trees. If this could be followed out by other cities it would be better. The great trouble is that our people all have a mind of their own and do not want to be subordinate to anyone else; hence so many mistakes.

Every farmer or fruit grower has to fight insects and fungus with insecticides. Eternal vigilance with them is the price of success. Shade and ornamental trees have their enemies as well, many of them more so, and the city, town, or people who want beautiful trees will have to exercise the same vigilance.

# NEWS OF THE CLUBS AND SOCIETIES

## NASSAU COUNTY HORTICULTURAL SOCIETY.

The annual meeting of the Nassau County Horticultural Society was held at Pembroke Hall, Glen Cove, Dec. 9.

The report of the judges on the yearly points contest awarded to H. F. Myers the gold medal for the most points and to V. Cleres the silver medal. It was decided to continue the point contest another year. Adolph Jaenicke offered to give the gold medal for next year. Charles Bertanzel offered to silver and S. J. Trepass the bronze medal.

There was a fine exhibition of flowers and fruits for which awards were made as follows: H. F. Myers for vase of roses; P. H. Ruel for three vases of carnations. Frank Gale for a dish of tomatoes, and Valentine Cleres for asparagus, each receiving certificates of culture. Frank Petrocchia for violets was given honorable mention. The treasurer's report showed a balance on hand of \$376.43.

It was voted to present to the secretary and to the treasurer \$50 each in gold as a token of appreciation for their valued services. A vote of thanks was extended to the committee on fall exhibition, which did excellent work. The election of officers resulted as follows: President, John Everett; vice-president, James Elmslie; secretary, Henry Gaut; corresponding secretary, W. Mackenzie; treasurer, Ernest Brown. It was decided to increase the membership of the executive committee to seven. These were elected: James Duthie, chairman; James Holloway, Charles Bertanzel, V. Cleres, John Ingram, Thomas Harrison, John Devine.

## AMERICAN ROSE SOCIETY.

The committee, Messrs. Simpson, May and Pierson, appointed by President Poehlmann, met in New York City, Dec. 21st, and discussed plans to revise the exhibition schedule. One plan was to incorporate all the latest American roses as special premiums, and to encourage the greatest possible number of all classes of exhibitors. The work was found to call for close attention and the committee could not finish the work at one sitting. At present there are \$715.00 cash prizes available, and three silver vases of fine grade. The latest donors are W. J. Palmer & Son, Buffalo, N. Y.; J. A. Budlong, Sons & Co., Auburn, R. I.; J. A. Valentine, Denver, Colo.; and Vice-President Wm. F. Kasting, Buffalo, N. Y.

We have reports that the florists of Buffalo and their Western friends are making preparations in earnest for their share of the work and will begin right after the holidays. The Iroquois Hotel may be selected as the place for the exhibition. According to the society's by-laws, the opening day will be the fourth Wednesday in Lent, which this year will be on March 17th, 1909. The annual meeting will open on that day. The exhibition will be held in conjunction with the Buffalo Florists' Club. All prizes should be forwarded as soon as possible to the secretary, whether cups or cash, so

that entry may be made and the prizes delivered immediately through the proper official channel at the close of the exhibition.

BENJAMIN HAMMOND, Sec'y.

## ELMER D. SMITH.

The new president of the Chrysanthemum Society of America, like many others who have attained eminence in some chosen field of horticulture, is a very modest and unassuming gentleman, and it has taken some persuading to induce him to have a photograph taken. The reproduction which we have the pleasure to present herewith is, like the original, minus frills or retouching, and will be recognized by those who know Mr. Smith as an excellent likeness.

Elmer D. Smith was born at Detroit Nov. 30, 1854, but has resided in Adrian, Mich., since 1857. He first became interested in the chrysanthemum by hearing John Thorpe's paper

ELMER D. SMITH

President-Elect Chrysanthemum Society of America.

on this topic at the S. A. F. meeting in 1887. As junior member of the firm of Nathan Smith & Son he became extensively known as the originator and disseminator of many sterling novelties. He was for many years the active member of the company. Since January, 1908, he has conducted the business under his own name.

He has served on the Executive Board of the S. A. F. and rendered signal service to the cause of horticulture in various capacities.

## WESTERN ASSOCIATION OF NURSERYMEN.

The Western Association of Nurserymen met at the Coates House, Kansas City, Mo., on Dec. 15, and elected officers as follows: President, A. T. Brown, Geneva, Neb.; vice-president, E. S. Welsh, Shenandoah, Ia.; secretary, E. J. Holman, Leavenworth, Kan. The tariff on imported seedlings, etc., was discussed but it was decided that no change in tariff would be asked for.

## THE AMERICAN CARNATION SOCIETY.

In reply to a request from the secretary for special rates for our meeting in Indianapolis, Ind., Jan. 27th and 29th, the following communication has been received:

"Your application for excursion fares for the occasion of your meeting has been presented to a meeting of lines identified with the Central Passenger Association, convened on the 9th inst. It was decided, after careful consideration, that they could not, in view of the recent legislative action establishing a maximum passenger fare of two cents per mile in the states in which they operate, consistently grant the concession requested for your approaching convention."

In view of the above facts it will be well for members to arrange to leave from a central point and get club tickets. Most offices sell a club ticket at considerable reduction to parties of ten or over. As the two cent rate applies, I presume, on all west of Pittsburgh, the fact of no concession being granted need not keep any one away, as the fare will be very little in excess of what it has been for other meetings, and you will have the advantage of having no restrictions placed on your method of travel. If you want to stop off at various points en route it can easily be arranged on a straight ticket.

We want everyone interested in Carnations to attend this meeting and exhibition. The money spent will be money well invested.

## Carnations Registered.

By Patten & Co., Tewksbury, Mass. —Sara Nicholson. Parentage, Ethel Ward crossed with Harry Fenn; color, glowing crimson; size of flower, three inches; habit, etc., an upright grower, very free and fragrant; a commercial variety, early and continuous bloomer. Genevieve. Parentage, Lady Bountiful crossed with White Lawson; color, pure white; size of flower, 3-1-2 to 4 inches; habit, etc., strong, upright grower, fragrant, classed with the fancies.

ALBERT M. HERR, Sec'y.  
Lancaster, Pa.

## SOCIETY OF IOWA FLORISTS.

The Society of Iowa Florists met on Dec. 9th in the horticultural rooms at the State House, Des Moines, Ia., with quite a large attendance, there being about seventy present, although not all were florists. The meeting was quite enthusiastic, and much interest was manifested in the various subjects brought up for discussion.

Among the papers read were the following: "Roots," by Peter Lambert, Des Moines; "Porch Vines," G. A. Heyne, Dubuque; "Some Problems in Roots," G. D. Black, Independence; "Sod and Sodding," Professor Shimek, Iowa City; "Plan of Eden," F. C. Pellett, Atlantic; "Commercial Floriculture," Chas. N. Page, Des Moines.

About twenty new members have joined the society recently, and it is hoped to secure the membership of every live, up-to-date florist in the state.

CHAS. N. PAGE.

## SOCIETY OF AMERICAN FLORISTS AND ORNAMENTAL HORTICULTURISTS.

### The Next National Flower Show.

The cup offered by Ellwanger & Barry, Rochester, New York, not having been won at the late National Flower Show, has been turned over to the undersigned, by the donors, to be offered as first prize at the next National Flower Show.

There has been much talk of the next National Show, but so far as the writer knows, this is the first really tangible offering which has been made. Should any other firms or individuals see fit to make any offers in connection with the next proposed show, the writer will be very glad to accept them temporarily and turn them over to whatever organization may be made for the purpose of conducting another show.

W. N. RUDD, Sec'y.

Morgan Park, Ill.

## VIOLET GROWERS' MUTUAL ASSOCIATION.

The violet growers of Rhinebeck, N. Y., have been incorporated under the laws of the State of New York.

One hundred and twenty-three growers, representing over one million square feet of glass, have joined already and more are to follow. Much enthusiasm is shown and it promises to be a success for both ends, although only the one end is likely to be acted upon at present, except to compare notes and select and favor those dealers showing the most justice to the members of the association. They already have a list of the bottom wholesale prices on coal, manure, boxes, paraffine paper, twine, sulphuric acid, cyanide of potassium and minor supplies which such a representation could use in very large quantities and reduce cost to a minimum.

### DETROIT FLORIST CLUB.

At the last meeting of the Detroit Florist Club it was decided to change quarters and move into larger rooms in the Cowie building. A hearty vote of thanks was offered to the Michigan Cut Flower Exchange, which in response through Mr. Dilger assured the club that in future their rooms will be at the club's disposal for special meetings or the like at any time. January 7, 1909, will be Ladies' Night in Harmonie Hall, and a very interesting program has been mapped out. B. Schroeter read a most interesting paper on Christmas 37 years ago, bringing out the fact that Christmas then held no excitements in store for the florist but New Year's day was quite important. The trade mainly was in flowering plants and decorations were only used in churches. Christmas greens were unknown quantity, as also flower boxes or covered wagons. Poinsettias, primroses, callas, camellias and Marechal Neil roses were the principal flowers.

### TOLEDO FLORISTS' CLUB.

The Florists' Club had a very lively meeting at H. A. Mills' on Dec. 16. We expected to have a big flower show in February with several hundred dollars as prizes, but the project fell through. Our next meeting will see some lively competition, as several members have

offered cash prizes for various things, and we also expect to have a sample dozen of each of the new carnations and roses for this meeting.

### CLUB AND SOCIETY NOTES.

The Western New York Horticultural Society will hold its annual meeting in Rochester, January 27-28.

Jesse C. Stevens of Centerville is the newly elected president of the Wayne County Horticultural Society, Ind.

The Iowa Horticultural Society at its meeting in Des Moines on December 10 re-elected its board of officers for the coming year.

The Totowa Dahlia and Flower Growers' Association of Paterson, N. J., held their second annual smoker on Dec. 11, which was well attended.

A banquet at the Phillips House on January 11 for the members is the next interesting feature on the program of the Dayton (O.) Florist Club.

George McWilliam of Whitinsville, Mass., has invited the members of the Worcester County Horticultural So-

evening. The next meeting will be with W. H. Weston, 277 Rutgen St., Utica.

The Montreal Gardeners' and Florists' Club at the meeting on December 7 elected the following officers: President, W. G. Pascoe; vice-presidents, Julius Luck, H. J. Eddy; secretary-treasurer, W. H. Horobin; assistant secretary, Thomas Arnold.

Wayne County Horticultural Society, Ind., at their meeting on Dec. 12 elected the following officers: President, Jesse Stevens; vice-president, Thomas Elleman; secretary, W. S. Ratliff; corresponding secretary, Wallace Reynolds; treasurer, T. E. Kenworthy.

On invitation from the Retail Florists' Protective Association of New York, seven members of the Wholesalers' Protective Association were present at the meeting of the retailers at the Waldorf-Astoria on Friday, 18th inst., and matters of mutual interest were discussed.

### NATIONAL APPLE SHOW.

Michael Horan, orchardist, stock-grower and banker at Wenatchee, Wash., and a native of Stockbridge, Mass., is the apple king of America, having gained that distinction by capturing the chief prize of \$1,000 for the best carload exhibit at the National Apple Show in Spokane, December 7 to 12, when \$35,000 in premiums was awarded to competitions from various parts of the United States. Washington growers took 58 first prizes, Canada captured 15, 11 went to Idaho, one to Montana, and the rest were scattered. Much to the disappointment of the management and the thousands of visitors, representing every state and province on the continent, practically all the fruit sent from the states east and south of the Rocky mountains was spoiled in transit. The apples had been taken out of cold storage and were sent to Spokane in heated cars, thus making them unrepresentable. To show the displays would have been manifestly unjust to the districts, so Harry J. Neely, secretary and manager, decided not to place them in competition or on exhibition, though prize moneys, medals and diplomas will be forwarded to the growers from every state entered in the district.

Records at the stiles showed 102,762 paid admission tickets, 4,000 season tickets and several hundred press and complimentary tickets, bringing the total attendance to 107,000 for the week. The statement of the daily paid admissions follows: December 7, 14,352; 8, 14,070; 9, 18,000; 10, 20,070; 11, 19,270; 12, 17,000; total, 102,362. The first exhibition of its kind and scope was so successful that it will be made an annual affair. It is likely that the prize-winning displays in 1909 will be sent to Chicago or some eastern city for exhibition purposes.

James M. Zion of Clarksville, Ind., is actively working for the introduction of a bill in the Legislature abolishing the office of State Entomologist and substituting a State Commissioner of Horticulture who shall be a skilled horticulturist. It will be identical with the Goodwine bill of two years ago.

JAMES ROBERTSON

President-Elect Newport Horticultural Society.

cety to visit his greenhouses while the calanthes are in bloom.

The Stark County Horticultural Society met at Canton, O., Dec. 16, and elected O. W. Foust, president; E. F. Graybill, vice-president; Mrs. S. O. Eggert of Massillon, secretary.

The Missouri Horticultural Society elected officers as follows at its recent meeting: President, A. T. Nelson; vice-president, W. D. Maxwell; secretary, Geo. T. Tippin, Nichols Junction.

The florists of Rockford, Ill., have organized a club with seventeen charter members and as many more prospective members. George S. Birks will be president and M. C. Sadewater, secretary.

The Westchester County Horticultural Society met at White Plains, N. Y., on Dec. 18, and elected officers as follows: President, Oliver Harman; vice-president, L. C. Platt; secretary, Daniel Maloney.

The Utica (N. Y.) Florist Club met with E. J. Byam of Rome. The stormy weather prevented a large attendance but those who were there enjoyed the

## PARIS AUTUMN SHOW.

[This account has been crowded out of our columns by the publication of essays but will, we hope, still be found interesting reading.]

Once again it has been our pleasure and privilege to visit the great autumnal display of chrysanthemums, fruit and vegetables annually held by the National Horticultural Society of France. It is a matter for extreme regret that the show which opened on the 6th of November and lasting to the 15th will be the last of a series of brilliant horticultural shows, for the huge greenhouses on the Cours la Reine lying between the Champs Elysees and the river Seine are doomed to demolition.

On our arrival on the opening morning we were welcomed at the entrance by many old friends: M. Viger, the president; M. Abel Chatenay, the secretary; M. Truffaut, and many others, anxious to receive the visitors with a courtesy peculiarly characteristic of our French horticultural friends. After a few handshakes and introductions to new acquaintances we pass through the gate and enter the spacious promenade leading up to the show. We are no sooner through the entrance than we at once begin work, for on our right and on our left we behold fine groups of hardy ornamental shrubs alternating with long lines of trained fruit trees that extend the whole length of the promenade in double rows. From Alfred Monnier we notice several of these ornamental groups, and there are also some from M. Leconte in which we observe a very choice assortment of conifers, hollies, euonymus, box, aucuba, etc. A little farther along the path of the central promenade we come to the usual display, at all these French shows of numerous trained fruit trees in diverse forms and uses known only to the French fruit culturist. Here euonymus, conifers, hollies, abies in variety, cupressus, are set up in large beds in the open, tastefully arranged in the usual French style and comprising many hardy ornamental shrubs of great merit. Culture and tasteful arrangement are irreproachable, and before entering we cast an appreciative glance at the extensive exhibits of greenhouses, garden pottery, heating apparatus, stationery and every conceivable accessory connected with the garden art—a display of gigantic proportions, which materially helps to vary the charm of this great show and to interest the visitors.

Entering the show we turn our steps towards the orchids, which are staged in two side rooms specially set apart. In one of these rooms, on our left, a handsome and imposing display presents itself to our view. It is practically the result of one firm of exhibitors of repute, viz., A. Truffaut & Son, comprising azaleas, dracaenas in great variety, anthuriums, ornamental foliage plants, begonias, etc., arranged artistically. Opposite, in the other room, are several collections of orchids from well-known Parisian cultivators, such as Maron & Son, Lesueur, Regnier, Beranek and others.

On emerging we are again in the dome-like entrance to the first greenhouse. In a series of several shaped borders we find Vilmorin-Andrieux & Co. have sent one of their representative collections of chrysanthemums.

They are mostly pot plants, dwarf, bush, and standards, the whole edged with a border of brightly colored pompons behind a green turf verge. Another exhibit from the same firm consists of a very large rectangular sunken garden with sloping sides towards the middle. On the lower level a geometrically arranged bed containing blooms graduated in great diversity of color with huge centre trained plant of yellow Japanese in bold relief. Along the sides are huge trained specimens of several fine varieties set up in beds cut out of the turf, many of them purely French show varieties unknown on our side.

New seedling chrysanthemums are always a feature at the Paris show, as also at the provincial ones, and special classes are provided for them. The lot from Ernest Calvat was superb in size and in color, and with them we must deal separately at some future time. Another lot came from the Marquis de Pins, but these were wanting in brilliance of color. Far more attractive in this respect were some of the novelties by Chaubrier, although the seedlings of this grower lack the proportions of the two first named. Heraud, Nonin, Dolbois, Vilmorin and others also staged novelties, and the floral committee had no easy task when it came to awarding the first-class certificates. The result of the floral committee's deliberations were: eighteen certificates to Calvat, eight to Vilmorin, eight to Nonin, seven to the Marquis de Pins, five to Chaubrier, five to Heraud, and seventeen to other exhibitors less well known to our readers.

In the chrysanthemum exhibits of cut blooms and pot plants we must notice M. Pechou's capital collection of fine cut blooms, which were staged in style on a rectangular grass lawn. Among them, and there were many others equally fine, Pres. Loubet, Mrs. Mease, Jean Calvat, Sapho, Calvat's Sun, Polypheme, Souvenir de Reydellet were striking examples of good culture. Another exhibitor, M. Robillard, had also a very interesting and artistic display of good cut blooms, mostly varieties of purely French origin, and therefore not much known to our readers. In Ernest Masselin's lot there were good blooms of great size and substance, such as Marquis de Pierres, Sans Souci, F. S. Vallis, W. R. Church, Tokio, Mrs. Dalton, all exceptionally fine.

M. Martin had a nice group of Miss Alice Byron in quantity, and also many other good varieties. Another good lot were staged in fine form by Durand, consisting of cut blooms only. Lachaussee staged some fine Japanese in a long group of plants in pots, large blooms, mostly three or four on a plant and deserving mention.

Opoix, the head gardener to the Luxembourg Garden, had a tastefully arranged lot of blooms, chiefly of the Japanese section, edged with maiden-hair ferns. Single-flowered varieties, Baronne de Vinols and several of its sports, including also a few pompons, helped to brighten up this lot in the most effective manner. The Asile de Ville Evard exhibited a fine group of pot plants, edged with Gerbe d'Or pompon—a very popular favorite for the purpose in Paris. J. H. Leconte also exhibited another collection of only medium sized blooms and rather too

closely packed. From another exhibitor, Giblin, came a curiously arranged and novel group. Large trained specimens carrying big show blooms were set up in rows at the back, while three rows of very large cut blooms in vases were arranged in front.

Cordonnier & Son occupied the far end of the first greenhouse with four collections composed of specimen blooms of the highest merit, arranged on the ground level in different beds.

Leveque et fils made an imposing plant display, nicely set up and a good color arrangement throughout, also nicely grown cut blooms.

A prominent exhibitor at the Tours show also competed at Paris. This was Pinon, whose curiously trained plants made a most imposing display. They consisted of tall pyramids, in variety, with fan shaped, and other curious designs, stars, etc. A noted exhibitor of grafted chrysanthemums who has made many successes in Paris is Leon Cavron. On this occasion he was well to the front as usual with a most comprehensive and varied collection. A. Govignon's collection was made up of very dwarf plants in pots sunk in the ground. They were chiefly medium sized blooms and comprised some well-grown examples.

Carnations were staged in large masses by several good growers. We can only name a few and of these Leveque et fils, who are famous for their roses as well as their carnations, made a fine display in two lots. The Ecole Plessis Piquet also showed carnations and a good exhibit from Beranek of the same flowers was also on view.

Floral decorations are also a grand feature. The celebrated florist Lachaussee of the Rue Royale, known to every American visitor to Paris, had a most artistic lot of chrysanthemums, orchids, autumn foliage, roses, etc., arranged in vases on pedestals, some on tables and various other designs, with a background of palms. Ed. Debrie had table and other floral decorations in pots and vases in similar style to the preceding.

On entering the corridor we notice a collection of Anthemis White Perfection and cyclamens by Aubert Maille.

The far right hand corner of the corridor was reserved for the literary and artistic exhibits in the so-called Retrospective Exhibition. Many old books, drawings, prints, pottery, etc., were staged here illustrative of the chrysanthemum. Momefa of Paris and Harman Payne of London made the finest display. Other exhibitors were Nonin, Roselle, Vilmorin, Baltet, the Library of the Society, etc. Cayeux and Leclerc staged various flowers in season. Francois large plants of chrysanthemums grown in tubs, with a very good collection of cut blooms in front. Close by was the lot from Lecolier consisting of hardy shrubs.

Fruit throughout the show was grandly shown, and there must have been many tons of it in the many fine lots we saw. So vast was this part of the show that we can only refer to it in the briefest way.

As an instance of the competition, we may mention that in one grape class alone there were twenty-one prizes awarded and in another twenty.

Turning down the flight of steps leading to the promenade by the river Seine we see Vilmorin Andrieux & Co.'s

A FRUIT EXHIBIT AT BOSTON  
By Isaac Locke & Co.

collection of vegetables, an enormous lot of everything in season such as only they can present to the public view. Exhibits from other well-known firms contained every vegetable in season the kitchen garden could supply.

In the second large greenhouse we have as much to see as in the first, but space is limited and we must summarize. Hydrangeas by Desire Ramelet were well staged. Ferard staged several beds containing *Primula obconica*, cyclamens and maidenhair ferns.

One of the chief features of the Paris Autumn Show is the begonias, and of these we noticed a fine lot staged by M. Billard of single and double flowered varieties, arranged in colors by themselves and forming a most effective display. Vallerand, who also is a marked grower of begonias, cyclamens, gloxinias, etc., had a very fine lot effectively arranged.

From Adnet of Cap d'Antibes, there came a remarkably interesting exhibit consisting of a choice collection of hybrid Gerberas. He had numerous varieties of many shades of color, quite a number of which received first class certificates. One of the attractions here was George Truffaut's display arranged on a circular lawn—a huge monument of white lilac, at least 9 feet high in the centre with clumps of lily of the valley arranged on a bed of dark green moss around the base.

In the chrysanthemum section here, Aug. Nonin had several groups containing many of the choicest exhi-

bition, decorative and other varieties. We only refer to a few varieties: Tout Paris, W. Duckham, Glorie de Vanves, Sapho, Naples, W. R. Church, Mrs. Coombs, A. J. Brooks, Paul Raudet, Duchesse d'Orleans, etc. are all very fine. E. Rosette also had a lot of fine cut blooms of popular varieties. Victor Gautier, Paul Feron, Guinle and Sarron had collections of plants and cut blooms respectively.

Altogether there were 319 exhibitions in the various classes. The following are a few of the leading prizes: Grand prix d'honneur to Crous et fils for fruit and fruit trees; grand prix d'honneur to Ernest Calvat for new chrysanthemums; and prix d'honneur to the following: Salomon et fils (grapes), Pinon (trained chrysanthemums), Leveque et fils (chrysanthemums and carnations), Lachaume (floral decorations), Colin (cut chrysanthemums), Lesueur (orchids) Goubelin (fruit), Vallerand (begonias, etc.), Valtier (vegetables).

M. Fallieres, President of the French Republic, visited the show on the opening morning.

#### Apples and Pears at the Paris Show.

The display of these fruits at the Paris Autumn Show is always one of the wonders of French horticulture. They are frequently staged in huge semi-circular pyramids, sometimes in other ways, one of the most remarkable this year being a huge slope of many square feet in area containing

pears. The varieties are practically innumerable and probably of little account in America. It is remarkable the great number of pears there are of French origin and the fine appearance they make on the show tables.

A few of the leading varieties of apples may be mentioned by way of curiosity for the readers of *HORTICULTURE* and of these I noted Calville Blanc, Grand Alexander, Reinette du Canada, Belle de Pontoire, Menagere, Reinette Blanche, Brebaur Bellefleur, Bismark, Belle Josephine, Roi d'Angleterre, Belle du Bois, Calville Rouge d'Hiver, Jeanne Hardy, most of which were shown in immense quantities.

As for the pears they are far more numerous. There is a whole host of Beurres and Doyennes and one needs to be a specialist to know their particular qualities other than merely pleasing the eye. Some of the most popularly shown are Beurre d'Aremberg, Doyenne d'Hiver, Belle Angeline, Passe Crassane, Doyenne du Comice, Duchesse d'Angouleme Beurre Diel, Beurre Hardy, Charles Ernest, Cure, Beurre Clairgeau, Le Lectier, Belle de Berry, Catillac, Fondaut des Bois, Beurre Magnifique, Olivier de Serres, Fondaut de Malines, Directeur Alphand, Notaire Sepin, Souvenir de Jules Guindon, Marie Benoist, Nouveau Poitcan, Beurre Bachelier, Beurre Van Gurt, etc. For exhibition these are certainly handsome looking samples and are generally in view at most French shows.

C. HARMAN PAYNE.

### LIME-SULPHUR AS A SUBSTITUTE FOR BORDEAUX MIXTURE IN SUMMER SPRAYING.

Most every fruit grower is familiar with lime-sulphur spray used as a winter spray for the destruction of the San Jose scale but very few know or have heard of it being used as a summer spray both as a combined insecticide and fungicide. While bordeaux mixture had proved such a friend when we first commenced using it, in the last few seasons it had proved so treacherous and wrought such damage at times, that one was never sure when using it what the result would be. It creates such an uneasy feeling among growers, than consequently we are ready and willing to try anything that has possibilities. We had heard that the growers of California were using a prepared lime-sulphur mixture known under the name of Rex very successfully and also that away up in the northwest they were using the same spray, and also another brand of the same thing under the name of Niagara. As the climatic conditions in both these sections were so different from our own the only way to prove whether we could use it here as successfully or not was to get it and try it. So 100 gallons of Niagara and a little later 250 gallons of Rex were ordered. Then the question was how much to dilute it. Could get no word from California but the northwest had reduced it 1 to 15—that is, one gallon of the mixture to fifteen gallons of water for apples and 1 to 20 for the peach, without injury. So taking into account the difference between our two climates, decided to reduce it still further—making it 1 to 25—but after corresponding with Prof. W. M. Scott of Washington, D. C. on his recommendation reduced it 1 to 40. The first spraying, before the blossoms, had already been done with the bordeaux mixture 4-4-50—before the lime-sulphur mixture had been received. It was the first intention to use simply the arsenate of lead spray just after the blossoms fell, putting it on very heavy. That is, using about 4 or 5 lbs. of arsenate of lead to the 150 gal. tank, but putting the spray on very heavy, so there would be no doubt about getting a little of it into the blossom end of the little apple, and then following it right up with the Rex spray 1 to 40. But owing to excessive wet weather delaying the first spraying, this plan had to be abandoned and the Rex and arsenate of lead had to be combined. The Rex lime-sulphur was used in the main part of the orchard and the Niagara in the part set aside to testing the different makes of arsenate of lead.

#### A Mysterious Burning.

After a little over half of this orchard had been sprayed, noticed a slight burn where we had used the Rex but none where we had used the Niagara. Thinking that there was a little too much burn and the scab showing up very plainly all over the orchard, changed the spray for the bordeaux but only used the 2-4-50 mixture, with a result of the worst burn we ever experienced, or ever saw in any other orchard. Now this burn proved considerable of a mystery. Thorough investigation failed to find a thing wrong in any of the materials of which that spray was composed and every hand on the job was ready to swear that

the right quantities were used. It is true that for those same two days, the atmosphere had that peculiar condition when everything burns. Neighboring orchards showed burn also for those same two days but not nearly so bad and they were using 3 lbs. copper sulphate. This burn was so bad, that for a time, it was questioned whether those trees would pull through or not, but being strong and vigorous, having been well cared for in previous years, they soon commenced to put forth a new set of foliage but made very little wood growth. After the new leaves had pretty well developed the trees were covered with woolly aphis, but a spray of Rex 1 to 40 soon wiped them out.

#### Prepared Mixtures Preferable to Homemade.

This spray also showed a slight burn. Arsenate of lead was also added to this spray. Now it is claimed by good authorities that you cannot combine arsenate of lead with lime-sulphur mixture—that one neutralizes the other. If this is a fact how much of this injury was due to this cause? It will take higher authority to answer this question as it is work for the chemist. The home prepared lime-sulphur mixture will never become popular with the masses on account of the trouble of making it. Then again it is difficult to spray on account of clogging the nozzle at times. If the Rex or Niagara or any other prepared mixture of the same materials can compete successfully in price with the home made and be just as strong there is no question but what they are the best and if they only prove successful will be the easiest spray made, for you do not need even an extra barrel, for you can dump your quantity right into your tank of water and go to spraying. They are in the form of a clear amber liquid with no sediment. The home made keeps an extra hand all the time watching the "pot" while the prepared would do away with the mixer entirely. Then again it is such an easily prepared and convenient spray to use on things planted around the house and garden. All you have to do is to put about a pint of this prepared liquid into a 3-gallon knapsack or Auto Pop sprayer filled with water and go to work. We have a very choice grape—name unknown—but suppose it must be one of Rogers' Hybrids as we bought quite a lot by number years ago. It was almost impossible to get it through any season without losing its foliage followed, of course, by the fruit. But this spray just carried it through in perfection.

#### Some Interesting Conclusions.

The same thing with the roses and strawberries; it does not leave a spotted leaf. Also found it fine for rust or blight on celery. In fact it was an ideal spray on everything in the garden line, but it couldn't get away with the old fashioned blister potato bugs. There was one thing about it, though; don't know whether it was owing to the season or the spray; you couldn't go over ten days or two weeks without spraying. Now if this spray will kill San Jose and other scale by contact, how strong will it have to be to kill the codling moth and other insect eggs; and will a tree in full foliage stand it at that strength? This is a question that I should think could be worked out this winter in the la-

boratory by some enterprising student. Another dream; even if we cannot make the spray strong enough to kill the eggs, if we could gauge the main hatch and time one of our sprayings accordingly we would make some of those little insects think that a small chunk of "hereafter" had struck them sure.

Now, while these prepared sprays have not proved much of a success, this season, where is there one that has? Old and tried sprays that we thought we knew all about, have gone back on us. Even arsenate of lead, if we had been trying it for the first time, we would have pronounced a failure. This has been a very peculiar season, the like of which we have never experienced before. There was so much damaged foliage, and it was so susceptible to everything that touched it, that no matter what spray you used, or how much reduced, there would be some injury. There is nothing that we are sure of or can verify this season, so the only thing we can do, is, in the vernacular of the race track, when under certain conditions they declare "all bets off," to declare all sprays off.

H. E. ALDRICH, Neoga, Ill.

### FLORICULTURAL EDUCATION AT AMHERST, MASS.

The short course in floriculture at Massachusetts Agriculture College promises to be a great success. Already applications have been accepted to about the capacity of the teaching equipment. It has been decided, however, to accept twenty for this course, instead of fifteen as originally planned. It is regretted that the new instruction building and the greenhouses will not be finished before Feb. 15th, or all who desired the course would be accommodated. The practical men are giving the course their most hearty support and the talks by experts promise to be especially valuable. The following have consented to assist in this course: W. H. Elliott, Brighton, Mass., "Rose Growing as a Business"; Eber Holmes, Montrose, "Roses"; M. A. Patten, Tewksbury, Peter Fisher, Ellis, "Carnations"; E. O. Orpet, South Lancaster, "Orchids"; William Sim, Cliftondale, "Sweet Pea Culture Under Glass"; Wm. J. Stewart, Boston, "Wholesale Marketing"; George Sinclair, Holyoke, "Chrysanthemums"; E. J. Canning, Northampton, Mass., "The Work of the Private Gardener." It is expected that Mr. Sykes of Lord & Burnham Co. will speak on "Greenhouse Design and Construction"; also Mr. Andrew Rider of the same firm on "Greenhouse Heating." Several other experts in various lines hope to assist but definite arrangements have not yet been made. In addition to these talks the daily lectures and laboratory exercises in floriculture, soils, fertilizers, insects, and diseases promise to make a busy ten weeks. Professor White is planning Saturday morning observation trips to various greenhouse establishments. These will include the commercial ranges of Field, Northampton; Beach, South Hadley; Sinclair, Holyoke; Beals and others, Springfield, Pierson, Cromwell, Conn., and many more, and to the conservatories at Smith College, and Mt. Holyoke College.

This year's farm crops in America are worth Eight Thousand Million Dollars.  
Leave us alone and BUSINESS WILL BOOM.

## READ THIS

# GIGANTEUM FOR 1909

Giganteum is today the best commercial lily produced in quantities for florist's use. Any grower should be able to force them for Easter. Retarded bulbs can be forced in from 12 to 16 weeks. Good Gigs can always be depended upon.

Inferior bulbs are planted near the top of the soil, so they will round out and grow to the required size quicker and bring quicker returns. Superior bulbs are planted deep down in the soil, requiring more cultivation, making them stronger before they grow to size, and consequently cost more to produce.

Your experience tells you to buy the best, because the cheapest often cost the most. Remember "He who gives something for nothing, expects something for nothing in return." Always buy the best and you will generally get it.

Our bulbs come direct from the plantations owned and controlled by Mr. Seitaro Arai, the largest grower and exporter of high class bulbs for florists' use in Japan. You may write him direct if you wish, or write us for prices, stating quantities you can use. You incur no obligation whatever in writing us. **Jobbers and growers supplied only.** Cases may be stencilled to order. Strictly wholesale.

## Obituary

### Charles Baltet.

Charles Baltet is dead! These words will be repeated the wide world round wherever horticulture is known, and repeated with regret. The great French pomologist, whom it has been our privilege to know and to be associated with officially, is no more, and we can scarcely realize the fact. Three years have elapsed since we last met him, when as members of the "Jury Supérieur" at the Paris International Horticultural Show we with several other old friends assisted in awarding the prizes.

Charles Baltet was a wonderful old man. As a pomologist he was probably without an equal, as a writer one of the most prolific, for his works would fill a small library, by themselves. He was descended from a race of French gardeners and was born at Troyes in the department of the Aube, where he lived all his life and carried on the business of a nurseryman. His erudition, aided by a facile pen, enabled him to give to the world at large the benefit of his great knowledge in a series of works the very enumeration of which is scarcely practicable in the limited scope of an obituary notice. Taking the entries under his name in the catalogue of the National Horticultural Society of France we find thirty-nine, and since the date when that catalogue appeared this grand old man of French horticulture has still been busy and added to the list. His name is written large in the annals of horticulture, and so long as men and women interest themselves in the art of gardening Charles Baltet's name will live.

He was a generous supporter of everything relating to his profession. He was a member of many important societies and institutions, a frequent contributor to the horticultural press and a good citizen who was held in high esteem by his townsmen. But his fame spread far beyond the town

of Troyes. Some of his books were translated into other tongues and as a reward for his labors he was the recipient of many decorations from various governments besides his own.

He was buried on the 27th November in his native town, full of years and full of honors, for as Officer of the Legion of Honor, he was accorded a military funeral and was followed to his last resting place by all the notabilities of Troyes and many others desirous of paying the last mark of respect to the great French pomologist.

Among the funeral orations we understand that M. Abel Chatenay and M. Nombrot from the Paris Society were called upon to speak in testimony of the departed one. C. H. P.

### F. M. Strong.

Frank M. Strong, born in Tioga County, N. Y., April 28, 1880, died in Grand Rapids, Mich., Dec. 13. Mr. Strong has been identified with the flower and vegetable growing business of Grand Rapids for the past twenty-five years. He founded the Grand Rapids Floral Co., and at the time of his death was president of the Grand Rapids Greenhouse Co. A widow, one son, a brother and a sister survive him.

### Hugh Mehorter.

Dec. 16th, 1908, Hugh L. Mehorter, a prominent associate member of the Florists' Club of Philadelphia, passed away, and was buried at Mount Moriah cemetery on the 19th inst. Mr. Mehorter was in his 35th year, and a shining light in the comptroller's department of the Penn. R. R. Co. He was of a very sociable disposition, and much beloved of his friends in the Florists' Club and many other organizations.

### Isabella Lilley.

Dec. 17th, 1908, at her late residence, 2243 North 10th street, Philadelphia, Mrs. Isabella Lilley, widow of Hugh Lilley. Interment took place at Cedar Hill cemetery on the 21st inst. Mr. Samuel Lilley, of Lilley & Upton,

commission florists of Philadelphia, is a son of the deceased, and the sympathy of the trade is extended to him in his bereavement.

### George Kahles.

George Kahles, a native of Brooklyn, N. Y., died on Dec. 9 at the age of 38. Mr. Kahles was formerly an employee of James Dean, but has been in business for himself many years. It is understood that his wife will continue the business.

### E. D. Spaulding.

E. D. Spaulding who started in the florist business in Jamestown, N. Y., over forty years ago, died at his home in that town on Dec. 15. He retired from business about ten years ago.

## NEWS NOTES.

Syracuse, N. Y.—The will of the late Louis E. Marquisee was admitted to probate on Dec. 5th. The value of the estate could not be given, as Mr. Marquisee was a beneficiary under the wills of his three half-brothers, whose estates are in course of settlement. Owing to the continued ill-health of Mrs. Marquisee, she feels compelled to give up the idea of continuing the business and has disposed of the ground on which the greenhouses stand; they will not be removed until July, which will give ample time to disseminate the new white carnation Marchioness, and dispose of the bedding stock.

Colorado will put into effect on Jan. 1, 1909, the new law to prevent the spread of injurious insects and plant diseases. Prof. C. P. Gillette becomes State Entomologist. All nurseries will be required to maintain a structure for fumigation of nursery stock with hydrocyanic acid gas; every package must bear a certificate of fumigation; a list of nurseries whose stock can be sold without further disinfection will be furnished; and a fine is fixed for violation of the law.

# New Rose **White Killarney**

Come and see White Killarney growing at our Scarborough houses, and you will say at once, as every one does who has seen it, it is

## The Best White Rose

they have ever seen. You need it if you want to be up to the times, and it will pay you better than any other white rose that you can plant. You will regret it if you do not plant it this year, and you will not regret it if you do.

Big lots are being booked. Get your order in early. Send us order at once, while you think of it. Get early stock. It will not cost you any more to order to-day, while you think of it, than it will two months from now. Be the early bird that catches the worm.

Strong young plants, 2 $\frac{1}{4}$ -inch pots, own-root, ready for delivery beginning February 15th, 1909, \$30.00 per 100; 250 for \$70.00; 500 for \$125.00; 1000 for \$250.00. Grafted plants, ready for delivery beginning March 1st, 1909, \$5.00 per 100 additional.

## MY MARYLAND

This new rose, which was introduced last season in a limited way, has proved to be one of the best roses ever introduced. Every one is enthusiastic in regard to its merits, and it will be planted very largely by the largest, most progressive and most up-to-date growers, who have already placed large orders for it.

It is a strong, healthy, and vigorous grower, producing long stems and long pointed buds, exquisitely fragrant. The color is a soft salmon-pink. This is a rose that we can recommend in the highest terms, as we are sure it will prove very, very satisfactory. It is a welcome addition to our limited list of really first-class varieties for indoor culture; and it is not only a fine midwinter rose, but is also unusually good during the summer months.

Strong plants, 2 $\frac{1}{4}$ -inch pots, own-roots, \$10.00 per 100, \$90.00 per 1000.

Grafted plants, \$20.00 per 100, \$150.00 per 1,000.

**F. R. PIERSON, Tarrytown-on-Hudson, NEW YORK.**

### PHILADELPHIA PERSONAL AND BUSINESS NOTES.

Mayor-elect Philip Breitmeyer of Detroit has been a visitor here since Saturday last, at the bedside of his wife's father and mother, both of whom are very ill. The mayor has taken opportunity to extend congratulations on the new dignities and honors which have been showered on one so well beloved since his boyhood's days in this neighborhood.

F. H. Pharesman, successor to Jno. Lees at Bridge street, Frankford, has greatly improved his retail store and reports good business and excellent prospects.

William Didden, Mt. Moriah lane, is a strong believer in the Formosa Easter lily. He has had good success with it the past two years.

August Muller, fern grower, 65th and Elmwood avenue, grows Amerpohli to a limited extent only, finding it not so good, as a commercial variety, as the old Boston and Scotti, especially when large, as it tends to go bad in the centres beyond a certain size.

James Griffin, Frankford, is changing his heating system from steam to hot water.

Fred Ehret, Broad and Fairmount Ave., reports a largely increased business on account of the doubling of his store. Mr. Beattie, late of Graham's, is in charge of the designing and decorating department. A Christmas reveller here is boxed with wreaths, two in a box. These are boxed in the growing districts and carry better all through until they reach the home. The extra cost is only about one cent each.

The question is being asked: Where can the "Revero" rubber hose be seen in Philadelphia? A demonstration of the new method of making this non-kinkable hose would seem to be in order. The Philadelphia branch of the company should get in touch with the Florists' Club. We never heard of "Revero" until HORTICULTURE told us this week.

Samuel J. Irvine, late with Louis Bark, is now occupying a responsible position on the Wanamaker estate at Jenkintown.

Up along, and down along, and all along the store and conservatory at Pennoek Bros., it is red, red, red! Baskets big and little, poinsettias in banks and waves! Cyclamens, azaleas and ericas are in strong force also, but we gasp in red until the background is reached.

It is rumored that a syndicate of Ranstead street wholesalers, headed by Edward Reid, J. McIntyre and W. E. McKissick, are negotiating with Councilman W. C. Smith for the purchase of the City Hall as a wholesale flower market.

Toledo, O.—There has been a remarkable improvement in business and all expect to have the Christmas of their lives and are preparing for it. The Patten Flower Store is lavishly decorated with southern smilax, holly and Christmas bells. The latter are of a new type, consisting of a skeleton of chenille intertwined with holly. S. N. Peck has his store filled with Begonia Gloire de Lorraine and Nephrolepis Amerpohli, both of which are at the height of popularity here.

### PERSONAL.

Rudolph Fischer sailed on the Campana from New York on December 23, on a visit to Germany.

Benjamin F. Lissauer of Hoboken, N. J., was stricken with heart trouble in the street and carried to the hospital on December 12.

Mr. Philip Breitmeyer left Detroit for Philadelphia Saturday evening, owing to the serious illness of his wife's mother, Mrs. Grass.

Hugh L. Cameron, of North Cambridge, Mass., sailed December 19 for Scotland. Mr. Cameron goes to visit his mother, who is 94 years old.

### NEWS NOTES.

Walden, N. Y.—W. P. Kestlo will add a nursery to his present florist business.

Phoenix, Ariz.—W. P. Gibson will engage in the nursery business here at an early date.

Knoxville, Tenn.—The flower store of Mrs. A. H. Daily was slightly damaged by fire last week.

Louisville, Ky.—Henry Lurding has taken charge of St. Stephen's cemetery and will at once repair and stock the greenhouses.

It is reported that Charles Thorley, the florist, has leased the premises at the northwest corner of Fifth avenue and 46th street, New York. The property comprises a four story and basement dwelling house, with a frontage of 25 feet on the avenue and a depth of 100 feet. The lease is for a long term. Mr. Thorley will extensively remodel the premises and use the ground floor for his business.

## TO SAVE THE PHOSPHATES.

Washington (Special).—The first tangible result from this session of the National Conservation Commission has been in favor of the agricultural interests of the country and the action in question is of widespread, national significance.

The report prepared for the Commission by the U. S. Geological Survey on the phosphate consumption and supply of the United States showed such a startling condition of affairs that vigorous steps were immediately taken by the Government, the President ordering the withdrawal from entry of the extensive area of phosphate lands recently discovered in the western states. The Sociological Survey is engaged in the investigation and examination of mineral deposits, but in this instance its work has resulted in the adoption of provisions which are of vital concern to every farm and every farmer in the land. The description of the lands withdrawn, which are situated in Wyoming, Idaho and Utah, was furnished by the Survey as a result of a preliminary examination of the area, and further geologic work will be prosecuted as soon as practicable, in which the lands will be carefully classified and those found to be actually underlain with phosphate will be held, pending action by Congress.

At the present rate of production, it was stated, the known available supply of high grade phosphate rock in the United States will last only about fifty years, and it was pointed out that a large proportion of this is exported for the benefit of foreign farm lands and at the expense of our own. While there is no method of preventing exportation from the eastern phosphate fields, it is believed to be possible to prohibit export of the western phosphates, since they are found largely on Government lands. This western field embraces the largest area of known phosphate beds in the world, and it is unquestioned that it is absolutely necessary to utilize these deposits solely for the benefit of the farms of the United States.

Phosphoric acid, as is of course well known, is one of the three substances which must exist in the soil to insure plant growth. President Van Hise, of the University of Wisconsin, stated that it had been shown as the result of agricultural experiment station work in Wisconsin, Ohio and Illinois, that in 54 years certain cropped soils of those States had been depleted of one-third of their original phosphoric acid—1080 pounds or 20 pounds per acre annually. Applying this rate of exhaustion to the 40,000,000 acres of cropped land in the United States, it would require 12,000,000 tons of phosphate rock annually to merely offset the loss, or as much as the total amount which has been mined from the Florida deposits.

The rapid rate of increase in the domestic use of phosphate taken in connection with the limited supply is a matter sufficiently serious; but the feature which should arouse the greatest concern and call forth the most vigorous protest is the exportation of nearly half the output. From this exportation the United States received practically no benefit, whereas every pound of American phosphate is needed for American farm lands. The

following figures show the steadily increasing production of phosphate rock in the United States:

## PHOSPHATE PRODUCTION IN UNITED STATES.

Year	Tons
1880	510,889
1900	1,431,216
1905	1,947,190
1907	2,265,343

Of the 1907 production, 900,000 tons or about 40 per cent. was exported.

The phosphate rock of South Carolina is nearly exhausted, and the Florida deposits, once popularly considered practically inexhaustible, have reached their maximum production. They will soon begin to decline. Tennessee has comparatively large deposits, but this field alone would at the present rapid rate of increase in production, last only, according to the government geologists, eleven years. There is some phosphate rock in Arkansas; but it is of low grade. The large deposits, therefore, of the Public Land States must furnish the most of the phosphate of the future, and to insure the enrichment of our own soil from our own phosphoric beds some methods must be devised to prevent the profitable business of the exportation.

This, it is believed, can be done only by the Government's retaining title to the public lands underlain with phosphate and providing for their development by leasing under terms which will forbid exportation. The lands have therefore been withdrawn by the Secretary of the Interior, as an emergency measure, and will be reserved pending action by Congress.

H. C. RIZER, Chief Clerk.  
U. S. Geological Survey.

## GREENHOUSES BUILDING OR CONTEMPLATED.

## Seed Trade

### AMERICAN SEED TRADE ASSOCIATION.

#### Tariff and Customs.

The following communication and representative items from tariff schedules are self-explanatory:

New York, December 2, 1908.

Hon. Serebo E. Payne, chairman Ways and Means Committee, House of Representatives, Washington, D. C.

Sir: At a meeting of the committee on tariff and customs of the American Seed Trade Association, an organization which consists of the leading seed growers of the United States, as well as seed dealers, held this day, the following preamble and resolutions were unanimously adopted:

Whereas, The members of this association are satisfied that the present duties on seeds and bulbs afford an adequate measure of protection to the American farmer and deprecate any radical change in the existing rate of duty on seeds and bulbs, and

Whereas, Owing to the methods of production abroad there is great difficulty, if not impossibility, in fixing equitably market values in the country of production because there are no open markets or exchanges where they are dealt in from day to day as is the case with many staple products, and

Whereas, These conditions, which are inseparable from the industry, have in the past led to great difficulty on the part of the appraising officers of the customs, in some cases to great injustice to importers and to serious inequalities in the administration of the tariff, and

Whereas, These undesirable results seem to be inevitable when the duty on seeds and bulbs is assessed on an ad valorem basis, now, therefore, be it

Resolved, That it is the judgment of this association that all dutiable seeds and bulbs should pay duties on a specific basis, and further be it

Resolved, That we strongly recommend to the ways and means committee the following schedule of duties on seeds and bulbs which has been compiled on the basis of average values abroad and with the desire to maintain the equivalents of the existing ad valorem rates, and finally be it

Resolved, That it is the sense of this association that, whatever duties on seeds and bulbs may hereafter be decided upon they should be assessed on a specific and not an ad valorem basis.

Respectfully submitted,

WATSON S. WOODRUFF, Pres.

J. C. VAUGHAN, Chairman, Committee on Tariff and Customs.

The schedules submitted with the foregoing provide specific duties on seeds, etc., as indicated by the following leading items in cents per pound; mushroom spawn, 2; turnip, 2; beet, 3; carrot, 4; cabbage, 6; lettuce, 8; celery, 10; tomato, 20; cauliflower, 100; peas per 60-pound bushel 40; beans per 60-pound bushel, 45.

Seeds of all kinds not specially provided for in this act, 5 cents per pound.

Specific duties on bulbs, bulbous roots or corms which are cultivated for their flowers or foliage, are indicated by the following representative articles, per 1000: Tulips, \$1; gladioli, \$1; narcissi, \$1.50; begonias, \$1.50; gloxinias, \$1.50; lily of the valley, \$1.50; hyacinths, \$2.50; lilies, \$5; peonies, \$10.

Bulbs, bulbous roots, or corms which are cultivated for their flowers or foliage not specially provided for in this act 50 cents per 1000.

The free list is as follows: Anise, canary, caraway, cardamon, coriander, cotton, cummin, fennel, fenugreek, hemp, horehound, mangel-wurzel, mustard, rape, Saint John's bread or bean, sugar-beet, sorghum or sugar-cane for seed, sunflower; bulbs and bulbous roots, not edible and not otherwise provided for; all flower seed, clover and

grass seeds, vetches or tares; all the foregoing not specially provided for in this act.

C. E. KENDEL, Sec'y.

Lord Maule of Panmure is a well-beloved name in the British Empire. The American scion of this house, although without title, has honored the good stock and achieved much distinction in his chosen field of effort—horticulture—particularly in seed growing and distribution. The latest Maule catalogue is a striking illustration of the perennial freshness and genius of the noted Philadelphia establishment. It is unique in its general get-up and a striking departure from conventional lines, especially in the cover portion.

### BULB GROWING IN SANTA CRUZ.

A. Mitting writes interestingly in the Santa Cruz Tribune about the rapidly growing bulb trade of that place. We extract a few notes.

"Experience has proved that it will pay to grow bulbs in Santa Cruz county for the eastern market. Calla bulbs are at present taking the lead, 1,500,000 of this variety having been planted in this vicinity in the last three years. There is a demand for about 1,000,000 of these bulbs each year, and as it takes three years with ordinary cultivation to raise a crop of them, it follows that 1,000,000 need to be planted every year to supply the market. Outside of Egypt, the country around the bays of Monterey and San Francisco is the only region in the world where calla bulbs can be grown successfully; and as the world supply of these plants must be drawn from this territory, there is no fear of the business of growing them being overdone for many years to come. There are about 16,000 buyers in the United States and Canada and many orders are received from China, England, France, Denmark, Holland and other foreign countries.

To grow the finest calla bulbs it is best to plant not over 200,000 bulb-lets to the acre. These bulbs in three years are worth from \$15 to \$20 per 1000 in Santa Cruz.

Until A. Mitting established his company, orders for bulbs which came to Santa Cruz from the east were filled by digging a sufficient number in door yards. Now the business is to some extent systematized, Mr. Mitting controlling about 82 per cent of the trade.

"Freesia bulbs are in large demand, upward of 10,000,000 being called for each year. A considerable number of this variety are now being grown along the seacoast in Southern California, some in the south of France, and a few in Bermuda. Tests have shown that 100,000 of these bulbs planted here in August will increase to 300,000 by the following June, besides producing a quantity of seed. This is the best paying crop in California to-day, as close to 1,600,000 bulbs from 600,000 bulbs planted can be raised on an acre of land, which will provide 1,200,000 to sell nine months after planting."

Mr. Mitting also speaks confidently of the adaptability of local conditions, to the raising of Lillium Harrisii, gladiolus and several species of narcissus. He continues:

"Owing to the lack of experienced men to raise bulbs in Santa Cruz coun-

ty, it will be a number of years before we are in a position to supply the florists' trade in the east. An outlay of several hundred thousand dollars will be required; and small ranch owners are slow to venture into a business they have no knowledge of. As it takes years to understand the wholesale bulb business, we must avail ourselves of the experience of eastern florists in these lines. Although the florists and growers of Santa Cruz can see the large amount of money there is in the bulb business, outside of these few have any conception of the great possibilities in this respect that await development here. Literature setting forth the unsurpassed advantages of soil and climate possessed by Santa Cruz should be sent to the 15,000 florists of the eastern states, most of whom are now ignorant of conditions here. All they hear of California in the east is about Los Angeles and San Francisco—occasionally, perhaps Sacramento and San Jose mentioned, but never a word about Santa Cruz. The trouble is that most people do not realize what a beautiful city we have here, or the great opportunities in floriculture that here exist. Finally, local real estate men should stop telling new comers that the chicken business is the best investment here and advise instead bulb growing."

### A LITTLE WONDER.

We have received a package of testimonials from Agricultural Experiment Stations and widely known growers concerning the Niagara Greenhouse Sprayer, manufactured by the Niagara Sprayer Company, Middleport, N. Y. On the lawn, in the orchard and in the greenhouse this little wonder has quickly won an enviable reputation. It has a concentrated power equal to a 4-horse power engine. It weighs only 35 pounds. Ask them about it.

### NEWS NOTES.

Boise, Idaho.—Johnson & Connor have purchased a large tract of land outside the city on which they intend to erect a range of greenhouses.

Chicago, Ill.—The Carlson Flower Shop, 92 Jackson Boulevard, has suspended business and a sign in the window announces "Closed by the bailiff."

## Of Interest to Retail Florists

### CHICAGO HOLIDAY WINDOW DISPLAYS.

Poinsettias never were better than they are this year. All the flower stores are making good use of them in their window decorations. A. Lange has them arranged in a large arch, using cut poinsettias in vases, some of which are nearly 6 feet high. A basket of orchids is the centre piece. Rowe uses the poinsettias effectively in two columns on either side of the window.

Mangel has one of the most striking windows done entirely in red, with a touch of green. Poinsettias are abundantly used, the jars concealed with mats of corresponding color. Clusters of bells of various sizes hang gracefully about. These bells are imported from France and are finished with a rim of green. They retail from one to three dollars per cluster of six to ten.

Manosus Bros. have their window showily trimmed with red berries and

some very fine chrysanthemums for so late in the season.

Smyth's large window is a study in red and green. It can be seen for blocks away and is one of the most attractive in the city. The centrepiece is a magnificent jar of cut poinsettias 5 ft. high against a background of lattice work in green wreathing. The sides slope away, one into a group of ardisias and the other into araucarias draped with red baby ribbon.

The front centre is filled with berry globes, each tied with red cord and tassel.

There is, as usual, a gorgeous display at Samuelson's, 31st and Michigan. Mr. Samuelson specializes in fine China suitable for the florists' trade. He has both the Dresden (white and gold) and the Bavarian (pure white) ware. A large order placed for the Christmas trade has failed to arrive.

## A CHICAGO FLORAL ESTABLISH- MENT.

Our cover illustration this week shows an interior view of the new establishment of "Schiller, the Florist," which we think is sufficiently conspicuous and suggestive to merit the prominence we give to it as an example of the most up-to-date type of what a retail floral establishment should be. The view given is what meets the gaze of the customer on entering from the street. Looking straight through the large sales room 40 x 50 ft. into the attractively arranged conservatory beyond, the eye takes in at a single glance a space 50 x 150 ft., every inch of which is new and artistic. This new place is at 904-6 W. Madison street, and consists of two stories, the lower one having sales rooms, conservatory, office and workroom, and the upper one a reading room. The large refrigerator extending across one end of the sales room has the entire front of glass and is lighted with electricity, as is also the conservatory, thus presenting a very attractive appearance at night. The entire 50 foot front on West Madison street is in glass, one pane being over 18 ft. long. The conservatory, which is of Möninger construction, has a large arch of rock, a fountain, cement walks and Wittbold benches. Manager George Asmus is justly proud of the establishment and is kept busy showing visitors about.

## CHICAGO RETAIL NOTES.

O. S. Reidenoner's place is known as the Warwick Flower Shop, and is one of the best locations on the South Side.

Frankenfelder has greatly enlarged and improved his place on W. Madison street. He has now a sales room, stock room and conservatories.

Julius Schnapp has given up his store and conservatories at 574 E. 47th street, and the owner will assume the management with the assistance of Miss Elsie Schnapp until he finds a purchaser.

Miss Megchelsson's store on Grand boulevard, one of the prettiest on the South Side, consists of two small front rooms, nicely thrown together, one for plants and the other for cut flowers, an arrangement which has many advantages.

Miss Anna Grace Sawyer, proprietor of the Pansy Flower Shop on West Madison street, is the inventor of a unique contrivance for hanging vases in windows, known as "Merry Window Hangers." Miss Sawyer's partner is a pansy specialist at Forest Park.

## Flower Market Reports.

**BOSTON** Midday, Dec. 24th, the hours of greatest import in the wholesale flower trade already gone, and the unprecedented quiet disturbed but little thus far—all goes to show a light trade as compared with former years. The best features of the demand are American Beauty, Richmond, Killarney and Bridesmaid roses, the latter showing unexpected vitality, carnations in colors, poinsettias and violets, the single violets outstripping the double in demand and price. The worst drag on the market is the white carnations. These are heaped up in hopeless accumulation, and cannot be sold at any price. Other white goods are also neglected, but the carnations are hardest hit, and they are of irreproachable quality. Trade in plants has been very brisk and indications are that only the scrubby and inferior stock will be left over. Greens of all kinds have an enormous sale.

Trade rapidly improved **BUFFALO** as Christmas drew near, but during the previous week was not any too active, with plenty of everything to supply the demand. Carnations were in good supply up to the end of the week and a fairly good cleaning up was had, fancy and red having been most in demand. Fine Harrisii and giganteum lilies are to be had, with demand only normal. Lily of the valley is in heavy supply as well as Roman hyacinths and narcissi. There was a slight dropping off in the violet trade during the past week and little or no advance demand for Christmas. The trade has been busy with Christmas greens and decorations, there being an oversupply on this line, especially holly.

The week preceding **CHICAGO** Christmas week was an unusually quiet one. Stock was plentiful, and much of it was good and such sales as were made were from the best grade of stock. Christmas week opened with a run on Monday and all first-class stock went out promptly. Colored flowers were especially in demand and the supply on red carnations and red roses much less than the demand. Lawson carnations helped to satisfy customers who could not get red. Large long-stemmed red carnations sold as high as twelve cents Monday. Every indication at this writing is for a good holiday trade, and no danger of too much stock, especially in colored flowers.

Business is moving along **DETROIT** nicely. There is an overabundance of flowers on the market owing to very clear and moderate weather. Holly is exceptionally fine this year and a heavy demand prevails. The same may be said of boxwood, ground pine and leucothoe. Wholesale growers of potted plants report being sold out. Wreaths of pine branches, cones and berries find eager buyers.

This market experienced the usual lull of the week before Christmas, the only marked activity being in holly, boxwood, mistletoe and other greens. As the holiday week opens cut flowers for out-of-town

points are in active demand and the wholesale firms are busy shipping. There is plenty of everything as far as can be seen at this writing—with the possible exception of cattleyas, American Beauty roses, gardenias, poinsettias and red carnations.

Prices for cut flowers **TOLEDO** have been better the last week and are still higher this week. Flowers all around have been of much better quality this season with the exception perhaps of chrysanthemums, which seem to have been unfavorably affected by the exceptionally hot and bright weather this fall.

Business during the **TWIN-CITIES** past week was nothing extraordinary; while it might have been worse it could have been much better. The outlook for the holidays is very bright. Good stock and plenty of it is at hand.

Washington is a **WASHINGTON** floral symphony in red and green. Everywhere and in everything the Christmas colors prevail. Outside the florists' stores the sidewalks, so far as the law will permit, are heaped up with Christmas material. There seems to be a good supply of all kinds of flowers outside of roses, which are phenomenally scarce except Beauties which it is hoped will be equal to the demand. Everything red goes; poinsettias seem to lead the day both in plant and cut form. There is an influx of aucubas but, owing to their high price, they do not move so rapidly as cheaper plants. Business is brisk. Retailers report that they have not been busier this early in the season before for years and prices have advanced at least fifty per cent.

## BUSINESS CHANGES.

**Oakland, Cal.**—The Piedmont Floral & Seed Co., has removed to Broadway and 14th St.

**Chicago, Ill.**—Victor Anderson has purchased the business of John Pherson, 25 E. 43rd St.

**San Francisco, Cal.**—Wickstrom's Floral Depot has moved from Eddy street to 810 Van Ness avenue.

**Hinsdale, Mass.**—L. B. Brague has admitted his son into partnership and the business will continue under the name of L. B. Brague & Son.

**Chicago, Ill.**—John Pherson and Alvin Marine have formed a partnership under the name of Pherson & Marine and started in business at 1212 Bryn Mawr avenue.

**St. Louis, Mo.**—H. Lambart of Chicago has bought out the interest of Mr. Sennewald in the firm of Jacquinen & Sennewald, dealers in dried flowers, foliage, etc. and the title of the firm will be Jacquinen & Lambart after Jan. 1.

## A CARICATURE.

The New York World in its issue for Sunday, Dec. 20th, devotes an entire page to an elaborate presentation of the poinsettia as the most popular of all the Christmas floral beauties. A life-size representation, in colors, of a poinsettia adorns the page, but, alas! the artist chose a cheap imitation for his (or her) subject instead of the real thing which might have been easily procured at any florist shop, with the result that foliage such as never grew on a poinsettia is represented, and the stem even shows the folds of the cheap paper with which it was wound!

**EVERYBODY KNOWS** Park, Cemetery and Landscape Gardening cannot be properly done without the aid of an accurate leveling instrument.

Bostrom's Improved Levels, No. 2 at \$15.00 and No. 3 at \$25.00, are conceded by all who **KNOW** to be the only Levels on the market which meet all the requirements, at the price.

Our guarantee is that every Level we sell, and satisfied users in every State in the Union heartily endorse every claim we make.

Shipping weight 12 lbs. Description on request.

## NEW YORK MARKET.

Christmas prices are no longer adjusted in advance in New York. Neither grower nor dealer has any longer the power to place a value on flowers beforehand that can be relied on and buyers no longer submit to elevated values simply because Christmas is a few days off. And this is why, but a few hours before Christmas morning, we are unable to give the Christmas prices on any flowers that are likely to be in special demand. As for the rest—those on which no special demand is looked for, prices remain at the same notch as if no holiday was in sight. Up to the present time there has been practically nothing doing to warrant any advance in rates other than the fact that bright red material is sure to find buyers anyway, and figures have consequently been doubled on red carnations and on some other specialties under the spur of the retailers' desire to appropriate them all in advance and store them away.

Of white material there is a surplus as usual at this time. Christmas greens are a very heavy supply, and the stores are showing wreaths and other made-up goods in great profusion, some of them being beautiful compositions of evergreen foliage, cones and scarlet berries. The plant trade, as far as it concerned the growers, was practically over several days before Christmas, and the responsibility for their further moving was shifted on to the retailers, who, up to the time of this report, have found business rather backward, but are hoping to have a record rush at the last moment.

## WHOLESALE ONLY

### Why My New Curved Iceless Eave is Far Superior to Anything on the Market Today

- 1st. No sash bars incased in iron, thereby eliminating all danger of bars decaying.
- 2nd. Can be used in conjunction with iron frame construction, thereby doing away with that very objectionable feature, "columns."
- 3rd. Roof bars with drip grooves, which act as conductors to carry away the condensation: Result, the driest roof ever used for greenhouse purposes.
- 4th. **THE MOST IMPORTANT OF THEM ALL.** The very small increase in cost over the ordinary style of construction which makes it possible to be used for commercial as well as private purposes.

**William H. Lutton,** Horticultural Architect and Builder  
West Side Ave Station (C.R.R. of N.J.) Jersey City, N.J.

## OUR IRON FRAME HOUSE

There is an argument—a strong argument—in favor of putting money into a house that is not an experimental construction. The THEORY of how long a house will last is a good talking point, but the FACT that our Iron Frame Construction has stood the test—the severest kind of tests—makes it the only SAFE PROPOSITION.

Send for our illustrated circular—Iron Frame Greenhouses for Private Places.

**Hitchings & Company**  
1170 Broadway New York

## On Page 13 of this Book

begins a chapter on "Planning and Locating Your Greenhouse." Gardeners and Superintendents find it of great value to them in deciding many a vexatious point. And there are over sixty other pages besides, filled with additional information and illustrations. We want every gardener and superintendent to have this book. We will send it free if when you write you will give us name of your employer.

**Lord & Burnham Co.**

Main Sales Office: 1133 BROADWAY, N.Y.

BOSTON: 819 Tremont Building. PHILADELPHIA: 1215 Filbert St.

## U-BAR ADAPTABILITY

You know how unattractive, absolutely factory like the usual greenhouse of the ordinary construction is. It isn't the kind of house that will harmonize with the attractive way grounds are being laid out these days.

But the U-Bar construction, because of its graceful lines and extreme lightness of effect makes a greenhouse adaptable to the most exacting requirements. See the illustration.

It is the ideal construction for private estates, parks, public institutions and florists' show rooms.
